Don't feel left out george, you can go to. Here's directions.

Maneuvers Distance Maps

1: Start out going South on DEVON CIR toward DARTMOUTH RD. <0.1 miles Map

2: Turn RIGHT onto DARTMOUTH RD. 0.1 miles Map

3: Turn LEFT onto SPRINGHOUSE RD. 0.7 miles Map

4: Turn SLIGHT RIGHT onto PARKWAY RD. 0.5 miles Map

5: Turn RIGHT onto W TILGHMAN ST. 1.2 miles Map

6: Merge onto I-476 N toward SCRANTON AND NORTH (Portions toll). 37.9
miles Map

7: Take the I-80/PA-940 E exit- exit number 95. 0.6 miles Map

8: Merge onto I-80 W (Portions toll). 441.2 miles Map

9: Merge onto I-280 N via exit number 71/5. 12.9 miles Map

10: Merge onto I-75 N toward DETROIT. 44.2 miles Map

11: Take the M-39/SOUTHFIELD RD exit- exit number 41. 0.3 miles Map

12: Merge onto MI-39 N. 16.1 miles Map

13: MI-39 N becomes SOUTHFIELD RD. 4.8 miles Map

14: Turn RIGHT onto W 14 MILE RD. 1.2 miles Map

15: Turn RIGHT onto WOODWARD AVE/MI-1 S. <0.1 miles Map

16: Make a U-TURN onto WOODWARD AVE/MI-1 N. <0.1 miles Map

17: End at [32860-32898] WOODWARD AVE ROYAL OAK MI Map

Total Est. Time: 8 hours, 48 minutes Total Est. Distance: 562.52 miles

Part Deux
From N3CVJ:
What type accountability is
it you wish to foster upon those who dare say something on usenet with
which you may disagree?

>There is nothing wrong with a healthy

>disagreement. But when you make unfounded
>character assassinations against those you

>disagree with and then run and hide behind

>your cloak of anonymity, that's not the sign of

>a mature person.

If it were a true character assassination and something was injurous or
libelous, and IF you actually believed that bullshit and cared enough to
actually want to do something about it, there are simple channels to
follow and remedy the situation.

>Are you suggesting that there are ways to

>identify someone who takes serious steps to

>hide their identity?

If unfounded character assassinations (libel) was committed, absolutely.

>How? When people hide behind anonymous

>remailers, servers, public WIFI access nodes,

>and NAT routers, how can you find out exactly
>who they are?

Do some homework on the wealth of information out there,,,visit some of
the hacker sites and groups,,,how do you think the launchers of serious
virus' are tracked down? In the fist manner, I was under the impression
you were speaking of this group. Since it is now apparent you are
experiencing problems of this nature somewhere else, I suggest you
consult an attorney. They give free consults. If you need one
specializing in internet related issues in your area, I will be more
than happy to point you in the right direction.

>Or are you saying that we all should just have

>to deal with abusive insulting and libelous

>comments because they are not worth the

>trouble to pursue seriously?

You said that.

>I'm asking if that is how you feel?

If my emotions were to take over, I would simply trn the thing off and walk away. No one is forcing you to partake in what you view as an injurous electronic arena. It is your choice.

>The same "turn it to the left" mentality that

>abusive CBers use to force good people off of

>the CB band?

The very idea that you feel "forced" by another has moved you to the point of wanting to force others to conform to your beliefs,,,nice.

>Decent people should be forced to yield to

>malcontents, rather than fight back?

That is a personal decision and an apparent unresolved issue that plagues you.

>I believe in the example of not saying

>something on a forum, that you wouldn't have

>the cajones to say to someone's face.

Very noble. Many agree with you. Obviously, those like Dogie, do not.

>Doug has personal issues of his own.

...and he fostered his personal issues on this group. Again, I ask of you, how would you he be held accountable for such behavior that you continue to rail against?

>I

>suspect they transcend those of radio

>operation.

>The fact is that being anonymous eliminates

>the small chance that the person you may

>insult might someday show up at your door to

>have you "explain" yourself in person, thereby

>removing that little bit of polite restraint you

>might otherwise have.

I have incredible restraint and am overly polite, even to you in many instances when you began reambling off-topic with insult. I invite anyone who has a problem with me to come forward.

>How does one "come forward" if we don't

>know who you are or where you live?

"We" lends the notion you are aware of someone, other than you, who shares your incredible identity obsessions and problem regarding myself. Care to specify?
Who I am and where I live is personal information, something you claimed you didn't seek.
Many know where I live. I am incredibly easy to find, as Doctor X recently found.

Of course, those who
do, encapsulate the very idea you are railing
against...not identifying themselevs, only it doesn't bother me like it does you. I have an open door policy and will meet anyone from this group for coffee, fishing, or to continue our rec.radio.cb debates.

>Ok, I'm coming to Orlando in October. I might

>make a detour to Tampa. Where do you want

>to meet?

My house. Are you driving? Bring a radio. I'll guide you right to my front door from the interstate.

_
So far, I have met several from
this forum and plan on meeting more. If I didn't fish for the day, and we didn't talk about politics or cb, I am certain you and I would get along just fine on the boat for an afternoon ride talking of nothing but hammie radio.

>Nothing wrong about talking about CB. I love

>the hobby (at least in the old days), and I

>could tell you a few good stories. But in order

>for you to talk authoritatively about hammie

>radio, that would imply that you are a ham

>yourself (or at least should be). You've implied
>similar before. The fact that you won't admit it

>one way or the other probably speaks more

>about your fear of identification, considering

>your admitted behavior on the freeband.

No doubt about it. Using the freeband always runs the risk of being identified.
But you can rest easy realizing that I just may, perhaps, have the best of both worlds and have for years.

>Don't worry, I have a whole website full of past
>antics, and no one has busted me yet. As I've

>said before, I have nothing to hide......

Nevertheless, this is not the law and doesn't apply to the majority.

> Anonymity is the enabler for people to act

>inappropriately, and rudely. Using the excuse

>that privacy overrides acting in a civilized

>manner is weak IMHO.

No one suggested such..but the gist of it, is that American's are afforded the right to act like idiots, even it offends you to no end. Using the excuse that it ought be over-ridden is what is weak.

>So then you assert that an American's right to

>act like an anti-social idiot deserves more

>consideration than other people's right to

>expect civilized behavior in public places?

You said that. You're wandering. You are confusing consideration with rights. There are very many things I can do well within my rights that offend you, in fact, I have no problem offending you with my legal rights merely because you disagree with them and my right to exercise them.

_
>Simply speaking one's opinion (however

>insulting or rude) is still a 1st amendment

>right, and ISP's are reluctant to go down that

>road.

You weren't talking of an opinion, Davie, you spoke of character assassination.

>Character assassination is either based on

>truth, or opinion.

Wrong. Truth is not character assassination.

>If the claims are true then they deserve to be

>brought out. If they are simply opinions, then it
>becomes a process to determine whether

>there was any "real" damage done. Again this

>becomes complicated if people "hide" well.

But easily enforceable via a court of law.

>Having your identity known, at least tempers

>the temptation to act like a retard.

And goes against everything the world of security experts and all isp's tell you. As far as I know, acting like "a retard" is perfectly legal, but if you had your way, anything you deemed 'acting like a retard" would most certainly be illegal.

>Acting rude, inconsiderate, or anti-social, is

>also not illegal, but it's not something a

>civilized person would do in a public forum.

Therein lies the answer to what ails you. Not all people in public forums are civilized.
Nevertheless, these traits you consider uncivilized, exist in these "bad" people you speak of, and unfortunately the word is made up of good AND bad people.

>So then what is your conclusion?

That you have problems following your own claims and posts and have damn near destroyed the thread with your snips and edits.,

>Should good

>people be turned away from public forums

>(Both radio and internet) by the behavior of

>the bad people?

Your words. In fact, you are the only one seeking to do away with what you perceive as "bad" people,,,those that do not conform to your idea of identifying themselves.

>Do good people not have some right to

>protection from the worst of the bad people?

>Isn't this in the best interest of society? Is the

>right of privacy so important that you would

>allow it to supersede keeping public places to

>at least a minimum amount of decorum?

It's not in my hands or yours, no matter how bad you wish you had that type control on usenet.

Sorry Dave, had to run out for awhile. Let us carry on,,,,

Part III
From: N3CVJ
>Why should this newsgroup be treated any

> differently than an in-person venue?

I happen to agree with you on this item, but why should others be forced
or made to conform to our view? They shouldn't.

>Why not?

Because they have the same rights as we do.

> Personal freedom does not (or should not)

>extend to the ruination of other people's

>freedom or right of access.

And usenet does neither, nor does CB.
Your argument makes the point against the Patriot Act quite nicely,
though.

>I would not want to make these activities

>"illegal". If you want to act like a retard, by all

>means, go for it! But we all have the right to

>know who it is that is acting like the retard so

>that they can properly face the repercussions

>that that type of behavior brings.

No,,you don't have the right to know the identity of one just because
you feel he is acting like a retard.

>If the behavior is continual and affects more

>than just one person, then that changes

>things.

Well now, the word "if" and the entrance of injurous posts constitutes
an entirely new concept and has no relation to you claiming you have the
right to know one's identity on usenet merely because you feel he is
"acting like a retard". Nice shuffle, but it non-effective.

But,,keeping with this thought you
put forward, you just described exactly what happened to Dogie.

>As it should be. Everyone who acts in that

>manner should be removed from society

>where they can no longer harm the activities

>of others.

Wrong." Acting like a retard" is not illegal.

>That's what I mean by accountability. If you

>had to "face the music" for acting

>inappropriately, you would eventually adopt an
>incentive to NOT act that way. The quality of

>the forums would increase considerably.

What you feel constitutes "quality" is the opposite of what many others
feel. The loss of personal privacy in this world is never an improvement
in the quality of anything.

>Why? Why should it matter if people know

>who you are? Are you THAT paranoid?

Why is none of your concern. Why I choose to exercise my American
birthrights is none of your concern. Once again, you are owed no
explanation.

_
Shall we take those inquiries one at a time concerning those unanswered
claims you were asked to provide for? You said a cber was busted in your
area awhile back and went through the courts. I politely called you on
it and asked you to provide some of this "credibility" you speak of and
demand of the rest of the usenet world. You became insultive and began
attacking myself and going off-topic without providing anything but
lipservice. You have failed to produce any of this "credibility' you
demand of others, concerning your claim.

>Gee, that's not the way I remember it.

We can post those posts one by one, if the n
eed be. Same with the Phelps. Perhaps it will jog your failing memory.

>I remember making the claim that some I

>knew personally was popped by local cops for

>interference relating to his CB radio. You

>challenged the validity of my claim,

AFTER you refused to cite a credible source, and only after did I
"challenge the validity" of your claim.

>I don't have a credible source. I didn't "find"

>the incident. I was personally involved with it.

Of course you don't and of course you were. There are those who insist
they were abducted by aliens who also have no credible source.

>first by trying to find some sort of difference

>between "a suburb of" and "suburban",

>suggesting that I was lying.

You are lying now. YOU were the one to invoke the word "suburb", not I,
and you invoked it when the heat got to hot and you realized, like said,
the court documents would confirm your story. I note you originally
claimed it happened IN Philthadelphia,

>I never EVER claimed that it happened IN

>philthy. Never. I said that it happened in

>SUBURBAN (Meaning in the suburbs) of

Exactly. And then you invoked Norristown, which is NOT a suburb of
Philthy, NOT on any area maps of Philthy, and pays no bills or taxes to
Philthy, and has no mail go through Philthy. It meets NONE of the
criteria for a suburb of Philthy, ,,in fact, it's nowhere near Philthy..

>Philly. Why I chose that wording instead of just
>saying that it happened in Norristown, should

>be obvious.

It was.

> This is an international forum. Ask someone

>from another geographical area if they're ever

>heard of a relatively small town (such as

>Norristown) and they will most likely not. But

>mention a popular city as a geographical point
>of reference, and it's another story.

This being an international forum doesn't stop you from invoking
domestic (American) law, so you can;t invoke it as a defense for your
beahvior now.

–

 and when I pressed on, you began
the back pedal

>What you call "back pedal" I call "clarification.

>Nothing changed except the precise wording.

and insults, playing games and getting elusive and only then invoking
"suburban" Philly. You provided nothing to this day concerning this
alleged case except more posts full of lipservice and smoke..

>What more do you want?

Umm....perhaps this credibility you always speak of . You hold one who
doesn't respond to your demands for personal information as not credible
on usenet. The rest of the world holds one who makes claims with no
substantiation as not credible.

>I told you all the

>details. I never knew the defendant's last

>name (part of that anonymity aspect of CB)

>only that the name he went by was "Floyd"

>(Which from other people, is his middle name,

>his fist name is Anthony). It happened in

>Norristown Pa (A suburb of philly) in the late

>90's.

>When you failed to find any information

AFTER you claimed it was in Philly,

>I never claimed it was IN philly.

Sure you did,,,here it is again:

>"This happened about 5 years ago IN

>suburban Philadelphia.."

>You will not find any post which claims that.

See above.

>That you feel that suburban philly means the

>same thing as IN philly was your mistake.

Wrong. That you called it that with, once again, nothing to substantiate
it except your belief, does not consititute what makes a suburbia of a
city. Once again, some of those parameters are which defines a suburb of
a city are outlined above and Norristown meets none of them.

–
and AFTER you failed to provide
anything at all concerning this case other than your lipservice.

>I don't need to go through the trouble to pacify

>you.

Now if only you could apply that concept to yourself when demanding
personal information and accountability from others.....

>If you want to go through the trouble to

>request (at your cost) microfiche records,

No need. As far as a court of law would be concerned, I have presented
the burden of proof that your claims were false. I have been "pacified"
over this issue regardless or not of whether you feel that such is your
decision.

>then

>go for it. But because you can't find it on the

>internet, does not mean that it doesn't exist,

The internet is but a single entity and only you assume such.

>nor that I "lied" about it.

>you again inferred that I was lying.

You were, and are.

>Nope. It was the truth. I only wish I had a way

>to prove it to you, so you can feel as foolish as
>you should.

You are the one unable to provide for your claims. That you feel another
should feel foolish for your inability to do so is troubling.

>Even when I told you the exact town,

You never said the exact town and if you did, you NEVER linked it with
the case you claim occurred or in the same thread. Since you claim
otherwise, force feed me some crow, Davie, and show the world where you
told me what town the cber got busted in and went to court. Just another
in that long line of unsubstantiated bullshit,,,,

>You asked for it, you got it: Enjoy your crow....

http://groups.google.com/groups?q=Norristown+Cber+Busted+group:rec.radiocb+author:Dave+aut
hor:Hall&hl=en&lr=&ie=UTF-8&c2coff=1&selm=3E493556.2BA%40worldlynx.net&rnum=1

There it is again,,,,Norristown, a town that has nothing to do with
Philadelphia except in your mind. You will find nothing anywhere
denoting Norristown as even remotely associated as a suburb of Philthy.
The more claims you make, the more you are unable to provide for.

>you were

>unable to find anything, which is not surprising
>considering how poorly the town keeps

>records..

>But what have you actually proven?

That you can't correctly "recall" what occurred in past posts, but we all realized that with your goof on the Phelps that you claimed you owned, then when asked about your Phelps a few years later, replied "What Phelps? I WISH I had a Phelps Stationmaster"...LOL,,THAT was the exact antenna you claimed you owned a few years earler.

>7 or 8 years earlier. An antenna that was a

>part of a repeater system, not my own shack.

Not "a" repeater system,,,YOUR repeater system. You referred to it as "my repeater".

>B. That you were unable to locate any

>information on the subject. (note that this

>doesn't mean that there isn't any)

Your ASSuming ignorance in getting in the way of your sense. I looked for nothing on any "subject". I specifically looked for the case you cited as receiving a citation. It never happened.

>You can't look for something and expect to f

>ind much without key particulars,

>like the defendant's name, which I can't give

>you as I didn't know all of it.

YOU not being able to doesn't mean others are unable. And sure I can, dave,,,I can do just that with the very simple process of elimination. You start with the town and backtrack to the corresponding year or two which you already gave us indirectly,,from there, one eliminates all charges except for discorderly conduct. From there, it's a matter of checking those charged with the offense in the corresponding time frame and walla walla,,,,,,,,,,and that is but one way of many and by far the easiest.

>Not all information is available on the internet.

Exactly, so I have no clue why you continue to assume it is.

>I am telling it as someone who was there who

>knew the party involved. I know what

>happened. If that isn't enough for you, then so

>be it.

Hehe,,it's not me,,it's the law of the land when it comes right down to it,,the burden of proof is always on the claimant. It is not like a scientist yelling "The world is flat. I dare you to disprove me....haha". One doesn't need disprove another's ramblings concerning their own specialty. In such cases, one merely asks them for their proof and watches them fall apart.

>It's true as far as I'm concerned. You made it

>one of your life's goals to disprove it.

Actually, I merely asked you to provide for it and instead of simply saying you are unable (as I have always maintained), like you finally did today, you insuted me with a barrage of off-topic remarks. Your life's goals are much more pertinent than mine here, as you consider bitching on the internet usenet groups a means of contributing to changing that of which you don't like and disagree.

>If you want to believe that I lied, then feel free.
>It doesn't make nay difference to me, or to the

>guy who had to pay a fine because of it

>Defending my position and questioning your

>logic is hardly "attacking" you on a personal

>level.

`

@storefull-3252.bay.webtv.net:
Absolutely disgusting. You can not, no matter how you attempt to present
it, justify his pathetic actions by invoking the actions of others.

>No twist

Yea, Geo...it certainly is. I know you find no problem with his
behavior, otherwise you would not point to others to justify his.

> what is disgusting is no named assholes like

>yourself and the guy in medina etc want to

>justify thier actions and post personal info

>beause Doug said something on a usenet.

What actions may those be? Cite the specific action you accuse me of
justifying, then go ahead and conjure some more bullshit.

>your posting under sock puppets

Deck-the-hall@webtv isn't a sock puppet. Check the headers. Besides,
where did I ever justify posting as such? HAH!

>posting the

>fcc repeater info,

That's a personal problem of yours. Dogie constantly made posts about
people cbers getting popped. When he got busted the FCC made it known
publicly, not I, not Mopar.
Bringing it this group's attention appears to have rattled you for
reasons only you seem to understand or care about..

>Hey, twist don't have to justify you're actions to
>me buddy it speaks for itself and answered

>your own question to me.

Weren't my actions, they were the FCC's, but I understand your need to abdicate blame of the guilty party.

_
" What actions may those be? Cite the specific action you accuse me of justifying, then go ahead and conjure some more bullshit."

>posting about Kathy,

Let's see,,,

>Yes shall we

Dogie ranted for years over a picture I posted of a middle grounds fishing trip. The poor dolt assumed it was my family and began verbally abusing the child in the photo. What is it with Dogie's penchant for abusing children? You certainly didn' have anything to say when he was initiating all the behavior that came back on him full tilt.

>More twisty justifying his actions ...LOL I love

>it

They weren't my actions,,they were the US court of Ohio's. Try to follow.

You just cry and moan.

>That is called rolling with laughter.

At a joke with you as the butt.

>posting

>about his child support shall I name more for

>you twisty

I wasn't the one that brought that to the public, get your story straight. The fact that Dogie commits felony crimes and the fact that it is made public for a REASON really galls you. Once again, I didn't make
his felonious ways known to the public,,,he did that first by breaking the law. Crimes of that nature are public record for a reason. Attacking the messenger is futile.

>More justifying your actions... wooo hoooo

Woo hoo,,,you're welcome. They weren't my actions, they were the courts and the FCC. I have no power over anyone else in this group, well, not intentionally anyways. That you feel the need to attack the messenger (with catcalls LMAO, nonetheless) clearly indicates how far removed from REALITY you really are.

>Thank you

Don't mention it. I've always had the luck of everything I become involved with working out successfully or making another happy.

–

Again, cite the specific act you accuse me of justifying, then be so kind as to cite but a single example of what you misinterpret as me justifying my actions, and to whom.\

>See above post shifty, not so fast

You cited nothing at all. All you did was toss accusational lipservice.

>I cited enough for you to come in and finish it

>off and try to justify why it is ok for you to do

>things and not doug. ... As I said tipsy..

>HYPOCRITE.....

No hypocritical behavior at all. ASk DAVIE HALL,,,,,,when the behavior is true, no damage is done. Your ignorance still has you shooting the messenger for finding this news and bringing it to the group. Go attack the FCC or QRZ or any of the myriad of web sites that listed his offenses or that of the felonious and fraudulent CPA with whom he resides.

>it has been my whole problem with you twsit

>from day one

You've been wrong about this since day one.

>I have been 100% right about you from my

>first post about you, it still holds true to this

>day.

You're still clueless.

>Not hardly, fool

Sure you are,,,and it pains you greatly because you know it. You don't even like yourself. Besides, isult is always the last refuge of the comically incompetent.

–
In fact, you are have been on the outside looking
in on this group for years and that is why not a single day goes by without you making hostile, nasty , insultive posts to this group and it's regulars.

>LOL,

You don't have the intellect to debate these folks so you take the last refuge of the incompetent.......insult.

>I can debate with anyone in this group. but

>when you deal with people who think they

>know it all, lie in almost every post and are

>hypocrites to boot it is a wasted battle in

>debating. I will give you 3 quick examples,

So will I. Yourself, yourself, and yourself.

> 1) you and others tell me my name is george,

>I tell you it is not.

LMAO,,,,,big freakin' deal,.you have posted and called me several incorrect names, too, only I am in control of my emotions and don't give a flying leap what you or anyone else calls me. Work on this issue.

> 2) You and others say I have aol.. I said i

>don't 3) You and others say I post using sock

>puppets... I said i don't, and only 100% post

>via this account. Now I can guarantee my

>answer's to be 100% true without question.

AS Davie said, you can guarantee NOTHING without revealing your positive identity and a manner in which to ascertain it.

> Yet you and your click say otherwise, and to

>top it off no one has had any solid proof other

>than hearsay, speculation, wild guess not one

>fact.

Same with your guarantee.

> So how can you debate people who know

>everything? I rather tell you you are a fucking

>asshole

"snip"

Get in control of your emotions and come on back when you have mastered the act of proper communication.

Agreed.

>It's a shame more people don't follow their

>own advice.

That you consider usenet posts as actions or behavior that need
justified somehow is curiously sad.

>Well, While I totally agree with your well

>written summation above, I can't help but find

>it a bit hypocritical for you to take "george" to

>task for justifying his actions by comparing

>them to the actions of others when you

>yourself have used the exact same tactic.

Whooa! I have never defended my "actions" by invoking another's
lawlessness.

>I have to be careful here, as you have a habit

>of taking things way to literally. I don't mean

>"you" specifically, just CBers in general.

Why not hammies in general? There are several hammies past and present
that have on MANY occasion lambasted his for his rotten posts (and you
consider posts to cosntitute behavior and action) that you continue to
say should be held accountable. I disagree. While he may be a
hypocritical insane fool, he shouldn't be held accountable for merely
offending someone.

>There have been many times when someone

>was making the case of the lawlessness that

>exists on CB, to which you have replied that

>the ham bands are "just as bad" or even "far

>worse", and citing the fact that there are more

>FCC "busts" of licensed hams than of

>unlicensed pirates.

Only when it's the same hammies who redundantly complain in here about cbers behavior but never post word one about the EASILY IDENTIFIED hammie ops in the hammie forums that REQUIRE YOUR IDENTITY in order to post.

>The fact that there are problem on the ham

>band, does not diminish the fact that there are

>at least as many (if not more) problems on

>CB. But that didn't seem to stop you from

>"justifying" the bad behavior of some CBers by
>citing the behavior of some "bad" hams.

So you consider me asking about why you don't confront the bad easily identifiable hammies is taken by you as a means of "justifying" cbers actions..hmmm,,ok,,,,well, that's your right to continue to wrongly believe such. I don't care what anyone does as it's none of my business, or yours unless you suffer direct negative consequences. You demonstrated you feel it your business to know onne's identity if they offend you on usenet. Unfortuantely for you, the manner in which the internet was constructed was done so in a manner that such is not a requirement and only you feel it should be.

>Nor have I ever defended a felon by

>unrealistically calling attention to another who

>may commmit simple rule infractions that are

>not enforced.

Yea,,erhaps not a felon, but you did with Dogie,,. Check your own link,,read it through. I can do it for you if you insist on claiming you never defended Dogie by invoking another's mere POST about their activities. We have Dogie whose actions (Jamming a repeater) were found by the FCC to be illegal and of malicious intent, and we have you citing offtopic remarks and insults concerning myself, justifying Dogie's bust,,,going so far to even say you were certain Keith was going to be investigated for impersonating Dogie and framing him....what a hoot. Give it up, dude,

> Nor have I ever attempted comparing the two

>(the felon vs. the dx talker) or try to draw some
>type analogy between the two.

>You are getting distracted by semantics.

And you're getting buried by your past defense of Dogie and outrageous lobbying of why he could be innocent even thought the FCC listed him as guilty..

>Someone who ignores FCC rules is

>technically a felon,

* You can't even understand CB law, I can;t hope for you to understand what consititutes felonious behavior from civil infractions. Go tell this to Phil Kane. This is like being a little bit pregnant,,you either are or you aren't.

> or would be once caught, processed and

>convicted. But I'm not talking about defending

>the actions of a child molester by using a CB

>rule breaker as justification. I'm talking about

>using Ham radio rule breakers as a

>justification for CB rule breakers.

Well, why the hell not? You invoke the prestige of a license all the time and they are to be held to a higher standard,,they are SUPPOSED to be held to a higher standard. They set the example whether they like it or not,,,,whether their behavior is pro or con, they are the example.

>Those are at least apples to apples examples.

_
You especially, have demanded "justification" of "what gives me the right" to talk dx and "break the law".

>The only reason that I demand "justification" is
>that you convey the attitude that ignoring

>federal radio law, is somehow your God given

>right.

You're lying, Davie, You always falsely attribute this to me when your emotions get the better of you. The mere posting of any freeband or dx activity has you mistakenly and myopically interpreting such as a flaunt. Again,,,you've been wrong since day one.

> That you have rationalized that your rule

>breaking is such small potatoes that it makes

>it "OK" is hardly an excuse.

Those again, are your words, not mine.

>Do you not acknowledge that every citizen

>owes society their pledge to be good citizens

>and to abide by the established rules, even if

>we might have a personal problem with one or
>two of them?

Hell no. When a society begins to stop questioning certain authority, the wrongs in the system will never be corrected. To lay down and accept the poor and ignorant mindset that ALL laws are good laws and as such must be followed without deviation is to invite corruption and abuse. This is absoutley necessary in a free society in order for bad laws to be done away with and innocent people be freed.

>For the record, I agree with you that

>freebanding is small potatoes. The problem I

>have is the slippery slope theory. Once you

>start justifying the ignoring of small rules, it

>becomes easier and easier to come up with

>justifications for ignoring larger ones.

That theory has been debunked. The pathetic conservatives tried saying that with their LAST waged war on an intangibles,,,,the lost war on drugs. They claimed pot was a "gateway" drug leading to harder drugs in order to justify their own failed policies. Nevermind alcohol and tobacco would be the true "gateway" drugs, IF they exist, but alas, they don't.

>Until one is finally caught and made to pay the
>price, this slippery slope will continue.

Mmmmm,,thank God,,,,know what that smell is? It's freedom, Dave,,,and it;s like a breath of fresh air to the rest of us,,,,too bad it's like a rancor cancer to you.

>I feel that society has slipped quite a bit

>already in the last 30 years. I'd like to see the

>trend reversed. That won't happen if people

>have little to no respect for rules, or feel that

>they will only obey the ones they feel they

>have a good chance of getting caught

>breaking.

>Talking DX on 11 meters is illegal under the

>current rules. So by all standards of definition,

>a person guilty of doing it, is committing a

>crime.

Here you go again, off and running blindly incorrect, but happily, nonetheless. A civil infraction is not the same as a criminal infraction. Please, consult Phil Kane or another attorney who can enlighten you on so much communication law of which you are not aware.

>Granted it's not on the same level as robbery,

>murder or rape, but it's still a citable offense,

>should the FCC ever decide that it's important

>enough to enforce.

But not a criminal offense.

>How many times have Aaron, Frank, Leland,

>myself or anyone else spelled out the

>behavioral problems on CB radio, and your

>response was along the lines of "well, the

>hammie bands are full of bad eggs too, so

>why pick on CBers".

None. I have always maintained time and time again you are status-starved and have no authority concerning people's behavior on CB.

>Please don't make me bring up the posts that

>prove it. I quite frankly don't have the time, but
>rest assured they are there. You have on

>several occasions, when confronted by

>someone with a complaint of CBers behavior,

>responded that hams have rule breakers too,

See discussion above on this. Nevertheless, I find it entertaining you invoke the mythical voob as soon as you talked out the other side of your mouth concerning no credibility of those who do not reveal themself to you personally on usenet.

>as if that somehow justifies the rule breakers

>on CB. Two wrongs don't make a right.

Your words.

>That is what I was referring to when I

>suggested that you were being a bit

>hypocritical.

Would be fine, only I never said it. See above discussion for
clarification.

You guys argue worse than a gagle of women at a friggin' state fair
bake-off!!! I think we oughta just rent a damn convention center in a
neutral territory and have a friggin' cage match to end it all:-)
Ah, I must admit tho.....reading the bickering going on in here reminds
me
of days gone by.....Nah, strike that. Make it YEARS gone-by....like
when I was 8!!!!
I still enjoy it tho...between insults/threats/policehams on
rec.radio.cb/people with multiple personalities/people who need your
social security number to verify authenication before having a
conversation, there's some good stuff about CB/radio/electronics:-)
Special thanks goes to Dr DX and Twistedhed for actually CONFIRMING they
"use" a CB.
LOL!!!
Don

_
Hehheh,,,,there's some great folks among these internet parts...

Frank is on the warpath again and off and lying. Never have I threatened anyone. Snipping text and isolating it from its original context always changes the meaning of something. As one can see, my words racked Frank's psyche over the years and damaged his self-esteem to the point of him carrying me in all his posts. All one needs to know of Frank is summed up neatly in his forced extraction: "I have admitted lying in this newsgroup, and on more than one occasion."

> impededance bumps don't exist, something which I never said or even
> implied.

It was a comment you made in a posted reply to Lancer. I have never said "they don't work at UHF", those are your words not mine. They are NOT RECOMMENDED for use at UHF because of the impedance bump they cause in the transmission line. The higher the frequency the worse the problem gets. The only connector that looks like the UHF is the "Mini-UHF" which IS a constant impedance connector. In fact Amphenol states they should be good up to 2.5 GHz.

Link for spec's for UHF connectors, pay attention to the impedance and recommended frequency application range.

http://www.amphenolrf.com/products/uhf.asp

Now compare that with the spec's for the "Mini-UHF" connector.

http://www.amphenolrf.com/products/miniuhf.asp

Then for comparative purposes with the "N" connector.

http://www.amphenolrf.com/products/typen.asp

Amphenol would not be manufacturing the last two connectors if the UHF connector was as good as you implied. For those who think a quick and simple SWR test proves the suitability of the connectors should read the link below which does a good job explaining how a so-called SWR reading, or using forward and reflected power reading, can lead you down the garden path if the test isn't done right.

So you were lying to Frank when you posted this Aug 1?

I did just for grins and giggles Frank. On my old 1/4 wave 6m mag mount, I used on my old Dodge minivan, I measured 490pf. The base was 4.75 inches in diameter. The base was placed on a steel sheet using 3 sheets of notebook paper. Notebook paper is around 0.003 inches thick, so that gives me the 0.010 inch spacing. Plus this mount also used a thin sheet of rubber over the foil making the spacing a bit higher, thus you would expect the capacitance to be down a bit from the calculated value. So the value I measured is about what I expected. It is important that the foil be intact on the bottom. If missing then the measured value will be much lower.

Liar? I'll tell you what, if I'm driving a "van", then you can throw a rock
at it, other wise I get to chuck one at your car at the cruise. Oh you can
tell it's my ride cuz it has a call sign license plate on it that reads
"KC8LDO". Care to take me up on the offer chicken?

It's party time on the strip. The cops had to shut it down at 10:00 PM the
other night. The Northwood shopping mall parking lot is jammed with cars.
Lots to see and do.

see Leland that is the difference between you and this steveo
character. you are out in the open with nothing to hide and dont care
if anyone knows your name and where you live and your callsign. steve
- if that is even his real name - is a coward and a chicken who hides
and takes pictures he is so afraid you will discover his identity lol

This radio is in good looking and working condition.
Am LSB USB AND EXTRA CHANNELS
It has a 10 turn clariifier ajustable power and a frequency counter and
built in digital clock.
Comes with 2 speakers and a brand new power echo mic.
You can shut off the echo.
$275 + shipping to the lower 48 states.
E-mail for picture of the radio.

Bet you $1000 steve goes to woodward, hides and take pictures of leland for a while, then has to get drunk to get the courage to walk up to him and say

steve: hi i'm moparholic
leland: if you say so
steve: so call me chicken to my face
leland: ok your a chicken
steve: I'll give you another chance, call me peepeeholic to my face
leland: ok, your peepeeholic
steve: I could hurt you.
leland: I doubt it
steve: well uh well uh well uh
leland: your wasting my time asshole. goodbye

Then steve will come back in the newsgroup and lie and say that leland backed down etc. $1000 says this is how it goes down lol

>
>
Hello,
I think I can help a bit.
I have a schematic available online at:
http://rogerbird.tripod.com/diagrams/
(its an unlinked page on my site - Shhh)
Ic 6 is the 8v regulator you are talking about.
One of the common causes of regulator problems in the HR series radios
is the fact that many of the Electrolytics are only 10v. These have been
known to cause issues on the 8V supply line and in the audio sections.
You may want to hit a couple with some freeze spray or just see if they
are getting hot.
Check C52 & C33 (47uf 10v) C60(470uf 10v).
In the audio Ckt C95 (470uf 10v) and C97 (47uf 10v).
I usually replace these with the same value just Higher voltage (16 to
25v) caps. There are others that can cause problems, but with your
issue I would start there.

Also I would check the Bias diodes on the driver and final. They could
cause the problem you are having. (d77 and D78 - MV1YHS).

I hope this helps,

Rogerbird

I'm not doing that either, I've tried four times to set
up a meeting place and time with nad..he won't respond.

He'll be in hiding this weekend, guaranteed.

Because this is the CB forum. What hams do on their own turf is their
business. And once again, two wrongs do not make a right. Bad hams do
not justify bad CBers.

>>The fact that there are problem on the ham

>believe such.

Again, this is the CB forum. I am here, not as a ham, but as a CBer. I
am addressing CB issues here. If I want to get involved with the
failings of ham radio, I will do so on the appropriate ham radio
forum.

> I don't care what anyone does as it's none of my business,

>requirement and only you feel it should be.

This will change in the not-so-distant future. There are too many idiots running around on the internet with no accountability, and many people are slowly getting fed up with it. New protocols will eventually be put in place which will limit the means by which people can remain anonymous. Sort of like a "caller-ID" for the internet.

>>Nor have I ever defended a felon by

>investigated for impersonating Dogie and framing him....what a hoot.
>Give it up, dude,

I never made any claim of the sort. I know nothing about Keith. You have me confused with one of your other objects of affection. Doug will answer for his own issues. The closest thing to a "defense" of Doug that I ever offered was that I agreed with his view with respect to law breaker on CB. But I have never condoned his methods. I also offered up the possibility that Doug may have been framed by those who seek to damage him. It was a distinct possibility. But I have no knowledge either way.

>>ï¿½Nor have I ever attempted comparing the two

>guilty..

By tabling a theory that it was possible he could have been framed? That (to you) is "outrageous lobbying"? What, do you not want to consider all possibilities? Or are you so stuck on your desire to see Doug fall, that you are blind to any alternatives?

>>Someone who ignores FCC rules is
>>technically a felon,

>or not,,,,whether their behavior is pro or con, they are the example.

That works both ways, but you're only going one way. But once again,
this is a CB radio forum. What hams do (good or bad) should have no
bearing on what's right or wrong here.

>Those are at least apples to apples examples.
>_
>You especially, have demanded "justification" of "what gives me the
>right" to talk dx and "break the law".
>
>>The only reason that I demand "justification" is
>>that you convey the attitude that ignoring

>the poor and ignorant mindset that ALL laws are good laws and as such
>must be followed without deviation is to invite corruption and abuse.
>This is absoutley necessary in a free society in order for bad laws to
>be done away with and innocent people be freed.

Yes, but in a civilized free society, the people discuss, and decide
if and when the rules need to be changed or modified. We don't just
arbitrarily ignore those "a-la-carte" rules that we individually don't
agree with. That is a sign of anti-social behavior.

>>For the record, I agree with you that

>
>
>
>That theory has been debunked.

By whom? Where? It's still a very valid psychological theory, which
can be substantiated in a number of cases particularly WRT
adolescents.

> The pathetic conservatives tried saying
>that with their LAST waged war on an intangibles,,,,the lost war on
>drugs. They claimed pot was a "gateway" drug leading to harder drugs in
>order to justify their own failed policies.

That the "war on drugs" may not have gone the way we would have liked,
that does not invalidate the slippery slope theory.

If you take the time to read psychological studies, the vast majority
of kids who are on "hard" drugs started with "small potatoes" drugs
like pot and alcohol. That validates, not "debunks" the slippery slope
theory.

>>Until one is finally caught and made to pay the
>>price, this slippery slope will continue.
>
>
>Mmmmm,,thank God,,,,know what that smell is? It's freedom, Dave,,,and
>it;s like a breath of fresh air to the rest of us,,,,too bad it's like a
>rancor cancer to you.

Freedom is not a license to be anti-social. Nor is demanding
accountability from those who would abuse the right of freedom, an
affront to the concept of freedom itself.

>>I feel that society has slipped quite a bit
>>already in the last 30 years. I'd like to see the
>>trend reversed. That won't happen if people

I snip the fat, as this thread has already grown to the point where it
is no longer comfortable to follow. I snip the oldest parts first.
There is no "game" involved. Brevity is a virtue. One you have yet to
appreciate, it would seem.

>CB IS anonymous, it's going to stay that way, get over the gastric pain
>it causes you.

>>It's everyone's problem unless,
>
>
>No, it's not everyone's problem,,it's YOUR problem. Not everyone sees CB
>as full of malcontents.

I guess in all honesty, it is highly geography dependant. Trust me, in my area, there are a great many malcontents. I apologize to the fine CBers in your area, if they are not of the same (im)moral caliber.

>Some see hammies like yourself as the
>malcontents for feeling you have some sort inalienable right to demand
>cbers jump through the same hoops you must jump through regarding hammie
>radio.

What "hoops" are there to just acting in a civilly responsible manner?

>radical and minority beliefs.

Nothing. I've done it already. But what good will it do? All it does it cause further arguments. You try to tell a nut that he's nuts, and they'll swear you're crazy. Finally I realize that it's no use. Why would I want to change a bunch of complete morons into people I'd want to associate with, if that's even remotely possible? You can't make an idiot into a normal person, so why try? Birds of a feather stick together. My only hope is that a group of decent people will decide to start another channel that I would be happy to participate in. I'm already working on a CB reunion for some of the old crew that I've contacted. This might spawn a "retro net" where we fire up that vintage gear for some old fashioned CB fun.

> After all, that would make you proactive

>face. Try it with the noise toys and on the radio with these
>people,,tell them they are the equivalent of the WWF. Report back.

Been there, done that. How do you rationalize the detrimental effects
of distorted audio, such as that produced by an echo mike, to someone
who has that "kid on Christmas" look on his face at the discovery of
his latest toy (that he probably spend half his fast food paycheck
for)? He doesn't care that it makes his audio hard to understand. He
just thinks it's "cool". Must be something in the water around
here.....

>Yup, it is, but that doesn't shake my faith of always seeing the glass

>people to be good hearted. Must be southern thing (shrug),,if I'm wrong,
>I'm sure a yankee will correct me to say it is you that are wrong and
>that people, even in the north, are generally good people.

That all depends on which circles you run in. I find most hams in my
area to be good people. I find my neighbors to be good people. I can't
say the same for the "seedier" towns, or the trash that populates the
most popular CB channel.

>Not true at all. You subscribe to socialist views and rhetoric,,,this is

>you, you not only embrace socialist beliefs, but go as far as to DEFEND
>those beliefs and offer several reasons WHY you believe that bullshit.

Do you even know what a socialist is? Do you still think (like you
once posted) that a liberal and a libertarian are the same thing?

Please provide any exchanges that I have authored where I defended the concepts of socialism. I believe in limited government. I believe in personal responsibility (and accountability). I believe that government should not restrict access and actions, but should prosecute those who abuse their rights.

>That is so far off track it's really funny.
>

>I'll make this very simple. Bush swore with his hand upon the Bible that
>he would uphold and protect the constitution. Immediately after taking
>office, he launched an assault upon it. His reasons for doing so are
>irrelevant, as are yours.

He did nothing to the Constitution. He merely granted the same powers currently afforded to law enforcement, to those involved with the fight against terrorism. Have you read the entire Patriot act? I have, and I find nothing in it that isn't necessary if we want to improve our chances against those who take advantage of our lax security to do us harm.

_
>The majority of
>American's (THANK GOD) do not subscribe to your bullshit about allowing
>the authorities and anyone else an open book to your life "if you don't
>have anything to hide".

You have no way of knowing what the majority of Americans, CBers, Hams or anyone else thinks or wants. Unless of course, you're omnipotent. You only know what YOU want and the small circle of people you associate want.

>>As I stated before, I am a big supporter of the
>>concept of freedom.

>Except when it comes to others exercising THEIR freedoms that you think
>should be curbed,,such as the right to anonymity on the internet, just
>for starters.

There is no good reason why someone needs to hide. You can't give me a good reason why someone deserves the right to be able to hide from others. Especially when that right threatens the rights of other people to the expectation of civil discourse.

When that right conflicts with the right to expect civility and accountability in public places then I favor civility and accountability.

>>But with the RIGHT of freedom, comes the
>>RESPONSIBILITY to follow the rules of
>>civilized society. It's not a free ride.

>Ride? What is this ride you speak of? You have rambled from speaking of
>anonymity on the net, (one's right) and your problems with it saying one
>shouldn;t have that right, and once again linked CB to society and
>presented your problems with all three in discombobulated fashion. You
>still need that vacation, Dave.

I'm sorry you cannot put the pieces together to form the big picture. All rights come with corresponding responsibilities. You can't hide behind a right, without being expected to be responsible enough to not abuse it. That's what I mean by "no free ride".

>>If a significant percentage of the population
>>fails to recognize their responsibility as a
>>member of this civilized society, then their
>>rights should be proportionally removed as
>>well.
>
>
>
>
>3% of the population of the US HAVE been "proportionally removed" due to
>poorly constructed laws that created non-violent criminals. We have more
>incarcerations than any other country on Earth. Keeping with your
>radical and oppressive beliefs, we must have the worst, evil, people to
>be found on the planet, eh?

Maybe we do. When we allow people the option to abuse the system, is it any wonder that there will be a percentage of people who do? Criminals have reneged on their responsibilities and therefore had their rights suspended. That is as it should be.

>> If people choose to hide behind the freedom
>>and "right" of privacy in order to commit crimes
>>or subvert the moral framework of society,
>>then I am in favor of plugging those loopholes
>>in our Constitution which allows this type of
>>malcontented behavior to proliferate.
>
>
>

>
>Again, Thank God the majority do not share your belief.

Prove to me that this is a true statement.

> Free society is
>not perfect and those "loopholes" will always be there in order to make
>a free society work. Plugging what you wrongly refer to as "loopholes"
>in the US Constitution does nothing but take away rights of ALL
>Americans, whether they choose to exercise those rights or not. Just
>because you choose not to, you damn sure don't have the right to tell
>others that they should not be able to exercise same and as it stands
>now, such is the law.

As long as people use these loopholes against society, our nation is
diminished in quality of life.

>
>>People who live honest, righteous lives have
>>nothing to worry about, as nothing will change.
>
>
>Bullshit. Over 50 people have been exonerated by DNA this year alone for

>are myopically not aware and it is apparent that you feel these innocent
>victims who lose their lives and families are just the acceptable kill
>and error ratio.

You are talking about apples and oranges. We were talking about the
right to anonymity and how that right can disrupt a civil discourse.
Now you are trying to link this to abuses and mistakes in the criminal
justice system. They do not equate. If people are truly innocent they
do not deserve to be incarcerated. But if they are guilty, they
deserve their punishment. But the biggest question I have is how do
these incidents relate to the right of anonymity?

>>Not at all. If you are attempting to pass
>>yourself and your opinions off in a serious

>start somewhere" to clean up radio to the point you wish it.
>

CB radio is full of "CB science" myths, which claim fantastic
improvements in performance. I am one of a few on here who will throw
cold water on these myths and debunk them with proven R.F. practices
when I can. This benefits anyone who might have been contemplating
spending a good chunk of cash on something that WILL disappoint them.
I've had 30 years of experience, and I know generally what works and
what doesn't.

>>So now it's your turn:

>>face value, without even the hint that it might
>>be "bad" advice? What accountability is there
>>if someone takes someone's "bad" advice and
>>in the process ruins a once perfectly good
>>radio?
>
>
>
>No accountabilty, which is why the internet and isps and usenet have
>discalimers you agree to prior to being able to access such information.
>You are really wound tighter than a slinky, Dave. You tend to forget,
>deliberate, bad information has been posted here by a certain hammie
>scumbag, that gave directions on how to ruin a radio,,,, disguised as a
>mod. Sorry you feel what you find on usenet and the internet is so
>credible. No wonder you are voting for Bush, as only the gullible are
>doing so.

So now you are proposing that all information found on the internet is
suspect? Then what GOOD is it, if you can't trust what you read? All
the more reason for a greater accountability. Thank you again for
making yet another point for me.

>
>>People identify on ham radio for a reason.

>Yea,,,,,,it's the law.
>
>>Hmmm.... The law states that it's illegal to talk
>>on the freeband, yet it doesn't stop you.
>
>
>Freebanding has nothing to do with hammies identifying "on ham radio for
>a reason".

But we are talking about the law. Why is it a given that hams follow
the law with respect to ID'ing, yet it's ok to ignore the law WRT
freebanding?

>Try and remain on your invoked topic.

I am, it's not my fault you don't see the relationship.

>Wrong. One is NOT required to identify on CB.
>
>

>>No, they are not required to. But the fact that
>>many go out of their way to conceal who they
>>are, imply a certain suspicious motive.
>
>
>Heheh,,,,of course they do, that is what one is supposed to do on
>cb,,,conceal their personal identity. You really don't know much about
>anything CB related.

Why would concealing one's identity on CB be any more important than someone doing so on the ham band? Isn't privacy important there? Once again, the anonymous appeal of CB implies a potentially sinister motive.

>
>>I have nothing to hide. One might wonder
>>about you though. What dark secret prevents
>>you from revealing who you are?
>
>
>
>Oh, I have no problem revealing who I am...in person. What great fear
>stops you from completing your mission concerning my personal
>information?

What "mission" is that? You are confusing me with Frank. I'm not the one who's looking for information on you. I just wonder why you hide behind a cloak of anonymity.

> If you wanted to know that bad, you would come down and
>meet me like others have..unless, of course, you have some dark secret
>fear, preventing you from doing so, and you would rather whine and cry
>here about something so bloody off-topic that only you are consumed with
>it. In that way, there is no danger of you having to live up to your
>word and saying things in person instead of on usenet that are offtopic,
>such as personal information.

Like I posted before, I'll be in Orlando in October. When and where do you want to meet?

>>Do you LIKE what this forum has become?
>ï¿½ï¿½
>
>
>I do.

So you like the barrage of "homo" spam, the bickering, the name calling, the cessation of most of the technical discussions? The rude, confrontational demeanor expressed by many of the participants?

> I have met many good folks, I have daily emails with regs, I have
>anything in the manner of radio, cb, hammie equipment I could possibly
>want, and I owe much of it to this group. tyvm.

Who have you met personally? I'd like to see them come forward and
confirm it.

>
>>I have NEVER asked for specific personal
>
>>details.
>
>
>
>Sure you have. You have inquired as to my work on past occasion, what
>town I live in, my name, my call sign,,,why, in fact, you have overly
>concerned yourslef with my identity for years and you;re still doing
>it.

I only inquired about your occupation when you made claims of being a
"professional writer" one time, and then in the "information gathering
business" (ironic occupation for someone who claims to relish privacy)
on another occasion, and then a charter boat captain yet again. There
are some inconsistencies which indicate deception.

>.look at the lenght of this thread,

Yet you lambast me for trying to clean it up and reduce the overall
length.

>,,all because you are still
>experiencing growing pains because the law regarding internet use is not
>the way you wish it. Another example of what you want and not the way
>the realism exists.

No, I'm just seeking a civil discussion with you to discover why you
hold such subversive views, and why it is so important to you that you
be allowed to hide behind a cloak of anonymity. I am keeping my tone
civil although I've noticed you starting to become personally
insulting. When you cross that line, I'm finished.

>> However, a person's name, and their

>>CBers, then that person needs to held
>>accountable for that. Thank you for making my
>>case for me.
>
>
>
>
>No, they DON'T need held accountable for that.

If there is no accountability then there is no means to insure accuracy or civility. That is a bad thing IMHO. It lessens the usefulness of the internet. Without accountability, the internet is little more than a playground for the socially deviate and pornography starved people to slither though and disrupt.

> If you read your user
>agreements when accessig the internet and usenet and all that governs
>such, you would find disclaimers for such info. This is where your
>socialist views and censorship are magnified.

There is nothing socialist about demanding accountability. And demanding accountability is not censorship. Nobody is suggesting that people be prevented from engaging in any activity, only the we all know who it is that's doing it.

> You have maintained in the
>past that, for example, instructions for homemade bombs (just for a
>SINGLE of endless examples) should be censored.

I never said that this information should be censored. Only that those who USE this information should be prosecuted.

> Your argument is weak.

It would be, if it were the truth.

>If the information is out there, you want the person that put the
>information out there to be "held accountable.

Well, the liberals in this country are all about the idea of deflecting responsibility to other (deeper pocket) entities. Holding bar owners responsible for a drunk patron becoming involved in a DUI accident. How would this be any different?

The same way as many other criminals are caught. They brag to their
friends and get turned in. That still doesn't address the basic
technical issue of how people can anonymously post messages and e-mail
using "public" internet access or through clever technical means to
disguise their identity. A simple IP lookup is no guarantee that you
will find the actual user.

>The very idea that you feel "forced" by another has moved you to the
>point of wanting to force others to conform to your beliefs,,,nice.

Not forced to conform to "my" beliefs. Only that they maintain a
certain level of accountability and by extension civility.

>>Decent people should be forced to yield to
>>malcontents, rather than fight back?

>That is a personal decision and an apparent unresolved issue that
>plagues you.

So you posit that decent people should be held hostage to the whims of
these malcontents, and those of us who feel otherwise have "issues"?

>>I believe in the example of not saying
>>something on a forum, that you wouldn't have
>>the cajones to say to someone's face.

>Very noble. Many agree with you. Obviously, those like Dogie, do not.

>>Doug has personal issues of his own.
>
>
>...and he fostered his personal issues on this group. Again, I ask of
>you, how would you he be held accountable for such behavior that you
>continue to rail against?

If you are asking how Doug should be held accountable, first I'd have
to ask; how do we know for sure that the person everyone thinks is
Doug, really is? Once we establish that it is him, then he should have
his access revoked for behaving in an inappropriate manner.

>I have incredible restraint and am overly polite, even to you in many
>instances when you began reambling off-topic with insult. I invite
>anyone who has a problem with me to come forward.
>
>
>>How does one "come forward" if we don't
>>know who you are or where you live?
>
>"We" lends the notion you are aware of someone, other than you, who
>shares your incredible identity obsessions and problem regarding
>myself. Care to specify?

That is paranoia speaking. All that "We" refers to is anyone who
happens to be a member of this group who would like the opportunity to

"come forward". Nothing nefarious about it.

>Who I am and where I live is personal information, something you claimed
>you didn't seek.

I don't need to know, but if you want me to "come forward" I do need
to know some details. I mean Florida is a big state (assuming that is
where you really live)

>Many know where I live. I am incredibly easy to find, as Doctor X
>recently found.

Does Dr. X know where you live? Does anyone? Somehow I doubt it. You
are a little too secretive about this. And you know all too well, that
once one person finds out, it'll only be a matter of time before the
information spreads around.

>Of course, those who
>do, encapsulate the very idea you are railing
>against...not identifying themselevs, only it doesn't bother me like it
>does you. I have an open door policy and will meet anyone from this
>group for coffee, fishing, or to continue our rec.radio.cb debates.
>
>
>>Ok, I'm coming to Orlando in October. I might
>>make a detour to Tampa. Where do you want
>
>>to meet?
>
>
>
>My house. Are you driving? Bring a radio. I'll guide you right to my
>front door from the interstate.

I'm flying, renting a car, no room to pack radios. Doing "Mickey
Mouse" for my kid.

_
>So far, I have met several from
>this forum and plan on meeting more. If I didn't fish for the day, and
>we didn't talk about politics or cb, I am certain you and I would get
>along just fine on the boat for an afternoon ride talking of nothing but
>hammie radio.
>
>>Nothing wrong about talking about CB. I love
>>the hobby (at least in the old days), and I
>>could tell you a few good stories. But in order
>>for you to talk authoritatively about hammie
>>radio, that would imply that you are a ham
>>yourself (or at least should be). You've implied
>>similar before. The fact that you won't admit it
>>one way or the other probably speaks more

>>about your fear of identification, considering
>>your admitted behavior on the freeband.

>No doubt about it. Using the freeband always runs the risk of being
>identified.
>But you can rest easy realizing that I just may, perhaps, have the best
>of both worlds and have for years.

I figured as much. Much like I have, even if you might not see it that
way from your perspective.

>>ï¿½ï¿½Anonymity is the enabler for people to act
>>inappropriately, and rudely. Using the excuse
>>that privacy overrides acting in a civilized
>>manner is weak IMHO.
>
>
>
>No one suggested such..but the gist of it, is that American's are
>afforded the right to act like idiots, even it offends you to no end.
>Using the excuse that it ought be over-ridden is what is weak.
>
>
>>So then you assert that an American's right to
>>act like an anti-social idiot deserves more
>>consideration than other people's right to
>>expect civilized behavior in public places?

>
>You said that. You're wandering. You are confusing consideration with
>rights. There are very many things I can do well within my rights that
>offend you, in fact, I have no problem offending you with my legal
>rights merely because you disagree with them and my right to exercise
>them.

It has everything to do with the core issue. You are attempting to
make value judgements regarding the relative priority of the rights
that people have. You have prioritized the right to privacy (and by
extension enabled the unaccountable actions of malcontents) over the
right of people to expect civilized behavior in public places.
When those rights clash, something has to give. You seem to have made
your choice, even though you keep dancing around it and not quite
ready to directly admit to it.

Ever hear the expression "The right to swing your fist ends just past
my nose"? That's how you have to look at your rights. If the right to
hide behind an anonymous cloak, adversely affects the sanctity of a
public forum, then the right of anonymity needs to be curtailed to a
degree than promotes a workable compromise.

_
>>Simply speaking one's opinion (however

>>insulting or rude) is still a 1st amendment
>>right, and ISP's are reluctant to go down that
>>road.
>
>You weren't talking of an opinion, Davie, you spoke of character
>assassination.
>
>
>>Character assassination is either based on
>
>>truth, or opinion.

>Wrong. Truth is not character assassination.

You might want to ask New Jersey Governor McGreevey about that.......

>>If the claims are true then they deserve to be
>>brought out. If they are simply opinions, then it
>>becomes a process to determine whether
>>there was any "real" damage done. Again this
>>becomes complicated if people "hide" well.

>But easily enforceable via a court of law.

Not if you can't identify the perp.

>>Having your identity known, at least tempers
>>the temptation to act like a retard.
>
>
>And goes against everything the world of security experts and all isp's
>tell you. As far as I know, acting like "a retard" is perfectly legal,
>but if you had your way, anything you deemed 'acting like a retard"
>would most certainly be illegal.
>
>
>>Acting rude, inconsiderate, or anti-social, is
>>also not illegal, but it's not something a
>>civilized person would do in a public forum.
>
>
>
>Therein lies the answer to what ails you. Not all people in public
>forums are civilized.
>Nevertheless, these traits you consider
>uncivilized, exist in these "bad" people you speak of, and unfortunately
>the word is made up of good AND bad people.
>
>
>>So then what is your conclusion?
>
>

>That you have problems following your own claims and posts and have damn
>near destroyed the thread with your snips and edits.,

I'm sorry if trimming old posts bothers you. I'm not looking to get
into the Guiness Book of records for the longest thread. I'm
discussing points, and I'd like to keep it as brief as possible. Your
WebTV browser is not helping in that regard either.

>
>>Should good
>>people be turned away from public forums
>>(Both radio and internet) by the behavior of
>>the bad people?
>
>
>Your words. In fact, you are the only one seeking to do away with what
>you perceive as "bad" people,,,those that do not conform to your idea of
>identifying themselves.

I am by far not the "only one". There are many people complaining
about the anonymous nature of the internet and the ability it gives to
people who cannot act any better than a gutter slug. These people have
requested changes. The industry has responded. New standards and
protocols are already in the works. Trust me, the days of the
untraceable anonymous troll is numbered.

>>Do good people not have some right to
>>protection from the worst of the bad people?
>>Isn't this in the best interest of society? Is the
>>right of privacy so important that you would
>>allow it to supersede keeping public places to
>>at least a minimum amount of decorum?
>
>
>
>
>It's not in my hands or yours, no matter how bad you wish you had that
>type control on usenet.

No, you are right about that. But when a significant majority of
people become fed up with things as they are, and request changes, you
can rest assured that things will happen. The court of law recently
acknowledged that internet "crime" is new ground, that hasn't been
properly codified, and that they are working on laws to address abuses
of the public by this venue.

At your back door
Behind a truck. "You got a bear at your back door." Ant. front door:
front of a truck.

Bear/Smokey
A county or state cop.

Bear in the air
A police airplane that monitors highway speeds below.

Bobtail
Running without a trailer.

Bulldog
A Mack truck.

Bumper sticker
An automobile following you too closely.

Cash register
A toll booth. "You're coming up on a cash register at yardstick 154."

City Kitty
A female city police officer.

Got your ears on?
Used when looking for someone on the CB.

Granny lane
The slow lane on a highway or freeway.

Hammer down
Go fast, step on it.

Hammer lane
The fast, passing lane on a highway or freeway.

Kojak with a Kodak
A police officer with a radar gun.

Meat wagon
Ambulance.

Plain white wrapper
An unmarked police car.

Reefer
A refrigerated cargo trailer.

Road pizza
Badly mangled road kill.

Sesame Street
CB channel 19. Named because of child-like behaviour that sometimes occurs, especially around urban areas.

Skate board
A flatbed trailer.

Yardstick
A mile marker alongside a highway.

I can't help note but you have begun your games again, selectively
snipping questions you pose and have great difficulty when given replies
with which you disagree. Editing your gaffes so that they no longer
appear illustrates only that you not only recognize such self-created
buffoonery, but go to great lengths to attempt to conceal it. By
introducing the behavior of selective snipping and editing of your
replies, you have intentionally compromised the thread. What you fail to
comprehend is such behavior merely serves to facilitate your own
degrading commmunicative skills.

_
>I snip the fat, as this thread has already grown
>to the point where it is no longer comfortable

>to follow. I snip the oldest parts first.

You're lying. Need shown again?

>There is

>no

>"game" involved. Brevity is a virtue. One you

>have yet to appreciate, it would seem.

You snipped no oldest part, you snipped your replies that illustrated
your self-contradictions.

_
CB IS anonymous, it's going to stay that way, get over the gastric pain
it causes you.
-

>And that is the main reason why there are so

>many malcontents on there.
-
Perhaps, perhaps not, but that is neither here nor there, and a problem
of yours. Stop trying to make it someone elses problem.
-
>It's everyone's problem unless,

No, it's not everyone's problem,,it's YOUR problem. Not everyone sees CB
as full of malcontents.
-
>I guess in all honesty, it is highly geography

>dependant. Trust me, in my area, there are a

>great many malcontents. I apologize to the

>fine CBers in your area, if they are not of the

>same (im)moral caliber.
-

Oh, I know what Philthy is about...been there many times.

_
Some see hammies like yourself as the
malcontents for feeling you have some sort inalienable right to demand
cbers jump through the same hoops you must jump through regarding hammie
radio.
-
>What "hoops" are there to just acting in a

>civilly responsible manner?
-
Read again: "same hops you must jump through regarding hammie radio".
That you responded with hammie radio as an example in acting civilly
responsible is not the best example you could have chosen,,in fact, it's
a poor one.

-
CB is not like that in my area. We have one channel with the lulu's,,the
rest yield great local roundtables and everyone radio-wise pretty much
knows everyone else. Being so close to Philthy, I can understand why CB
must be mess in your area. Those people are vile.
-
>Yes they are. Ironically, in my new area, there

>is one channel with any decent local activity.

>But as luck would have it, the people on the

>channel rarely just "talk". They are usually

>involved with showing off another new noise

>toy, or engaging in the verbal equivalent of

>WWF smackdown. The rest of the band is

>pretty much dead now. I'd love to have it they

>way you have described.
-
Then what is preventing from you from getting on that channel and
speaking your mind to those people as you do on here concerning your
radical and minority beliefs.
-
>Nothing. I've done it already. But what good

>will it do?
-
I've asked that of you concerning here and your answer was always along
the lines of "you have got to start somewhere" and "someone has got to
take a stand". It appears you shy aways from live real-time
confrontation you claimed would take place in the same manner in which
you conduct yourself on usenet.

_
>All it does it cause further arguments.

-
Same on usenet.
-
>You try to tell a nut that he's nuts, and they'll

>swear you're crazy.
-
In all fairness and I'm not being cruel or mean or malicious, but coming
from one who holds talking dx is technically a felony, and that roger
beeps are illegal on cb, that doesn't mean much.

_
>Finally I realize that it's no use. Why would I

>want to change a bunch of complete morons

>into people I'd want to associate with, if that's

>even remotely possible?
-
The morons are the ones who have no clue about the law which they speak.
In fact, your beliefs have been shown to be of extreme radical and
socialistic nature, clearly not in belief with the majority (Again ,
THANK GOD). What you hold as a felony can't be all that far from the
same logic of what you hold a moron.

_
> You can't make an idiot into a normal person,

>so why try? Birds of a feather stick together.

-

Which is why you have defended Dogie and attempted to present an
incredibly spaced out and fantasized case for Keith framing him, even
though the FCC busted him for jamming.

_
> My only hope is that a group of decent people
>will decide to start another channel that I

>would be happy to participate in. I'm already

>working on a CB reunion for some of the old

>crew that I've contacted. This might spawn a

>"retro net" where we fire up that vintage gear

>for some old fashioned CB fun.
-
Now that might bring back some of the fun with cb that has eluded you
for some time. Heck, we have get togethers all the time here. On any
given day one can tune in and hook up with countless fishermen all over
the bay area,,many of them sitting in their cars chewing the fat while
fishing.

_
 After all, that would make you proactive instead of reactive like you
have always been here, and I am certain we can count on you to offer
your beliefs to those on the air using those noise toys that have you
bleeding from the ears and nose, because we all know you believe in
saying the same things here as you would face to face. Try it with the
noise toys and on the radio with these people,,tell them they are the
equivalent of the WWF. Report back.

>Been there, done that. How do you rationalize

>the detrimental effects of distorted audio, such
>as that produced by an echo mike, to

>someone who has that "kid on Christmas" look
>on his face at the discovery of his latest toy

>(that he probably spend half his fast food

>paycheck for)? He doesn't care that it makes

>his audio hard to understand. He just thinks

>it's "cool". Must be something in the water

>around here.....

Nothing to rationalize. This is cb, not audiophile FM 101 High Fidelity
Broadcasting. What you can't get, because you been in with the snobs
that have a hard-on for cb too long, is that many, many folks don't look
at cb like you do and compare it to hammie radio. The only thing many
folks are interested in is making contact, not quality. Like a stereo,

some folks spend big bucks for symphonic reproduction, others do ok and opt for a clock radio. Different strokes, but here you are bashing those folks that may use a legal item as is their right, on cb, all because *you* disagree and dislike their choice. Tsk tsk.

-

>I tend to look at a glass that has 50% contents
>as half full also.

_
Not with CB, society, the FCC, and personal privacy rights you don't
-
>Because, in those cases, the glass in much

>less than 50% full.
-
No,,NOT in those cases, in YOUR personal experiences CB and society may be crumbling, but not to the rest of the world. What you experience is not the last word, far from it.

-

>The problem is that when running across

>people, with respect to morality and

>consideration, it seems that the glass is slowly
>dropping below 50%, and it's hard to see the

>positive side.
-
That IS a problem of yours, no doubt. I still find the majority of people to be good hearted. Must be southern thing (shrug),,if I'm wrong, I'm sure a yankee will correct me to say it is you that are wrong and that people, even in the north, are generally good people.
-
>That all depends on which circles you run in. I

>find most hams in my area to be good people.

>I find my neighbors to be good people. I can't

>say the same for the "seedier" towns, or the

>trash that populates the most popular CB

>channel.
-
Interesting. Do you feel there are more hammies or cbers in this country?

-
You subscribe to socialist views and rhetoric,,,this is NOT how America is, but how you wish it would be.
-

>You know, I really have to laugh when you

>accuse me of being a socialist.
-
It's true, In fact, this is another of those little times that I will
not only remind you that we have had this conversation long ago and many
times, but that in what remains one of my more favorite exchanges with
you, you not only embrace socialist beliefs, but go as far as to DEFEND
those beliefs and offer several reasons WHY you believe that bullshit.
_
>Do you even know what a socialist is?

I do.

>Do you

>still think (like you once posted) that a liberal

>and a libertarian are the same thing?
_
A liberal and a libertarian are very much similar and the same. They
BOTH advocate the maximum liberties permitted under the law which is the
exact manner of which I referred the two. In fact, it is you and Frank
who were shown not to know what a liberal is. Washington was a liberal.
Our forefathers were liberals. This country was founded and built by
liberlas.
You have succumbed to partisanship rhetoric of the right, where all who
dare question or oppose the Bush admin, are labeled a liberal. The term
has become, albeit incorrectly, an intentionally misplaced catch-all to
encompass anyone who opposes the current admin.
-

>Please provide any exchanges that I have

>authored where I defended the concepts of

>socialism. I believe in limited government.
-
Wrong, you favor government imposition and can't even see it.

-
>I believe in personal responsibility (and

>accountability).
_
So do the majority, but you also believe you have the right to mete out
accountability as you see fit, in your most recent example, by requiring
the identity of those who post to the internet.
-

> I believe that government should not restrict

>access and actions, but should prosecute

>those who abuse their rights.

-
Abuse is a relevant term and what you consitute defines abuse has
already been shown to not always be illegal, so no, when one "abuses"
their rights, say, to the point of offending the hell out of you for
their behavior or for what they say, no, there should be no
"prosecution".

-

You not being aware of how this
adminsitration has snowballed sheople like
you isn't at all
funny, it's frighteningly pathetic.
-
>Only if you have your own partisan beliefs

The rest of the world would hold you claiming and posting that you are
voting for George Bush constitutes a partisan belief. That you used his
name and the words "against socialism" in the same sentence with a
straight face and actually made yourself believe it, is even more
telling.

-

>and

>buy into the rhetoric from equally clueless

>detractors.

_
Has nothing to do with what I hear. The St. Petersburg Times won a
Pulitzer prize for busting Bush in his wmds lie concerning Iraqi troop
buildup he said were on the border ready to attack and invade. He said
he had satellite photos of this. It was all lies,,the beginning of a
mountain of lies. Nothing partisanship about this, Dave. I was
registered republican all my life until Ronnie's disgusting second term
when he single handedly destroyed what was truly a GRAND 'ol Party. It
never recovered. In fact, what they accept as their leaders now has
great republicans spinning in their grave.

_

>I am the

>biggest fan of the free market, capitalism,

>freedom, and personal responsibility. Hell, I'm

>voting for Bush, that's about as far away from

>a socialist as you can get.

_
I'll make this very simple. Bush swore with his hand upon the Bible that

he would uphold and protect the constitution. Immediately after taking
office, he launched an assault upon it.
His reasons for doing so are irrelevant, as are yours.
-
>He did nothing to the Constitution.

_
Wrong. He repealed the Fourth Amendment via the Patriot Act in the name
of terror when deemed necessary. Read up.
Adding to this, not single conviction has resulted from the (un)Patriot
Act,,not ONE!
-

>He merely

>granted the same powers currently afforded to
>law enforcement, to those involved with the

>fight against terrorism.

-
Huh? What does that mean? Those in Law Enforcement ARE the ones involved
in the repub's manufactured war on another intangibe, er,,"terrorism".

_
>Have you read the

>entire Patriot act? I have, and I find nothing in

>it that isn't necessary if we want to improve

>our chances against those who take

>advantage of our lax security to do us harm.

_
If you read it, you may want to have someone read it to you, cause you
missed the part about not needing a warrant in certain cases which has
NEVER been afforded law enforcement until now.

_

The majority of
American's (THANK GOD) do not subscribe to your bullshit about allowing
the authorities and anyone else an open book to your life "if you don't
have anything to hide".
-
>You have no way of knowing what the majority
>of Americans, CBers, Hams or anyone else

>thinks or wants.
-
Sure I do, Davie. Many people have such a talent. Some people spot
market trends, some people know fashion opinions, some know political
opinions, many people make a living off of similar talents, Davie. But
keeping with your line of bullshit, it is *you* that have no way of

knowing what I know. For all you don't know, I could be involved with the current political polls that usually have a margin of only a 3% error. Suhc is highly idicative of the pulse of the people. Once again, Frank accused me of writng for Pop Comm and Monitoring Times. Assuming I did, that would mean I am much closer in touch with my readers, who just happen to be,,,taa daa,,,hammies and cbers, tahn you care to acknowledge. So you see, these are but a fraction of the multitude of possibilities that decimate your incorrect hypothesis.

–

>Unless of course, you're omnipotent. You only

>know what YOU want and the small circle of

>people you associate want.

–
Umm,,,see above. Heck, with Sporadic Waves alone, there was never a "small circle". Some day you may wish to think big, as in big "circles", Davie. the big doggs are not sleeping on the porch in small circles.

–

>As I stated before, I am a big supporter of the

>concept of freedom.

–
Except when it comes to others exercising
THEIR freedoms that you think should be
curbed,,such as the right to anonymity on the
internet, just for starters.

–
>There is no good reason why someone needs

>to hide.

>You can't give me a good reason why

>someone deserves the right to be able to hide

>from others.

–
You aer owed no reason. This is your problem and the source of your hostility toward anonymity. You are owed nothing when a citizen exercises their rights under the law.

–
>Especially when that right threatens the rights

>of other people to the expectation of civil

>discourse.

-
You have NO right to expect civility among anyone. It would be great in a perfect world if that were true, but there is no law outlawing those

who are not civil. Once again, there is too much personal interpretation here for you to claim you have a right to expect civil behavior from everyone. That there is NO law outlawing these things you feel out be illegal shows that I indeed am in touch with the majority of the opinion, as if the majority felt like you, rudeness/non-civil acting folks and anonymity would be illegal.

–

>When that right conflicts with the right to

>expect civility and accountability in public

>places then I favor civility and accountability.

–
Once again, you have no right to expect civility by anyone, let alone demand accountability from another.

>And usenet does neither, nor does CB.

When legally operating people are shouted off of CB radio by illegal
stations "squashing mud ducks", their right of access has been
infringed. On Usenet, no one can "squash" a "mud duck" every one is
allowed to voice their opinions. But there are no restraints for those
who can't maintain a civil tone.

>Your argument makes the point against the Patriot Act quite nicely,

There would be no question about whether or not someone is acting like
a retard. This is beyond the subjective opinion of one user over
another.

>"acting like a retard". Nice shuffle, but it non-effective.

What did you think I meant when I used the term "acting like a
retard"? A simple disagreement of opinion does not qualify as "acting
like a retard". Someone who acts like a retard is someone who
contributes nothing positive and verbally harasses the regular users
to the point that they take the fun out of participation.

It IS a suburb of philly, as it resides in an area which surrounds
the city area. In any case it was your hangup of semantics that caused
you to look in the wrong place. The worst you can accuse me of is
incorrectly stating the location. It doesn't change the particulars.

Oh, and thank you for admitting that I DID provide the name of the
exact town.

American law applies to me as I am a citizen of America. But as a
referential courtesy to those who don't line in "my neck of the woods"
I used general locational terms. I never intended to be detail
specific at the time I posted it. That you took it as such is a
failing on your part.

Suburban philadelphia is not the same thing as being in the city of
philadelphia. If I had intended to state that it was in the city I
would have said "in the city of Philadelphia".
You still won't admit your mistake.

>>That you feel that suburban philly means the

>Wrong. That you called it that with, once again, nothing to substantiate
>it except your belief, does not consititute what makes a suburbia of a
>city. Once again, some of those parameters are which defines a suburb of
>a city are outlined above and Norristown meets none of them.

Not in the minds of the people who live here, all of whom refer to
themselves as living in the suburbs of phila. Even as far out in the
sticks as I now live even the news media refers to this area as the
"philadelphia suburbs". But I guess all these people are wrong and you
are right?

If I was making the whole thing up, do you think I would waste so much
time on semantics? What difference does it make now? You know where
exactly it happened now, so to continue to argue the point now is
counterproductive and wasteful of bandwidth.

Not gonna happen with public forums. Guaranteed.
-

>Nor have I ever defended a felon by

>unrealistically calling attention to another who

>may commmit simple rule infractions that are

>not enforced.
  –

Yea,,perhaps not a felon, but you did with Dogie,,. Check your own link,,read it through. I can do it for you if you insist on claiming you never defended Dogie by invoking another's mere POST about their activities. We have Dogie whose actions (Jamming a repeater) were found by the FCC to be illegal and of malicious intent, and we have you citing offtopic remarks and insults concerning myself, justifying Dogie's bust,,,going so far to even say you were certain Keith was going to be investigated for impersonating Dogie and framing him....what a hoot. Give it up, dude,

–
>I never made any claim of the sort. I know

>nothing about Keith. You have me confused

>with one of your other objects of affection.

>Doug will answer for his own issues. The

>closest thing to a "defense" of Doug that I ever

>respect to law breaker on CB. But I have

>never condoned his methods. I also offered up
>the possibility that Doug may have been

>framed by those who seek to damage him. It

>was a distinct possibility.

YOU said it. Click on your link. Hell, you said it here. You need a vaction, dave. "I never made any claim of the sort" doesn't jibe with your "I was a distincy possibility". Read your posted link..you most certainly said not only was it a possibility, but you were sure he (Keith) was going to be investigated. Why you have problems owning up to your bullshit, is answered in your self-contradcitions.

–

>But I have no knowledge either way.

Then how were you certain Keith was going to be investigated?

–

> Nor have I ever attempted comparing the two

>(the felon vs. the dx talker) or try to draw some
>type analogy between the two.

>You are getting distracted by semantics.

Really? You said, and I quote,"It is technically a felony". Clean the dirt from under your claws caused by all that scrambling.

–
And you're getting buried by your past defense of Dogie and outrageous

lobbying of why he could be innocent even thought the FCC listed him as guilty..
-
>By tabling a theory that it was possible he

>could have been framed? That (to you) is

>"outrageous lobbying"? What, do you not want
>to consider all possibilities? Or are you so

>stuck on your desire to see Doug fall, that you

>are blind to any alternatives?

When the FCC busts someone in such a manner, any possibilities of innocence are exhausted. Are you so stuck on your desire to see Dogie's actions defended you resort to outrageous stories concocted by those who have voiced their displeasure with cb?

_
>Someone who ignores FCC rules is

>technically a felon,

* You can't even understand CB law, I can;t hope for you to understand what consititutes felonious behavior from civil infractions. Go tell this to Phil Kane. This is like being a little bit pregnant,,you either are or you aren't.

_
>There's no question, you are a felon if you

>break the law.

_
Man , are you off base and way wrong, but you are welcome to continue to insist on remaining so ignorant.

_

> But I'm not talking about defending the

>actions of a child molester by using a CB rule

>breaker as justification. I'm talking about using
>Ham radio rule breakers as a

>justification for CB rule breakers.

Well, why the hell not? You invoke the prestige of a license all the time and they are to be held to a higher standard,,they are SUPPOSED to be held to a higher standard. They set the example whether they like it or not,,,,whether their behavior is pro or con, they are the example.

>That works both ways, but you're only going

>one way.

Not at all, I presented the side you refused to acknowledge. And here YOU are invoking hammies on this cb forum when YOU feel it is permissable to do so. You have iisues with hypocrisy, as you have a cow when I invoke them.

–

>But once again, this is a CB radio forum. What
>hams do (good or bad) should have no

>bearing on what's right or wrong here.

Sure they do, when it is a hammie that is reeking havoc and succumbing to this bad behavior and non-civility you say they should be held accountable to.

–
>Those are at least apples to apples examples.

–
You especially, have demanded "justification" of "what gives me the right" to talk dx and "break the law".

>The only reason that I demand "justification" is
>that you convey the attitude that ignoring

>federal radio law, is somehow your God given

>right.

–
You're lying, Davie, You always falsely attribute this to me when your emotions get the better of you. The mere posting of any freeband or dx activity has you mistakenly and myopically interpreting such as a flaunt. Again,,,you've been wrong since day one.

>Then I'll ask you this straight up: Do you feel

>you have the right to ignore FCC rules with

>regard to 11 meter operation? A yes or no

>answer is all that is required.

Unfortunately for you, I do not answer to you in the parameters you demand. Until you answer for my actions, you are owed nothing. This galls you. You act like I randomly discard FCC law. I do not. I take great care where I operate and am educated of the frequencies I operate. You also infer that I do nothing but freeband. Again, nothing could be further from the truth. There have been times I went months without tuning the freeband. The only rule I continually disregard is dx talking which you incorrectly call a felony.

–

> That you have rationalized that your rule

>breaking is such small potatoes that it makes

>it "OK" is hardly an excuse.

Those again, are your words, not mine.

>Then please, by all means, give us your words
>on the subject. Why do you feel it is ok to

>ignore the rules?

I never said it was ok. The why is of no consequence to you in any manner whatsoever. Ask a base jumper why he does what he does. Ask any enthusiast why he does what he does. it's irrelevant. You have great difficulty with this.

–

>Do you not acknowledge that every citizen

>owes society their pledge to be good citizens

>and to abide by the established rules, even if

>we might have a personal problem with one or
>two of them?
-
Hell no. When a society begins to stop questioning certain authority, the wrongs in the system will never be corrected. To lay down and accept the poor and ignorant mindset that ALL laws are good laws and as such must be followed without deviation is to invite corruption and abuse. This is absoutley necessary in a free society in order for bad laws to be done away with and innocent people be freed.
-
>Yes, but in a civilized free society, the people

>discuss, and decide if and when the rules

>need to be changed or modified.

–
So change the rules if you feel people like me should be tried for a felony for dx talking. Don't let me prevent you from instituting a campaign for this type change? Make sure you list the identity of anyone you find on this earth that agrees with you.

–

–

>We don't just arbitrarily ignore those

>"a-la-carte" rules that we individually don't

>agree with. That is a sign of anti-social

>behavior.

Which this country was founded upon,,,,dissent and what was then considered anti-social beahavior. Jefferson said a healthy skepticism of government is necessary for an honest government, and that they should be challenged all the time. Now I know you don;t agree with this, as

Jefferson was a patriot and freedom loving liberal and libertarian.

–

>For the record, I agree with you that

>.freebanding is small potatoes. The problem I

>have is the slippery slope theory. Once you

>start justifying the ignoring of small rules, it

>becomes easier and easier to come up with

>justifications for ignoring larger ones.

-
That theory has been debunked.

>By whom? Where? It's still a very valid

>psychological theory, which can be

>substantiated in a number of cases particularly
>WRT adolescents.

–
Then perhaps you should be directing your radical minority diatribes
toward adolescents.

–

The pathetic conservatives tried saying
that with their LAST waged war on an intangibles,,,,the lost war on
drugs. They claimed pot was a "gateway" drug leading to harder drugs in
order to justify their own failed policies.

–
>That the "war on drugs" may not have gone

>the way we would have liked,

-
You mean, like, you wish your party didn't fail?

>that does not invalidate the slippery slope

>theory.
-
A theory is only that, a theory until proven. Your theory was debunked
and is no longer even a theory.

–

>If you take the time to read psychological

>studies, the vast majority of kids who are on

>"hard" drugs started with "small potatoes"

>drugs like pot and alcohol. That validates, not

>"debunks" the slippery slope theory.

_
Wrong. Latest studies indicate kids exposed to TOBACCO and alcohol at an early age are predisposed to drug abuse. Once again, you are twenty years late on the most recent data, like the cb laws.

_
>Until one is finally caught and made to pay the
>price, this slippery slope will continue.

Mmmmm,,thank God,,,,know what that smell is? It's freedom, Dave,,,and it;s like a breath of fresh air to the rest of us,,,,too bad it's like a rancor cancer to you.

>Freedom is not a license to be anti-social.

It most certainly is. Just because you have a personal problems with a bunch of behaviors of others does not make their behavior illegal.

_

>Nor is demanding accountability from those

>who would abuse the right of freedom, an

>affront to the concept of freedom itself.

Abusing freedom, according to you, is remaining anonymous on usenet without revealing one;s personal real world identity.

_

>I feel that society has slipped quite a bit

>already in the last 30 years. I'd like to see the

>trend reversed. That won't happen if people

>have little to no respect for rules, or feel that

>they will only obey the ones they feel they

>have a good chance of getting caught

>breaking.

>Talking DX on 11 meters is illegal under the

>current rules. So by all standards of definition,

>a person guilty of doing it, is committing a

>crime.

_
Here you go again, off and running blindly incorrect, but happily, nonetheless. A civil infraction is not the same as a criminal

infraction. Please, consult Phil Kane or another attorney who can enlighten you on so much communication law of which you are not aware.
>How can you consider the breaking of a

>federal law to be a "civil infraction"? Please

>cite some sources.

It's not what *I* consider, its what the courst consider. Sure,,how about the FCC. Check any NAL,,CIVIL Forfeiture. Dave, you haven't the foggiest of what you are speaking.
–

>Granted it's not on the same level as robbery,

>murder or rape, but it's still a citable offense,

So is jaywalking, but it's not criminal.

>should the FCC ever decide that it's important

>enough to enforce.

But not a criminal offense.

>Yes it is. You can go to jail for it if it becomes

>serious enough. How much more criminal to

>you have to be?

One can go to jail for many non-criminal offenses, such as unpaid traffic tickets. Get a lesson in law, Dave.

>Dave

I concern myself with real word issues. I don;t have time to sit around
entertaing "what-if's" in the world.

_
>Or are you saying that we all should just have

>to deal with abusive insulting and libelous

>comments because they are not worth the

>trouble to pursue seriously?

If my emotions were to take over, I would simply turn the thing off and
walk away. No one is forcing you to partake in what you view as an
injurous electronic arena. It is your choice.
-
>The same "turn it to the left" mentality that

>abusive CBers use to force good people off of

>the CB band?

_
The very idea that you feel "forced" by another has moved you to the
point of wanting to force others to conform to your beliefs,,,nice.

>Not forced to conform to "my" beliefs. Only

>that they maintain a certain level of

>accountability and by extension civility.

Yes,,accountability and civility according to YOUR beliefs, not the law.
You have already demonstrated your disain and disagreeing with the law
that allows anonymity in life, most recently, to usenet and CB.

_

>Decent people should be forced to yield to

>malcontents, rather than fight back?

That is a personal decision and an apparent unresolved issue that
plagues you.

>So you posit that decent people should be

>held hostage to the whims of these

>malcontents, and those of us who feel

>otherwise have "issues"?

There are no "us", as you are alone in your radical beliefs. No one else feels "held hostage" or "forced" concerning their freedom of choice to partake in usenet, only you.

–

>I believe in the example of not saying

>something on a forum, that you wouldn't have

>the cajones to say to someone's face.

Very noble. Many agree with you. Obviously, those like Dogie, do not.

>Doug has personal issues of his own.

–
..and he fostered his personal issues on this group. Again, I ask of you, how would you he be held accountable for such behavior that you continue to rail against?

>If you are asking how Doug should be held

>accountable, first I'd have to ask; how do we

>know for sure that the person everyone thinks

>is Doug, really is?

Yea, you already established that the same entity (the FCC) you say we should all obey can be mistaken when it comes to Dogie's bust, but they couldn't possibly be mistaken in not repealing their poorly constructed dx rule. AS always, you take an issue and slant it toward your own agenda, invoking it (the FCC) as one we should obey, but not necessarily believe. More hypocrisy.

–
> Once we establish that it is him, then he

>should have his access revoked for behaving

>in an inappropriate manner.

Well, there you have it. It is not up to YOU to establish anything. His antics have been reporeted many times by the many on this group and he has lost several accesses to this group over the years. Yet, it is not up to any "we" to establish his wrong doing,,,that is the job of his isp, and when they find such, as they had in the past, they take action,,not you, despite the status you seek.

–
I have incredible restraint and am overly
polite, even to you in many instances when you began reambling off-topic with insult. I invite anyone who has a problem with me to come forward.

>How does one "come forward" if we don't

>know who you are or where you live?

"We" lends the notion you are aware of someone, other than you, who shares your incredible identity obsessions and problem regarding myself. Care to specify?

>That is paranoia speaking.

No, it is a command grasp of basic English. You said "we". "We" is not singular. Again, I ask who you refer in addition to yourself?

> All that "We" refers to is anyone who happens
>to be a member of this group who would like

>the opportunity to "come forward". Nothing

>nefarious about it.

No,,you said how do "we" come forward if
"we" don;t know who you are. Not many really care WHO I am in addition to yourself, Now, I ask again, who else do you profess to caring about my identity as much as yourself?

–
Who I am and where I live is personal information, something you claimed you didn't seek.

>I don't need to know, but if you want me to

>"come forward" I do need to know some

>details.

Oh, I NEVER said I wanted you to come forward,,,just the opposite, you said you were coming to Florida. My invite hasn' changed. Anyone that wishes or "wants" to look me up can do do. If I was concerned about you, then I would travel to you, but this isn't the case. YOU apparently want to come forward, so come on down.

–

> I mean Florida is a big state (assuming that is
>where you really live)

Well then, if you have doubts, perhaps you better reconsider.

–
Many know where I live. I am incredibly easy to find, as Doctor X recently found.

>Does Dr. X know where you live?

Dr. X never asked.

>Does anyone?

Oh yesiree

>Somehow I doubt it. You are a little too

>secretive about this. And you know all too

>well, that once one person finds out, it'll only

>be a matter of time before the information

>spreads around.

More of your far-removed delusions. I have ordered apparatus from two separate regular businesses on this group, one place twice. That makes two businesses in addition to those I have met from this group that "know" me. See Davie, these people don't give a damn as they don't have the motives you telegraph with your intentions to "spread around" personal information. This is undertaken by those like yourself.

_
Of course, those who
do, encapsulate the very idea you are railing against...not identifying themselevs, only it doesn't bother me like it does you. I have an open door policy and will meet anyone from this group for coffee, fishing, or to continue our rec.radio.cb debates.

>Ok, I'm coming to Orlando in October. I might

>make a detour to Tampa. Where do you want

>to meet?

My house. Are you driving? Bring a radio. I'll guide you right to my front door from the interstate.

_
>I'm flying, renting a car, no room to pack

>radios. Doing "Mickey Mouse" for my kid.

Mickey Mouse is like a six foot rat to little toddlers. I'm 90 minutes from Orlando. Provide me a cell phone number like Keith did and I'll call you, if that's what you wish. I'll give you precise directions. In fact, if you rent a room in Tampa Bay for a day, I'll take you and show you the way Florida was millions of years ago. Some areas remain untouched.

_
So far, I have met several from
this forum and plan on meeting more. If I didn't fish for the day, and we didn't talk about politics or cb, I am certain you and I would get along just fine on the boat for an afternoon ride talking of nothing but hammie radio.

>Nothing wrong about talking about CB. I love

>the hobby (at least in the old days), and I

>could tell you a few good stories. But in order

>for you to talk authoritatively about hammie

>radio, that would imply that you are a ham

>yourself (or at least should be). You've implied
>similar before. The fact that you won't admit it

>one way or the other probably speaks more

>about your fear of identification, considering

>your admitted behavior on the freeband.

No doubt about it. Using the freeband always runs the risk of being identified.
But you can rest easy realizing that I just may, perhaps, have the best of both worlds and have for years.

>I figured as much. Much like I have, even if

>you might not see it that way from your

>perspective.

_
>Anonymity is the enabler for people to act

>inappropriately, and rudely. Using the excuse

>that privacy overrides acting in a civilized

>manner is weak IMHO.

No one suggested such..but the gist of it, is that American's are afforded the right to act like idiots, even it offends you to no end. Using the excuse that it ought be over-ridden is what is weak.

>So then you assert that an American's right to

>act like an anti-social idiot deserves more

>consideration than other people's right to

>expect civilized behavior in public places?

You said that. You're wandering. You are confusing consideration with rights. There are very many things I can do well within my rights that offend you, in fact, I have no problem offending you with my legal rights merely because you disagree with them and my right to exercise them.

_
>It has everything to do with the core issue.

Which was what? Law? Breaking the law? Offending you isn't necessarily against the law.

_
>You are attempting to make value judgements
>regarding the relative priority of the rights that

>people have. You have prioritized the right to

>privacy (and by extension enabled the

>unaccountable actions of malcontents) over

>the right of people to expect civilized behavior

>in public places.

I didn't make that priority,,,the law did. The law outweighs your demand for what you interpret as civilized behavior.

> When those rights clash,

>something has to give. You seem to have

>made your choice, even though you keep

>dancing around it and not quite ready to

>directly admit to it.

What you misinterpret as clashing rights is not illegal.

2739. Redco DigiScan UFO Manual

Newsgroup: rec.radio.cb

Hey Gang...

Anyone got the COMPLETE Manual/Installation Guide for the old
Redco DIGISCAN UFO Digital VFO for the OLD C.B. Band.

If I remember right, the UFO was the Universal Version of the Digi-Scan.

I need to Beg or Buy a copy.

Thanks !!

Randy, N0GMX

K...back again.

Part III
From: N3CVJ

>Why should this newsgroup be treated any

>differently than an in-person venue?

I happen to agree with you on this item, but why should others be forced
or made to conform to our view? They shouldn't.

>Why not?

Because they have the same rights as we do.

> Personal freedom does not (or should not)

>extend to the ruination of other people's

>freedom or right of access.

And usenet does neither, nor does CB.

_
>When legally operating people are shouted off
>of CB radio by illegal stations "squashing mud

>ducks", their right of access has been

>infringed.

Please show me any document speaking of this a RIGHT to access you
claims exist.

>On Usenet, no one can "squash" a "mud duck"
>every one is allowed to voice their opinions.

>But there are no restraints for those who can't

>maintain a civil tone.

Nonetheless. civility is not a legal requirement, and once again, usenet
"can not extend to the ruin of another's freedom." In fact, the ONLY
thing that can lead to such a thing is a crime and/or incarceration

_
Your argument makes the point against the Patriot Act quite nicely,
though.

>In what way?

Read the part you snipped, it illustrates it perfectly.

_
>I would not want to make these activities

>"illegal". If you want to act like a retard, by all

>means, go for it! But we all have the right to

>know who it is that is acting like the retard so

>that they can properly face the repercussions

>that that type of behavior brings.

No,,you don't have the right to know the identity of one just because
you feel he is acting like a retard.

>There would be no question about whether or

>not someone is acting like a retard. This is

>beyond the subjective opinion of one user

>over another.

>If the behavior is continual and affects more

>than just one person, then that changes

>things.

Whatever. You STILL don't have the right
to know the indentity of one merely because you lend your personal
opinion that one is "acting like a retard".

_
Well now, the word "if" and the entrance of
injurous posts constitutes an entirely new concept and has no relation
to you claiming you have the right to know one's identity on usenet

merely because you feel he is "acting like a retard". Nice shuffle, but
it non-effective.

>What did you think I meant when I used the

>term "acting like a retard"?

Since you solidified how objective the term can be, it can actually mean
whatever you wish it to mean. Nevertheless, because *YOU* feel one is
acting in a certainmanner not in conformity with your beliefs gives you
no right to know anything concerning their identity.

_>
>A simple disagreement of opinion does not

>qualify as "acting like a retard".

You are the one needing to qualify what he term *you* initiated as term
extremely "objective".

>Someone who acts like a retard is someone

>who contributes nothing positive and verbally

>harasses the regular users to the point that

>they take the fun out of participation.

That is ridiculous. "Retard" is a poitically incorrect offensive term
for one who suffers from diminished mental capacity confirmed by a
American licensed MD.

_
But,,keeping with this thought you
put forward, you just described exactly what happened to Dogie.

>As it should be. Everyone who acts in that

>manner should be removed from society

>where they can no longer harm the activities

>of others.

Wrong." Acting like a retard" is not illegal.

>Neither is listening to loud rap music outside.

Non-sequitur. But to show how incorrect you have been, it most certainly
is illegal once it reaches levels that violate noise ordinances. The
charge: Disturbing the peace.

>But do it at 1:00 Am and guaranteed the cops

>will be there to "oppress" your right, for the

>betterment of the rest of the community.

Non-sequitur once again. One has no right to disturb the peace and if one chooses to do so, must be prepared for any consequence.

>That's what I mean by accountability. If you

>had to "face the music" for acting

>inappropriately, you would eventually adopt an
>incentive to NOT act that way. The quality of

>the forums would increase considerably.

-
What you feel constitutes "quality" is the opposite of what many others feel. The loss of personal privacy in this world is never an improvement in the quality of anything.

>Why? What would you do differently if

>suddenly we all knew who you were? It

>certainly wouldn't change how I interact as I'm

>already up-front about who I am.

>Why? Why should it matter if people know

>who you are? Are you THAT paranoid?

Why is none of your concern.

>But is undoubtedly the whole reason why you

>defend this notion so vehemently.

Don't give yourself so much credit. I have defended personal liberties long before encountering you.

-
Why I choose to exercise my American
birthrights is none of your concern. Once again, you are owed no explanation.

>That you would flaunt you rights as an excuse

>to allow people to victimize other people at the
>expense of their rights is also telling.

Perhaps if that is what I have done, there may be some validity to that. But since I have not done so, and only discussed such when continually pressed by those not unlike yourself who have nose problems and an admitted penchant for personal information in order to "spread it around", I am quite satisfied with just what is and isn't "telling" in this thread.

_
>I remember making the claim that some I

>knew personally was popped by local cops for

>interference relating to his CB radio. You

>challenged the validity of my claim,

AFTER you refused to cite a credible source, and only after did I
"challenge the validity" of your claim.

>I don't have a credible source. I didn't "find"

>the incident. I was personally involved with it.

Of course you don't and of course you were. There are those who insist
they were abducted by aliens who also have no credible source.

>That doesn't mean that it didn't happen.

Well, yea, in the world of reality acceptance, it does.

>first by trying to find some sort of difference

>between "a suburb of" and "suburban",

>suggesting that I was lying.

You are lying now. YOU were the one to invoke the word "suburb", not I,
and you invoked it when the heat got too hot and you realized, like
said, the court documents would confirm your story. I note you
originally claimed it happened IN Philthadelphia,

>I never EVER claimed that it happened IN

>philthy. Never. I said that it happened in

>SUBURBAN (Meaning in the suburbs) of

Exactly. And then you invoked Norristown, which is NOT a suburb of
Philthy, NOT on any area maps of Philthy, and pays no bills or taxes to
Philthy, and has no mail go through Philthy. It meets NONE of the
criteria for a suburb of Philthy, ,,in fact, it's nowhere near Philthy..

>It IS a suburb of philly, as it resides in an area

>which surrounds the city area. In any case it

>was your hangup of semantics that caused

>you to look in the wrong place. The worst you

>can accuse me of is incorrectly stating the

>location. It doesn't change the particulars.

Your posts do not constitute particulars ofan incident that never
occurred merely because you say it did.

>Oh, and thank you for admitting that I DID

>provide the name of the exact town.

Oh, no problem, if that minor consolation worls for you, hail hail. The fact of the matter is, the town meets no parameters for what consitutes a suburb of a city. You feel merely because the closest big city is Philly, it constitutes that Norristown is a suburb? By what do you base this? Distance? What were you references? Again, you can cite nothing in this world that illustrtaes Norristown as a suburb of Philly, because it is not.

>Philly. Why I chose that wording instead of just
>saying that it happened in Norristown, should

>be obvious.

It was.

> This is an international forum. Ask someone

>from another geographical area if they're ever

>heard of a relatively small town (such as

>Norristown) and they will most likely not. But

>mention a popular city as a geographical point
>of reference, and it's another story.

This being an international forum doesn't stop you from invoking domestic (American) law, so you can;t invoke it as a defense for your beahvior now.

>American law applies to me as I am a citizen

>of America.

But you don't direct your posts about the law to yourself,,(well, sometime you do), you post them with abandon and no thought to other counties laws.

>But as a referential courtesy to

>those who don't line in "my neck of the woods"
>I used general locational terms. I never

> intended to be detail specific at the time I

>posted it. That you took it as such is a failing

>on your part.

You had months to reply. You were asked many, many times to provide "specifics" (verbatim) of the case. That you responded with "Suburbian Philly" and now try to say you weren't responding with "detail specific" at the time you were asked, is *your* communication gaffe, because that is exactly what you were asked for.."specifics". Not anyone else's fault you can't answer correctly.

>What more do you want?

Umm....perhaps this credibility you always speak of . You hold one who doesn't respond to your demands for personal information as not credible on usenet. The rest of the world holds one who makes claims with no substantiation as not credible.

_
>I told you all the

>details. I never knew the defendant's last

>name (part of that anonymity aspect of CB)

>only that the name he went by was "Floyd"

>(Which from other people, is his middle name,

>his fist name is Anthony). It happened in

>Norristown Pa (A suburb of philly) in the late

>90's.

>When you failed to find any information

AFTER you claimed it was in Philly,

>I never claimed it was IN philly.

Sure you did,,,here it is again:

>"This happened about 5 years ago IN

>suburban Philadelphia.."

>Suburban philadelphia is not the same thing

>as being in the city of philadelphia.

Correct. But suburbs of Philadelphia are inexplicably tied to the city it a suburb of, in one of many ways, a few of which you have now been informed.

> If I had intended to state that it was in the city

>I would have said "in the city of Philadelphia".

> You still won't admit your mistake.

>That you feel that suburban philly means the

>same thing as IN philly was your mistake.

_
Wrong. That you called it that with, once again, nothing to substantiate it except your belief, does not consititute what makes a suburbia of a city. Once again, some of those parameters are which defines a suburb of a city are outlined above and Norristown meets none of them.

_
>Not in the minds of the people who live here,

>all of whom refer to themselves as living in the
>suburbs of phila. Even as far out in the sticks

>as I now live even the news media refers to

>this area as the "philadelphia suburbs". But I

>guess all these people are wrong and you are

>right?

If they call Norristown a suburb of Philly, yes , they are wrong, and once again, stop being so personal, for it is not I that define the parameters of what constitutes a suburb of a city. For one, they must have a civic connection in some form. Norristown does not. In addition to you admitting how vile those Philthy folks are, you're telling the world the majority of folks in your area are ignorant, as well.

>If I was making the whole thing up, do you

>think I would waste so much time on

>semantics?

Oh yea. This group has been witness to watching you talk out both sides of your mouth.

>What difference does it make now?

Now that you admitted what I maintained after all this time, that you are unable to produce anything to sustantiate this claim, not a thing.

_
>You know

>where exactly it happened now, so to continue
>to argue the point now is counterproductive

>and wasteful of bandwidth.

Correct. It should be reserved for your long rants illustrating your fancy for what you refer as internet psychology.

>If you want to go through the trouble to

>request (at your cost) microfiche records,

No need. As far as a court of law would be concerned, I have presented the burden of proof that your claims were false. I have been "pacified" over this issue regardless or not of whether you feel that such is your decision.

_
>This is the internet remember, there is no

>accountability. So anything that anyone says

>is already suspect.

You are the one unable to provide for your claims. That you feel another should feel foolish for your inability to do so is troubling.

>Even when I told you the exact town,

You never said the exact town and if you did, you NEVER linked it with the case you claim occurred or in the same thread. Since you claim otherwise, force feed me some crow, Davie, and show the world where you told me what town the cber got busted in and went to court. Just another in that long line of unsubstantiated bullshit,,,,

>You asked for it, you got it: Enjoy your crow....

http://groups.google.com/groups?q=Norristown+Cber+Busted+group:rec.radiocb+author:Dave+author:Hall&hl=en&lr=&ie=UTF-8&c2coff=1&selm=3E493556.2BA%40worldlynx.net&rnum=1
-

There it is again,,,,Norristown, a town that has nothing to do with Philadelphia except in your mind. You will find nothing anywhere denoting Norristown as even remotely associated as a suburb of Philthy.

>Except by the people who live here.

Another claim of yours that is morose. I don't believe an entire community is illiterate in civics.

>I don't

>purport to know what the people in the greater
>Tampa area should refer to themselves as, so

>I would expect that you not be so

>presumptuous as to assume the same from

>my area.

_
Ahhh,,but I am quite familiar with Philthy and the related area...actually, I am pretty familiar with Penna, NY and a host of other states. I have done quite a bit of traveling over the years and hung around Philthy for some time.

_
_
>You can't look for something and expect to f

>ind much without key particulars,

>like the defendant's name, which I can't give

>you as I didn't know all of it.

YOU not being able to doesn't mean others are unable. And sure I can, dave,,,I can do just that with the very simple process of elimination. You start with the town and backtrack to the corresponding year or two which you already gave us indirectly,,from there, one eliminates all charges except for discorderly conduct. From there, it's a matter of checking those charged with the offense in the corresponding time frame and walla walla,,,,,,,,,,and that is but one way of many and by far the easiest.

>Not disorderly conduct, it was disturbing the

>peace. Get it right.

Semantics.

> And you still assume that this information is

>on the internet.

Whatever has you stuck on the internet as being the single informational tool in my work arsenal is incorrect, but seeing as you were told this before and still can't grasp it, this will be the last time I correct you on this matter.
As always, you have the right to insist on remaining clueless and ignorant on such matters.

> It may not be. The incident occurred in the

>1996-1998 time frame

>Not all information is available on the internet.

Exactly, so I have no clue why you continue to assume it is.

>Then use your "magic" to produce the info.

I am of the opinion it did not occur. You made the claim, substantiate it or just get past the fact that you finally admiitted you are unable.

>Although once you find it, I suspect you will

>not admit it. You don't strike me as someone

>who takes being proven wrong all that well.

Well, that's ok, considering how many times you have been wrong lately.

>Dave

Sure it is. The test data is quantitative, the graph and number don't lie,
and his remark about the "quality" is just qualitative. Now if you can
explain just what he means by "poor quality" in a way that's measurable let
me know.

I'm still waiting for your expert answer as to why Amphenol doesn't show the
application range for their UHF connectors above 300 MHz. And if they're so
great why doesn't everybody use them on UHF instead of the more expensive
constant impedance connectors like the "N", "BNC", "SMA" etc. You shouldn't
have to wait for me to do anything to answer that one. If they're so darn
good then tell every why. You seem to know more than the company that
designed, manufactures, and markets them. It seems really dumb of them to be
selling the other types when as you seem to think the cheaper UHF style
works just fine up on UHF, even for your TV channel 77 I think you mentioned
in your E-mail.

Message-ID: <6OidnTeVLPj5ArvcRVn-sQ@comcast.com>
Source record: 185554

Quick story...back in like 1976. We had a BIG house on top of a BIG hill in the middle of nowhere. I got into "cb" with a bud of mine. Started off with a simple midland am 23 channel. Next thing I know, I'm buying 60' of tower and a moonraker 4!! I was only 13(my bud was 17) but I always worked evenings/weekends at a local farm or with my dad's construction company. So money wasn't a problem and MAN DID I BLOW IT!!!

I dug the hole the night before dad went away to the hunting camp for a week. LOL. I had a WHOLE 1400sq ft walkout basement that was finished, complete with kitchen, bed/bath and rec room to MYSELF(sister had moved out). When I was sure that dad had gone, me and my bud had the tower and moonraker delivered from the guy I bought it from. I ran the tower in the hole and up just above the roof line and anchored it using 2 clamp brackets to the eve of the house. We then poured the concrete in and started running coax/rotor wire to my room in the basement. We knew NOTHING..LOL!! Just flyin' by the seat of our pants. Next day we hung the last 3 sections and mounted the rotor. I assembled the raker and carried it up on across my chest/shoulders like I was doing a front squat. Mounted the antenna, back down for the wires/coax. Connected everything, raised the raker up and mounted the rotor.

I put my little midland mobile radio on that raker!! hehee. Then, dad came home. He never even noticed the antenna until about 3 days later!! He wasn't mad at all, just pissed I didn't tell him I was going to do it. Anyway, I finally got into sideband and shooting skip and bought that 1011 and had it gone over. It was an impressive rig back then. My buds thought I was the "shit" with that thing. Girls were even impressed...I think they admired the majestic "look" of the chrome D-104:-) LOL

I used to get up at like 2am and talk until 7am. Sometimes I'd just stay up all night. Man I had a blast doing that!! Steal a few brews from the downstairs fridge:- Had a couple of "friends" over...hell I even had my OWN driveway:-)(back drive going to the walkout garage).

Ah, those were the days. No worries. No accountability. No responsibility. No savings either!!!

>Sure it is. The test data is quantitative, the graph and number don't lie,
>and his remark about the "quality" is just qualitative.

No, it's subjective, which means the test data is also subjective. And
the conclusions were also subjective, extrapolating the test results
from a single "poor quality" UHF connector to all such connectors
regardless of quality. One single connector is not even a valid sample
group, let alone a fair representation of a connector type that has
been sucessfully used in UHF applications for over 60 years.

> Now if you can
>explain just what he means by "poor quality" in a way that's measurable let
>me know.

Assuming you can do anything for yourself, email the guy and ask -him-
what -he- meant by "poor quality". After all, it was -his- test and
-his- connector.

>I'm still waiting for your expert answer as to why Amphenol doesn't show the

I have answered that question, and more than once. You are avoiding
the answer almost as much as you are avoid the test. Are you going to
do the test or not?

I don't know that I'd be overly concerned with caps unless they are in the regulator circuit that supplies dc voltage to the final.
I suspect that the regulator/modulator pass transistor is breaking down when heated, or something in that circuit.
If it were the bias regulator diodes, the power wouldn't rise that much.

Not sure you really have a problem. Mine did this on a trip to Florida too
after setting in Disney World parking lot all day. Never had this problem
again.Think it is just too hot. Probably shouldnt be operating the radio at
that temp anyway.

Hi,

I'm looking into getting a fairly decent CB for my car.

Where might I go for evaluations of different CB models and brands?

Thanx!

www.copper.com

check out the forum and go from there. I just did that about a month ago.
Seems like the best of the true CB was the grant/148gtl.

Best of the "export" catagory was the 2510.

Your mileage may vary, but that was about the meat and potatoes of my
search.

Can't educate the village idiot I see. Oh well, I like my new 04 ride
better. I've only put on 7900 miles since I took delivery at the dealer last
December. Only took about 4 weeks to get it built after placing the order
and came in at a sticker price of $38,400. Leather interior, factory 180
watt sound system with 6-way Pioneer speakers, built in Nav system with DVD
player and LCD map display/voice promtps for turn by turn directions, 10
disk CD changer, dual zone climate control etc.

Just got back in from the dream cruise. Had perfect weather for it, sunny, low 70's, low humitity, and a mild breeze. I was out on the strip from around 10:30 AM till 8:30 PM with a group of friends having a BBQ and watching the cars all day. The chicken A.K.A. Steveo, A.K.A. PeePeeholic, he signed that note under my door that way so he must like the name, left one of his dumb threating messages on my answering machine. He's still not man enough to quit hiding his idenity. I don't hide mine. Can't waste my time on people who aren't honest, and can't even admit to who they really are.

DAMNNNNNNN!!! 2 days. 1 freq!!! LOL

I believe you're right. Anyway, I'm typically on 37-38 lsb using "Pa 313" mobile. I'm only mobile for now. Be awhile until I can setup another antenna system. Development I'm in has antenna restrictions and I'm going to be here for at least 4 more years. After that, it's back on top of a hill with 60' of tower and twin moonraker 4's :-)

Made a couple of contacts in Nova Scotia around 3pm est coming back from the lake.

Frank, first you can't answer the technical questions I put to you why everybody isn't using those connectors at UHF. You claim to be so "knowledgeable" in the area so what's your problem with explaining it? Here's your chance to make me look dumb and you can't even take adavntage of it because you're wrong. The burden of proof is on you, not me. The simple fact that they are not used in most cases is an answer in it self, and not from any lack of trying either. I'm sure many people better than you have tried and discarded the idea of using them.

Second I have made qualitative measurements as I mentioned before in my E-mails to you. You seem to ignore that every time you bring up the subject.

Third, somebody else has already done the test, described the test set up in enough detail to allow people with the experience using vector network analyzers to repeat the test for themselves, and published the actual equipment plots. As far as I'm concerned his comments about the test connector "being of poor quality" could mean anything from for example maybe his preference is silver plating over nickel plating on the body of the connector, or gold plating instead of tin coat for the contacts.

Forth, your test is completely useless since there isn't sufficient information to even duplicate the setup you used. I don't know what kind of cable you used, it's length, where the power meter was located in relation to the tested connector "system", what kind of power meter was used, and finally what EXACTLY was the configuration of the connector system you tested. Was it a simple plug socket combo, a barrel connector and two plugs, how long was the barrel connector was, or something else completely and what dielectric was used in each component etc. And all of that does matter as was pointed out in the link below.

http://iwce-mrt.com/ar/radio_swr_name/

The link below used exactly the same connector configuration I made my calculations for in the Mathcad worksheet I sent you as a HTML copy, which pretty much reflected the same conclusions reached by the gentlemen using the vector network analyzer. And I'll even bet if you asked nicely he would provide more details of the tests he did.

>tried and discarded the idea of using them.

I answered your question both in the newsgroup and via email, but I'll
answer it once again using simpler words: Because there are other
connectors that are better suited for those frequencies. In fact, in
<41ish0hm9c2qdd8pnpj9f4n0oa4kdqaimb@4ax.com> I wrote:

>I never suggested that the N-type connector -wasn't- better. I will
>agree that they are better.....

But (and this is the part you have a problem understanding) the
existence of better connectors doesn't negate the fact that UHF-type
connectors are, more or less, very usable on UHF, which I stated in
the very next line of the same post:

>... But I said that the UHF connectors work
>fine, and for the OP's intended use they will probably work just as
>well as an N-type connector.

And I also pointed out that much equipment, both commercial and
professional (and I'll even add that some military equipment), has
used them on UHF with satisfactory results. So in addition to
answering your question in both venues and once again in this post, I
even answered it once -before- you asked it!

>Second I have made qualitative measurements as I mentioned before in my
>E-mails to you. You seem to ignore that every time you bring up the subject.

You said your brother was having problems with UHF-type connectors on
his 2-meter line. I recommended checking the coax near the connectors
for overheating during soldering (a cause of UHF problems -regardless-

of which connector you use). I also described a method of cleaning the connectors that will not leave behind any residue (which is also a cause of problems with UHF connectors). Did you even bother to try my suggestions?

>Third, somebody else has already done the test, described the test set up in
>enough detail to allow people with the experience using vector network
>analyzers to repeat the test for themselves, and published the actual
>equipment plots. As far as I'm concerned his comments about the test
>connector "being of poor quality" could mean anything from for example maybe
>his preference is silver plating over nickel plating on the body of the
>connector, or gold plating instead of tin coat for the contacts.

Like I said, the test was subjective, only one device was tested (not even a valid sample group), and I'm sure every tech that uses UHF-type connectors has a impedance network analyzer just collecting dust on the shelf waiting for such a situation to arise. My test may not have been much better in terms of sample groups, but it did measure the results at the load which is where it counts. My test is also much easier to replicate, and any tech or engineer with access to a UHF signal source, a few coax cables, a dummy load and an RF voltmeter can do it in about 10 mintues. It took me longer because I started with my watt meter which (I found out) didn't have the sensitivity to measure the difference, but if you have one that can then the test should go even more quickly. Are you suggesting that you, a senior engineer at a big-time company, don't have access to such common equipment?

>Forth, your test is completely useless since there isn't sufficient
>information to even duplicate the setup you used. I don't know what kind of
>cable you used, it's length, where the power meter was located in relation
>to the tested connector "system", what kind of power meter was used, and

>
>http://iwce-mrt.com/ar/radio_swr_name/

Did I not write in <non3i09c9rq4vpmag5l2a1o9vp3nkl7s4p@4ax.com>:

>Regardless, I suggested that you -measure- this apparent loss, not
>calculate it (.....gee, seems I've said that before.....). Since you
>don't care to measure things, I did. The Adler I mentioned earlier is
>a 100-watt translator tuned for TV channel 77. I measured the output
>to my wattmeter through one 12' length of RG-11 and again through two
>6' lengths of RG-11, the difference being that the latter adds a male
>and female UHF-type connector to the line. The wattmeter showed no
>visible difference. So I did the same test directly to the dummy load
>and measured with an RF voltmeter at the dummy load. The difference
>was a loss of 0.4 volts, which is slightly less than 1 watt, or about
>0.05 dB. Yes, I use teflon connectors and I keep them clean. And no,

>the coax wasn't overheated during soldering (it's all about the
>technique!).

It looks like I described my test fairly well. Not only did I describe
it on the newsgroup, I also sent you the following in an email:

>ASCII-CAD works fine for this application (use fixed-width font):
>
>First test......
>
> 12' RG-11
>RF source --------------------------------> dummy load
> ^
> measure here
>
>Second test......
>
> 6' RG-11 6' RG-11
>RF source ---------------->>>--------------> dummy load
> ^ ^
> | measure here
> PL-259/SO-239
>
>RF voltage from the first test - RF voltage from the second test = RF
>voltage of power reflected by PL-259/SO-239 connection. Pretty simple,
>huh?

You now say I didn't provide "sufficient information" to replicate the
test; specifically, cable type, cable length, location of meter, type
of meter, and configuration of connector system under test. I provided
ALL your requested information....TWICE. So either you didn't read
it....TWICE....or you are arguing for the sake of arguing. Considering
that you didn't read any of my FOUR answers to your previous question
(about why everybody isn't using UHF-type connectors on UHF), I think
you are arguing just for the sake of arguing.

>The link below used exactly the same connector configuration I made my
>calculations for in the Mathcad worksheet I sent you as a HTML copy, which
>pretty much reflected the same conclusions reached by the gentlemen using
>the vector network analyzer. And I'll even bet if you asked nicely he would
>provide more details of the tests he did.
>
>http://www.qsl.net/vk3jeg/pl259tst.html

Like I said before, ask him yourself. Or do the test yourself. Even
better, do -both- tests yourself! But it's now obvious that you aren't
going to do -any- tests. On the contrary, it appears you are going to
start taking cheap shots and suck up to Twisty. Well, that's your
choice I guess, but it sure doesn't seem like a credible response from
a person that claims to be a successful engineer.

BTW, I'm still looking for someone in Spokane to verify some antenna comparison tests. If anyone has a Penetrator and a few free hours on a weekend, drop me an email.

LMAO!!! Did you drive around with a name tag? Why didn't
you just meet him where he said was going to be? Can't waste you're
time? What are you doing by typing out this message, LOL!!!
I'm begining to think you are more of a Chuck type, no I'll take
that back, at least Chuck went to an event and meet some people
on this board.
Nope Leland this post just proves that you didn't go to where
Mopar told you he was going to be at or bother to call his Hotel
as per the emails.

I only stated the Obvious caps because it may cause issues with the 8v
Regulator, which he seemed to think he had a temp problem with.
If the caps were leaky or shorted it could stress the regulator and it
could cause issues in other areas.

Another thing to remember is the Final chain is always connected to
power, even with the radio OFF. So he may want to Unplug the radio when
its gonna be sittng in the hot sun for a while.

I've got it!! That's what I was talkin' with:-)

Wish I woulda knew you were gonna be on last night....I woulda gave it a try. I was out around 9pm and talked to Kentucky and a station in Miss.

I'm picking up another on the 24th...a total VIRGIN(2510, don't get so excited:-). NEVER installed in a vehicle, it was used as a base for 5 years and then put away in the original box. NO MODS. That's the one I'll prolly send to rogerbird for chipswitch/tuning.

Yeah, it's on my vehicle. Its a call sign license plate. You got some
problem with that?

> Why didn't
> you just meet him where he said was going to be?

As you so conveniently forgot I made the offer to meet at a local restaurant
in Royal Oak some months back. He said it was too far to drive. Then showed
up at my apartment behind my back sticking a note under the door saying
"PeePeeholic". Guess he lied that it wasn't too far to drive. Seems he can't
be trusted to do what he says so I don't have any reason to believe him if
he wants to meet some place.

Hello Everyone,

I would just like to tell you about my new Amateur Radio (CB's, too) swap page and would like to invite you to visit. I still have some changes to make but everything seems to be up and running.

My new web site is called The Online Hamfest!(tm) and it's located at: http://www.onlinehamfest.com

My web site is new and there's not much to look at yet but I've tried my best to make it look like a real live hamfest. There is a flea market area, free door prizes, a testing session and more goodies like a live chat frequency and games. Hopefully I have created, "The world's first live online hamfest!" :)

Cross-posted to: boulder.general,co.general,co.politics,co.denver.general,rec.radio.cb

All bring back fond memories. But I don't think that any but a few had them is this area. I mean highway stuff.
I grew up in an area outside of Chicago (you figure where) where US41 intersected with US 294 (a toll road) commonly known to truckers as the rich man's flatrock. It was an on-the-air meetingplace of those who had the money or corporate backing to run the toll road, and those who did not.

Lots of truckers stayed overnight with their honeys or slept in their cabs and talked into the night with each other and locals. The REACT team was big, and even the local cop shop had CBs in dispatch. Some cops and fire-rescue units had CBs in stations, trucks, and cars. Smokey was on the air a lot, as well as a handles like Squad 51 (of the TV show Emergency fame); Talking Towers (fire dispatch); Flash Camera (someone 'taking pictures' with a radar gun); Shadow and lots of other fun people.

The best part was that no matter what time of day or night you could get help, directions, call the cops on drunk drivers, or meet friends. Or you could talk 'skip' to the other side of the planet. I had weekly conversations with a guy in La Junta and another in the Grand Cayman Islands. You could be sure by sending QSL cards in the mail.
Nonsense like what goes on between Sammy and his sock puppet friend usually ended in a coffee meeting, laughs, and new friendships. Then they would get back on the air and continue to sound like twelve year olds. All in fun.

When I moved out here there was little of that. I once invited some kids that I had been hammering on with my linear over to my place. Really a block away just to be sure that they weren't nut jobs. Good thing too, because one of them had a sawed off shotgun. They played friendly on the air, but they were low down and mean spirited in reality.

With this technology, no one really wants to meet and greet, share a cup of joe or plan fox hunts. They really might want to kill you or kick your ass. I think of Coloradoans as friendly, but on anonymous chat groups such as this - who can tell?

I don't generally pretend to be someone I am not. I can certainly spoof my return address with the best of them, but why bother? I'm a public person and listed in the phone book. I am also fully capable of defending myself and my property.
What I would rather do is meet new people and have fun, but if their idea of fun is to kick my ass I will send them to jail via the hospital first.

2790. Amp question.....4 pill

Newsgroup: rec.radio.cb
Date: 2004-08-22 23:12:14 UTC
From: M-Tech <mechtechllc@yahoo.com>
Message-ID: <BNWdnZnPwaDNtbTcRVn-sQ@comcast.com>

sd-1446's. Appears to be in like new condition. I think it's of old manufacture, due to the quality of the work and size of the heatsink. It also has a fan on a temp switch(clik-on type). Brand is apache...says' "450 swing".

Sounds like too much from a 4 pill 1446.

Thoughts?

Don

That's the whole problem with this "internet tough guy" stuff. It will NEVER be a fair fight. You won't have the opportunity to send someone to the hospital first. They'll drop you in the front yard with a 9mm when you exit for work in the morning.

I trust NO ONE anymore. Used to be you could go one and one, respectfully. Hell, even when there were guys from BOTH sides standing around. Everyone had the integrity to let the two settle it. Times have changed. Kids today have NO RESPECT for their own lives let alone, yours.

Nah, it ain't worth it....

Hi Don -- guess you just dropped in and haven't been paying close attention.
First off I wouldn't meet them in my front yard, secondly I think that
everyone here already knows that I am armed. Not armed all the time, but
certainly if going to meet people that have expressed a desire to beat me
into submission.

The thing about children with guns is that they got their training from TV.
Like the Columbine twins: Harris and Kleybold. They spray bullets. No
directed fire.
I have no desire to kill anyone, so unless they have body armor over their
kneecaps ...

Anyway ... regarding not a fair fight - or internet tough guy stuff -- it
hardly matters. No one here is threatening anyone with deadly force. Just
commentary.
If Spammy and Poxie really didn't care to engage each other they would both
be pressing delete. Instead they are having fun.

I'm not sure why you are railing on KIDS. I very much doubt that there are
any kids yaking here.
Do you have a problem with the youth of amerika today? Perhaps you should
get involved with some youth programs and find out what things kids are
thinking about. The same things we were thinking about as kids. Having fun
and getting laid.

LOL...You wouldn't have the opportunity to meet them anywhere. They'd find
out where you lived and pop u coming down the sidewalk!! Armed or not, my
point is, you'll NOT have the opportunity to defend yourself.

And admittedly, I didn't read the whole thread, I was just commenting on
your;
"
I don't generally pretend to be someone I am not. I can certainly spoof my
return address with the best of them, but why bother? I'm a public person
and listed in the phone book. I am also fully capable of defending myself
and my property.
What I would rather do is meet new people and have fun, but if their idea of
fun is to kick my ass I will send them to jail via the hospital first."

My point being, people that want to take you out, won't give you the
opportunity to send them to the hospital first.

I don't agree...PARENTS, or lack thereof, is the reason for kids attitudes
today. Sure, violence on TV shows them how, but parents let them and give
them the opportunity.

>
> Anyway ... regarding not a fair fight - or internet tough guy stuff -- it

Problem with that is that Spammy thinks he's having "fun". Meanwhile,
Poxie, is scoping out Spammy's street.

Was speaking about kids in general...and I wasn't "railing" on them. I
never "rail". LOL!! You sure draw conclusions fast.

> Do you have a problem with the youth of amerika today? Perhaps you should
> get involved with some youth programs and find out what things kids are
> thinking about. The same things we were thinking about as kids. Having fun
> and getting laid.

Yes, I do. So do you. Unless you are not a member of society. And I am
involved. You? Like I said, kids of today do not have the respect kids of
yesterday did. And the problem is the WAY they "have fun" and the extent
they take it to.

> > Nah, it ain't worth it....
>
> To you perhaps ...

??? So it's worth getting into an internet argument and have someone sneak
over to your house and pop you while you sleep? I think we're not following
each other very well....LOL!!

Also, sorry, I didn't see that I was cross-posting. I do apologize to
everyone. This will be my last.

Enjoyed the QSO!!

Don

Usually down at the White Spot(remember those)after 1 am or whenever the
3.2 places closed down.

Denver's a lumpers' CB town (know what those are?) and 19 can be a real
brawl.

I'd guess Windy wasn't far off in some respects.

> When I moved out here there was little of that. I once invited some kids

Things have changed a bit, but Colorado has always had a nasty underside
to it, remnant frontier-ism or just latter day cow town attitude, dunno
which. You were smart to be a bit cagey there.

> With this technology, no one really wants to meet and greet, share a cup of

It's dicey...people in general don't show much that humor these days,
and those that do arm it with a razor tip.

It's all through the culture, maybe we should have legalized pot and let
the stoners run free...

I believe you are, problem these days is identity theft and hacking. Too
many malicious virus birthing young geeks who wrote their own version of
morality and don't mind making you or I a footnote.

You remember coax parties, some bad ass would get his coax snipped or
pinned and be off the air for a couple of days, but it was basically
harmless fun.

Time have changed.

Mass media generation, they learned the moves, but not the consequences.

That's common sense, and our 2nd amndt. RIGHT.

Good observation.

And yet these same punks would argue that they aren't affected by
violent video games or movies...yeah..right...

> I have no desire to kill anyone, so unless they have body armor over their

Well yes and no.

Poxie really wants to git me.

> If Spammy and Poxie really didn't care to engage each other they would both
> be pressing delete. Instead they are having fun.

That's true, it's all about choices.

I think poxie is scum and don't mind letting it prove the point for me.

So far, so good.

You'd be surprised Paul, this is a youth-oriented medium.

Universal constants.

But they're also being fed a steady diet of first person shooter games,
that has to have *some* impact on their minds.

You are what you pretend.

Remember when Superman was good enough?

That's true, but violence is pervasive in mass media, and kids are
targeted from a ridiculously early age as consumers.

A parent can only control so much of what a kid sees and is exposed to.

They can also try and be a bit more involved.

>>Anyway ... regarding not a fair fight - or internet tough guy stuff -- it
>>hardly matters. No one here is threatening anyone with deadly force. Just

I do.

> Meanwhile, Poxie, is scoping out Spammy's street.

Life is not without risk.

Then again this is the same pox that has been posting links to beheading
videos and running OUR nation down.

That kind of internal backstabbing (regardless of which party one
favors) is wholly unacceptable at time of war, and brother we are at war
- like it or not.

If pox makes a move on me I've notified relevant third parties who will
insure justice is served.

More than that, well...I play by the rules, others may not.

>>>I trust NO ONE anymore. Used to be you could go one and one,

Today, I picked up a turner plus 2 desk mic. This was the mic to have back when I was a kid (1970's) ... So I opened it up and guess what.... No mic element. So,,,,,
does anyone have any information on what type of element (i.e. characteristics, ohms etc) or does anyone know where to buy a new one, or does anyone have a working element for cheap????

Thanks in advance
Bob in phx

2803. Pure Prairie League

http://www.pureprairieleague.com/

http://www.goshornbrothersmusic.com/

http://www.oldies.com/artist/view.cfm/id_2859.html

This album proved their masterwork, one of the best and most underrated records produced in country rock. Its originality lay in the use of string arrangements, for which they recruited the services of former David Bowie acolyte Mick Ronson. His work was particularly effective on the expansive "Boulder Skies" and "Call Me Tell Me". A single from the album, "Amie", was a US hit and prompted the return of John Call, but when Fuller left in 1975 to form American Flyer, the group lost its major writing talent and inspiration. Powell continued with bass player Mike Reilly, lead guitarist Larry Goshorn and pianist Michael O'Connor. Several minor albums followed and the group achieved a surprise US Top 10 hit in 1980 with "Let Me Love You Tonight". Fuller joined with Little Feat, while latterday guitarist Vince Gill, who joined Pure Prairie League in 1979, has become a superstar in the country market in the 90s. At the end of the 90s Fuller had returned and was performing with O'Connor, Gerry House, Reilly and songwriter Gary Burr.

Sock Puppet is a capitalized proper noun.

Spammy is a sociopath, and really does want to kill people who disagree
with his crazed views.

Watch yer 6, Goose.

So quote me accurately with a valid message id then.

When did I threaten to kill anyone who "disagreed" with my "views"?

You went way far out on a limb there smacky, and I think maybe I'll take
you down in court.

Got some money for a good lawyer?

You'll need one.

I'll work you like a rusty well pump.

Too bad your running off. Sooo long I will miss these little chats.

Betcha Don's going to lower 35. Turn on your discrimantors or he will sound like Donald Duck. I have to go back to 19 and help the sixteen year old Mexican truckers with their NAFTA approved 130K lb loads with translations for the street signs down near the interesection of walk & don't walk. Dontca know ... back atcha in a short shake ....

Flash Camera

Thank you -- my point exactly. I'm not hiding under a rock because some bozo has ideas. I am a bozo and I have ideas. I speak (or write about them) at will. Free will.
If you are going to exercise free then you need to be able to back it up.

I used to actually think that. Training kids to shoot changed that somewhat.
Few seem interested in concentration and performance, and more in killing.
Since I am no longer a hunter, I cannot relate. I am not interested in
killing anything. Those interested in guns seem to want to kill everything.

hey - maybe the result of our middle-eastern war will turn out a new crop of pacifists with weapons proficency.

Do you think Pox is serious? Perhaps you SHOULD meet him, along with five of your best friends. Five of my best friends would include a few people with handcuffs and badges.

I dunno ... could be some lurkers, but UseNet just isn't very attractive to today's youth. Politically active youth may find
UseNet useful, but few flamers of youth here. Web based chat rooms are more to their liking.

Could be that poxie has misplaced his youth and found it here, but I doubt that he is a teenie.

Yes it does. One of the things that it does is create a farm for the military. Makes you wonder. Children who want to kill. Better pack them off to war before they shoot me in my front yard.
>
> You are what you pretend.
>
> Remember when Superman was good enough?

Batman was seriously violent. All that 'BIF' and 'BAM'. At least in Superman the same criminals didn't come back. Joker, Penguin and Frank Gershin repeatedly showing up as multiple henchmen. Just like our courts here in realityland.

yes. why not find poxie's address and pin his cable or snip his dsl?

ever pour water over a pinned cable in the winter? forces ice into the cable
jacket. really nice screw job.

> with his crazed views.

I think that I have disagreed with his views here several times so far. I
believe that sometime ago he may have called me 'stoopid' or something to
that effect.
we're still talking and agreeing on other things, and disagreeing on some
things as well.

No shots have been fired. A few of us here are either adults, or can at
least pretend to be adults. Reasonable ones.
I haven't asked General Sam (a proper noun pertaining to a person of
military rank) to have sex with me, or with himself, or with members of his
family or pets. You have.

>
>Thoughts?
>
>Don
>

It might push 450 watts PEP (not 'swing'), although 400 watts PEP is
more realistic (or 100 watts AM carrier power). The important things
to remember are that your input power may be as high as 30 watts PEP
(7.5 watts AM) for full output, and the peak DC current draw will be
at least 60 amps. Most important, the SD1446 is not a transistor you
want to over-volt -- it is recommended for operation at 12.5 VDC and
has a Vceo of only 18 VDC, so you might be taking some risk even if
you run it at normal alternator voltage (13.8 VDC). Instead, find a
nice, big deep-cycle battery to run this amp. Something around 100
Amp/hrs should give you about 4-5 hours of talk time per charge.

Some Turners were crystal, some were ceramic and a few were dynamic.
IIRC, they used different preamps for the different elements, so it
might be a hit-and-miss game to find a replacement. It's not likely
that you will find a new or NOS element for it. Fortunately, the mic
was sold as several off-brand models that you can pick up cheap on
ebay and elsewhere -- the logo and castings are different, but the
guts are the same. You might also consider installing an electret and
preamp which will sound much better.

>both. Goes both ways.

That should be plainly obvious. "their own turf" is on the ham bands
discussing issue which relate specifically to ham radio. As opposed to
here where the venue is CB radio and the things which affect it.

Yes, many people (myself included) enjoy both CB and ham radio. But
other than the fact that they both are 2-way radios, and they share
some propagation characteristics, there aren't many other issues that
are common. Things like RFI, antenna restrictions, and such are
notable exceptions.

>>And once again, two wrongs do not make a

If I bring up ham radio, it is only as either a contrast to, or as
supporting evidence to make a point. I'm not one to play the "ham vs.
CB" game. They're not in the same league, so a one-on-one comparison
is meaningless.

>ï¿½I don't care what anyone does as it's none of my business, or yours

You should know that other than death and taxes, there are no
"guarantees". Time will tell which side of the fence this issue falls
on. There may be pockets of remaining free-for-all anonymous forums
around with all sorts of "enter at your own risk" disclaimers attached
to them, just to pacify those who, for whatever reason, seem to feel
that they have to hide from everyone. The more serious forums will be
more regulated, and anonymity will not be allowed.

>_
>Man , are you off base and way wrong, but you are welcome to continue to
>insist on remaining so ignorant.

Ok, I think at this point a little clarification of terms is in order
here.

A "crime" is defined as an act committed in violation of the law.
The term "crime" is further clarified in an excerpt from:
http://criminal.findlaw.com/crimes/criminal_overview.html
which states that: "When a society and its government decide that
certain conduct is dangerous to citizens, or damaging to the society

as a whole, such conduct is labeled a "crime" and is made punishable by sanctions such as fines and imprisonment. "

Does violating the law with respect to FCC rules result in a fine or imprisonment? In many cases, the answer is yes. So operating on the freeband can be considered a crime.

Now we come to the terms "felony", "misdemeanor", and "summary judgement".

Again from:
http://criminal.findlaw.com/articles/1377.html

"Most states divide their crimes into two major groups -- felonies and misdemeanors. Whether a crime falls into one category or the other depends on the potential punishment. If a law provides for imprisonment for longer than a year, the crime is usually considered a felony. If the potential punishment is for a year or less, then the act is considered a misdemeanor. In some states, certain crimes, called "wobblers," may be either a misdemeanor or a felony, because the judge has the power to impose a sentence of less than a year (making the crime a misdemeanor) or more than a year (making it a felony)."

So the difference between a felony and a misdemeanor is based on the amount of jail time. Can the FCC impose a jail sentence longer than 1 year? The answer is again yes.

I also noticed the following passage, which explains your understanding of how things are:

"Behaviors punishable only by fine are usually not considered crimes at all, but infractions -- traffic tickets, for example. But a legislature may on occasion punish behavior only by fine and still provide that it is a misdemeanor, such as possession of less than an ounce of marijuana for personal use in California."

Ok, the FCC is a pretty busy agency. They are way understaffed to take care of the numerous enforcement actions that they have. But all this aside, there are cases where people are actually popped for various violations of the rules. These violations range for warnings, to fines, to actual jail time. People who receive warnings or small monetary forfeitures may not be considered "criminal" by the definition provided. Other cases, which involve larger fines and jail time, push it into the misdemeanor or felony category.

I guess whether or not the term "criminal" or "felony" applies in cases of FCC rules, is individual case dependant.

I apologize for applying an overly general definition to what is, by definition, an individually varying set of cases.

>
>>The only reason that I demand "justification" is

>>that you convey the attitude that ignoring
>>federal radio law, is somehow your God given
>>right.

>You're lying, Davie, You always falsely attribute this to me when your
>emotions get the better of you. The mere posting of any freeband or dx
>activity has you mistakenly and myopically interpreting such as a
>flaunt. Again,,,you've been wrong since day one.

What you consider and what other people interpret are often separate
things.
It's also one thing to pass along personal experiences, it's totally
another to encourage others to engage in activities which are in
violation of the law without at least recognizing the potential
ramifications.

>>Then I'll ask you this straight up: Do you feel
>>you have the right to ignore FCC rules with
>>regard to 11 meter operation? A yes or no
>>answer is all that is required.

>Unfortunately for you, I do not answer to you in the parameters you
>demand.

I'll take that as a "yes".

> Until you answer for my actions, you are owed nothing. This
>galls you.

No, it doesn't "gall" me. It's simply reflective of your disregard for
following rules which you feel are "unfair".

>You act like I randomly discard FCC law.

Ok, so the rules you choose to break are not random, but specific. It
changes nothing.

> I take great care where I operate and am educated of the frequencies I operate.

Meaning you know where you are least likely to get busted. That's no
different than a dope dealer knowing which corners to sell their
"wares" on, which have the least chance of being popped by the cops.

>You also infer that I do nothing but freeband.

I do nothing of the sort. No one is that single focussed. But I am
concentrating on those activities which are in violation of the law.
If you are operating on the legal 40, or legally operating on the ham
bands, then there is no issue.

> Again, nothing could be
>further from the truth. There have been times I went months without
>tuning the freeband. The only rule I continually disregard is dx
>talking which you incorrectly call a felony.

I settled that issue above. I doubt that simple DX talking would
amount to a felony conviction. But call it what you will, it is still
a violation of the rules.

>>ï¿½That you have rationalized that your rule
>>breaking is such small potatoes that it makes
>>it "OK" is hardly an excuse.

>Those again, are your words, not mine.
>
>>Then please, by all means, give us your words
>>on the subject. Why do you feel it is ok to
>>ignore the rules?

>I never said it was ok.

But you still do it?

>The why is of no consequence to you in any
>manner whatsoever. Ask a base jumper why he does what he does. Ask any
>enthusiast why he does what he does. it's irrelevant. You have great
>difficulty with this.

I have no difficulty with people enjoying activities. Most don't break
the law though, and that's the difference.

>>Do you not acknowledge that every citizen
>>owes society their pledge to be good citizens
>>and to abide by the established rules, even if
>>we might have a personal problem with one or
>>two of them?

>Hell no. When a society begins to stop questioning certain authority,
>the wrongs in the system will never be corrected. To lay down and accept
>the poor and ignorant mindset that ALL laws are good laws and as such
>must be followed without deviation is to invite corruption and abuse.
>This is absoutley necessary in a free society in order for bad laws to
>be done away with and innocent people be freed.

>>Yes, but in a civilized free society, the people
>>discuss, and decide if and when the rules
>>need to be changed or modified.

>So change the rules if you feel people like me should be tried for a
>felony for dx talking. Don't let me prevent you from instituting a
>campaign for this type change? Make sure you list the identity of anyone
>you find on this earth that agrees with you.

You've got it backward. It's already illegal to talk DX on 11 meters.
You should be the one to lobby the FCC to change the rules to
eliminate that prohibition and make it legal, instead of choosing to
ignore the existing rules.

And you know what? If you do, I'll sign the petition along with you.
I'm not against the activity at all. I'm just concerned with the legal

aspects of it.

>>We don't just arbitrarily ignore those
>>"a-la-carte" rules that we individually don't
>>agree with. That is a sign of anti-social
>>behavior.

>Which this country was founded upon,,,,dissent and what was then
>considered anti-social behavior.

That is a bit of a stretch. This country was founded on the concepts
of freedom. Those concepts do not extend to blatant anti-social
behavior, to the detriment of society at large. The rules and laws of
this (or any) country are enacted when they are in agreement with the
majority of its citizens. If a certain minority have a problem with
this, they can try to change things, but if they fail, they are not
permitted to ignore what they don't agree with.

>Jefferson said a healthy skepticism of
>government is necessary for an honest government, and that they should
>be challenged all the time. Now I know you don;t agree with this, as
>Jefferson was a patriot and freedom loving liberal and libertarian.

I believe in minimal government involvement in personal lives. I don't
believe in banning or outlawing activities, but I do believe in
enforcing laws which punish those who hurt others by their activities.

>>For the record, I agree with you that
>>.freebanding is small potatoes. The problem I
>>have is the slippery slope theory. Once you
>>start justifying the ignoring of small rules, it
>>becomes easier and easier to come up with
>>justifications for ignoring larger ones.
>

>That theory has been debunked.

>The pathetic conservatives tried saying
>that with their LAST waged war on an intangibles,,,,the lost war on
>drugs. They claimed pot was a "gateway" drug leading to harder drugs in
>order to justify their own failed policies.
>_
>>That the "war on drugs" may not have gone
>>the way we would have liked,
>>that does not invalidate the slippery slope
>>theory.
>-
>A theory is only that, a theory until proven. Your theory was debunked
>and is no longer even a theory.

Until you can provide proof that the theory has been "debunked", your
conjecture is merely hearsay.

>>If you take the time to read psychological
>>studies, the vast majority of kids who are on
>>"hard" drugs started with "small potatoes"
>>drugs like pot and alcohol. That validates, not
>>"debunks" the slippery slope theory.

>Wrong. Latest studies indicate kids exposed to TOBACCO and alcohol at an
>early age are predisposed to drug abuse.

Hello? You've just validated the theory. It doesn't matter whether the
substance was Tobacco or Pot, the fact that it lead to harder stuff,
is what the slippery slope theory outlines.

>>Until one is finally caught and made to pay the
>>price, this slippery slope will continue.

>Mmmmm,,thank God,,,,know what that smell is? It's freedom, Dave,,,and
>it;s like a breath of fresh air to the rest of us,,,,too bad it's like a
>rancor cancer to you.
>
>>Freedom is not a license to be anti-social.
>
>It most certainly is. Just because you have a personal problems with a
>bunch of behaviors of others does not make their behavior illegal.

Anti-social behavior is classified as illegal in some cases.

The link:
http://www.ci.olympia.wa.us/council/PublicSafety/behavior.asp

gives a good primer on how and why the laws of this country are
created, and what factors and behaviors influence them.

>>Nor is demanding accountability from those
>>who would abuse the right of freedom, an
>>affront to the concept of freedom itself.

>Abusing freedom, according to you, is remaining anonymous on usenet
>without revealing one;s personal real world identity.

When you use the cloak of anonymity to harass, disrupt and otherwise
degrade the experiences of other participants then it should be
considered an abuse.

Carl,

Thank you for the nice reply. :)

I am usually around during the evenings and am normally in the chat room talking with another radio friend. When you enter the chat type "/back 5" without the quotes to view the last five messages.

By the way, the door prizes came in last week. These are really nice radios and I almost would rather keep one for myself, hi hi. :)

>You have already demonstrated your disain and disagreeing with the law
>that allows anonymity in life, most recently, to usenet and CB.

The law does not allow a person to use anonymity to adversely affect
the rights of other people. That seems to be something you have
trouble understanding.

There are no absolutes when it comes to rights. Rights are always
relative, and subject to compromises, when they clash with the rights
of other people.

>>Decent people should be forced to yield to
>>malcontents, rather than fight back?

>partake in usenet, only you.

How can you make such a definitive statement? How can you be so sure
that I am, in fact, "alone"? You tend to make these blatantly absolute

statements quite frequently, when there is no possible way you can
speak with any authority on the subject.

You might want to do a Google search on the issues of privacy, the
internet, anonymity and the law regarding these things, and you will
find that quite a few people are looking to change the way things are
done.

>>I believe in the example of not saying

>dx rule.

Woah, lets not put words in my mouth. I wholeheartedly agree with you
that the FCC should remove the DX limitation. If it were up to me,
they should allow unlimited DX, allow 100 watts of power, and open the
band from 26.000 Mhz to 28.000 Mhz.

> AS always, you take an issue and slant it toward your own

>singular. Again, I ask who you refer in addition to yourself?

>> All that "We" refers to is anyone who happens
>>to be a member of this group who would like
>>the opportunity to "come forward". Nothing
>>nefarious about it.

>No,,you said how do "we" come forward if
>"we" don;t know who you are. Not many really care WHO I am in addition
>to yourself, Now, I ask again, who else do you profess to caring about
>my identity as much as yourself?

Your paranoia is showing again. I use the term "We" as this is a
public forum, which includes more people than you and I. That makes it
a "we" issue.

>Who I am and where I live is personal information, something you claimed
>you didn't seek.

>>I don't need to know, but if you want me to
>>"come forward" I do need to know some
>>details.

>Oh, I NEVER said I wanted you to come forward

Perhaps you've forgotten your own quote from a few paragraphs above:

" I invite anyone who has a problem with me to come forward." Do I
not count as "anyone"?

>,,,just the opposite, you
>said you were coming to Florida.

After you made your invite to "come forward".

> My invite hasn' changed. Anyone that
>wishes or "wants" to look me up can do do.

Look you up? How is one supposed to do that when you are not
forthcoming with certain pertinent information?

> If I was concerned about you,
>then I would travel to you, but this isn't the case. YOU apparently want
>to come forward, so come on down.

I'm merely calling your bluff. You know that I live an impractical
driving distance from you, so you feel relatively safe, in making that
claim. Now that you have an opportunity to make good on your invite,
you start, ever so slightly, to back pedal. I'm guessing that you will
find some way to wiggle out of any chance of a face-to-face meeting,
as it would blow the lid off of your secret life.

>> I mean Florida is a big state (assuming that is
>>where you really live)

>Well then, if you have doubts, perhaps you better reconsider.

>Many know where I live. I am incredibly easy to find, as Doctor X
>recently found.

>>Does Dr. X know where you live?

>Dr. X never asked.

So he doesn't know. Although you implied such in your last statement
above.

>>Does anyone?

>Oh yesiree

>>Somehow I doubt it. You are a little too
>>secretive about this. And you know all too
>>well, that once one person finds out, it'll only
>>be a matter of time before the information
>>spreads around.

>More of your far-removed delusions. I have ordered apparatus from two
>separate regular businesses on this group, one place twice. That makes
>two businesses in addition to those I have met from this group that
>"know" me.

We only have your word for that, so it is as meaningless as you claim
my accounts are of the CBer who got popped in Norristown.

Besides, anyone can use an anonymous PO box or other address to
conduct business. They don't even need a real name as long as the
payment is real.

> See Davie, these people don't give a damn as they don't have
>the motives you telegraph with your intentions to "spread around"
>personal information. This is undertaken by those like yourself.

They probably don't know it was you they were dealing with either.

I have found through many years of experience on CB, that one of the best ways to rid a channel of a belligerent anonymous troublemaker, was to simply locate them and then make that information public. Once they are unmasked, they tend to give up causing trouble, since they are basically cowards.

>

>rights. There are very many things I can do well within my rights that
>offend you, in fact, I have no problem offending you with my legal
>rights merely because you disagree with them and my right to exercise
>them.

If it is a simple matter of subjectivity and value judgement, then I
agree with you. But when the exercising of your rights negatively
impacts on the rights of others, the line becomes drawn, and some sort
of compromise is in order. Remember, you rights are not worth any more
(or less) than anyone else's rights. You have no exclusivity.

>>It has everything to do with the core issue.

>Which was what? Law? Breaking the law? Offending you isn't necessarily
>against the law.

We aren't talking about a simple case of "offending" me.

>>You are attempting to make value judgements
>>regarding the relative priority of the rights that
>>people have. You have prioritized the right to
>>privacy (and by extension enabled the
>>unaccountable actions of malcontents) over
>>the right of people to expect civilized behavior
>>in public places.
>
>
>I didn't make that priority,,,the law did.

The law has done no such thing. In fact, laws are being crafted right
now to deal with this relatively new forum for abuse, and to protect
the rights of people who are victimized by anonymous people who hide
to escape retribution.

>The law outweighs your demand
>for what you interpret as civilized behavior.

>> When those rights clash,
>>something has to give. You seem to have
>>made your choice, even though you keep
>>dancing around it and not quite ready to
>>directly admit to it.

>What you misinterpret as clashing rights is not illegal.

The truth in that statements depends on the details of the infraction.

You are entitled to see things from the other side of the glass, as it
were. But there is a big difference. Us "snobby" hams are not
interfering with other hams while pursuing our fringe activities, and
insisting that our "right" to pursue it, overrides everyone else
rights to enjoy their piece of the hobby. Yes, there are hams who do,
but I do not associate with them.

>confrontation you claimed would take place in the same manner in which
>you conduct yourself on usenet.

I don't "shy away" but at some point you have to realize that it's an
unwinnable situation, or you realize that you can put a 3 piece suit
on a pig, and he's still a pig. Even if I convince the idiots that
their echo boxes and distorted class "C" amplifiers sound like crap,

they're still idiots.

>>All it does it cause further arguments.
>-
>Same on usenet.

This is true.

>>You try to tell a nut that he's nuts, and they'll
>>swear you're crazy.
>-
>In all fairness and I'm not being cruel or mean or malicious, but coming
>from one who holds talking dx is technically a felony, and that roger
>beeps are illegal on cb, that doesn't mean much.

Roger beeps were at one time classified as an "amusement" device, and
as such was prohibited in 95.413 (6). While it is true that I cannot
find a rule which specifically addresses these devices, I can neither
find any information which specifically allows them, along the same
lines as selective call tones are specifically outlined in 95.412 (b).

Since there isn't a definitive rule in place, you can make the case
that they are, in fact, legal (or at the very least not worthy of
consideration). But it seems funny that this feature has not appeared
on most mainstream legal radios.

Echo boxes are a totally different issue. They fall clearly into the
classification of "amusement or entertainment" devices and as such are
specifically prohibited by 95.413.

>
>
>Nothing to rationalize. This is cb, not audiophile FM 101 High Fidelity
>Broadcasting. What you can't get, because you been in with the snobs
>that have a hard-on for cb too long, is that many, many folks don't look
>at cb like you do and compare it to hammie radio. The only thing many
>folks are interested in is making contact, not quality. Like a stereo,
>some folks spend big bucks for symphonic reproduction, others do ok and
>opt for a clock radio. Different strokes, but here you are bashing those
>folks that may use a legal item as is their right, on cb, all because
>*you* disagree and dislike their choice. Tsk tsk.

You don't have to be an audiophile. Some people are so distorted that
they are actually hard to understand. Yet these same mentally
challenged idiots think that they actually sound good! Excessive echo,
class "C" amplifiers, too much mike gain, no limiters, excessive
"swing" all contribute to overall poor audio quality. Many of these
"mods" also contribute to adjacent channel interference and RFI. There
is nothing even remotely redeemable about these actions.

Echo is not legal. Class "C" (or any other) amplifiers are not legal.
Removing modulation limiters is not legal. Transmitter modifications

are not legal. Generating RFI above the technical specifications is not legal.

So I'm not bashing people for liking different things than I do. I'm bashing people for their displayed ignorance of good RF practice and for displaying an indifference to, or an outright contempt for, other people's right of access to the hobby.

Would you listen to a radio with a torn speaker? Would it not bother you?

>>I tend to look at a glass that has 50% contents
>>as half full also.

>Not with CB, society, the FCC, and personal privacy rights you don't

>>Because, in those cases, the glass in much
>>less than 50% full.
>-
>No,,NOT in those cases, in YOUR personal experiences CB and society may
>be crumbling, but not to the rest of the world. What you experience is

>I'm sure a yankee will correct me to say it is you that are wrong and
>that people, even in the north, are generally good people.

>>That all depends on which circles you run in. I
>>find most hams in my area to be good people.
>>I find my neighbors to be good people. I can't
>>say the same for the "seedier" towns, or the
>>trash that populates the most popular CB
>>channel.

>Interesting. Do you feel there are more hammies or cbers in this
>country?

Not at all. Where would you get that idea? But there does seem to be more hams in my radio than there are local CBers. But that's an unfair comparison, due to the fact that many ham bands have long distance capability, and the sphere of my VHF coverage is much wider than the typical range for CB. I can talk back to my old area with no problem on 2 meters. Yet I can hear no one over about a S3 on CB, from a similar distance.

There are more total Cbers in this country than hams (at least it used
to be that way years ago), but the range of CB is relatively small and
results in "pockets" of users, not all of which can be heard beyond
their local range.

> You subscribe to socialist views and rhetoric,,,this is NOT how America
>is, but how you wish it would be.

>>You know, I really have to laugh when you
>>accuse me of being a socialist.

>It's true, In fact, this is another of those little times that I will
>not only remind you that we have had this conversation long ago and many
>times, but that in what remains one of my more favorite exchanges with
>you, you not only embrace socialist beliefs, but go as far as to DEFEND
>those beliefs and offer several reasons WHY you believe that bullshit.
>_
>>Do you even know what a socialist is?
>
>
>I do.
>
>>Do you
>>still think (like you once posted) that a liberal
>>and a libertarian are the same thing?
>_
>A liberal and a libertarian are very much similar and the same.

No, they are not. Liberals believe in big government oversight to
handle the plethora of social programs that they feel we need to have
shoved down our throats (At our tax expense). In fact extreme
liberalism is what leads to socialism.

A libertarian believe is the smallest amount of government that can
exist and still be effective. Extreme libertarian views lead to
anarchy.

Conservatives believe in somewhat limited government, and personal
responsibility. Conservatives believe in strong law enforcement for
those who cannot abide by the rules of society. Extreme conservatism
leads to fascism.

>They BOTH advocate the maximum liberties permitted under the law which is the
>exact manner of which I referred the two.

Wrong! You need to do some more reading........

>In fact, it is you and Frank
>who were shown not to know what a liberal is. Washington was a liberal.
>Our forefathers were liberals. This country was founded and built by
>liberlas.

Today's liberal is someone who wants freedom for everyone, as long as
it's according to their standards. A typical example is how the

democrats had no problem with letting Michael Moore trash the
president, but now scream foul when an independent group is now taking
aim on Kerry. Today's liberal is two faced, duplicitous, and
hypocritical. Today's liberal wants the working man to pay for the
habitually lazy. Higher taxes for richer people. From those according
to their means, to those according to their needs. Sound familiar? Try
reading Karl Marx for the answer.

>You have succumbed to partisanship rhetoric of the right, where all who
>dare question or oppose the Bush admin, are labeled a liberal. The term
>has become, albeit incorrectly, an intentionally misplaced catch-all to
>encompass anyone who opposes the current admin.

I've opposed bleeding heart liberals since the time I was aware enough
to realize that they were undermining the traditional values that this
country was founded on. Liberals are the ones who would defend the
"right" of someone to distribute kiddie porn, rather than acknowledge
that this is a social disease.

>>Please provide any exchanges that I have
>>authored where I defended the concepts of
>>socialism. I believe in limited government.

>Wrong, you favor government imposition and can't even see it.

Not at all. I believe is responsibility an accountability. You a re
free to do what you will, (within the framework of a civilized
society) but you are solely responsible for the effects of your
actions (or inactions).

>>I believe in personal responsibility (and
>>accountability).

>So do the majority, but you also believe you have the right to mete out
>accountability as you see fit, in your most recent example, by requiring
>the identity of those who post to the internet.

Accountability is universal. Every action that you do, has the
potential to affect someone else. You need to be accountable to those
you affect.

>> I believe that government should not restrict
>>access and actions, but should prosecute
>>those who abuse their rights.
>
>-
>Abuse is a relevant term and what you consitute defines abuse has
>already been shown to not always be illegal, so no, when one "abuses"
>their rights, say, to the point of offending the hell out of you for
>their behavior or for what they say, no, there should be no
>"prosecution".

Laws exist to codify "abuse".

>You not being aware of how this
>adminsitration has snowballed sheople like
>you isn't at all
>funny, it's frighteningly pathetic.
>-
>>Only if you have your own partisan beliefs
>
>
>The rest of the world would hold you claiming and posting that you are
>voting for George Bush constitutes a partisan belief. That you used his
>name and the words "against socialism" in the same sentence with a
>straight face and actually made yourself believe it, is even more
>telling.

That you think that GWB is synonymous with socialism is even more
telling.

>>I am the
>>biggest fan of the free market, capitalism,
>>freedom, and personal responsibility. Hell, I'm
>>voting for Bush, that's about as far away from
>>a socialist as you can get.
>_
>I'll make this very simple. Bush swore with his hand upon the Bible that
>he would uphold and protect the constitution. Immediately after taking
>office, he launched an assault upon it.
>His reasons for doing so are irrelevant, as are yours.
>-
>>He did nothing to the Constitution.
>_
>Wrong. He repealed the Fourth Amendment via the Patriot Act in the name
>of terror when deemed necessary.

This is the same power already given to law enforcement for use
against drug dealers. It still requires a court order. You need to
read the fine print.

>Adding to this, not single conviction has resulted from the (un)Patriot
>Act,,not ONE!

What does that mean exactly? That's like concluding that since WMD
have not been found yet, that they never will. You seem to take the
future for granted.

>>He merely
>>granted the same powers currently afforded to
>>law enforcement, to those involved with the
>>fight against terrorism.
>
>-
>Huh? What does that mean? Those in Law Enforcement ARE the ones involved
>in the repub's manufactured war on another intangibe, er,,"terrorism".

It broadened the power which used to be restricted to other uses (like
drug traffickers) to now include terrorists.

>_
>>Have you read the
>>entire Patriot act? I have, and I find nothing in
>>it that isn't necessary if we want to improve
>>our chances against those who take
>>advantage of our lax security to do us harm.

>If you read it, you may want to have someone read it to you, cause you
>missed the part about not needing a warrant in certain cases which has
>NEVER been afforded law enforcement until now.

You still need court approval to perform those functions. No one has
ultimate power.

>The majority of
>American's (THANK GOD) do not subscribe to your bullshit about allowing
>the authorities and anyone else an open book to your life "if you don't
>have anything to hide".
>-
>>You have no way of knowing what the majority

>>thinks or wants.
>-
>Sure I do, Davie. Many people have such a talent. Some people spot
>market trends, some people know fashion opinions, some know political
>opinions, many people make a living off of similar talents, Davie. But
>keeping with your line of bullshit, it is *you* that have no way of
>knowing what I know. For all you don't know, I could be involved with
>the current political polls that usually have a margin of only a 3%
>error. Suhc is highly idicative of the pulse of the people. Once again,
>Frank accused me of writng for Pop Comm and Monitoring Times. Assuming I
>did, that would mean I am much closer in touch with my readers, who just
>happen to be,,,taa daa,,,hammies and cbers, tahn you care to
>acknowledge. So you see, these are but a fraction of the multitude of
>possibilities that decimate your incorrect hypothesis.

That means nothing. If you take a poll of dopers at a rock concert on
their feelings WRT legalizing pot, you would get an overwhelming
majority in favor of it. If you look in a fish store, should it
surprise you to find fish there?

>>Unless of course, you're omnipotent. You only
>>know what YOU want and the small circle of
>>people you associate want.
>
>_
>Umm,,,see above. Heck, with Sporadic Waves alone, there was never a
>"small circle". Some day you may wish to think big, as in big "circles",
>Davie. the big doggs are not sleeping on the porch in small circles.

It's still small potatoes. Sporadic Waves was a 3rd rate rag.

>>As I stated before, I am a big supporter of the
>>concept of freedom.

>Except when it comes to others exercising
>THEIR freedoms that you think should be
>curbed,,such as the right to anonymity on the
>internet, just for starters.

>>There is no good reason why someone needs
>>to hide.
>>You can't give me a good reason why
>>someone deserves the right to be able to hide
>>from others.

>You aer owed no reason. This is your problem and the source of your
>hostility toward anonymity. You are owed nothing when a citizen
>exercises their rights under the law.

>>Especially when that right threatens the rights
>>of other people to the expectation of civil
>>discourse.
>
>-
>You have NO right to expect civility among anyone. It would be great in
>a perfect world if that were true, but there is no law outlawing those
>who are not civil. Once again, there is too much personal interpretation
>here for you to claim you have a right to expect civil behavior from
>everyone. That there is NO law outlawing these things you feel out be
>illegal shows that I indeed am in touch with the majority of the
>opinion, as if the majority felt like you, rudeness/non-civil acting
>folks and anonymity would be illegal.

Certain behavior is illegal. Things which fall under disturbing the
peace, disorderly conduct, creating a public nuisance etc.

>>When that right conflicts with the right to
>>expect civility and accountability in public
>>places then I favor civility and accountability.
>
>_
>Once again, you have no right to expect civility by anyone, let alone
>demand accountability from another.

I have as much right as everyone else.

JC Whitney sells (or at least they used to sell)
these neat little devices that attach to the top of the door's window
sort of like the trays did at the old drive in resturants. It runs on a
nine volt battery and has a little fan for air exchange,,,prevents the
vehicle from becoming a virtual oven. I bought several of them at a flea
market some years ago. Great gadgets.

Then you'll have to come to court, and I'll see you there.

You're an idiot if you think a made-up sock puppet cowering in the shadows of anonymity can be represented for libel. You have no rights. Post your name and prove that my words had some actual damage to your prefoessional credibility, and then you might have something, if you can afford the $150 an hour that the lawyer is going to cost.

Wow, you can do an nslookup. BFD, so can 80% of the people on USENET. I don't take the kinds of paranoid precautions that you do to mask my source or identity. You need to pay giganews to hide you. Don't talk tough to me, for I know you whimper and cower in fear of discovery.

I've only put on 7900 miles since I took delivery at the dealer last December. Only took about 4 weeks to get it built after placing the order and came in at a sticker price of $38,400. Leather interior, factory 180 watt sound system with 6-way Pioneer speakers, built in Nav system with DVD player and LCD map display/voice promtps for turn by turn directions, 10 disk CD changer, dual zone climate control etc.

Over 38G? (sound of whistle here)!! If you bought a mini van, it must have been a Chrysler Town and Country at that price. As far as vans go, I'm a Dodge fan, then comes Chevy, then Ford...where trucks are concerned, I'm a Ford freak until they build something that rides like a Ford and where the engine runs like a Ford, but lasts as long as a Chevy. When it comes to off road, gimme Jeep. Anyhoooo, are you going to be running a radidio in this new van? Are you making a swivel ball mount or what? I hate making these decisions regarding new vehicles.

Somehow I think that if the two of us dropped off the board, there would continue to be no shortage of verbal sparring. Watching the technical wars between those who know what they are talking about is much more interesting than all the other bullshit. I can't tell ya' how much I've learned watching the debates. Just trying to do the research to figure out who is right on some of these debates results in a bunch of knowledge being acquired.

It's taken my several years, but I've finally reached the level where removing the cover from a radio and doing my own soldering on some minor

issues is finally no longer intimidating. I guess I've arrived at the wanna-be-hack level. For example, I just had a probem with one of my radios that had never given me any type problem before. It seemed like an audio stage dropped out. Once ascertaining it wasn't the mic or jack, I had a decision to make. Call the new tech in town (my fave tech died recently) or make it my project and maybe ruin the radio.
The radio is pretty easily replaced, so I figured, what the hell. I opened 'er up and really didn't have that much of a clue what I was looking at. My original plan was to open it up, come out here, and ask the group "It's open. Now what?"
I saw a solder joint broke up front of the radio and another one right next to it that looked like it was about to break (thin, weak, and it "gave" a bit when slight pressure was applied). I resoldered both of them and now it's fine. Yea yea, I know,,luck of the Irish and all that....but, hey, it worked.

>require you're identity?

QRZ

>Bullshit

>they don't

They do.

>They don't

>cite them,

I did.

>Incorrectly

>post them

www.qrz.com

>wrong

No, that's really qrz.

>prove it

I did.

>In your mind

(shrug) Go read it from their website for yourself.

>liar.

Incompetent ignoramus.

>You are incompetent, they require a email

>address and a nic name, any name to

>participate just as most all private web sites.

You can not participate in qrz's hammie forums and general discussion areas without your call.

>There is no identity revealed you buffon. Just

>cartoon character names kinda like you use.

You're always back-pedaling. You apparently just found out for your loathesome self that they DO require your personal identity for such and now you're scrambling with your painted black fingernails to grab on to anything you can. You apparently took a liking to the conjured term "reveal". I said your identity was required for posting, you said it wasn't found out otherwise, and are now changing your tune and entering the term "revealed" when no one claimed such except YOU. Nevertheless, you're 100% incompetent and incorrect. QRZ requires the your identity for full posting and general discussion privileges. Educate yourself and stop insulting those who enlighten you to that of which you have no clue.

There you go again bleeding all over the group because you're a wannabe moderator. Who are you to say what is related?

_
Well certainly, but also as I have always maintained, snipping only a passage from a post and alienating it from its original text almost always changes its meaning, but then again, to illustrate the post in its entirety and the reply of which it was directed would certainly disqualify your scoundrel activity of which we have all become so fond. All groups need examples of the worst and the best. You're our worst.

I like chess, but pool's my thang. 9 Ball, if you will.

>Or are you saying that we all should just have

>to deal with abusive insulting and libelous

>comments because they are not worth the

>trouble to pursue seriously?

If my emotions were to take over, I would simply turn the thing off and walk away. No one is forcing you to partake in what you view as an injurous electronic arena. It is your choice.
-
>The same "turn it to the left" mentality that

>abusive CBers use to force good people off of

>the CB band?

The very idea that you feel "forced" by another has moved you to the point of wanting to force others to conform to your beliefs,,,nice.

>Not forced to conform to "my" beliefs. Only

>that they maintain a certain level of

>accountability and by extension civility.

Yes,,accountability and civility according to YOUR beliefs, not the law. You have already demonstrated your disain and disagreeing with the law that allows anonymity in life, most recently, to usenet and CB.

>The law does not allow a person to use

>anonymity to adversely affect the rights of

>other people. That seems to be something you
>have trouble understanding.

I understand just fine. You think you have some sort of right to operate free from whatever it is you call "adversely effecting your rights", whether or not what you refer to as a "right" is affected legally or

not.

-
>There are no absolutes when it comes to

>rights. Rights are always relative, and subject

>to compromises, when they clash with the

>rights of other people.

No,,rights are not relative. You are undermining the inherent, not relative rights afforded us as US citizens. Rights are NOT subject to compromises as they are specifically, not relatively spelled out in the US Constitution.

-
>Decent people should be forced to yield to

>malcontents, rather than fight back?

That is a personal decision and an apparent unresolved issue that plagues you.

>So you posit that decent people should be

>held hostage to the whims of these

>malcontents, and those of us who feel

>otherwise have "issues"?

There are no "us", as you are alone in your radical beliefs. No one else feels "held hostage" or "forced" concerning their freedom of choice to partake in usenet, only you.

_
>How can you make such a definitive

>statement? How can you be so sure that I am,
>in fact, "alone"? You tend to make these

>blatantly absolute statements quite frequently,

>when there is no possible way you can speak

>with any authority on the subject.

I can and do speak with authority on the subject. I know exactly what the public likes and dislikes covering a broad spectrum. I know when there is a news worthy event the public enjoys reading about, I know what information they are seeking and what is not important. I know how much is too much information and I know how much is not enough. This is necessary criteria when dealing with the public as I do in such a manner. My broad experience catering to the general public as both A) my client and b) audience for many years affirms what you claim the opposite.

–

>You might want to do a Google search on the

>issues of privacy, the internet, anonymity and

>the law regarding these things, and you will

>find that quite a few people are looking to

>change the way things are done.

I'm on the front lines of the threats to personal privacy and the protection of media sources, but thanks for the head's up. Here's the skinnny, No doubt there are those seeking to do such things and it began with the assault on the US Constitution by Bush after taking office.These movements you speak of will fade after November when us freedom lovers tell GW Bush "You're Fired!"

-
>I believe in the example of not saying

>something on a forum, that you wouldn't have

>the cajones to say to someone's face.
-
Very noble. Many agree with you. Obviously, those like Dogie, do not.

>Doug has personal issues of his own.

.and he fostered his personal issues on this group. Again, I ask of you, how would you he be held accountable for such behavior that you continue to rail against?

>If you are asking how Doug should be held

>accountable, first I'd have to ask; how do we

>know for sure that the person everyone thinks

>is Doug, really is?

Yea, you already established that the same entity (the FCC) you say we should all obey can be mistaken when it comes to Dogie's bust, but they couldn't possibly be mistaken in not repealing their poorly constructed dx rule.

>Woah, lets not put words in my mouth. I

>wholeheartedly agree with you that the FCC

>should remove the DX limitation.

>If it were up

>to me, they should allow unlimited DX, allow

>100 watts of power, and open the band from

>26.000 Mhz to 28.000 Mhz.

The 100 watts issue doesn't even faze me,,,I don't need it, but I can appreciate many others need for it in the hills. Besides, 100 watts will make me a big gun on the bowl <g>.

-

AS always, you take an issue and slant it toward your own agenda, invoking it (the FCC) as one we should obey, but not necessarily believe. More hypocrisy.

>Well, yea, if you assume to know what I think,

>as opposed to what I really think.

While I don't profess to know what you think, I do know it's not in the majority.
And you have done just that, taking the FCC and invoking that we should blindly follow their rules, even if the rules are wrong. On the other hand, you have made an argument that even though the FCC claimed Dogie was guilty via his listing on the Rain Report for jamming, his innocence may still be very possible. This shows you blindly follow the FCC when it suits you, but question their authority when it does not, even when enforcing the rules you claimed we should blindly follow.

_
> Once we establish that it is him, then he

>should have his access revoked for behaving

>in an inappropriate manner.

Well, there you have it. It is not up to YOU to establish anything. His antics have been reporeted many times by the many on this group and he has lost several accesses to this group over the years. Yet, it is not up to any "we" to establish his wrong doing,,,that is the job of his isp, and when they find such, as they had in the past, they take action,,not you, despite the status you seek.

>I don't care who does it, as long as it's done.

_
I have incredible restraint and am overly polite, even to you in many instances when you began reambling off-topic with insult. I invite anyone who has a problem with me to come forward.

>How does one "come forward" if we don't

>know who you are or where you live?

"We" lends the notion you are aware of someone, other than you, who shares your incredible identity obsessions and problem regarding myself. Care to specify?

>That is paranoia speaking.

No, it is a command grasp of basic English. You said "we". "We" is not
singular. Again, I ask who you refer in addition to yourself?

> All that "We" refers to is anyone who

>happens to be a member of this group who

>would like the opportunity to "come forward".

>Nothing nefarious about it.

No,,you said how do "we" come forward if "we" don't know who you are.
Not many really care WHO I am in addition to yourself, Now, I ask again,
who else do you profess to caring about my identity as much as yourself?

-
>Your paranoia is showing again.

Paranoia doesn't have an open door policy. Paranoia is seeking personal
and off-topic information on someone you debate on usenet.

-

>I use the term

>"We" as this is a public forum, which includes

>more people than you and I. That makes it a

>"we" issue.

Not concerning this issue, it doesn't.

–
Who I am and where I live is personal information, something you claimed
you didn't seek.

>I don't need to know, but if you want me to

>"come forward" I do need to know some

>details.

Oh, I NEVER said I wanted you to come forward

>Perhaps you've forgotten your own quote from
>a few paragraphs above:

" I invite anyone who has a problem with me to come forward."

>Do I

>not count as "anyone"?

Certainly. If one has a problem with me, they will come to me, as it is
THEIR want, not mine. You certainly couldn't expect someone to come to
you because *you* have the problem.

–

,,,just the opposite, you
said you were coming to Florida.

>After you made your invite to "come forward".

My invite hasn' changed. Anyone that
wishes or "wants" to look me up can do do.

>Look you up? How is one supposed to do that

>when you are not forthcoming with certain

>pertinent information?

Already told you. Send me your cell number,,I'll guide you in. This is
my second attempt at assisting you.

-
If I was concerned about you,
then I would travel to you, but this isn't the case. YOU apparently want
to come forward, so come on down.

>I'm merely calling your bluff.

No bluff to call. I have made more than a few accomodating offers of
which you continue to offer additional excuses.

> You know that I live an impractical driving

>distance from you, so you feel relatively safe,

>in making that claim. Now that you have an

>opportunity to make good on your invite, you

>start, ever so slightly, to back pedal. I'm

>guessing that you will find some way to wiggle
>out of any chance of a face-to-face meeting,

>as it would blow the lid off of your secret life.

Cell number.

> I mean Florida is a big state (assuming that

>is where you really live)

Well then, if you have doubts, perhaps you better reconsider.

_
Many know where I live. I am incredibly easy to find, as Doctor X
recently found.

>Does Dr. X know where you live?

Dr. X never asked.

>So he doesn't know. Although you implied

>such in your last statement above.

No,,I said I am incredibly easy to find, not that Dr. X knew where I lived as you improperly implied.

>Does anyone?

Oh yesiree

>Somehow I doubt it. You are a little too

>secretive about this. And you know all too

>well, that once one person finds out, it'll only

>be a matter of time before the information

>spreads around.

"Spreads around?" Are you for real? Only people like you give a damn about "spreading around" personal information of those they debate on usenet. Most have enough on the ball that simple things such as usenet anonymity doesn't upset them or effect them to the point of threatening to not only seek out their personal information, but to "spread it around".

_
More of your far-removed delusions. I have ordered apparatus from two separate regular businesses on this group, one place twice. That makes two businesses in addition to those I have met from this group that "know" me.
-
>We only have your word for that, so it is as

>meaningless as you claim my accounts are of

>the CBer who got popped in Norristown.

(shrug),,fine and dandy. I'm not worried about who believes me or not...never was.

>Besides, anyone can use an anonymous PO

>box or other address to conduct business.

>They don't even need a real name as long as

>the payment is real.

I always purchase by cc as it offers great protection. Name required.

_
  See Davie, these people don't give a damn as they don't have the motives you telegraph
with your intentions to "spread around" personal information. This is undertaken by those like yourself.

_
>They probably don't know it was you they

>were dealing with either.

It was I the businesses emailed after reading my posts, so there is no question they know who they were dealing. In fact, I received many emails for the same offer, but went with who I thought was the best choice, not necessarily the cheapest.

-
>I have found through many years of

>experience on CB, that one of the best ways

>to rid a channel of a belligerent anonymous

>troublemaker, was to simply locate them and

>then make that information public. Once they

>are unmasked, they tend to give up causing

>trouble, since they are basically cowards.

What trouble would you be referring or implying that fits this analogy?

-
>Ok, I'm coming to Orlando in October. I might

>make a detour to Tampa. Where do you want

>to meet?

My house. Are you driving? Bring a radio. I'll guide you right to my front door from the interstate.

>I'm flying, renting a car, no room to pack

>radios. Doing "Mickey Mouse" for my kid.

Mickey Mouse is like a six foot rat to little toddlers.

>My daughter just wants to ride Space

>Mountain, and see all the sights.

Call ahead and make sure it's not closed for maintenance as it always is these days.
-
 I'm 90 minutes from Orlando. Provide me a
cell phone number like Keith did and I'll call you, if that's what you wish.

>I don't own a cell phone. But I might bring a 2

>meter H.T. There are several 2 meter

>repeaters in the greater Tampa area. You

>already know my callsign.

No dice. Assuming I had a call, there is no way I would volunteer such information to another hammie who has already expressed his problem with me and threatened to "spread around" any personal information he can locate, assuming he can break the impotent streak he has had attempting same for the past how many years.

-

Give me your room number and the hotel you are staying and I'll call you. This is now the third attempt I am making to accomodate you and you appear, however so slightly, to begin yet another back pedal.

-

I'll give you precise directions. In
fact, if you rent a room in Tampa Bay for a day, I'll take you and show you the way Florida was millions of years ago. Some areas remain untouched.

>I've seen some of those areas. I'm no newby

>to Florida, although I tend to prefer the east

>coast. I almost moved to Melborne 14 years

>ago. I might even stop at my favorite steak

>house, Farmer Jones Red Barn in Lakeland. I

>hope they're still there.

I have relatives in Palm Beach and have surfed Melbourne in the past, in addition to Jupiter and Cocoa. Other than that, I prefer the clear water and white sands the west coast offers.

-

>Anonymity is the enabler for people to act

>inappropriately, and rudely.

-

>So then you assert that an American's right to

>act like an anti-social idiot deserves more

>consideration than other people's right to

>expect civilized behavior in public places?

You said that. You're wandering. You are confusing consideration with rights. There are very many things I can do well within my rights that offend you, in fact, I have no problem offending you with my legal rights merely because you disagree with them and my right to exercise them.

>If it is a simple matter of subjectivity and value

>judgement, then I agree with you. But when

>the exercising of your rights negatively

>impacts on the rights of others, the line

>becomes drawn, and some sort of

>compromise is in order.

Only we weren't speaking of infringing on anther's rights,,,,*you*
entered that into the equation when you expressed your belief against
anonymity on the internet. You wish to infringe on another's right
(taking away the right to be anonymous on the internet) merely because
you feel it MAY lead to abuse. That's Orwellian and anti-American.

>Remember, you rights are not worth any more
>(or less) than anyone else's rights. You have

>no exclusivity.

>It has everything to do with the core issue.

Which was what? Law? Breaking the law?
Offending you isn't necessarily against the law.

>We aren't talking about a simple case of

>"offending" me.

But we were. YOU have the problem with anonymity. No one else is having
a cow over the issue on this group, so it indeed does offend you, so
much to the point, that you have made it clear that you wish it were no
longer so.
–

>You are attempting to make value judgements
>regarding the relative priority of the rights that

>people have. You have prioritized the right to

>privacy (and by extension enabled the

>unaccountable actions of malcontents) over

>the right of people to expect civilized behavior

>in public places.

I did no such thing. You have no "right" to expect what you call
"civilized" behavior. Show a single document that supports this
delusion.

>The law has done no such thing. In fact, laws

>are being crafted right now to deal with this

>relatively new forum for abuse, and to protect

>the rights of people who are victimized by

>anonymous people who hide to escape

>retribution.

The law outweighs your demand
for what you interpret as civilized behavior.

> When those rights clash,

>something has to give.

You have been asked over and over again and have yet to reply,,what
rights of yours have been infringed upon or do you consider "clashing"
with your rights by my postings?

> You seem to have

>made your choice, even though you keep

>dancing around it and not quite ready to

>directly admit to it.

What you misinterpret as clashing rights is not illegal.

>The truth in that statements depends on the

>details of the infraction.

Anonymity is what originally set you off on a tangent about such
behavior clashing with your rights, which you have yet to define.

Oh, I know what Philthy is about...been there many times.
Some see hammies like yourself as the
malcontents for feeling you have some sort inalienable right to demand
cbers jump through the same hoops you must jump through regarding hammie
radio.

>You are entitled to see things from the other

>side of the glass, as it were. But there is a big

>difference. Us "snobby" hams are not

>interfering with other hams while pursuing our

>fringe activities, and insisting that our "right" to
>pursue it, overrides everyone else rights to

>enjoy their piece of the hobby.

Neither do I, but you continue to try and pigeonhole me as such for
merely posting of freeband activity and dx, yet, nothing in my posts has
ever had a remote relation to what you falsely promote.

>Yes, there are hams who do, but I do not

>associate with them.

–
>What "hoops" are there to just acting in a

>civilly responsible manner?

Read again: "same hoops you must jump through regarding hammie radio".
That you responded with hammie radio as an example in acting civilly
responsible is not the best example you could have chosen,,in fact, it's
a poor one.

>Again, like on CB, this is largely

>geographically dependant.

Despite your belief of it being geographically dependendent (it's
not,,,,there are good and bad everywhere in both services)it doesn't
validate your contrived gaffe.

>But I will say, that I've personally witnessed far
>more rule abuses on CB than on ham radio.

Again, your personal views and beliefs have been demonstrated to be in
the minority,,,,,

_
Then what is preventing from you from getting on that channel and
speaking your mind to those people as you do on here concerning your
radical and minority beliefs.
-
>Nothing. I've done it already. But what good

>will it do?

I've asked that of you concerning here and your answer was always along
the lines of "you have got to start somewhere" and "someone has got to
take a stand". It appears you shy aways from live real-time
confrontation you claimed would take place in the same manner in which
you conduct yourself on usenet.

>I don't "shy away" but at some point you have

>to realize that it's an unwinnable situation,

At the risk of being called a cad and yelling "na na nee nee boo
boo,toldjaso"....you'e been told that for years by myself and others.
What point was the epiphany you experienced??

>you realize that you can put a 3 piece suit on a

>"C" amplifiers sound like crap, they're still

>idiots.

>All it does it cause further arguments.

See prevous sentence..

-
Same on usenet.

>This is true.

>You try to tell a nut that he's nuts, and they'll

>swear you're crazy.
-
In all fairness and I'm not being cruel or mean or malicious, but coming
from one who holds talking dx is technically a felony, and that roger
beeps are illegal on cb, that doesn't mean much.

>Roger beeps were at one time classified as an
>"amusement" device, and as such was

>prohibited in 95.413 (6).

I doubt roger beeps were ever classified as such and as a result,
illegal on cb, but even if that were so,,,many things "used" to be a
certain way,,,,,it's no longer. It's a brave, new world*.

_
>While it is true that I cannot find a rule which

>specifically addresses these devices, I can

>neither find any information which specifically

>allows them, along the same lines as selective
>call tones are specifically outlined in 95.412

>(b).

>Since there isn't a definitive rule in place, you

>can make the case that they are, in fact, legal

>(or at the very least not worthy of

>consideration). But it seems funny that this

>feature has not appeared on most mainstream
>legal radios.

I do believe some of the newer legal radios most certainly have them.

>Echo boxes are a totally different issue. They

>fall clearly into the classification of

>"amusement or entertainment" devices and as
>such are specifically prohibited by 95.413.

I disagree, but let's assume you right on this item. I would challenge
the validity of this on several counts,,,the most obvious being the fact
that sound and broadcast engineers use echo (not repeat, but slight
reverb echo) on FM broadcasts for many commercials and ads for a
specific reason,,,,it gets noticed and is often more recognizeable and
often louder. As such, one could make the argument, it is an audio
"enhancer", not entertainment device, and with the myriad of broadcast
sound engineers backing my case, I would feel extremely confident
handling my own situation, if this were it. As you now are most astutely
aware, what you consi enhancement and what I consider enhancement is now
very much subjective. Again, ask Phil Kane what must take place now
(once this case is challenged). The FCC would have to rule (FIRST, and
before any further prosecution) what constitutes "amusement devices" and
specifically address the echo issue, just as they recently ruled what
constitutes broadcast obscenity.

_
> You can't make an idiot into a normal person,
>so why try? Birds of a feather stick together.
-

Which is why you have defended Dogie and attempted to present an incredibly spaced out and fantasized case for Keith framing him, even though the FCC busted him for jamming.

>I never accused Keith of framing Doug. I wish

>you would look back on your links and realize

>that. I postulated that it was possible that he

>might have been framed, but I never accused

>any one person of doing it.

I stand corrected, You "postulated" that the FCC, who you profess we should blindly follow, may not have the facts of the case before telling the public one is guilty. I question your logic and intellect to blindly follow an agency who crafts law, yet you claim same agency could be incompetent in upholding said law.
Do you not see the sheer hypocrisy of such talk?

_
>My only hope is that a group of decent people

>will decide to start another channel that I

>would be happy to participate in. I'm already

>working on a CB reunion for some of the old

>crew that I've contacted. This might spawn a

>"retro net" where we fire up that vintage gear

>for some old fashioned CB fun.
-
Now that might bring back some of the fun with cb that has eluded you for some time. Heck, we have get togethers all the time here. On any given day one can tune in and hook up with countless fishermen all over the bay area,,many of them sitting in their cars chewing the fat while fishing.

>Those are some of the things I sorely miss.

 After all, that would make you proactive instead of reactive like you have always been here, and I am certain we can count on you to offer your beliefs to those on the air using those noise toys that have you bleeding from the ears and nose, because we all know you believe in saying the same things here as you would face to face. Try it with the noise toys and on the radio with these people,,tell them they are the equivalent of the WWF. Report back.

>Been there, done that. How do you rationalize

>the detrimental effects of distorted audio, such
>as that produced by an echo mike, to

>someone who has that "kid on Christmas" look
>on his face at the discovery of his latest toy

>(that he probably spend half his fast food p

>aycheck for)? He doesn't care that it makes

>his audio hard to understand. He just thinks

>it's "cool". Must be something in the water

>around here.....

-
Nothing to rationalize. This is cb, not audiophile FM 101 High Fidelity Broadcasting. What you can't get, because you been in with the snobs that have a hard-on for cb too long, is that many, many folks don't look at cb like you do and compare it to hammie radio. The only thing many folks are interested in is making contact, not quality. Like a stereo, some folks spend big bucks for symphonic reproduction, others do ok and opt for a clock radio. Different strokes, but here you are bashing those folks that may use a legal item as is their right, on cb, all because *you* disagree and dislike their choice. Tsk tsk.

>You don't have to be an audiophile.

Correct,,but you apparently are, and are expressing difficulty grasping why others are not so concerned with these nuances.

>Some

>people are so distorted that they are actually

>hard to understand. Yet these same mentally

>challenged idiots think that they actually sound
>good! Excessive echo, class "C" amplifiers,

>too much mike gain, no limiters, excessive

>"swing" all contribute to overall poor audio

>quality. Many of these "mods" also contribute

>to adjacent channel interference and RFI.

>There is nothing even remotely redeemable

>about these actions.

>Echo is not legal.

See above.

> Class "C" (or any other)

>amplifiers are not legal. Removing modulation

>limiters is not legal. Transmitter modifications

>are not legal. Generating RFI above the

>technical specifications is not legal.

>So I'm not bashing people for liking different

>things than I do. I'm bashing people for their

>displayed ignorance of good RF practice and

>for displaying an indifference to, or an outright

>contempt for, other people's right of access to

>the hobby.

An echo mic is in no manner affecting any of your rights.
You are still confusing the law with your preferences. Echo mics are
legal. Email the FCC and ask them.

–

>Would you listen to a radio with a torn

>speaker?

Poor analogy, as your equipment apparently is not the problem...but your
personal preference with another's broadcast. You always have the righyt
to change the channel, as your "rights" are not being infringed upon.

>Would it not bother you?

See above. If it bothered me, I'd shut it off.

–
>I tend to look at a glass that has 50% contents
>as half full also.

Not with CB, society, the FCC, and personal privacy rights you don't

>Because, in those cases, the glass in much

>less than 50% full.
-
No,,NOT in those cases, in YOUR personal experiences CB and society may
be crumbling, but not to the rest of the world. What you experience is
not the last word, far from it.

>Again you claim to know what the "majority"

>are thinking. You cannot possibly know what

>anyone else is thinking.

Hehhe,,,,,,,correct,,,not in the manner youappear to be taking it,,not
in an esp kind of way, but I indeed have the pulse of the public on a
variety of issues. I *have* to.

>The problem is that when running across

>people, with respect to morality and

>consideration, it seems that the glass is slowly
>dropping below 50%, and it's hard to see the

>positive side.

That IS a problem of yours, no doubt. I still find the majority of people to be good hearted. Must be southern thing (shrug),,if I'm wrong, I'm sure a yankee will correct me to say it is you that are wrong and that people, even in the north, are generally good people.

>That all depends on which circles you run in.

Well, you are focusing on the urchins, not the good.

>I find most hams in my area to be good

>people.

But you are focusing on the urchins, lending to the notion that you indeed have a preferecn to dwell on the bad instead of the good,,,IE.the "half empty" glass.

–

> I find my neighbors to be good people. I can't

>say the same for the "seedier" towns, or the

>trash that populates the most popular CB

>channel.

Interesting. Do you feel there are more hammies or cbers in this country?

>Not at all. Where would you get that idea?

It was a multiple choice question. I tried qualifying such with "or".

>But there does seem to be more hams in my

>radio than there are local CBers. But that's an

>unfair comparison, due to the fact that many

>ham bands have long distance capability, and

>the sphere of my VHF coverage is much wider
>than the typical range for CB.

Don;t be so paranoid,,,I compared nothing,,,,again, it was a multiple choice question.

>I can talk back to my old area with no problem

>on 2 meters. Yet I can hear no one over about
>a S3 on CB, from a similar distance.

The cb hops in Tampa Bay, all the time, practically.

>There are more total Cbers in this country

>than hams (at least it used to be that way

>years ago), but the range of CB is relatively

>small and results in "pockets" of users, not all

>of which can be heard beyond their local

>range.

-
 You subscribe to socialist views and rhetoric,,,this is NOT how
America is, but how you wish it would be.

>You know, I really have to laugh when you

>accuse me of being a socialist.

It's true, In fact, this is another of those little times that I will
not only remind you that we have had this conversation long ago and many
times, but that in what remains one of my more favorite exchanges with
you, you not only embrace socialist beliefs, but go as far as to DEFEND
those beliefs and offer several reasons WHY you believe that bullshit.
–

>Do you even know what a socialist is?

I do.

>Do you

>still think (like you once posted) that a liberal

>and a libertarian are the same thing?

–
A liberal and a libertarian are very much similar and the same.

>No, they are not. Liberals believe in big

>government oversight to handle the plethora

>of social programs that they feel we need to

>have shoved down our throats (At our tax

>expense). In fact extreme liberalism is what

>leads to socialism.

No,,,that may be the currently attached definition by the terrified
right, but I suggest you look up the definition of each...use any

dictionary you prefer and come on back with a cut and paste.

_
A libertarian believes in the smallest amount of government that can
exist and still be effective.

>Extreme libertarian views lead to anarchy.

Like the establishment of a free society? Like the Boston Tea Party?
Like suffrage? Like equal rights? On it goes...

>Conservatives believe in somewhat limited

>government, and personal responsibility.

>Conservatives believe in strong law

>enforcement for those who cannot abide by

>the rules of society. Extreme conservatism

>leads to fascism.

They BOTH advocate the maximum liberties permitted under the law which
is the exact manner of which I referred the two.

>Wrong! You need to do some more

>reading........

Again,,,,I do not need a partisan party to redefine the term. History
and the founding forefathers, in addition to Merriam Webster are those I
choose to believe. That the right has been so effective in making terms
mean something completely opposite of what it truly is (a liberal, of
all examples) is frightening. When the US government begins using the
term as an insult, those who follow such bullshit must be educated to
all they have been falsely indoctrinated. You have been misled and lied
to by Bush.....on many occassion.

_
In fact, it is you and Frank
who were shown not to know what a liberal is. Washington was a liberal.
Our forefathers were liberals. This country was founded and built by
liberlas.

>Today's liberal is someone who wants

>freedom for everyone, as long as it's

>according to their standards.

Wrong, wrong, way wrong. This is what the right has attempted to
redefine. That is what the right WANTS everyone to think and say, and
those of you, like yourself, need structure in their life, direction,
and pretty much told what to do and how to act and to conform to a
single mindset (theirs). And to you and the Bush admin, anyone who
expresses dissent (one of the most cherished American rights)

automatically becomes an enemy of the admin. The Bush admin not only openly echoes Stalinism, but practices it....as Stalin said "those who are not with us are against us".

_
>A typical example is how the democrats had

>no problem with letting Michael Moore trash

>the president, but now scream foul when an

>independent group is now taking aim on Kerry.

Moore can be sued if anything in his movie was untrue. No lawsuits after all this time. Conclusion,,,,,,,hmmmmm.

>Today's liberal is two faced, duplicitous, and

>hypocritical. Today's liberal wants the working

>man to pay for the habitually lazy. Higher

>taxes for richer people.

Nope,,just their fair percentage of their income. In fact, when faced with actual percentages paid from their income, the top two percent of the wealthiest have the least taken out of their income (percentage wise) when compared to the bluecollar worker, even though in sheer dollars, they pay more. The irony of this revelation alone should be enough to serve as a wake-up call to the nation as the gap continues to widen between the levels of society, but nope,,we have smokescreens by those like you who are more concerned with redefining terms to encompass all who dare oppose the current Bush regime are its enemy.

>From those according to their means, to those
>according to their needs. Sound familiar? Try

>reading Karl Marx for the answer.

You have succumbed to partisanship rhetoric of the right, where all who dare question or oppose the Bush admin, are labeled a liberal.
The term has become, albeit incorrectly, an intentionally misplaced catch-all to encompass anyone who opposes the current admin.

>I've opposed bleeding heart liberals since the

>time I was aware enough to realize that they

>were undermining the traditional values that

>this country was founded on.

Bush is the one undermining the values,,such as our rights...not the liberals. You can cite NO liberal that has EVER seeked to take away portions of our constitution.

>Liberals are the ones who would defend the

>"right" of someone to distribute kiddie porn,

>rather than acknowledge that this is a social

>disease.

Social disease? whooooo.that's a liberal term, isn't it? But of course, we all know you made a boo-boo when using the term, 'cause the right locks up those with social diseases.

-
>Please provide any exchanges that I have

>authored where I defended the concepts of

>socialism. I believe in limited government.

Wrong, you favor government imposition and can't even see it.

>Not at all. I believe is responsibility an

>accountability.

Accountability does not extend to you being one that another must account to, although you ahve attempted such on many occasion.

>You a re free to do what you will, (within the

>framework of a civilized society) but you are

>solely responsible for the effects of your

>actions (or inactions).

Exactly,,,,,*I* am responsible for my actions, not you, so anything that I do, such as MY right to anonymity, has nothing to do with you, yet that doesn't stop you from claiming it shouldn't be permitted as it somehow imposes on these "rights" you have yet to define and say how it affected your suffering.

I agree that the FCC should remove the DX limitation, it was a bad idea to
begin with.
I somewhat agree on the 100 watts, but there needs to be some rules such as
NO class C amps, or better yet 10 watts AM and 100 watts SSB.
No way should they EVER open up the freebands. Some of us freebanders (me)
spend 80% of our radio time on these freqs. and we (me) do not want the
general population of CBers using up our (mine) bandwidth.

2835. Re: Hey Twist!!!!

>I believe in personal responsibility (and

>accountability).

So do the majority, but you also believe you have the right to mete out accountability as you see fit, in your most recent example, by requiring the identity of those who post to the internet.

_
>Accountability is universal. Every action that

>you do, has the potential to affect someone

>else. You need to be accountable to those you
>affect.

Not on your argument that the freedom (in this cae, anonymity) needs done away with because the mere potential for abuse exists, it doesn't.

> I believe that government should not restrict

>access and actions, but should prosecute

>those who abuse their rights.
-
Abuse is a relevant term and what you consitute defines abuse has already been shown to not always be illegal, so no, when one "abuses" their rights, say, to the point of offending the hell out of you for their behavior or for what they say, no, there should be no "prosecution".

>Laws exist to codify "abuse".

Semantics. Laws exist to protect the public, not "codify" anything.

_
You not being aware of how this
adminsitration has snowballed sheople like you isn't at all
funny, it's frighteningly pathetic.
-
>Only if you have your own partisan beliefs

The rest of the world would hold you claiming and posting that you are voting for George Bush constitutes a partisan belief. That you used his name and the words "against socialism" in the same sentence with a straight face and actually made yourself believe it, is even more telling.

>That you think that GWB is synonymous with

>socialism is even more telling.

Once again, me and the majority. Look aroud the globe,,Bush is hated by
many respected world leaders and has made us hated and made us a target.
There is NO arguing the fact terror has escalated under Bush and taht he
has made Americans more unsafe anywhere on the globe than ever before.

_
>I am the

>biggest fan of the free market, capitalism,

>freedom, and personal responsibility. Hell, I'm

>voting for Bush, that's about as far away from

>a socialist as you can get.

_
I'll make this very simple. Bush swore with his hand upon the Bible that
he would uphold and protect the constitution. Immediately after taking
office, he launched an assault upon it.
His reasons for doing so are irrelevant, as are yours.
-
>He did nothing to the Constitution.

_
Wrong. He repealed the Fourth Amendment via the Patriot Act in the name
of terror when deemed necessary.

>This is the same power already given to law

>enforcement for use against drug dealers. It

>still requires a court order. You need to read

>the fine print.

Your semantic spin with what you may later define as a "court order" is
irrelevant. Law enforcement no longer needs a WARRANT in many cases,
thanks to the (un)Patriot Act. This move effectively circumvents your
right to remain free from undue governmental intrusion
and the right to be secure in your own home. I need read no fine print
anywhere. I studied this act from its infancy stage of proposal.

_
Adding to this, not single conviction has resulted from the (un)Patriot
Act,,not ONE!

>What does that mean exactly?

It means it was and remains a poor artsenal in the war against terror.
Face it, since Bush has made the Patriot Act law, terror has increased
incredibly under his watch, his own admin admitted this, yet, his
Patriot Act has done nothing. This speaks volumes to the majority. That
you can't understand the meaning is,,well,,,,not surprising, Dave.

>That's like concluding that since WMD have

>not been found yet, that they never will.

Not in Iraq, they won't. Perhaps Bush will find them in his new "Iraq?-Don't-worry-about-our-boondoggle-in-Iraq!-See,-we-have-this-IRAN-thing-going-on-now-and-that's-where-the-real-bad-guys-are-so-you-just-forget-about-Iraq" obfuscational scam, bit not likely,,,,,he's fired come November.

>You seem to take the future for granted.

You want to take away liberties and craft new laws because exercising those liberties have the potential for abuse.

>He merely

>granted the same powers currently afforded to
>law enforcement, to those involved with the

>fight against terrorism.
-
Huh? What does that mean? Those in Law Enforcement ARE the ones involved in the repub's manufactured war on another intangibe, er,,"terrorism".

>It broadened the power which used to be

>restricted to other uses (like drug traffickers) to
>now include terrorists.

Yep,,another intangible to include any definition the government wishes. Not like actually cathing a drug dealer with drugs,,,,nope! Terror can be any activity the Bush admin says it is,,then they can hold you for no reason other than "suspicion",,,,and we all know all those folks being released after DNA exonerates them from the crtimes of which they were convicted all had to be guilty in the first place of something...otherwise, they would have never been under suspicion from the police in the first place, seeing as they had nothing to hide, right Dave?

Kinda like they did with "hate" crimes. When one commits an assault, its pretty much done with malice, although the feds had to pacify the special interest groups and initiate an additional word to the crime ."hate",,in this manner, the DA can make a hate crime out of practically anything they want.

_
>Have you read the

>entire Patriot act? I have, and I find nothing in

>it that isn't necessary if we want to improve

>our chances against those who take

>advantage of our lax security to do us harm.

If you read it, you may want to have someone read it to you, cause you missed the part about not needing a warrant in certain cases which has NEVER been afforded law enforcement until now.

>You still need court approval to perform those

>functions. No one has ultimate power.

Umm, Dave,,that is exactly what the Patriot Act IS,,a court order giving THAT exact function,,,,in fact, that was the entire gist of the Act, to expedite the process.

_
The majority of
American's (THANK GOD) do not subscribe to your bullshit about allowing the authorities and anyone else an open book to your life "if you don't have anything to hide".
-
>You have no way of knowing what the majority
>of Americans, CBers, Hams or anyone else

>thinks or wants.
-
Sure I do, Davie. Many people have such a talent. Some people spot market trends, some people know fashion opinions, some know political opinions, many people make a living off of similar talents, Davie. But keeping with your line of bullshit, it is *you* that have no way of knowing what I know. For all you don't know, I could be involved with the current political polls that usually have a margin of only a 3% error. Suhc is highly idicative of the pulse of the people. Once again, Frank accused me of writng for Pop Comm and Monitoring Times. Assuming I did, that would mean I am much closer in touch with my readers, who just happen to be,,,taa daa,,,hammies and cbers, tahn you care to acknowledge. So you see, these are but a fraction of the multitude of possibilities that decimate your incorrect hypothesis.

>That means nothing.

_
It means a great deal, Subscriptions confirm it.

_
> If you take a poll of dopers at a rock concert

>on their feelings WRT legalizing pot, you

>would get an overwhelming majority in favor of
>it.

Sporadic Waves was no poll. It is subsription only, as were the other magazines mentioned.

> If you look in a fish store, should it surprise

>you to find fish there?

And those who subscrie to fish magazines are represetative of,,,,,,the tea in China? Of course not,,,,ta daa,,,,,,the fish crowd. Yet, you erroneously hold that the hypothetical fish magazine knows nothing of their readers.

>Unless of course, you're omnipotent. You only

>know what YOU want and the small circle of

>people you associate want.

_
Umm,,,see above. Heck, with Sporadic Waves alone, there was never a "small circle". Some day you may wish to think big, as in big "circles", Davie. the big doggs are not sleeping on the porch in small circles.

>It's still small potatoes. Sporadic Waves was a
>3rd rate rag.

Non-Sequitur.
No one foreced anyone to subscribe.

>As I stated before, I am a big supporter of the

>concept of freedom.

Except when it comes to others exercising THEIR freedoms that you think should be
curbed,,such as the right to anonymity on the internet, just for starters.

>There is no good reason why someone needs

>to hide.

>You can't give me a good reason why

>someone deserves the right to be able to hide

>from ohers.

You are owed no reason. This is your problem and the source of your hostility toward anonymity. You are owed nothing when a citizen exercises their rights under the law.

>Especially when that right threatens the rights

>of other people to the expectation of civil

>discourse.

You have NO right to expect civility among anyone. It would be great in a perfect world if that were true, but there is no law outlawing those who are not civil. Once again, there is too much personal interpretation here for you to claim you have a right to expect civil behavior from everyone. That there is NO law outlawing these things you feel out be illegal shows that I indeed am in touch with the majority of the opinion, as if the majority felt like you, rudeness/non-civil acting

folks and anonymity would be illegal.

>Certain behavior is illegal.

You spoke of civility and are now attamepting to make it synonymous with legalities. If you meant legalities, you would have said so, but what you said, was "civility".

>When that right conflicts with the right to

>expect civility and accountability in public

>places then I favor civility and accountability.

_
Once again, you have no right to expect civility by anyone, let alone demand accountability from another.

>I have as much right as everyone else.

Which is zero. The fact you are the only one that holds other's are somehow required by law to treat you in a manner what you consider "civil", and that you consider another's right to anonymity as infringing upon YOUR right's because of the potential for abuse is ludicrous.

>Dave

Hello M- Tech:

I had a old 4 pill SD1446 Messenger 3V (class Ab1) that did around 380 to 390 when whistling in it, when driven with a Motorola Radio doing about 16 watts PEP. This was on a Bird Model 43 watt meter so the measurement should be pretty close. It indicates the RMS value of the peak power voltage, or Peak Envelope Power, abbreviated PEP.

I am sure with a little more drive it will do more, but your at about the end of its power output capability with 380 to 400 watts. Any more output and you will be close to smoking the transistors, and it won't be any louder or get any more significant range.

I am sure the "450 Swing" is just a CB type hype term or rating.

The Messenger 3V Amp smoked off the 130 pF capacitor in the base loading coil in my K-40 antenna, so did the Messenger 3V Amp go south.

I replaced the cheap burnt up 130 pF capacitor with a Mica Type transmitting capacitor rated at 1000 Volts, again at 130 pF. And that bullet proffed the K-40 Antenna.

I replaced the SD1446 Transistors with MRF 453 transistors, as I bought a few at the TRW Swap Meet near the Los Angles Airport, for a song.

The SD1446 Transistors where rated at 80 watts out I believe, and the MRF453 Transistors had a 60 watt output rating. I believe the MRF 453 Transistors had a higher input impedance marking the input impedance match much closer. The amp didn't put out as much but sounded great on both SSB and AM. About 100 watts less but sounded great, and no one could tell the difference in signal strength.

Jay in the Mojave

M-Tech wrote:

Thanks Frank/Jay!! Great info. I figured the "450" on the front was all hype:-)

The actual Batman comics from the 50's were quite dark, but I kinda
found it hard to take Adam West seriously even _with_ BIF bubble pop ups.

The first Catwoman, well now...that's another "tail"...

That depends.

An alias, if it is associated closely enough with its author, can be
taken as a positive form of identity. Thus one who repeatedly libels
"slash" or "madonna" might well be served.

However the matter of proving damages is less likely, though you never
know...

They have not been "demonstrated" to be anything of the sort. Because
YOU claim them to be does not make them so. I can hear more rule
violations after listening to 5 minutes on CB channel 6 than I can
hear in a week's worth of ham radio. That's the plain truth, and for
you to deny or spin it is clearly a bias on your part.

>before any further prosecution) what constitutes "amusement devices" and
>specifically address the echo issue, just as they recently ruled what
>constitutes broadcast obscenity.

Ok, I like the way you've presented this. You make a good argument
that a certain amount of reverb enhances audio quality and adds
"depth". I totally agree with you on this point. If the current batch
of "echo toys" were sold as devices which ONLY added enough reverb to
accomplish the effect you've described, then I would agree that the
device was an "enhancement" device in much the same way as an audio
compressor. But that would eliminate "repeater" type echos.

But you and I both know that is not the intent of the users of the
majority of these devices. Mot have them set way beyond the point of
"audio enhancement" and well into the point of audio distortion. They
run them for the "cool" effects, and not as a range extender.

Intent is the key point here.

There is also a burden of proof issue as well. The FCC can make a
broad determination as to any device which is "added" to a CB radio.
It is up to the makers of the device to demonstrate that the device
does not cause or promote illegal operation.

>>ï¿½ï¿½You can't make an idiot into a normal person,

>incompetent in upholding said law.
>Do you not see the sheer hypocrisy of such talk?

I can see how you might feel that way based on your perspective. But that's not reflective of reality. I never claim to "blindly" follow anyone. But there is a process to follow to have rules changed. It is not proper to just "ignore" rules that we don't personally agree with.

One thing I DO believe in strongly is the concept that a person is innocent until PROVEN guilty. Do you assume that someone is automatically guilty of a crime the instant he is arrested? The fact that Doug was cited (same as an arrest in this case) does not mean that all the evidence was in and a final determination was made (at least at the time I made my comments). Surely you have to acknowledge that Doug's behavior has managed to earn him quite a few enemies. What's to stop any one of them from "masquerading" as him in order to cause trouble and "frame" him as a form of payback? It's a distinct possibility. I admit that I am not privy to what evidence the FCC has or doesn't have in this case, and I could be way off base.

>>Been there, done that. How do you rationalize
>>the detrimental effects of distorted audio, such
>>as that produced by an echo mike, to
>>someone who has that "kid on Christmas" look
>>on his face at the discovery of his latest toy
>>(that he probably spend half his fast food p
>>aycheck for)? He doesn't care that it makes
>>his audio hard to understand. He just thinks
>>it's "cool". Must be something in the water
>>around here.....
>

>-
>Nothing to rationalize. This is cb, not audiophile FM 101 High Fidelity
>Broadcasting. What you can't get, because you been in with the snobs
>that have a hard-on for cb too long, is that many, many folks don't look
>at cb like you do and compare it to hammie radio. The only thing many
>folks are interested in is making contact, not quality. Like a stereo,
>some folks spend big bucks for symphonic reproduction, others do ok and
>opt for a clock radio. Different strokes, but here you are bashing those
>folks that may use a legal item as is their right, on cb, all because
>*you* disagree and dislike their choice. Tsk tsk.
>
>
>>You don't have to be an audiophile.
>
>
>Correct,,but you apparently are, and are expressing difficulty grasping
>why others are not so concerned with these nuances.

I will admit to being sensitive to audio quality. I can tell the sound
of a Class "C" amplifier without even looking. Any device that changes
the audio for the worse detracts from quality. I like to make my audio
as close to a broadcast station as I can. I like what those guys on 80
meter AM have done with their setups. Some of those guys have audio
that I am truly envious of.

>>Some
>>people are so distorted that they are actually
>>hard to understand. Yet these same mentally
>>challenged idiots think that they actually sound
>>good! Excessive echo, class "C" amplifiers,
>>too much mike gain, no limiters, excessive
>>"swing" all contribute to overall poor audio
>>quality. Many of these "mods" also contribute
>>to adjacent channel interference and RFI.
>>There is nothing even remotely redeemable
>>about these actions.
>
>>Echo is not legal.
>
>See above.
>
>
>> Class "C" (or any other)
>>amplifiers are not legal. Removing modulation
>>limiters is not legal. Transmitter modifications
>>are not legal. Generating RFI above the
>>technical specifications is not legal.
>>So I'm not bashing people for liking different
>>things than I do. I'm bashing people for their
>>displayed ignorance of good RF practice and
>>for displaying an indifference to, or an outright

>>contempt for, other people's right of access to
>>the hobby.
>
>
>An echo mic is in no manner affecting any of your rights.
>You are still confusing the law with your preferences. Echo mics are
>legal. Email the FCC and ask them.

I might do that. I cannot see how a device which is clearly intended to "amuse or entertain" could be considered legal, when the rules expressly prohibit them.

But let me outline a few examples of how many of these "radio hotrods" do affect other people's right of access.

1. A radio which is running in excess of the legal power limit promotes a stronger signal. While this maybe be an advantage to the operator, he cannot control just how far his signal travels. Legally operating stations in the distance, now have a harder time communicating, because of the illegally produced signal. Those legal operators are having their right to access affected.

2. A radio which has had its modulation "clipped" the radio peaked, and uses a class "C" "modulator" amp to get that added "swing" is producing spurious audio harmonic content and splatter which makes their signal extend outside (sometimes very far) outside of the 10 Khz bandwidth of the CB channels. So when the operator transmits, he's not only dominating his own channel, be creates sufficient interference on others. Legally operating stations on those other channels, now have a harder time communicating, because of the illegally produced signal. Those legal operators are having their right to access affected.

3. A person operating a "peaked and clipped" CB into a class "C" amplifier generates spurious emission and higher harmonic content. People living in the vicinity of this illegal operator may have trouble using their entertainment devices (Broadcast radio, TV, computer) due to interference from those increased harmonics. Those people are having their right of access impeded.

>>Would you listen to a radio with a torn
>>speaker?

>Poor analogy, as your equipment apparently is not the problem...but your
>personal preference with another's broadcast. You always have the righyt
>to change the channel, as your "rights" are not being infringed upon.

That depends. See my #2 above.

>>Would it not bother you?

>See above. If it bothered me, I'd shut it off.

But why should you have to? If you have a hobby or activity that normally brings you pleasure, and you are now faced with some

undesirables which ruin your pleasure, why should you be always forced
to be the one who has to yield to these people? If it were as simple
as allocating certain channels for each activity and there were no
such things as bleedover or interference, then your solution would be
acceptable. But you know that that's not reality on CB.

>>I tend to look at a glass that has 50% contents
>>as half full also.

>Not with CB, society, the FCC, and personal privacy rights you don't

>>Because, in those cases, the glass in much

>>less than 50% full.

>No,,NOT in those cases, in YOUR personal experiences CB and society may
>be crumbling, but not to the rest of the world. What you experience is

>
>
>Hehhe,,,,,,,correct,,,not in the manner youappear to be taking it,,not
>in an esp kind of way, but I indeed have the pulse of the public on a
>variety of issues. I *have* to.

But no "pulse" or poll is completely reflective of reality. Polls are
subject to political or social biases, and limited to the demographics
of the participants.

>>The problem is that when running across
>>people, with respect to morality and
>>consideration, it seems that the glass is slowly
>>dropping below 50%, and it's hard to see the
>>positive side.

>That IS a problem of yours, no doubt. I still find the majority of
>people to be good hearted. Must be southern thing (shrug),,if I'm wrong,
>I'm sure a yankee will correct me to say it is you that are wrong and
>that people, even in the north, are generally good people.
>>That all depends on which circles you run in.

>Well, you are focusing on the urchins, not the good.

>>I find most hams in my area to be good
>>people.

>But you are focusing on the urchins, lending to the notion that you
>indeed have a preferecn to dwell on the bad instead of the good,,,IE.the
>"half empty" glass.

Only if I am surrounded by "the bad" to the point where looking for
the positive becomes a ridiculous exercise in insanity.

>> I find my neighbors to be good people. I can't
>>say the same for the "seedier" towns, or the
>>trash that populates the most popular CB
>>channel.

>Interesting. Do you feel there are more hammies or cbers in this
>country?
>
>>Not at all. Where would you get that idea?
>
>
>It was a multiple choice question. I tried qualifying such with "or".

My mistake. I took it as a claim that there are more hams than Cbers.

>>But there does seem to be more hams in my
>>radio than there are local CBers. But that's an
>>unfair comparison, due to the fact that many
>>ham bands have long distance capability, and
>>the sphere of my VHF coverage is much wider
>>than the typical range for CB.

>Don;t be so paranoid,,,I compared nothing,,,,again, it was a multiple
>choice question.

>>I can talk back to my old area with no problem
>>on 2 meters. Yet I can hear no one over about
>>a S3 on CB, from a similar distance.

>The cb hops in Tampa Bay, all the time, practically.

Your topographical parameters make for an overall greater direct
distance. In my area, there are numerous "hills" which bend and block
signals, resulting in lopsided range, especially when operating
mobile.

>>There are more total Cbers in this country
>>than hams (at least it used to be that way
>>years ago), but the range of CB is relatively
>>small and results in "pockets" of users, not all
>>of which can be heard beyond their local
>>range.

>>No, they are not. Liberals believe in big
>>government oversight to handle the plethora
>>of social programs that they feel we need to
>>have shoved down our throats (At our tax
>>expense). In fact extreme liberalism is what
>>leads to socialism.
>
>
>No,,,that may be the currently attached definition by the terrified
>right, but I suggest you look up the definition of each...use any
>dictionary you prefer and come on back with a cut and paste.

That is THE current understanding of what passes for modern liberalism
in today's political climate. It's not a "right wing conspiracy".
Liberals are the champions of the poor, the disenfranchised, the un
and underemployed, minorities, and anyone else who feels that they're
getting the "shaft" WRT the "American Dream". Liberals downplay the
importance of personal responsibility, instead believing that people
are all victims of circumstances, and that "corporations" are the root
of all evil. They believe that government should play the part of "the
great equalizer". THAT is the seed of socialism.

_
>A libertarian believes in the smallest amount of government that can
>exist and still be effective.
>
>>Extreme libertarian views lead to anarchy.
>
>
>Like the establishment of a free society? Like the Boston Tea Party?
>Like suffrage? Like equal rights? On it goes...

Like no rules and everyone's rights trampling on everyone else's.

>>Conservatives believe in somewhat limited
>>government, and personal responsibility.
>>Conservatives believe in strong law
>>enforcement for those who cannot abide by
>>the rules of society. Extreme conservatism
>leads to fascism.
>
>

>>Wrong! You need to do some more
>
>>reading........
>
>Again,,,,I do not need a partisan party to redefine the term. History
>and the founding forefathers, in addition to Merriam Webster are those I

>choose to believe.

You, the one lecturing me that all rules should be "evergreen" and subject to revision as society and culture changes, are now sticking by a definition which is obsolete?

>That the right has been so effective in making terms
>mean something completely opposite of what it truly is (a liberal, of
>all examples) is frightening.

Nothing frightening about it. It's reality. Liberals have been a key force in the undermining of traditional values for the last 30+ years. There are practices and activities which are almost common today that no one would even think of doing in the 1950's. You might think this is good. But I don't look at increased promiscuity, along with gratuitous sex and porn, the abandonment of traditional family roles etc, as a "good" thing.

> When the US government begins using the
>term as an insult, those who follow such bullshit must be educated to
>all they have been falsely indoctrinated. You have been misled and lied
>to by Bush.....on many occassion.

I have been a strong conservative long before Bush came along. It's refreshing to see a decisive leader who is guided by principle rather than one who changes his position depending on the political winds at the time.

_
>In fact, it is you and Frank
>who were shown not to know what a liberal is. Washington was a liberal.
>Our forefathers were liberals. This country was founded and built by
>liberlas.
>
>>Today's liberal is someone who wants
>>freedom for everyone, as long as it's
>>according to their standards.

>Wrong, wrong, way wrong. This is what the right has attempted to
>redefine.

No that's the truth. Take the recent political events as an example. The left feels that it's perfectly fine and an expression of a person's 1st amendment for Michael Moore to create a "propagandamentary" trashing and distorting Bush's leadership. But now that the shoe is on the other foot and a group of veterans is disputing Kerry's Vietnam claims, the left screams bloody murder and has attempted legal intimidation to attempt to block the release of the (#1 on the Amazon.com best seller list) Swift boat book Unfit for Command, as well as the associated TV ads. So what happened to the Left's cherished respect for the 1st amendment? The answer is clear to those who are not blinded by partisan myopia. The left are hypocrites of the first degree.

>>A typical example is how the democrats had
>>no problem with letting Michael Moore trash
>>the president, but now scream foul when an
>>independent group is now taking aim on Kerry.

>Moore can be sued if anything in his movie was untrue. No lawsuits after
>all this time. Conclusion,,,,,,,hmmmmm.

Many of F-911's conjectures have been disproven by the 911 commission
report (I trust you've read it?).

Kerry can do the same to the Swift Boat veterans. Yet he, instead of
taking aim at the veterans themselves, has attempted to block
distribution of their book and ads. Conclusion? Hmmm.........

>>Today's liberal is two faced, duplicitous, and
>>hypocritical. Today's liberal wants the working
>>man to pay for the habitually lazy. Higher
>>taxes for richer people.
>
>
>
>Nope,,just their fair percentage of their income.

What's "fair" is purely subjective. I don't believe that anyone
deserves special consideration. The tax rate should be flat.

> In fact, when faced
>with actual percentages paid from their income, the top two percent of
>the wealthiest have the least taken out of their income (percentage
>wise) when compared to the bluecollar worker, even though in sheer
>dollars, they pay more.

The top 10% of wage earners pay over 60% of the total income tax
revenue.

> The irony of this revelation alone should be
>enough to serve as a wake-up call to the nation as the gap continues to
>widen between the levels of society, but nope,,we have smokescreens by
>those like you who are more concerned with redefining terms to encompass
>all who dare oppose the current Bush regime are its enemy.

Those who work hard and earn a place in the higher echelons of income
should not be penalized for their success by being burdened by the
baggage of those who lack the ambition to achieve similar success.

>>From those according to their means, to those
>>according to their needs. Sound familiar? Try
>
>>reading Karl Marx for the answer.
>
>You have succumbed to partisanship rhetoric of the right, where all who
>dare question or oppose the Bush admin, are labeled a liberal.

Liberals and their socialistic ideals have been "bad" for this country
long before Bush came into power.

>The term has become, albeit incorrectly, an intentionally misplaced
>catch-all to encompass anyone who opposes the current admin.

The answer is easy if you look at a few key facts.

1. Socialism is a concept of a social structure which dictates that
government shall take from those according to their means, to those
according to their needs. This is well documented.

2. Which political party in this country looks to take more taxes from
those who achieve, to give back to those who don't?

3. A free market economy and true freedom involves less government
involvement in personal lives allowing people to make greater choices.

4. Which party is seeking to increase government involvement in
people's lives, by proposing government mandated education programs,
healthcare oversight, preventing social security investment in private
accounts, limiting gun ownership rights (Who needs the 2nd
amendment?), and of course increasing taxes to pay for it all?

>>I've opposed bleeding heart liberals since the
>>time I was aware enough to realize that they
>>were undermining the traditional values that
>>this country was founded on.
>
>
>
>
>Bush is the one undermining the values,,such as our rights...not the
>liberals. You can cite NO liberal that has EVER seeked to take away
>portions of our constitution.

Every liberal who favors gun control is trampling on the 2nd
amendment.

>>Liberals are the ones who would defend the
>>"right" of someone to distribute kiddie porn,
>>rather than acknowledge that this is a social
>>disease.

>Social disease? whooooo.that's a liberal term, isn't it? But of course,
>we all know you made a boo-boo when using the term, 'cause the right
>locks up those with social diseases.

As it should be. There are just some activities that should not be
allowed. Freedom is not absolute.

>>Please provide any exchanges that I have
>>authored where I defended the concepts of
>>socialism. I believe in limited government.

>Wrong, you favor government imposition and can't even see it.

>>Not at all. I believe is responsibility an
>>accountability.

>Accountability does not extend to you being one that another must
>account to, although you ahve attempted such on many occasion.

I'm not electing myself Pope here. I'm just saying that people need to
be held accountable (to someone or thing) for their actions.

>>You a re free to do what you will, (within the
>>framework of a civilized society) but you are
>>solely responsible for the effects of your
>>actions (or inactions).

>Exactly,,,,,*I* am responsible for my actions, not you,

So how can you be held accountable to hold to your responsibility if
there is no one there to make the determination? Claim's of "taking
responsibility" are meaningless unless there is a mechanism to enforce
it.

> so anything that
>I do, such as MY right to anonymity, has nothing to do with you, yet
>that doesn't stop you from claiming it shouldn't be permitted as it
>somehow imposes on these "rights" you have yet to define and say how it
>affected your suffering.

You should have the right to remain anonymous as long as it does not
cause undue problems for the harmony of the forum.

its not a stupid question at all. in fact, given the type of device and its
use, its a rather important one.

ok, what you are looking for is a lightning arrester with so-239 connectors
on it, correct? you should be able to order these from many mail order
electronics houses (jameco comes to mind). there are others, but I haven't
seen much in the way of such components in a while....

you can also make one using a couple of screws and a barrel connector (a
spark gap arrester).

again, it all depends on what you need to do and where in the line you want
to put it.

>pursue it, overrides everyone else rights to

>enjoy their piece of the hobby.

Neither do I, but you continue to try and pigeonhole me as such for
merely posting of freeband activity and dx, yet, nothing in my posts has
ever had a remote relation to what you falsely promote.

>You like to accuse me of making things

>personal, but in this case (as in many) you

>mistake my general summation for a direct

>critique of your personal habits.

No mistake and you have made much more than "general summations"
directed toward myself over the years. There was nothing general
concerning your posts.

>I'm sure your operation is fairly low impact, but
>there are others who are not so cognizant of

>their impact on others (or worse, they don't

>care).

Yep,,,there rare indeed. Many with licenses, many without.

>Yes, there are hams who do, but I do not

>associate with them.

>What "hoops" are there to just acting in a

>civilly responsible manner?

Read again: "same hoops you must jump through regarding hammie radio". That you responded with hammie radio as an example in acting civilly responsible is not the best example you could have chosen,,in fact, it's a poor one

>Again, like on CB, this is largely

>geographically dependant.

Despite your belief of it being geographically dependendent (it's not,,,,there are good and bad everywhere in both services)it doesn't validate your contrived gaffe.

>So now you deny that geography and

>demographics play a major part in determining
>the percentage of Good/Bad operators in a

>particular location?

Absolutely not. Eliminate "particular location". A more accurate statement would be "Good and bad people exist everywhere and are not bound by geography." I don't for one minute subscribe to the fact that there are more bad people in one big city than in another big city of the same size.

> That's a direct contrast to your comments

>about the people who "infest" Philthy.

Hehehe,,,I don't think I used the term "infest", but "nest" would be a word I would use to describe their sub-existing. I do think people from Philthy and NY tend to wear their heart on their sleeve a bit more than the rest of the country,,IE: very vocal. Now apply the malcontents from these cities and add a radio...it seems like a city of idiots,..no? But it doesn't make them any worse than the worst any other city has to offer, but as they are more vocal, add a device that furthers what is already a very vocal opinion, and it can sem worse than other cities. I'm not the one that holds cb as a reflection of society.

>But I will say, that I've personally witnessed far
>more rule abuses on CB than on ham radio.

Again, your personal views and beliefs have been demonstrated to be in the minority,,,,,

>They have not been "demonstrated" to be

>anything of the sort. Because YOU claim them
>to be does not make them so.

They have been demonstrated. Example #1: You feel anonymity should not be afforded internet participants. The mere fact that the laws (crafted by the moral majority) reflect just the opposite, illustrtates you are

in the minority with your belief. Example #2: No one here erroneously considers talking dx a felony. Again, it is your right to engage in whimsical beliefs, but you are alone in such belief. That you have been informed such is not a felony merely served to confuse you, not being able to distinguish between civil and criminal court proceeedings. This is with the minority, as the majority are clued in and educated regarding the hobby of which they are engaged. It is not a good idea to participate in anything that has the potential for legal repercussions unless one is informed of the risks and understands the penalties involved and is willing to accept such parameters. But having a concise comprehension of the law is necessary. Clearly, you do not.

>I can hear more rule violations after listening

>to 5 minutes on CB channel 6 than I can hear

>in a week's worth of ham radio. That's the

>plain truth, and for you to deny or spin it is

>clearly a bias on your part.

I have no problem with what you believe, as long as you don't attempt to pass it off as fact or representative of the majority, as you attempted with the much contrived statement that there are more rule violators on cb than hammie radio. Reminding you of how incorrect this statement actually is had you qualify your remarks to now say *you* can hear more rule violations on cb than on hammie radio. Again, way too many variables and factors involved for you to say "cb has more rule violators than hammie radio".

_
Then what is preventing from you from getting on that channel and speaking your mind to those people as you do on here concerning your radical and minority beliefs.

>Nothing. I've done it already. But what good

>will it do?

I've asked that of you concerning here and your answer was always along the lines of "you have got to start somewhere" and "someone has got to take a stand". It appears you shy aways from live real-time confrontation you claimed would take place in the same manner in which you conduct yourself on usenet.

>I don't "shy away" but at some point you have

>to realize that it's an unwinnable situation,

At the risk of being called a cad and yelling "na na nee nee boo boo,toldjaso"....you'e been told that for years by myself and others. What point was the epiphany you experienced??

>The point where I realized that you can't make
>an idiot into a normal person. It's

>counterproductive to try. It's better to seek out

>little oasis' of sanity in the cesspool, than

>trying to clean it up.

Well, that didn't take but a few years now, did it? And that was the
gist of what I and others have been trying to tell you for years.

>you realize that you can put a 3 piece suit on a
>pig, and he's still a pig.

Yes. Look at the well dressed pigs running the country.

>Even if I convince the

>idiots that their echo boxes and distorted class
>"C" amplifiers sound like crap, they're still

>idiots.

>All it does it cause further arguments.

In all fairness and I'm not being cruel or mean or malicious, but coming
from one who holds talking dx is technically a felony, and that roger
beeps are illegal on cb, that doesn't mean much.

>Roger beeps were at one time classified as an
>"amusement" device, and as such was

>prohibited in 95.413 (6).

I doubt roger beeps were ever classified as such and as a result,
illegal on cb, but even if that were so,,,many things "used" to be a
certain way,,,,,it's no longer. It's a brave, new world*.

–

>While it is true that I cannot find a rule which

>specifically addresses these devices, I can

>neither find any information which specifically

>allows them, along the same lines as selective
>call tones are specifically outlined in 95.412

>(b).

>Since there isn't a definitive rule in place, you

>can make the case that they are, in fact, legal

>(or at the very least not worthy of

>consideration). But it seems funny that this

>feature has not appeared on most mainstream
>legal radios.

-
I do believe some of the newer legal radios most certainly have them.

>I have been informed of some. But I remain

>skeptical of their type acceptance, and

>whether the FCC will allow it to continue. But

>time will tell.

>Echo boxes are a totally different issue. They

>fall clearly into the classification of

>"amusement or entertainment" devices and as
>such are specifically prohibited by 95.413.

I disagree, but let's assume you right on this item. I would challenge the validity of this on several counts,,,the most obvious being the fact that sound and broadcast engineers use echo (not repeat, but slight reverb echo) on FM broadcasts for many commercials and ads for a specific reason,,,,it gets noticed and is often more recognizeable and often louder. As such, one could make the argument, it is an audio "enhancer", not entertainment device, and with the myriad of broadcast sound engineers backing my case, I would feel extremely confident handling my own situation, if this were it. As you now are most astutely aware, what you consider enhancement and what I consider enhancement is now very much subjective. Again, ask Phil Kane what must take place now (once this case is challenged). The FCC would have to rule (FIRST, and before any further prosecution) what constitutes "amusement devices" and specifically address the echo issue, just as they recently ruled what constitutes broadcast obscenity.
-

>Ok, I like the way you've presented this. You

>make a good argument that a certain amount

>of reverb enhances audio quality and adds

>"depth". I totally agree with you on this point. If
>the current batch of "echo toys" were sold as

>devices which ONLY added enough reverb to

>accomplish the effect you've described, then I

>would agree that the device was an

>"enhancement" device in much the same way

>as an audio compressor. But that would

>eliminate "repeater" type echos.

Interesting. Where would the line be drawn? At one complete repeat? Two?

>But you and I both know that is not the intent

>of the users of the majority of these devices.

Maybe.....I have heard the folks messing with them and repeating over
and over...but then again, like my fave AM audio, it has barely a tinge,
almost the "double voiceover" effect, but no repeat. In fact, one can
barely tell.

>Most have them set way beyond the point of

>"audio enhancement" and well into the point of
>audio distortion. They run them for the "cool"

>effects, and not as a range extender.

Yea,,well truckers have the right to play and entertain themselves on
those long trips, at least until they outlaw such items.

>Intent is the key point here.

>There is also a burden of proof issue as well.

>The FCC can make a broad determination as

>to any device which is "added" to a CB radio.

>It is up to the makers of the device to

>demonstrate that the device does not cause or
>promote illegal operation.
-
> You can't make an idiot into a normal person,

>so why try? Birds of a feather stick together. -

Which is why you have defended Dogie and attempted to present an
incredibly spaced out and fantasized case for Keith framing him, even
though the FCC busted him for jamming.

>I never accused Keith of framing Doug. I wish

>you would look back on your links and realize

>that. I postulated that it was possible that he

>might have been framed, but I never accused

>any one person of doing it.

I stand corrected,

>Thank you. My respect for you just went up a

>few notches.

The fact remains, you hold the FCC as an entity whose rules should be blindly followed, but then question the same agency's integrity when they enforce those rules.
This is getting long, again.
Going to Part Deux.

2858. Re: Hey Twist!!!!

Twist/N3CVJ
Part Deux
You "postulated" that the FCC, who you profess we should blindly follow, may not have the facts of the case before telling the public one is guilty. I question your logic and intellect to blindly follow an agency who crafts law, yet you claim same agency could be incompetent in upholding said law.
Do you not see the sheer hypocrisy of such talk?

>I can see how you might feel that way based

>on your perspective. But that's not reflective of
>reality.

It was your reality.

>I never claim to "blindly" follow anyone. But

>there is a process to follow to have rules

>changed. It is not proper to just "ignore" rules

>that we don't personally agree with.

And until those rules are changed, you can not possibly have any reason for fantasizing the FCC was wrong in busting Dogie. As you say, that is the process. But you still don't see you espouse the process of the FCC, but you question their end result, meaning you have doubt concerning their competence in handling their responsibility. You tout their rules, then when one gets busted by their rules, you undermined the entire concept.

_
>One thing I DO believe in strongly is the

>concept that a person is innocent until

>PROVEN guilty. Do you assume that

>someone is automatically guilty of a crime the

>instant he is arrested?

Just the opposite. Until proven in a court of law. Once again, *you* are the one misusing the term "crime" when applied to radio rules, as they are not criminal infractions. See how the misuse and entrance of the term "crime" and "criminal" becomes distorted?

>The fact that Doug was cited (same as an

>arrest in this case) does not mean that all the

>evidence was in and a final determination was
>made (at least at the time I made my

>comments).

I disagree. I hold that when the FCC reports one on the Rain Report for an infraction, NOT as merely receiving a warning notice for some alleged rule infraction, the evidence is in and the final determination of guilt is beyond a reasonable doubt, enough to satisfy any court of law.

> Surely you have to acknowledge that Doug's

>behavior has managed to earn him quite a few
>enemies. What's to stop any one of them from

>"masquerading" as him in order to cause

>trouble and "frame" him as a form of payback?
>It's a distinct possibility. I admit that I am not

>privy to what evidence the FCC has or doesn't
>have in this case, and I could be way off base.

I do not believe for one second a bunch of folks are going to sign a sworn affidavit signed by a notary only to commit purgery in order to frame another.

–

>My only hope is that a group of decent people

>will decide to start another channel that I

>would be happy to participate in. I'm already

>working on a CB reunion for some of the old

>crew that I've contacted. This might spawn a

>"retro net" where we fire up that vintage gear

>for some old fashioned CB fun.

>Now that might bring back some of the fun

>with cb that has eluded you for some time.
-
 Heck, we have get togethers all the time here. On any given day one can tune in and hook up with countless fishermen all over the bay area,,many of them sitting in their cars chewing the fat while fishing.

>Those are some of the things I sorely miss.
–
 After all, that would make you proactive instead of reactive like you have always been here, and I am certain we can count on you to offer

your beliefs to those on the air using those noise toys that have you bleeding from the ears and nose, because we all know you believe in saying the same things here as you would face to face. Try it with the noise toys and on the radio with these people,,tell them they are the equivalent of the WWF. Report back.

>Been there, done that. How do you rationalize

>the detrimental effects of distorted audio, such
>as that produced by an echo mike, to

>someone who has that "kid on Christmas" look
>on his face at the discovery of his latest toy (

>that he probably spend half his fast food p

>aycheck for)? He doesn't care that it makes

>his audio hard to understand. He just thinks

>it's "cool". Must be something in the water

>around here.....
-
Nothing to rationalize. This is cb, not audiophile FM 101 High Fidelity Broadcasting. What you can't get, because you been in with the snobs that have a hard-on for cb too long, is that many, many folks don't look at cb like you do and compare it to hammie radio. The only thing many folks are interested in is making contact, not quality. Like a stereo, some folks spend big bucks for symphonic reproduction, others do ok and opt for a clock radio. Different strokes, but here you are bashing those folks that may use a legal item as is their right, on cb, all because *you* disagree and dislike their choice. Tsk tsk.

>You don't have to be an audiophile.

Correct,,but you apparently are, and are expressing difficulty grasping why others are not so concerned with these nuances.

>I will admit to being sensitive to audio quality. I
>can tell the sound of a Class "C" amplifier

>without even looking. Any device that changes
>the audio for the worse detracts from quality. I

>like to make my audio as close to a broadcast

>station as I can. I like what those guys on 80

>meter AM have done with their setups. Some

>of those guys have audio that I am truly

>envious of.

Hehe,,that commercial FM sound...

>Some

>people are so distorted that they are actually

>hard to understand. Yet these same mentally

>challenged idiots think that they actually sound
>good! Excessive echo, class "C" amplifiers,

>too much mike gain, no limiters, excessive

>"swing" all contribute to overall poor audio

>quality. Many of these "mods" also contribute

>to adjacent channel interference and RFI.

>There is nothing even remotely redeemable

>about these actions.

>Echo is not legal.

See above.

_
>Class "C" (or any other)

>amplifiers are not legal. Removing modulation

>limiters is not legal. Transmitter modifications

>are not legal. Generating RFI above the

>technical specifications is not legal.

>So I'm not bashing people for liking different

>things than I do. I'm bashing people for their

>displayed ignorance of good RF practice and

>for displaying an indifference to, or an outright

>contempt for, other people's right of access to

>the hobby.

An echo mic is in no manner affecting any of your rights. You are still
confusing the law with your preferences. Echo mics are legal. Email the
FCC and ask them.

>I might do that. I cannot see how a device

>which is clearly intended to "amuse or

>entertain" could be considered legal, when the
>rules expressly prohibit them.

>But let me outline a few examples of how

>many of these "radio hotrods" do affect other

>people's right of access.

>1. A radio which is running in excess of the

>legal power limit promotes a stronger signal.

>While this maybe be an advantage to the

>operator, he cannot control just how far his

>signal travels. Legally operating stations in the
>distance, now have a harder time

>communicating, because of the illegally

>produced signal. Those legal operators are

>having their right to access affected.

There doesn't seem to be any place at all where these "legal operators" are making any waves. I submit this is an extremely rare problem concerning cbers.

>2. A radio which has had its modulation

>"clipped" the radio peaked, and uses a class

>"C" "modulator" amp to get that added "swing"

>is producing spurious audio harmonic content

>and splatter which makes their signal extend

>outside (sometimes very far) outside of the 10

>Khz bandwidth of the CB channels. So when

>the operator transmits, he's not only

>dominating his own channel, be creates

>sufficient interference on others. Legally

>operating stations on those other channels,

>now have a harder time communicating,

>because of the illegally produced signal.

>Those legal operators are having their right to

>access affected.

There is no right to access. You have the freedom to use a radio at will,,,you haev no right that said radio will be free from interference. You are discounting the problem is world wide, and as you said with our ops, the signal doesn't stop. Our ops, compared to the word ops, are an

exterme minority when it comes to not complying with FCC cb radio rules. Even if you would have cbers obeying all rules at all times, it wouldn't make a noticeable dent in the noise and skip, except on channel 6, as its strictly American owned and operated <g>.

>3. A person operating a "peaked and clipped"

>CB into a class "C" amplifier generates

>spurious emission and higher harmonic

>content. People living in the vicinity of this

>illegal operator may have trouble using their

>entertainment devices (Broadcast radio, TV,

>computer) due to interference from those

>increased harmonics. Those people are

>having their right of access impeded.

Again, no one has such a "right of access" of "unimpedement". The mere fact that the devices say they MUST accept interference discounts any "right" concerning unimpedement and unfetttered use.

>Would you listen to a radio with a torn

>speaker?

Poor analogy, as your equipment apparently is not the problem...but your personal preference with another's broadcast. You always have the righyt to change the channel, as your "rights" are not being infringed upon.

>That depends. See my #2 above.

I did. Check out my reply.

>Would it not bother you?

See above. If it bothered me, I'd shut it off.

>But why should you have to?

Don't "have" to,,thats what comes with freedom of choice.

_
>If you have a hobby or activity that normally

>brings you pleasure, and you are now faced

>with some undesirables which ruin your

>pleasure, why should you be always forced to

>be the one who has to yield to these people?

No one is forcing anyone to partake in the hobby. There is no "force going on.

> If it were as simple as allocating certain

>channels for each activity and there were no

>such things as bleedover or interference, then

>your solution would be acceptable. But you

>know that that's not reality on CB.

What solution? If changing the channel or band doesn;t work, shut it off.

>I tend to look at a glass that has 50% contents
>as half full also.

Not with CB, society, the FCC, and personal privacy rights you don't -

>Because, in those cases, the glass in much

>less than 50% full.

No,,NOT in those cases, in YOUR personal experiences CB and society may be crumbling, but not to the rest of the world. What you experience is not the last word, far from it.

>Again you claim to know what the "majority"

>are thinking. You cannot possibly know what

>anyone else is thinking.

Hehhe,,,,,,,correct,,,not in the manner youappear to be taking it,,not in an esp kind of way, but I indeed have the pulse of the public on a variety of issues. I *have* to.

>But no "pulse" or poll is completely reflective

>of reality.

Correct. Most polls carry a margin error of 3% give or take, but it's pretty damn close,,and indicative.

>. Polls are subject to political or social biases,

>and limited to the demographics of the

>participants.

And the best thing we have to measure the current pulse of certain factions. Other factions have other manners of gauging such things.

N3CVJ/Twist
Part III
>The problem is that when running across

>people, with respect to morality and

>consideration, it seems that the glass is slowly
>dropping below 50%, and it's hard to see the

>positive side.

That IS a problem of yours, no doubt. I still find the majority of people to be good hearted. Must be southern thing (shrug),,if I'm wrong, I'm sure a yankee will correct me to say it is you that are wrong and that people, even in the north, are generally good people.

>That all depends on which circles you run in.

>Well, you are focusing on the urchins, not the

>good.

>I find most hams in my area to be good

>people.

But you are focusing on the urchins, lending to the notion that you indeed have a preference to dwell on the bad instead of the good,,,IE.the "half empty" glass.

>Only if I am surrounded by "the bad" to the

>point where looking for the positive becomes a
>ridiculous exercise in insanity.

> I find my neighbors to be good people. I can't
>say the same for the "seedier" towns, or the

>trash that populates the most popular CB

>channel.

Interesting. Do you feel there are more hammies or cbers in this country?

>Not at all. Where would you get that idea?

It was a multiple choice question. I tried qualifying such with "or".

>My mistake. I took it as a claim that there are

>more hams than Cbers.

>But there does seem to be more hams in my

>radio than there are local CBers. But that's an

>unfair comparison, due to the fact that many

>ham bands have long distance capability, and

>the sphere of my VHF coverage is much wider
>than the typical range for CB.

Don't be so paranoid,,,I compared nothing,,,,again, it was a multiple
choice question.
-
>I can talk back to my old area with no problem

>on 2 meters. Yet I can hear no one over about
>a S3 on CB, from a similar distance.

The cb hops in Tampa Bay, all the time, practically.

>Your topographical parameters make for an

>overall greater direct distance. In my area,

>there are numerous "hills" which bend and

>block signals, resulting in lopsided range,

>especially when operating mobile.

>There are more total Cbers in this country

>than hams (at least it used to be that way

>years ago), but the range of CB is relatively

>small and results in "pockets" of users, not all

>of which can be heard beyond their local

>range.

_
>Do you even know what a socialist is?

I do.

>Do you

>still think (like you once posted) that a liberal

>and a libertarian are the same thing?

A liberal and a libertarian are very much similar and the same.

>No, they are not. Liberals believe in big

>government oversight to handle the plethora

>of social programs that they feel we need to

>have shoved down our throats (At our tax

>expense). In fact extreme liberalism is what

>leads to socialism.

No,,,that may be the currently attached definition by the terrified
right, but I suggest you look up the definition of each...use any
dictionary you prefer and come on back with a cut and paste.

>That is THE current understanding of what

>passes for modern liberalism in today's

>political climate.

Only in the right's political climate. In fact , the right is so
clueless as to the pulse of the public, they are going to be scratching
their azzes come November, saying honestly "What happened?"

>It's not a "right wing conspiracy". Liberals are

>the champions of the poor,

Because the right has nothing but disdain for the poor. Someone has to
come to their aid.

>disenfranchised, the un and underemployed,

>minorities, and anyone else who feels that

>they're getting the "shaft" WRT the "American

>Dream". Liberals downplay the importance of

>personal responsibility,

Wrong, this is more rhetoric and poison from
the right. Have you noticed the Bush admin has a name for ALL who oppose
or question their motives? They have neat little terms for all those
they pigeonhole.

>instead believing that

>people are all victims of circumstances, and

>that "corporations" are the root of all evil. They
>believe that government should play the part

>of "the great equalizer". THAT is the seed of

>socialism.

I invoke the entire concept of "social" security.
The seed of socialism is much more in tone with the Bush admin than ANY

liberal.

_
A libertarian believes in the smallest amount of government that can
exist and still be effective.

>Extreme libertarian views lead to anarchy.

Like the establishment of a free society? Like the Boston Tea Party?
Like suffrage? Like equal rights? On it goes...

>Like no rules and everyone's rights trampling

>on everyone else's.

Where did you see anarchy arrive in the US via a libertarian view? Could
this be more of th e concept you dispalyed that we ought do away with
something because it carries the potential for abuse?

>Conservatives believe in somewhat limited

>government, and personal responsibility.

>Conservatives believe in strong law

>enforcement for those who cannot abide by

>the rules of society. Extreme conservatism

>leads to fascism.
-
They BOTH advocate the maximum liberties permitted under the law which
is the exact manner of which I referred the two.

>Wrong! You need to do some more

>reading........

Again,,,,I do not need a partisan party to redefine the term. History
and the founding forefathers, in addition to Merriam Webster are those I
choose to believe.

>You, the one lecturing me that all rules should

>be "evergreen" and subject to revision as

>society and culture changes, are now sticking

>by a definition which is obsolete?

Where did I EVER say the la should be subject to revision? If I felt
that way, I would work actively to change the dx rule, but I do not> I
selectively disregard the rule. I find it much more easier and less
trouble. The dx rule isn't worth challenging.

_
That the right has been so effective in making terms mean something

completely opposite of what it truly is (a liberal, of all examples) is
frightening.

>Nothing frightening about it. It's reality.

When a political party believes it can take a defining word and change
it's meaning after 228 years, that is not reality, far from it.

>Liberals have been a key force in the

>undermining of traditional values for the last

>30+ years. There are practices and activities

>which are almost common today that no one

>would even think of doing in the 1950's.

Same with the oppression of our rights.

>You might think this is good. But I don't look at
>increased promiscuity, along with gratuitous

>sex and porn, the abandonment of traditional

>family roles etc, as a "good" thing.

Those were your first choices, not mine.

_
When the US government begins using the
term as an insult, those who follow such
bullshit must be educated to all they have been falsely indoctrinated.
You have been misled and lied to by Bush.....on many occassion.

>I have been a strong conservative long before

>Bush came along.

As I was a staunch republican until Ronnie's second term when they began
declaring war (economic, drugs, tariffs) on our own citizens.

>It's refreshing to see a decisive leader who is

>guided by principle rather than one who

>changes his position depending on the

>political winds at the time.

It sure is, but too bad we don't have that choice this time around.

_
In fact, it is you and Frank
who were shown not to know what a liberal is. Washington was a liberal.
Our forefathers were liberals. This country was founded and built by
liberlas.

>Today's liberal is someone who wants

>freedom for everyone, as long as it's

>according to their standards.

Wrong, wrong, way wrong. This is what the right has attempted to
redefine.

>No that's the truth. Take the recent political

>events as an example. The left feels that it's

>perfectly fine and an expression of a person's

>1st amendment for Michael Moore to create a

>"propagandamentary" trashing and distorting

>Bush's leadership. But now that the shoe is on
>the other foot and a group of veterans is

>disputing Kerry's Vietnam claims, the left

>screams bloody murder and has attempted

>legal intimidation to attempt to block the

>release of the (#1 on the Amazon.com best

>seller list) Swift boat book Unfit for Command,

>as well as the associated TV ads. So what

>happened to the Left's cherished respect for

>the 1st amendment? The answer is clear to

>those who are not blinded by partisan myopia.
>The left are hypocrites of the first degree.

>A typical example is how the democrats had

>no problem with letting Michael Moore trash

>the president, but now scream foul when an

>independent group is now taking aim on Kerry.
Moore can be sued if anything in his movie was untrue. No lawsuits after
all this time. Conclusion,,,,,,,hmmmmm.

>Many of F-911's conjectures have been

>isproven by the 911 commission report (I trust

>you've read it?).

Sure I have. One question to you..have you seen the movie, or are you
commenting on what you have been told, read, and hear?

>Kerry can do the same to the Swift Boat

>veterans. Yet he, instead of taking aim at the

>veterans themselves, has attempted to block

>distribution of their book and ads. Conclusion?
>Hmmm.....

Conclusion is Kerry appears to be taking legal actions at untruths. Bush can't do the same because what Moore said he did is true. Don;t you believe for one microsecond that if Bush could have Moore's azz on a platter, he would. to think otherwise is naive, as Bush has been shown to be hotheaded, non-composed, non-articulate, a liar, and spiteful and retaliatory, and holds great disdain for Americans who express their Aemerican birthrights,,,the right to express displeasure with the president.

>Today's liberal is two faced, duplicitous, and

>hypocritical. Today's liberal wants the working

>man to pay for the habitually lazy. Higher

>taxes for richer people.

Nope,,just their fair percentage of their income.

>What's "fair" is purely subjective. I don't

>believe that anyone deserves special

>consideration.

See below,

The tax rate should be flat.
In fact, when faced
with actual percentages paid from their income, the top two percent of the wealthiest
have the least taken out of their income
(percentage wise) when compared to the
bluecollar worker, even though in sheer
dollars, they pay more.

>The top 10% of wage earners pay over 60% of
>the total income tax revenue.

And STILL it is NOT the same percetnage of their income as the blue collar and middle class workers,,it is MUCH less.

The irony of this revelation alone should be enough to serve as a wake-up call to the nation as the gap continues to widen between the levels of society, but nope,,we have smokescreens by those like you who are more concerned with redefining terms to encompass all who dare oppose the current Bush regime are its enemy.

–

>Those who work hard and earn a place in the

>higher echelons of income should not be

>penalized for their success by being burdened
>by the baggage of those who lack the ambition
>to achieve similar success.

It's not a penalty to ask them to pay the same percentage of their
income as the working class.

>From those according to their means, to those
>according to their needs. Sound familiar? Try

>reading Karl Marx for the answer.

See above for solution.

_
You have succumbed to partisanship rhetoric of the right, where all who
dare question or oppose the Bush admin, are labeled a liberal.

>Liberals and their socialistic ideals have been

>"bad" for this country long before Bush came

>into power.

No,,they have never been bad,,,,,that is why the great ones were elected
over and over for the course of ther lives. And the term "liberal" was
never more misrepresented than when Bush came into office, but then
again, Bush misrepresents everything.

_
The term has become, albeit incorrectly, an intentionally misplaced
catch-all to encompass anyone who opposes the current admin.

>The answer is easy if you look at a few key

>acts.

I agree,,,and the answer is November when Bush gets booted back to
Texas.

>1. Socialism is a concept of a social structure

>which dictates that government shall take from
>those according to their means, to those

>according to their needs. This is well

>documented.

>2. Which political party in this country looks to

>take more taxes from those who achieve, to

>give back to those who don't?

"MORE" is a relevant and subjective term when distribution is accounted for.

>3. A free market economy and true freedom

>involves less government involvement in

>personal lives allowing people to make greater
>choices.

Yet, Bush has taken away more choices and imposed more governmental intrusions (laws passed) than any other president.

>4. Which party is seeking to increase

>government involvement in people's lives,

By laws taking away rights disguised as protection from terrorists...

>by

>proposing government mandated education

>programs, healthcare oversight,

Healthcare oversight is all Bush. So are drug prices.

>preventing

>social security investment in private accounts,

Whooaa,,,messing with SS by this admin is going too far,,,they already screwed up the dru prices and health care to the point of no return, in fact, everything they touch turns to sh*t.

>limiting gun ownership rights (Who needs the

>2nd amendment?),

Or the fourth?

> and of course increasing

>taxes to pay for it all?

That was Bush. Bush raised taxes for the state of Texas to build his new stadium for his ball team, and then after he got what he wanted, turned around and claimed hewas against raising taxes. You want a list of Bush flips? He has Kerry outnumbered 10 to 1 on flip flops.

_
>I've opposed bleeding heart liberals since the

>time I was aware enough to realize that they

>were undermining the traditional values that

>this country was founded on.

Bush is the one undermining the values,,such as our rights...not the liberals. You can cite NO liberal that has EVER seeked to take away portions of our constitution.

>Every liberal who favors gun control is

>trampling on the 2nd amendment.

I am always accused of being a liberal, yet I am a card carrying member of the NRA. And why is the second amendment so much more important than the fourth? You disregard the assaults on the fourth by Bush and Ashcroft.

>Liberals are the ones who would defend the

>"right" of someone to distribute kiddie porn,

>rather than acknowledge that this is a social

>disease.

Social disease? whooooo.that's a liberal term, isn't it? But of course, we all know you made a boo-boo when using the term, 'cause the right locks up those with social diseases.

>As it should be. There are just some activities

>that should not be allowed. Freedom is not

>absolute.

Yea? As it should be? No,,,you don't lock one up for alcoholism or gambling. Now you're professing something akin to the Nazis..locking up what you feel are undesirables.

>Please provide any exchanges that I have

>authored where I defended the concepts of

>socialism. I believe in limited government.

Wrong, you favor government imposition and can't even see it.

>Not at all. I believe is responsibility an

>accountability.

Accountability does not extend to you being one that another must account to, although you ahve attempted such on many occasion.

>I'm not electing myself Pope here. I'm just

>aying that people need to be held accountable
>(to someone or thing) for their actions.

>You a re free to do what you will, (within the

>framework of a civilized society) but you are

>solely responsible for the effects of your

>actions (or inactions).

Exactly,,,,,*I* am responsible for my actions, not you,

>So how can you be held accountable to hold

>to your responsibility if there is no one there to
>make the determination?

For what actions? Having the government watching citizens all the time
in case they step out of line is akin to making something illegal
because it has the potential for abuse......and I'm not surprised you
take such a position.

>Claim's of "taking responsibility" are

>meaningless unless there is a mechanism to

>enforce it.

There is..it's called the FCC, remember? You took issue with them when
they enforced the rules you said we must follow.
I gotta do some work on the boat. Be back later.

Nobody is suggesting that laws should be blindly followed, but you
have claimed that that laws should be openly violated -because- you
question their integrity. That's not the way it works, Twist. Try
reading the First Amendment.

Nope, the truce still stands. Woodward was killer and
pictures won't do it justice.

I made buds with this car club up there and had great
seats, you'd really have to see an aerial view of it
to really appreciate what's going on.

I have pics on film that I haven't taken in yet. My
brother-inlaw died from cancer today, he was only
44.

::shudder:: He was 70 lbs.

Thanks Shark. No, he had cancer in his aeorta right next
to his heart, so they couldn't get all of it with the
surgery or radiation. Although he had part of that
replaced with some kind of synthetic hose.

Damn shame.

Damn shame.

Good god! What's the price of that one? Looks great! I like the XLR mic
input! think it has Phantom power on it to use a real broadcast mic, OR
think of the pro level processing you could put in front of it to punch it
up . something like this: http://www.tcelectronic.com/Triple-C.

Hmmmm, The possibilities are endless!

2885. Noise-canceling Mic Suggestion?

Newsgroup: rec.radio.cb
Date: 2004-08-25 15:37:42 UTC
From: Obadiah <pilgrimworker@yahoo.com>
Message-ID: <412CB246.6547E115@yahoo.com>
Source record: 185745

Hi. I am somewhat new to CB and have a quick question. I have a RadioShack TRC-520 in my pickup. I'd like to replace the cheap plastic mic w/ a noise-canceling and, if possible, powered mic. Everything I find says 4-pin or 5-pin, but if I look @ my unit I see 6 pins. What am I missing here? :^)

Any suggestions on a good model? Thanks.

  but then again, to illustrate the post in its entirety and the reply of which it was directed would certainly disqualify your scoundrel activity of which we have all become so fond.
All groups need examples of the worst and the best. You're our worst.
Certainly snipping a passage from a post and alienatiing it from its original text almost always changes its meaning.

>I know it

,,and have always maintained such.

>yes and i also maintan you are guilty of

>snipping posts

It was never initiated by who you blame for your misery. Snipping only a passage from a post
is exactly what you are usually guilty of.

>Return fire,

.is exactly what you reap. Was never I that initiated that behavior.

>JR.

Jay-are? Is that who I am today? Ok.
Now, worrying about your own incompetence would go a long way in handling your incredible low self-esteem and battered ego instead of expressing paranoia over the identity of those you encounter via usenet.

> don't like it when someone plays your game

>with you.

Not *my* game nor did I ever initiate the behavior. The only "game" I see taking place here is you volunteering for puppet duty.
The rest of the world (read: majority) do not look to usenet for "games", such as you do, but as a medium of the proper exchange of communication, something of which you have yet to learn. By all means, "play" your "game" here all you want, if that's what it takes for you to gain self confidence.

In a way, having something noise cancelling AND amplified is an Oxymoron (after all, you want to cut down background noise and yet you are looking for audio amplification). The RK56 is a time tested NC microphone, and I suppose someone makes a NC/Amp microphone. The last decent one I tried was the Turner RK70, or maybe it was a 76. The majority of Realistic radios used a 6pin "DIN" connector (like a half circle of pins), although they have had a few models that used a 5 pin (similar to the Cobra) or 4 pin connector.

>acknowledged creating (via alcohol).

You flew right past it, Twist....."or petition". The First Amendment give you the right "to petition the Government for a redress of grievances", which means you have a legal and direct course of action to try and change any law you think is unfair. That is a right which goes above and beyond all the other rights that you are guaranteed to insure that the government remains a democracy. But if the petition is denied, you -don't- have the right to ignore that law. And you -don't- have the right to selectively ignore any law just because you are a spoiled little child and are too lazy to follow the legal procedure for change.

> League in 1979, has become a superstar in the country market in the 90s.
> At the end of the 90s Fuller had returned and was performing with
> O'Connor, Gerry House, Reilly and songwriter Gary Burr.

PPL was up there with the greats of country rock and were outselling
all of them in the mid 70's. That Bio above though is totally
inaccurate.Fuller left in early 73 , not 75. Call didn't return
because Amie became a hit in 75. He returned in early 73 after Fuller
left.Call left the band because he wouldn't live on a farm in Canada
and the guys from the debut LP broke up leaving Fuller and Powell.
Bustin' Out and Amie became a hit in 75 because Larry Goshorn joined
Call, Powell ,Connors, Hinds and Reilly in 73,toured for two years
with no contract, built a following , generated airplay and were then
resigned by RCA who had dropped them. Goshorn's Two Lane Highway got
much airplay, the LP became PPL's first gold record and dragged Amie
and Bustin Out onto the charts 3 years after their original release.
The incorrect bio says minor albums, even though Two Lane Highway and
If The Shoe Fits both did better on the charts than Bustin' Out ,
Firin Up was a huge success with their only top ten hit and their Live
LP was another big one. They received praise in Rolling Stone, Circus,
Billboard , Variety, People magazines and many others all after Fuller
left , from 75- 81. The Bio is inept, was used for many years thanks
to the idiots at AMG who pushed it off to many sites. They have since

updated it after receiving countless emails with a correct bio. I personally wrote them for two years then received a letter, their first and only response, to stop writing them, they were correcting it. Dance and Live ! Taking The Stage (which in the past two weeks went for over 100.00 twice on ebay)were also first rate LP's. Powell and Goshorn were as good or better songwriters than anyone in country rock. Goshorn and Call played twin leads that were innovative and no one else matched what they did. John David Call was the best steel man on the scene, truly incredible. Their LP's with Gill also did well particularly Firin' Up, another classic from PPL. From the point Goshorn entered right up until Gill left , PPL had numerous TV appearances and toured nationally every year, with all LP's hitting rock and country charts, something most country rock acts couldn't match.A very talented and successful band, it all happened long after Craig left in 73. Country rock had a small window in regards to airplay and exposure and PPL were at the top of the heap right into the 80's while most had come and gone. An excellent group whose music held up all these years as evidenced by the demand for their work on ebay. Larry and Tim Goshorn have two excellent CD's , check out their website.

2900. Farewell Amateur Radio and CB

Newsgroup: rec.radio.cb
Date: 2004-08-26 07:21:07 UTC
From: Me <k8cpachuck@gmail.com>
Message-ID: <cgk313$hgg@odbk17.prod.google.com>
Source record: 185760

Greetings all,

it is with a heavy heart that I write this message.

after the events of today. I have decided that this hobby just isn't worth it any longer.

Before it comes out in the news. I will annouce it to the amateur radio world. Yes, I did get a letter from riley hollingsworth. it was reguarding a supposed "Death Threat" made to another ham. It happened on qrz.com. I did post the message, however, I didn't intend it to sound as it was taken by alot of people. I did send a reply into riley, I have it hear if anyone wants to read it.

Before I go on, I just wanted to share something.... I got into this hobby in 1989. I'd been interested in Amateur Radio since age 8. My grandfather's sister's husband was a ham, He was from Little Rock, ark. His name was james, his call, was KA5LAB. (Now a silent key) He had a wonderful shack, even gave classes in his garage. I was so awestruck by what I saw, I vowed that one day, I would become a Amateur Radio Operator. and finally in 1989, I finally after alot of years of stuggle, I finally obtained my Novice license. I was so proud, as were my parents. about a year or so later, I upgraded to Tech, and again, my parents were very proud. I always have been proud of this hobby and I've always enjoyed this hobby.

However, In the last few years, alot has taken place in my life, I've noticed a change in this hobby as well, some for the good and quite frankly, alot for the bad. I admit, I haven't been the most popular person in this hobby, and quite frankly, there's quite a few who don't like me at all. I speak me mind, quite a bit, I'm for the little guy, the working stiff, someone who's often overlooked by the "well to do" in this world. I don't claim to be a perfect shining example of what a "amateur radio operator" should be, quite frankly, I don't think most of us could be that.

As I said before, alot has taken place, I'm not the same person who was originally introduced to this hobby, I've grown up alot, and I'm quite naive as I once was. I was very naive as Child, needless to say, in my later teenage years, say, 19-20-21... I grew up in a great big hurry. and... alot as recently taken place as well, and I've, quite frankly, been forced to take a long hard look at my life and things around me and I've noticed that things I really used to hold dear to, simply don't really hold my interest any longer. at one point in my life, I lived, breathed, and ate, slept, and walked and talked amateur radio. it was all I ever was interested in. well, quite frankly, I just don't

have the drive or desire any longer.

Now to address the situation at hand. Thanks to some very "interesting" people in this fond hobby of mine, I recieved a "bad boy" letter from our amateur radio enforcement person. Riley Hollingsworth. This "Incident" in question, did NOT take place on the air, as it was told to him. It happened on the Internet. well, mr. riley says that doesn't matter. It only matters that I am a licensed ham and that I supposedly, made a threat to someone. This is quite disturbing to me. and quite frankly, I am not so such I like being painted as some dude who goes around threatening people everyday. I do not do this and I've got people that would be more than happy to back this statement up. I've told riley this as well, in my reply.

So, Be that as it may... I have come a decision. I am getting out of Amateur Radio. This once great hobby, has degenerated down to a level of which I wish to no longer be associated with any longer. I will be selling the equipment, eventually. I need to make some repairs to some of it, and once that's done, it's outta here, the whole station, (I won't be selling K8RFP'S wattmeter, so, he doesn't have to worry) However, everything I own, that pertains to amatuer radio, will cataloged and sold as a package deal. radios, antenna tuner, 2 meter mobiles, everything is outta here. I will be annoucing this when I am ready to sell on QTH.NET.

To the local freinds I have made on ham radio and abroad. thank you for your friendship, you know who you are. To those who did attempt to railroad me off amateur radio. I hope you are happy. Especially to the staff of QRZ.COM. for using your personal friendship with riley hollingsworth, to get me a notice. it served it's purpose.

Thanks for reading this and have a good day...

-Chuck Adkins
K8CPA (Hopefully for a little while longer...)

Thanks for your kind follow up. I see what you mean about power &
noise-canceling. I thought I saw one like that in my searches, but guess I was
wrong. I don't really care about the power part, but would like to find
something that is noise-canceling.

If you have any links, I would be grateful. Thanks.

>You flew right past it, Twist....."or petition". The
>First Amendment give you the right "to petition
>the Government for a redress of grievances",

Only I have none of these "grievances" you speak of.

>which means you have a legal and direct

>course of action to try and change any law you
>think is unfair.

It's a non-issue with myself. It's so mundane, a law that is never
enforced isn't worth the bother you suggest.

> That is a right which goes above and beyond

>all the other rights that you are guaranteed to

>insure that the government remains a

>democracy.

Ee are not a democracy, we are a republic.

>But if the petition is denied, you -don't- have

>the right to ignore that law. And you -don't-

>have the right to selectively ignore any law just
>because you are a spoiled little child and are

>too lazy to follow the legal procedure for

>change.

I have the "right" to do anything I choose and if those who enforce the
law feel my acts are infringing on others or breaking the law, the law
has the right to make me accountable. If experiencing pain over cbers
talking dx is all you have to entertain and concern
yourself,,,,,congratulations.

>is exactly what you reap.

_
You have always initated the snipping of posts. I merely follow suit in
replies to you,....in fact, look at your posts from when you entered the
group,,,selective snipping to all who have scooled you.

_

>yes indeed, we all know you have initiated that
>behaviour thanks for sharing your dilema with

>the rest of the group.

You're not part of the group unless we say you are. In fact, when the
three or four who reply to you stop replying to you, you cease to exist
and take to playing,,er,talking with yourself.

>JR.

Jay-are?
Who is Jay-are?
Is that who I am today? Ok.

>You need to ask yourself what cartoon

>character name you are playing today, I just

>posted 2 letters now there is some secret

>meaning behind them???

That you feel "just typing 2 letters" with no significance in your posts
is a clear and concise example of one who can express themselves clearly
is laughable. I guess like the Tourette's you suffer, you wildly flail
about and among your spastic convulsions, post things with no or erratic
meaning.

>lol paranoia running wild huh twist

Oh yea,,tons, so much, in fact, I induced in you the need to call me
Jay-Are and claim you are suffering communication breakdowns again when
no one can comprehend your unclear projected paranoia.

_
Now, worrying about your own incompetence would go a long way in

handling your incredible low self-esteem and battered ego instead of expressing paranoia over the identity of those you encounter via usenet.

LOL look at you froth over the mouth over 2

>letters, Jr.

You went to pieces when asked why you called me JR. Carry on with your show, please.

>.. lol talk anout battered ego's and low self

>esteem you have the market cornered.

And you are found to be made standing there with the dunce cap.

> don't like it when someone plays your game

>with you.

Not *my* game

>Exactly it isn'yt your game, you suck at it

Make up your unclear and damaged mind. First iyou claim it's *my* game, then you were forced to self-contradict. In fact, the only game, once again, is in watching you deteriorate.

nor did I ever initiate the behavior.

>Another bold face lie

The only "game" I
see taking place here is you volunteering for puppet duty.
The rest of the world (read: majority) do not look to usenet for
"games", such as you do,
but as a medium of the proper exchange of
communication,

>with whom cartoon character's?

Try that again, this time with all the communciation skill you can possibly muster.

>who would

>take a cartoon character seriously on the net?

Apparently, only yourself.

Amateur Radio Newsline™ Report 1410 - August 20, 2004

Amateur Radio Newsline report number 1410 with a release date of Friday,
August 20th, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio is ready as Hurricane Charley comes
ashore. Find out the details on Amateur Radio Newsline report number
1410 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAM RADIO AND HURRICANE CHARLEY

Packing 145-mile per hour winds Hurricane Charley slammed into west-central Florida, ravaging oceanfront homes and trailer parks, tearing apart small planes and inundating the coast. More than a half million customers were left without power or telephone service statewide. Damage
was especially heavy in downtown Punta Gorda on Charlotte Harbor. Warren Elly, W1GUD, is a Tampa based TV reporter sent to cover the aftermath of Charley coming on shore:

--

Audio report only. Hear it in mp3 audio in the current newscast posted
at http://www.arnewsline.org/quincy

--

Warren's report was filed early Monday the 16th. Since then President
George Bush has declared some sections of Florida as a major disaster area. His brother, Florida Governor Jeb Bush, projected damage from Charley could exceed 15 billion dollars, but that estimate was preliminary. (ARNewsline(tm))

**

RESCUE RADIO RULES: FCC CLARIFIES EMERGENCY DECLARATIONS

The FCC has issued what amounts to a white paper to clarify the rules
hams must follow when providing communications during an emergency.

Amateur Radio Newsline's Mark Abramowicz, NT3V, is here to sort it all
out:

--

With the hurricane season upon us and wildfires and other severe weather
hitting various parts of the nation, the Federal Communications
Commission believes now is the time for a clarification on Emergency
Communications Declarations.

What is an Emergency Communications Declaration or ECD?

When a natural disaster or accident interrupts or disrupts normal
communications systems in a particular area, the FCC - at the request of
emergency management officials or an amateur radio operator acting on
behalf of emergency officials - issues an Emergency Communications
Declaration.

Essentially, the order defines special conditions and special rules to
be followed by amateur radio stations providing service during the
communications emergency in that particular area.

The FCC says occasionally, it receives requests for Emergency
Communications Declarations before a hurricane or tropical storm hits.
The FCC says such requests generally arrive anywhere from 24 to 72 hours
in advance of weather predictions citing potential damage to a
particular area.

But under Section 97.401(a), emergency communications before an event
CAN be established to meet essential needs of a community or to help
prepare relief activities. The commission acknowledges preparations to
meet a disaster may overload or damage normal communications systems so
it allows amateur stations to make emergency transmissions at any time
prior to or even during a disaster.

In essence, the FCC says there's no need for an ECD because the actual
event disrupting communications has not occurred.

So, the FCC says such declarations WILL NOT be issued until AFTER the
disaster disrupts normal communications in a geographic area subject to
FCC regulation.

Speaking of emergencies, it doesn't necessarily have to be a weather-related incident, as we found on September 11, 2001. It can also be a transportation accident such as a railroad incident or a fire or explosion.

Whatever the emergency, once communications are disrupted, the FCC says there are only two sources from which it will accept an application for an ECD. The first is an emergency management official responsible for communications in the affected area. The second is an amateur radio operator acting at the request of an emergency management official.

The FCC says such applications must contain very specific information such as:

- The date the event has taken place.
- The nature of the disaster.
- A description of the communications system disrupted and a contact person who can verify the damage.
- The geographic area affected - city, county, state or region.
- Listing of the VHF/UHF, MF or HF frequencies to be used during the emergency.
- An estimated time the disruption of normal communications is expected to last.

The FCC says an Emergency Communications Declaration will contain an expiration date. However, the commission says that date can be extended at the request of the emergency official or authorized party making the original request.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

The FCC's Communications and Crisis Management Center is the place where Emergency Communications Declaration requests are sent. You can reach them by phone at 202-418-1122, that's 202-418-1122. FAX requests are handled at 202-418-2813, 202-418-2813. Or, you can make the filing by e-mail to comm(hyphen)ctr@fcc.gov. (ARNewsline (tm))

**

EMERGING TECHNOLOGY: AUTOMATING EMERGENCY ALERTS

A new technology soon to debut in 12 states will significantly extend Amber alerts, reaching cell phones, e-mail and handheld computers. It could also be used to transmit weather and terrorism alerts.

According to news reports the system uses a simple broadcast technology that takes the information from a Web portal and reconfigures it for different types of broadcast. By way of example, a state department of transportation might receive it in one format for its road signs and another for its information number.

More important, people with cell phones can sign up to receive Amber alerts with their local county or with state authorities. The text of an alert can be sent immediately to local TV news stations and Web sites.

**

RADIO RULES: INTERNET LINKING IN THE UK

Telecommunications regulators are about to make ham radio internet linking a lot easier on the other side of the Atlantic. This, as Ofcom which is the U-K equivalent of our FCC issues new and more liberalized rules. RSGB news presenter Jeramy Boot, G4NJH, has more:

--

Ofcom has announced the decisions it has taken about changes to the procedure and terms of issuing Notices of Variation (NoV) for Internet Linking Gateways.

Ofcom proposes to pass the Internet-linking NoV process to the RSGB to issue NoVs on behalf of Ofcom. The RSGB will be announcing procedures for NoV renewal shortly and queries on the renewal process should be directed to the Society.

Ofcom's decisions were made following the notification of four proposals
which gave those holding an NoV the opportunity to make representations.

Jeramy Boot, G4NJH, in Nottingham.

--

For those interested the complete set of new U K Internet linking rules
is on line at http://tinyurl.com/4LE8P (GB2RS)

**

RADIO RULES: VANITY FEE REMINDER

Back here in the USA, a reminder from the FCC that the new Amateur Radio
vanity call sign fee of $20.80 for the 10-year license term became effective on Tuesday, August 10th. Not on Friday, August 6 as we and and others had announced.

The reason for the last minute change? A management-level staffer in the FCC's Office of Managing Director explained to the ARRL that the Commission was not necessarily bound by the August 6 effective date The
Federal Register indicates. That date was 30 days after publication of
the order containing the new fee schedule. (ARRL, FCC)

**

ENFORCEMENT: NO LICENSE - STAY OFF THE AIR

Meantime the FCC has written to a pair of unlicensed operators telling
them to stay off the air. The agency's Daryl Duckworth, NNZ0W, explains:

--

Duckworth: A warning notice went to Rick Shepherd of Crescent City, California for unlicensed operation on 146.515 MHz along the Oregon/California border aboard the fishing vessel Sunset.

David Shoemaker of Sebina, Ohio, also apparently not in the FCC Licensing Database was issued a warning notice for unlicensed operation
from a vehicle with license plates registered in his name. The transmissions were on 28.085 MHz near the intersection of I-71 and U.S.
36.

--

Shepherd and Shoemaker were both told that operation of radio transmitting equipment without a license is a violation of Section 301
of the Communications Act of 1934. They were also informed that continued operation could lead to fine or imprisonment, as well as seizure of any non-certified radio transmitting equipment that they own.
Monetary forfeitures for unlicensed operation normally range from $7,500
to $10,000. (FCC, RAIN)

**

RADIO RULINGS: FCC PERMITS SAN JOSE STATION TO BUILD SAN FRANSCISCO TRANSMITTER

The San Franscisco Chronicle reports that thousands of people in and around San Francisco will be able to watch NBC television over the air
again. This, courtesy of a Federal Communications Commission ruling on
Thursday, August 12th, that will let KNTV build a new transmitter to cover the area.

According to the news story, the San Jose based station will be permitted to construct a new transmitter atop San Bruno Mountain which
overlooks San Francisco. The station claims this site will reach 400,000 people who lost service when KNTV became the Bay Area's NBC affiliate in 2001. (FCC, San Franscisco Chronicle and other published
news stories)

**

NAMES IN THE NEWS: ANOTHER OPERATION FROM IRAQ

Even as the military action in Iraq continues another ham radio stAtion
has come on the air from that war torn region. This, word that Ryszard
Nowakowski, SP8HKT has been licensed to operate as YI9KT.

Ryszard will be there for five months. He uses a 100 watt radio into a
vertical antenna on all bands from 40 to 10 meters. He operates mostly
on C-W but will come onto SSB if you make the request. (GB2RS)

**

NAMES IN THE NEWS: NEW QCWA OFFICERS ELECTED

Former FCC rules man John B. Johnston, W3BE, is the new President of the

Quarter Century Wireless Association. Also elected are Vice-
President
Bob Roske, NOUF: Secretary Alan Pickering, KJ9N and Treasurer Frank
Harris, WA4PAM

Elected to serve as QCWA Directors are Tom Atkins, VE3CDM: Harold
Chase,
W1EES: Lew Gordon, K4VX: Jerrel Jones, W5TUU; Ray Minichello, W1BC:
Len
Nathanson, W8RC: Blanche Randles, W4GXZ, and Ed Yoder W3YMB.

Both Gordon and Nathanson are former Directors of the ARRL. 2307
QCWA
members returned ballots in this years election. (QCWA)

**

EVENTS: 2004 QCWA NATIONAL CONVENTION IN OTTAWA

And speaking about the QCWA. word that the organization will hold its
2004 international convention in Canada. The dates are October 15th
through the 17th at the Lord Elgin Hotel in Ottawa.

This years gathering is hosted by the National Capital Chapter 70.
More
information is on line at www.qcwa.org/2004convention.htm (QCWA)

ON THE NET: LINUX CONTINUES TO GROW

The use of the Linux operating system especially among experimenters
including ham radio operators is quietly growing. One in five
servers
sold last year to handle Internet traffic and corporate networks ran
on
Linux.

Observers say that the economic downturn may be responsible for the
Linux move. The Linux operating system was created as the people's
software, free and open for everyone to use in an attempt to thwart
the
commercialization of all Internet technology. Amateur radio was

among
tgher first to truly embrace it and may ham radio applications are
written for Linux based operation. (Published news reports)

HAM RADIO IN SPACE: NASA CELEBRATES ISS AT MARINA AIR FAIRE

Scott Avery, WA6LIE, reports over the AMSAT mailing list that NASA
will
have a booth set up at the Marina Air Faire in Marina, California
on
October 16th. Scott says that the plan is to make a live I-S-S voice
contact and to also have a video of Q-S-O's made with the space
station
playing for passers by to see. Scott adds that any help in getting
video files of school contacts with the I-S-S would be appreciated.
For
more information please contact him by e-mail to wa6lie@msn.com
(WA6LIE)

WORLDBEAT: LIGHTHOUSES OF AUSTRALIA 2004 ANNUAL DINNER WEEKEND

Turning to news from around the world, word that this year's
Lighthouses
of Australia Dinner will be held in Launceston, Tasmania Saturday,
October 2nd. The dinner will include a tour to the National Archives
Office Exhibition on Australian Lighthouses titled "Beacons by the
Sea."
Also scheduled is a visit to the Low Head Light and the Pilot Station
Maritime Museum also at Low Head the same weekend. (WIA News)

**

WORLDBEAT: RADIO CLUB GETS GRANT TO TEACH THE HOBBY

The Thornton-Cleveleys Amateur Radio Society in the United Kingdom
has
recently received a grant of close to 5,000 British Pounds. This, to
help in the promotion of amateur radio. Over the past two and a half
years the club has held 18 examination classes with 150 passing the U-
K
Foundation class ham radio license exam. (GB2RS)

**

WORLDBEAT: GB4WTA COMMEMORATING THE UK WIRELESS TELEGRAPHY ACT

GB2RS reports that Ted Moore, G7AIR, and members of the Eddystone
Users
Group will operate as GB4WTA on Sundays and some Saturdays through
the

28th of August. The station commemorates the centenary of the United Kingdoms Wireless Telegraphy Act, which came into effect on the 15th of
August 1904. GB4WTA will operate from Wireless Hill in the Rutland area. (GB2RS)

**

DX

In D-X word that K4QD will be QRV August 16 to 27 portable HH4 from. This, from the Northwest Christian Mission in Haiti. Activity will be
on most H-F bands plus 6 meters, using CW and SSB as time permits. QSL
to his home call. (K5SW via VHF Reflector)

And GB6LOP is a special events station that will take to the air to celebrate the 60th Anniversary of the Liberation of Paris during Word War 2. The station will operate on all modes, starting August 25th and
will be on for 4 weeks. Your QSL card will be required beforehand in order to receive the special QSL from this station. Please QSL via RSARS
QSL Bureau. For further information contact G0SWY by e-mail to G0SWY@aol.com (G0SWY)

And also listen for HS7-B on from Thailand. This special event call sign has been issued to celebrate the Queen's 72nd birthday. The call sign will be in use during any SEA NET activities. QSL via operators' instructions. (RSGB)

**

THAT FINAL ITEM: THE BIG T-HUNT: HOW THE U.S. NAVY KEEPS TRACK OF EARTH
ORBITING SATELLITES

The U.S. Navy has built an exotic radar system to track earth orbiting
satellites, and the system has been in place for many years. Now, thanks to a couple of sleuths, details of the Navy's system have been posted on the web. Amateur Radio Newsline's Bruce Tennant, K6PZW, has
the details:

--

The Navy's satellite tracking system appears to consist of multiple transmit and receive sites across the U.S., and one of the receive sites
just happens to be located in San Diego County a few miles north of Brown Field. This, according to web-published coordinate data as

reported in the CGC Communicator broadcast industry newsletter.

And if think UHF moon bounce antennas have gain, wait until you see the
giant array built near Lake Kickapoo, Texas. This two mile long antenna
transmits continuously on 216.98 Mhz with an unmodulated carrier and has
a beamwidth of only 0.02 degrees in one plane. So powerful is the
transmitted signal that when the moon passes through the beam, the
return echo is said to be detectable on earth with only a dipole antenna
attached to a receiver. Talk about the ultimate E-M-E.

For the Amateur Radio Newsline, Im Bruice Tennant, K6PZW, in Los
Angeles.

--

If all this is fascinating and you want to learn more, take your web
browser over to:
http://www.gate.net/~tomk/navspasur/navspasur5.html
and
http://www.jump.net/~crossley/NAVSPASUR/index.html (CGC)

Don't hand me that line, Twist -- you have been whining about
something or other ever since you started posting, Twist. Lately it
has been Bush's illegal regime, before that it was Leland's threats,
before that it was the virtues of illegal operation, etc, etc. You are
nothing but a legal whine-bot, and a hypocritical one at that since
you complain about the alleged transgressions of others while boasting
about your own lawless behavior.

Call it whatever you want, but the fact remains that the people are in
control of the government (at least, they -would- be in control if
they weren't so apathetic).

>>But if the petition is denied, you -don't- have

>law feel my acts are infringing on others or breaking the law, the law
>has the right to make me accountable. If experiencing pain over cbers
>talking dx is all you have to entertain and concern
>yourself,,,,,congratulations.

Oh yeah, I forgot you get your legal advice from the school of natural law, where where 'civilization' is a conspiracy of the weak to opress those who would otherwise exercise their natural 'right' to rob them blind.

So shouldn't you be busy thumbing your way to NY with your other anarchist buddies to crash a political convention? Or did you manage to save enough money to take the bus?

That's a damn shame. Sorry to hear someone has ruined something so dear to you. It's just wrong. Although I have no idea of the details, it seems you should take a "break" and come back to the hobby latter. Your walking away for good (probaly for worse) will only weaken the community and yourself in the long run. It that 8 year old boy still there? Yes, he is. Best of luck to you in whatever you do.

There's a plethora of reasons, the most obvious being most of them
started a CBer's. Most of them are radio people with no hidden agenda.

BUT... certain fucksticks think passing a no-code multiple choice test
makes them better than us. (small minority, mostly cowards)

That said, I pay great attention to people like Jim Hampton and the
like. :)

Because they can. Hey, it's not because they have
a call sign that causes the problem, it's when you act
like an a#$hole and happen to have a license that causes
the problems.

Frank's not a ham, remember ;) That being said I
don't have any problem with Frank when he talks tech
& even politics.

--
Real heroes are men who fall and fail
and are flawed, but win out in the end
because they've stayed true to their
ideals and beliefs and commitments.

–
Frank's not a ham, remember ;) That being said I
don't have any problem with Frank when he talks tech & even politics.
--

Any tech conversation that includes the stroking of Frank must include
Leland. When Leland sticks to what he knows, his knowledge can be
extremely helpful. And he's not nearly as condescending as Frank is when
talking only tech.

>Start over, Twist. Richie Furay and Poco

>invented that sound!!

Yea,,,,I remember the post-Buffalo Springfield member's band.. the "Kind Woman" and "Under the Gun" thing....but the country-rock theme goes back further than even that...remember Rock-a-Billy and the Burnett family? Sam Phillip's Sun Studios in Memphis with Carl Perkins, Johnny Cash, even Elvis. Bob Dylan, The Byrds, and others brought it to a younger audience. Rolling Stone Encyclopedia of Rock and Roll credits CCR as being responsible for the country-rock revival.
Incidentally, did you know Furay auditioned Greg Allman (then with Allman Joys) but rejected him?

Organization: AOL http://www.aol.com
Subject: Open reply to the Boys on 3.865 Morning crew...
Message-ID: <20040127090226.20606.00000522@mb-m21.aol.com>

I overheard something on 3.865 this morning. and I don't normally get
involved in the affairs of others, but this one, I must.

I hear N8EIO, WQ4E, and KC8ENJ on 3.865 running K8CPA down this Morning and
telling much of an idiot he really is, ect...

I want everyone who reads this page to know the real story.

I've known Chuck K8CPA since he was a child. He's a good man, He's got his
quirks. But deep down inside, He's a really nice person. So is his dad and
family.

Now, the real story on why K8CPA became so hated on 3.865.

why? because people like marvin and greg and bobby, are a bunch of
backbiting,
backstabbing people, who are friends to your face and
foe to your back.. Bobby used Chuck as a Pawn in a battle with
Jack WB8BFS and once that battle died down, Chuck found himself ejected
from
3.898. All because Chuck did NOT like the idea of someone talking about
his
mother. Chuck even apologized to Greg, Yet Bobby still holds a grudge.

Further more.... Bobby made a very, very, very cutting statement about Chuck
this morning, and Doll, you've sunk to a new low my friend! Chuck in fact,

was
a victim of a attempted sexual molestation attempt as a child. And you
saying
that, as about as low as one person can go. (I did speak with Chuck before I
sent this..)

and, I ask you this Bobby, Do you molest Nathan? I think you do, being you
know
so much about Molesting Children.

as for why the addresses were sent out... This was AFTER Marvin W8JLH come
into
the newsgroup ALT.TRANSPORT.TRUCKING and ran K8CPA in the ground, talking
crap
that was NOT true.

As for the supposed accusation of K8CPA being banned from QRZ.COM, He is
listed, Stupid... Go look for yourself! http://www.qrz.com/detail/K8CPA he
is
there... He simply told the guys at QRZ.COM, "You all want to censor me,
then
take my call out of your database!" and they did... But after getting some
pretty nasty e-mails from friends of his, he was returned!

So, folks, when you hear people bashing K8CPA, come to the person who knows
him
well, and I'll set you all straight...

For the purpose of my personal protection I remain anonymous...

That said, I pay great attention to people like Jim Hampton and the
like. :)
-
Jim Carroll, Jay, Jim H & the late Richard
McCollum among many others.
Landshark

>I'll even toss Frank Gilliland into the mix, what

>say?

_
Frank's not a ham, remember ;) That being said I
don't have any problem with Frank when he talks tech & even politics.
--

"Any tech conversation that includes the stroking of Frank must include
Leland. When Leland sticks to what he knows, his knowledge can be
extremely helpful. And he's not nearly as condescending as Frank is when
talking only tech."

Well your right about that, when Leland talks tech about
something that he might know a lot about, it would be worth
something. Problem with that, Leland doesn't talk about CB,
Doesn't own a CB, Has no interest in CB, advocates shooting
CB'ers that don't follow the rules in the head like they were
terrorist. Frank, while condescending in tone, at least he owns
a CB, Talks CB, Does experiments with CB.
Now don't get me wrong, when I'll disagree with Frank, I'll
let him know, of course he'll start in with that arrogant attitude,
but that doesn't preclude the fact that sometimes he's wrong,
sometimes he's right.

Chuck (and the group),

What you really meant when you sent that letter/post is certainly not proveable. Apparently, you put it in writing and your problem revolves around how the receiver (and Mr. Hollingsworth) perceived it.

To the group:

The days of the pony express are long gone. That disappeard in the 19th century. Morse code is fun for some, but is of little consequence now. We are in the Internet era and whatever we send/post is there for anyone to see. Some folks use anonymising web sites. Those sites can find out who sent anything through them. Although they normally won't reveal that information, they can and will reveal that information to appropriate government agencies or upon a court order. The FCC is a government agency. Our electronic fingerprints are all over our posts and e-mails.

There are so many flames. Sure, we may argue, but some of the nonsense that goes on in the cb newsgroup and amateur newsgroups is really pushing the envelope. I don't think some of the sexual, racial, and other comments belong in the newsgroups, but that is my personal opinion. What may well count is what the FCC opinion is as to the worthiness of an individual obtaining or retaining their amateur license, given some of the posts. That should concern us all.

We can certainly agree to disagree, but it would be prudent for all of us to try and tone down the language a bit. Folks willing to flame-bait and argue all the time (especially with foul language) are quite unlikely to be much different on the air. That is the problem that Chuck is facing and I'm not sure that the rest of us would care to be in his shoes either now or in the future. I would also hope that the hams that *do* post here to remember that we are guests and should treat all of the other folks - both cbers and other hams - with some respect.

Chuck, I hope this situation resolves in a reasonable manner for all involved. Next time, type what ever you wish - just don't hit "send".

73 from Rochester, NY

2.5K...hmmm. BAD ham!
Hello, I have a Like New, one owner Ameritron AL-1200 Amp for 10-160 meters. I have only used it a handful of times on 17 meters. When I bought it from AES 2 years ago, I had an Electrical Engineering friend come down to test it, as I am visully impaired. It did about 2.5 KW into a Oil Filled Dummy Load. I keep it covered when not in use and I am a non-smoker. I had a deal and he couldn't come up with the money, but it is all packed in its original boxes. I am asking $1800 and I will ship, or 1725, and you ship from near Pgh, Pa. I can be reached at martyjp@comcast.net or 724-875-9357 Thanks for reading this, 73, es g.b.

Regards,
Marty, W3QK

2959. PR: Free Photo Ad, Can Also Link to eBay

Newsgroup: rec.radio.cb

Source record: 185719

Hello Everyone,

First I would like to say thank you to those of you that read my original post and visited my new web site. I also appreciate all the feedback and comments that I have received.

Based on that feedback, and since my web site is still new, I have decided to allow members to post a free photo ad. You can use this free ad to advertise your radio gear for sale, post a want ad, or even advertise your eBay auction item.

While you're checking out my new web site, please be sure to sign up for the free door prize drawing. The first door prize drawing will be held in October and one lucky registered member will win either a new ham or CB radio.

To learn more about how to get a free photo ad and to read the rules for the free door prize drawing, please visit http://www.onlinehamfest.com .

Please also tell a friend about my new web site or add my link to your web page. I could really use everyone's help in getting my new web site off to a good start. :)

Thanks and 73
Dave, Zed Zed

The major one is the 03 Z06. I suspect that I should sell that. I have not started it in 3 months - seems like a waste of $60K.

Stevie Boy - I took the N2O out of the car, so if you need/want it; let me know. I have 2 of the ZEX 15 lb bottles, and all the related hardware. Is it dangerous for N2O to be sitting on a shelf in my garage?

news:4926-412E0CAF-222@storefull-3257.bay.webtv.net...
> Do or can you write and design software programs?

I did for class projects when I was working on my computer science degree. The biggest program was an integrated DOS utility for reading disk parameters, viewing the raw sector data, showing what disk clusters were used by any file on the disk, and finally a disk defragmentation function. The program featured pop-up overlapping menus, hot keys, and mouse control. It was written in C++ and took me about 2-1/2 months to write working on it around 15 to 20 hours per week, design - test - debugging. And after all that it was specifically written for a 720K floppy disk so the professor could test it without killing his hard drive in case of bugs. All that was for a project for a class I took in operating systems. I think mine was the only one that worked and also handled subdirectories too. Even the 20+ something year old class computer geek wiz, and the professor's pet student no less, couldn't do it. I got the "look" from him in the hallway one day at the start of the next semester.

I haven't really gotten in to doing Windows programming, it's event driven verses procedural coded. That's a totally different animal. Windows programming is a real pain, and complex if you really want to take full advantage of the system. For simple programs that don't need a lot of fancy wiz-bang features Visual Basic is a good choice to use. The other choices are Visual C++, C#, or Java. The last three are object orientated languages. That could be a big chuck to bite off and learn for somebody who hasn't done any programming at all.

I've also done some Intel assembly language programming - 8080 and X86, and VAX-11 assembly too. Assembly language programming is to computers like Morse Code is to Ham Radio. Now that I think about it the first computer I had was a Radio Shack TRS-80 with16K of memory. The first assembly language program I wrote, in Z80 assembly, was to translate text on the screen into Morse Code by keying the relay contact used to control the record/play-back function of the cassette recorder used for program storage.

jeez leland you are showing your age :) i fixed the hardware problems
associated with the 8080 processor on several military related programs.
hell we used uv ovens to clear the memories of chips.
the simulators the air force used drum drive technology and if the sims
were having a problem we took out an alan key and physically moved the
read/write heads until it worked. the damn drum drives were used in

grumman a6 aircraft also. hehehe looking back its a wonder that stuff actually worked.

No need to complain -- the AL-1200 has a top-end limit of 15 meters. Besides, it's a quality piece of gear, not a splatterbox designed for 'max swang'. So even if they -could- afford it, the amp wouldn't be of much interest to CB amp junkies because it's not "loud".

Your reply branched off Leland's post. I'm not Leland.
Yet another cut & paste Fk'up, from the google-puppet..
For some reason, you cannot or will not, use a regular
newsreader. Which is sort of odd.. Why is that?? hmm?!?

Carry on with your (busy-body) akc leg humpin' thing, you
troll. lol!

2-1/2 months? You should have learned disk access functions on a
COCO-II -- your program would have been up and running in about three
days. IOW, it's much easier if you bypass the BIOS calls and access
the disk directly.

I'll agree, Windoze sucks for programming. The libraries required for
even simple programs, while easier to understand than DOS, are far
more extensive than the DOS interrupt list, direct hardware control is
almost impossible, and the OS overhead sucks up most of the processing
power.

You might have enjoyed playing with a TI-990 I scrapped a couple
months ago.

Body handling: Inline uuencoded payload not displayed: spacer.gif; Inline uuencoded payload not displayed: arrow.gif; Inline uuencoded payload not displayed: d2header_fade-end.gif

According to the FCC Web site

Operations
Equipment
Territorial Limits
Linear Amplifier Ban
Antennas
Ten Codes

47 CFR 95 Subpart D prescribes all operating requirements which apply
to CB. General system technical details and major operational regulations
are highlighted below.

Equipment

You must use an FCC certificated CB transmitter at your CB station.
You can identify an FCC certificated transmitter by the certification label
placed on it by the manufacturer.

Territorial Limits

You may operate your CB unit within the territorial limits of the
fifty United States, the District of Columbia, and the Caribbean and Pacific
Insular areas ("U.S."). You may also operate your CB on or over any other
area of the world, except within the territorial limits of areas where
radio-communications are regulated by another agency of the U.S. or within
the territorial limits of any foreign government. You may also be permitted
to use your CB unit in Canada subject to the rules of Industry Canada.
Travelers to the U.S. may operate a CB unit within the U.S. as long the unit
is FCC certificated.

Linear Amplifier Ban

Users may not raise the power output of their CB units. That would be
unfair to the other users sharing the channel by raising the level of radio
noise. You must not attach a "linear," "linear amplifier" or any other type
of power amplifier to your CB unit, Moreover, you must not modify your CB
unit internally. Doing so cancels its certification and you forfeit your
authorization to use it.

Ya...but it does MORE than the allowed 1500 watts PEP, therefore it's
illegal.

>>>>Do or can you write and design software programs?
>>>
>>>
>>>I did for class projects when I was working on my computer science degree.
>>>The biggest program was an integrated DOS utility for reading disk
>>>parameters, viewing the raw sector data, showing what disk clusters were
>>>used by any file on the disk, and finally a disk defragmentation function.
>>>The program featured pop-up overlapping menus, hot keys, and mouse control.
>>>It was written in C++ and took me about 2-1/2 months to write working on it
>>>around 15 to 20 hours per week, design - test - debugging. And after all
>>>that it was specifically written for a 720K floppy disk so the professor
>>>could test it without killing his hard drive in case of bugs. All that was
>>>for a project for a class I took in operating systems. I think mine was the
>>>only one that worked and also handled subdirectories too. Even the 20+
>>>something year old class computer geek wiz, and the professor's pet student
>>>no less, couldn't do it. I got the "look" from him in the hallway one day at
>>>the start of the next semester.
>>>
>>>I haven't really gotten in to doing Windows programming, it's event driven
>>>verses procedural coded. That's a totally different animal. Windows
>>>programming is a real pain, and complex if you really want to take full
>>>advantage of the system. For simple programs that don't need a lot of fancy
>>>wiz-bang features Visual Basic is a good choice to use. The other choices
>>>are Visual C++, C#, or Java. The last three are object orientated languages.
>>>That could be a big chuck to bite off and learn for somebody who hasn't done
>>>any programming at all.
>>>
>>>I've also done some Intel assembly language programming - 8080 and X86, and
>>>VAX-11 assembly too. Assembly language programming is to computers like
>>>Morse Code is to Ham Radio. Now that I think about it the first computer I
>>>had was a Radio Shack TRS-80 with16K of memory. The first assembly language
>>>program I wrote, in Z80 assembly, was to translate text on the screen into

>>>Morse Code by keying the relay contact used to control the record/play-back
>>>function of the cassette recorder used for program storage.
>>
>>jeez leland you are showing your age :) i fixed the hardware problems
>>associated with the 8080 processor on several military related programs.
>>hell we used uv ovens to clear the memories of chips.
>>the simulators the air force used drum drive technology and if the sims
>>were having a problem we took out an alan key and physically moved the
>>read/write heads until it worked. the damn drum drives were used in
>>grumman a6 aircraft also. hehehe looking back its a wonder that stuff
>>actually worked.

2990. Amateur Radio Newsline™ Report 1411 August 27, 2004

Newsgroup: rec.radio.cb
Date: 2004-08-29 01:18:28 UTC
From: radionews@aol.com
Message-ID: <20040828211828.25456.00003990@mb-m29.aol.com>
Source record: 185850

Amateur Radio Newsline™ Report 1411 August 27, 2004

Amateur Radio Newsline report number 1411 with a release date of
Friday, August 27th, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. A ham radio operator looses his house and
tower in a fire and an urban terrorist is the suspect. Also,
interference to a ham could lead to a fine for an uncooperative
neighbor and lots happening on the B-P-L front. Find out the details
on Amateur Radio Newsline report number 1411 coming your way right
now.

(Billboard Cart Here)

**

ALL POINTS BULLETIN: ARSONIST BURNS DOWN HAMS HOUSE

An arsonist with a grudge against radio has burned down the home of a
Vancouver, Washington ham. Amateur Radio Newslines' Mark
Abramowicz,
NT3V, has the details:

--

A $10,000 reward is posted and the Clark County Fire Marshal's office
is tracking any and all leads it hopes help them capture someone who
has been setting fire to communications towers in the Vancouver area
since the beginning of the month.

Until recently, investigators say the targets have primarily been
state government, telephone company and cellular telephone towers.
But it was an Aug. 20 fire at the home of John Stein AB7F that now
has alarmed the ham radio community in Vancouver.

The fire marshal's office says Stein's amateur radio tower was
apparently targeted. It believes the fire was set at the base and
spread upward along the feed line. Flames fell from the melting
cables and spread to Stein's home.

Fortunately, authorities say, Stein was awake when the fire broke out
about 11:30 p.m., got out, called 9-1-1 and tried to get a start on
putting the fire with a garden hose. But the fire took off quickly
and, unfortunately, the home sustained extensive damage in excess of
$50,000.

The fire marshal's office says Stein told them he spotted somone
running away from his home and he gave them a description.

Clark County Deputy Fire Marshal John Dunaway is leading the investigation into the communication tower fires.

At this point, the fire marshal's office will confirm basic details about the fires. But the fire marshal's office says there is certain information it cannot release at this time because it doesn't want to jeopardize the case it hopes to eventually bring against the arsonist.

Stein's home was not far from the fires at the other communications towers, the most spectacular of them on a more than 200-foot tall tower in Vancouver. That's shared by the Washington State Patrol and the Washington State Department of Transportation headquarters.

Officials say while the state patrol's communications in Clark County were disrupted by the fire, 9-1-1 communications were not affected. Damage in that fire was estimated at more than $100,000.

That blaze prompted the $10,000 reward offer from a foundation. Ham operators in the Vancouver area are very concerned and fear anyone with a tower could become the next victim. They've been transmitting word about what's been happening via repeater, HF radio and the internet across the region. They're urging hams with towers to be especially vigilant and take precautions to protect their feedlines, but more importantly their homes and their lives.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

There is general agreement that this anti radio fire bug has to be stopped before someone to loose their life in one of his blazes. If any one has information regarding these fires or the person setting them please call the Crime Information Tip Line at 877 - 274 - 6311 or the Clark County Washington Fire Marshal's Office at area code 360 - 397 - 2186 and ask for extension 3396. You may remain anonymous on either line. (ARNewsline ™, CGC, others)

**

ENFORCEMENT: FCC WARNS NEIGHBOR OF HAM OVER INTERFERENCE

A neighbor of a ham radio operator who refuses to clean up interference he is causing could now face a stiff fine. The FCC'as
Daryl Duckworth, NN0W, says that the agency is giving the neighbor one last chance to comply:

--

Duckworth: "A follow-up warning letter went to a resident in Friendwood, Texas, concerning interference to William Cooper, W5ZAF, from a battery charger. The amateur had supplied ferrite beads earlier to the resident which did solve the problem. Evidently, the

resident changed his mind and tossed the ferrites back over the fence."

--

The FCC says that if the interference is not corrected by September 15th, it will have its Field Office investigate the matter and possibly issue the uncooperative neighbor a hefty fine. It also suggested that he consult an attorney regarding the FCC rules that control radiation from unlicensed devices like the battery charger that's causing the problem to the ham next door. (FCC, RAIN)

**

THE BPL FIGHT: ARRL ASKS FCC TO CLOSE DOWN AZ. BPL TEST

Some important developments on the B-P-L front. First to Arizona where the ARRL is calling on the FCC to immediately shut down a Broadband Over Powerline field trial in the Cottonwood. This, because it's causing severe interference to Amateur Radio communication in the area.

The ARRL Letter says that Electric Broadband LLC and utility A-P-S have been operating the B-P-L experiment at two sites since June under a Special Temporary Authorization the FCC granted Electric Broadband in March. Michael Kinney, KU7W, filed the first Amateur Radio complaint in June. It cited testing by the Verde Valley Amateur Radio Association in the 1.8-30 MHz range to show that B-P-L interference made attempts at ham radio communication useless. The interference on typical Amateur Radio equipment shows received undesired signal levels in excess of 60 dB over S9.

According to the ARRL, both the utility and Electric Broadband were contacted, and no response was received. The ARRL says that both companies are aware that the B-P-L field trial has been causing harmful interference and neither has taken any steps to either resolve it or terminate the test. (ARRL)

**

THE BPL FIGHT: BAD NEWS FROM DOWN UNDER

Meantime, Broadband Over Powerline and its introduction in Australia has that nations hams on the alert. This, because little has been known about what has been occurring behind the scenes as power companies prepare to adopt the B-P-L technology and the Australian Communications Agency considers rules to govern it. Now, WIA Newsman Jim Linton, V-K-3-P-C has uncovered an almost terrifying development. One that could mean the end of H-F operations down-under for many V-K hams.

--

The future introduction of Broadband Powerline Communications (BPL) in Australia could be on the condition that "less significant" HF radio users such as radio amateurs and four wheel driver clubs would not be protected from any interference it causes.

The Australian power industry has a real concern about the added expense required to address interference that could affect amateur radio stations and other recreational radio users. Its arguments include that to remove amateur radio frequencies from a BPL system will add cost and reduce the capacity and potential data rate. The power industry is requesting that the Australian Communications Authority (ACA) outweigh the concerns of recreational or "less significant" HF radio users with the higher community benefit of providing greater access to broadband-enabling technology.

The ACA, in response to the power industry concerns, is now examining the legal possibility of allowing BPL networks to cause substantial interference to "less significant" radio services, while other radio services would continue to be entitled to interference protection. Presumably if this becomes reality the Amateur Service could lose its protection against harmful powerline interference too. After all, were are in the eyes of some just a "less significant" radio service.

This has been Jim Linton VK3PC for WIA National News.

--

If this does happen it could mean a lot fewer V-K callsigns will be heard on the Hiugh Frequency and low VHF bands. (WIA News)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the repeaters of the Rocky Mountain Radio League serving Denver and Bloomfield, Colorado.

(5 sec pause here)

**

RESTRUCTURING: ARRL PROPOSES BANDWIDTH DEFINED HAM SERVICE

The ARRL has released a synopsis of its petition to the FCC aimed at restructuring the Amateur service along bandwidth defined lines. While what has been made public is highly abreviated, a drafted, the ARRL's bandwidth petition would preserve double-sideband AM and would stop short of opening the phone bands to digital and other modes of the same bandwidth.

The ARRL's petition also proposes to limit bandwidth in the CW subbands to 200 Hz, which also will accommodate data modes such as PSK31. It also suggests to limit bandwidth in the

existing "RTTY/data subbands" to either 500 Hz or 3 kHz, with phone emissions specifically prohibited in certain subbands where 3 kHz would be permitted.

Obviously this will be an ongoing story. More on this next week as reaction comers in. (ARRL)

**

HAM RADIO IN SPACE: HURRICANE CHARLEY WRECKS AMSAT LAB

Hurricane Charlie has also taken its toll on the Amateur Radio space program. This, with word that the storm destroyed the building housing the lab used to assemble the latest series of ham radio satellites.

Hurricane Charlie hit Orlando, Florida at about 8 p m Eastern on Friday, August 13th packing sustained winds estimated at close to 100 miles per hour. One of the places sustaining damage was Orlando Executive Airport. This was home of the AMSAT Laboratory. The place where ham radio satellites have been assembled and tested prior to launch.

Rick Hambly, W2GPS, reports that AMSAT members in the area survived with relatively minor damage but the building that houses that AMSAT Lab suffered severe structural damage from Charley's onslaught.
It
has now been condemned and will have to be torn down.

W2GPS says that the equipment and parts inventory at the lab are in good shape but AMSAT was given less than two weeks to move out and find temporary storage for its equipment. The Amateur Radio space agency also must begin a search for a new building to support development of the Eagle ham radio satellite and future projects.

Complicating matters is that AMSAT's insurance does not cover the costs of temporary storage or of moving to a new facility. So, they are asking the Amateur Radio community to keep ham radio space projects alive by sending a donation to AMSAT's Hurricane Fund. Hambly says that the money collected will be used to get the lab back in operation as soon as possible.

AMSAT North America is a federally charted 501(c)(3)not for profit organization. Any donation should be tax deductible in the United States. Information on the fund and how to donate is in cyberspace at www.amsat.org. (AMSAT-NA, W2GPS, W5DID)

**
RESCUE RADIO: RADIO STATIONS GET PRAISE IN CHARLEY AFTERMATH

Broadcasters in Florida have been getting involved as the clean-up following Hurricane Charley. One has taken on being the voice of the storm ravaged area.

According to the CGC Communicator, FM radio station Seaview-104.9 in Punta Gorda, Florida and four of its sister stations are all owned by Clear Channel Communications. Seaview-104.9's studios were damaged and the station was knocked off the air by Hurricane Charley, but service was restored within hours. According to a report in the St. Petersburg Times, once the storm had passed, General Manager Mike Moody returned to the building housing his station. The roof was shredded and the ceiling collapsed. But one studio, no bigger than a walk-in closet, was in working order.

Moody said that there was no power but using a generator he got the studio on the air. He also found a phone outlet reserved for a FAX machine operating so he plugged in a phone, put the receiver to the microphone and then let callers unravel their tales of storm survival.

The studio is the only one based in Charlotte County. Because of this it has become a lifeline for residents searching for information to help them cope with the storm's aftermath and listeners like Ron Hall, KP2N, have rallied around the station in support of its vital post storm activities. (CGC)

**

RESCUE RADIO: UK GROUP ACTIVATES FOR FLOODS

Meantime, over in the U-K, a ham radio emergency communications unit was activated. This, after severe rains caused flooding near the town of Boscastle. Jeramy Boot, G4NJH, is in Nottingham with more:

--

Cornwall Raynet Groups were put on standby by their Emergency Planning Unit on the evening of Monday, 16th August, following communications difficulties resulting from the massive flooding at Boscastle. Eleven volunteers were available to proceed to the emergency, but were stood down later as the communications difficulties had been resolved.

Jeramy Boot, G4NJH

--

For those not aware, RASYNET is the U-K equivalent of ARES and RACES here in the U-S-A. (GB2RS)

**

HAM RADIO ON THE NET: MORE CHANGES AT QRZ.COM

More changes have come to the QRZ.com super site. This, as its owner Fred Lloyd, AA7BQ, announces some policy changes regarding the callsigns that are listed in the QRZ Callsign database.

--

According to QRZ's Lloyd, the site will no longer accept callsign designators, prefixed or suffixed, as independent callsigns. This would include reciprocal calls such G 3 slash K6PZW -- a call I might be assigned if I were visiting England.

Lloyd says that these listings were problematic for both the QRZ website and the QRZ CD ROM, and they were of questionable value to begin with. As of the latest software update, the server will no longer accept or record such entries. The logic is that anybody wanting to contact the callsign holder could just as easily look them up by their primary callsign.

Also gone will be non ham call signs such as those self issued by individual SWL's, Weather watchers, and others. Lloyd says that Q-R-
Zed will continue to accept SWL listings as long as they are issued by a formal body, and so long as they have an alphanumeric format. But Lloyd says that an SWL callsign cannot be a primary login account name to a website that manages amateur radio callsigns.

The bottom line: Non-amateur callsigns will continue to be excluded from the QRZ CD ROM and will take last priority with server management resource. In other words, they will be listed on a time and space available basis, only.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, reporting.

--

These changes are in addition to the posting policy changes that Lloyd announced two weeks ago. (QRZ.com)

**

RADIO LAW: SENATE WARNING ON CABLE RATES

The Senate says that it will consider new regulations for cable television unless the industry addresses soaring prices and allows consumers more channel choices. Members of the Senate Commerce Committee said pressure from angry constituents is leading them to look at ways to hold down cable rates and let subscribers choose individual channels rather than packages set by operators.

Since Congress deregulated the industry in 1996, cable rates have increased by 53 percent while inflation has risen 19 percent. Cable operators said the jump reflected higher programming costs, more channels and system improvements such as rewiring to provide digital TV. (Published reports)

**

RADIO LAW: BETTER CELLULAR SERVICE

The government says wireless companies are doing a better job of switching customers who want to keep their cell phone number. In the first month after the change took effect, the Federal Communications Commission received 24-hundred complaints. Most were from people who said the transfers were taking too long. In the past month, the number of complaints has fallen to 400. Customers have had the option of keeping their phone numbers when they switch to a new carrier since November. (Science OnLine)

**

EMERGING TECHNOLOGY: PERSONALIZED PHONE MUSIC SERVICE FROM SONY

Meantime Sony Corporation has announced what it called the first personalized radio service for mobile phones. Under the still-unnamed music streaming service, subscribers would not own any of the songs but could create a customized channel to listen to the music they want, storing favorite tunes in personal playlists. Users would also be able to listen to music from a collection of predefined channels. A "smart personalization" feature could also keep track of the subscriber's music preferences and make song suggestions. (Sony)

**

THE SOCIAL CIRCUIT: TENNESSEE IN AUGUST

Turning to the ham radio social calendar, word that Tennessee's Short Mountain Repeater Club will be sponsoring the Cedars of Lebanon Hamfest on August 28th. This, at the Gladville Community Center in the town of Gladville Look for vendors, a large tail gate sales area and lots more. For more information e-mail keharris@netc.com or take your web browser to www.qsl.net/smrc (E-mail)

**

THE SOCIAL SCENE: LIGHTHOUSES OF AUSTRALIA 2004 ANNUAL DINNER WEEKEND

And if you want to travel a bit, this year's Lighthouses of Australia Dinner will be held in Launceston, Tasmania on Saturday, October 2d. The event will include a trip to the National Archives Office Touring Exhibition on Australian Lighthouses known as "Beacons by the Sea." It will also include visits to the Low Head Light and the Pilot Station Maritime Museum also at Low Head the same weekend. (GB2RS)

**

THE SOCIAL CIRCUIT: GERMAN VHF CONVENTION HAS NEW DATE

And from Europe word that Germany's Weinheim VHF Convention, which
had originally been scheduled for August 28th and 29th will now take place on 11th and 12th of September. The new venue is Bensheim which is 10 kilometers north of Weinheim. Full details are on the web at

www.ukwtagung.de (DARC)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United
States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

WORLDBEAT: CB SPECTRUM SHARING IN THE UK

There may soon be some new sounds on 27 MHz C-B in the United Kingdom, and they won't be saying 10-4 Good Buddy. In fact they may
be very formal sounding. This, as British telecommunications regulator Ofcom proposes to allow local religious and community organizations to operate one-way low power broadcast stations within the U-K Citizens' Band allocation. Our producer, Bill Pasternak, WA6ITF, has more:

--

No. Its not a joke. And Great Britain's Office of Communications --
Ofcom -- says that this is how the new shared C-B service will work.

At first a small number of organizations will be licensed to transmit religious services in a limited number of pilot areas. These would be called Community Audio Distribution Systems or C-A-D-S. Their specific purpose will be to allow house-bound religious congregation members -- people unable to travel to a house of worship but who wish to hear local religious community services -- the ability to do so.

If proven effective, Community Audio Distribution Systems would be expanded as a short-range and inexpensive wireless public address systems. The U-K radio regulator says evidence of demand for such arrangements has arisen primarily from within religious communities and this is where Ofcom expects the majority of use to be. But its not making this a religious-only radio service. In fact it is encouraging other community groups could also use the system for other similar purposes.

To test these plans, Ofcom is proposing a closely monitored year-long pilot program in the areas where interest has been most widespread and sustained. This includes West Yorkshire in England and all of

Northern Ireland. In those regions C-A-D-S users will share spectrum with the Citizens' Band users in a way that Ofcom says will provide the flexibility required to transmit religious and community service material while protecting other spectrum users from harmful interference. At least it will try its best to do so.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, reporting.

--

Can something similar happen here in the U-S-A. Not likely. At least not very soon. C-B is still to crowded, unruly and unstructured a band to effectively share. But it is expected that other administrations world-wide will be watching this United Kingdom C-B sharing experiment with an eye to introducing similar services in their nations as well. (RSGB)

**

WORLDBEAT: BIG VHF TECH SYMPOSIUM DOWN-UNDER

The Wireless Institute of Australia's Central Region is holding a Technical Symposium Saturday October 2nd. Rex Moncur VK7MO will discuss Digital enhancement of VHF signals, Doug Mc Arthur VK3UM EME Techniques, Joe Kasser VK5WU Computers for Amateur Radio and David Giles VK5DG will explain that Amateur Satellites are really only high tech repeaters on orbit. The venue is the Modbury Heights School with talk-in on 148.850 MHz. (WIA News)

**

HAM RADIO IN SPACE: INDIA'S HAMSAT READIED FOR LAUNCH

A Dutch student is helping India put its first Amateur Radio satellite in orbit. Willian Lijenaar, who has graduated as an electronics engineer, has provided a transponder to the satellite.

According to the W-I-A News, the Indian project is called HamSat and is scheduled for launch in four or five months. Reportedly, the coordinator of HamSat had asked the young Dutch engineer to design and build the transponder. Along with Lijenaar's unit an Indian built transponder will be part of new bird as well. (WIA News)

**

RADIO SCIENCE: NASA TO SAVE HUBBLE

NASA has decided to try to save the orbiting Hubble Space Telescope. Possibly by sending a Canadian made robot to fix it.

Nasa Administrator Sean O'Keefe told researchers at the agency's Goddard Space Flight Center in Maryland about the plan. He also has instructed engineers to begin work to put the robotic mission into orbit by 2007. (NASA)

**

DXCC: SOMALIA NOW ACREDITED

Some good news for D-Xers. Effective immediately, the ARRL DXCC Branch will accept QSL cards for operations taking place in Somalia using the 6O / T5 prefix and suffix. This includes the Somaliland which is north-western Somalia and Puntland in north-eastern Somalia. These are autonomous areas but will be accepted along with the southern and central areas of that nation.

The DXCC will also accredit operations possessing written permission from any recognized authority that is acknowledged to be in control of a particular region of Somalia. All cards will count for the Somali Democratic Republic. And says the DXCC, QSL's for past operations will be accepted where proper documentation has been submitted.

Of coarse this is subject to change based on future developments in Somalia. We quill have more D-X news a bit later on. (ARRL, GB2RS)

**

DX

In D-X, word that Kris Partridge, G8AUU, is working in Baghdad and has received the callsign YI9AU. Kris is reported to be active on the High Frequency bands using 100 watts to a long wire but hopes to improve his antennas soon. He is also hoping to become active on Echolink and says that he be in Iraq until early or mid-September.

And G0JMU is again active from Malawi as 7Q7HB. Reports say that he will be there until at least the 22nd of September.

Also, news that 5B4AFM will operate as J42004A from Skopelos and Athens through the 1st September. The island of Skopelos counts as EU-072 for the RSGB Islands on the Air award program.

Lastly listen for the Cook Islands to be on 6 meters with a better signal in coming weeks. This as KC5YKX reports over the VHF Reflector that he has shipped a 5 element beam there for ZK1CG to use. ZK1CG should be on the Magic Band as soon as the antenna arrives. QSL all of these operators in these stories as directed on the air.

(All aboveDX from various DX sources)

**

THAT FINAL ITEM: ECHO - THE TONE ACCESS HAM RADIO SATELLITE

And finally this week a rhetorical question. Why use continuous tone coded squelch access to talk through a ham radio satellite? AMSAT says that there are several very good reasons and Amateur Radio Newsline's Norm Seeley, KI7UP, has them in this report:

--

Continuous tone coded squelch is better known in ham radio circles under its Motorola trade name of P-L or Private Line. And AMSAT says that there are several good reasons to use it on the new Echo ham radio satellite.

First, and simply, is on orbit power management. The ability to minimize the amount of power used by the satellite.

Recent data collection shows that on average, Echo's tone access FM repeater transponder is on for less than 40% of an orbit. There are orbits where that number is as high as 65%, but the average is below 40%. That means the satellite is conserving over 60% of the power that would have been consumed by the transmitter if it were being keyed up by every random signal passing through its receiver. Since you cannot easily change rechargeable batteries on a satellite like you can on a terrestrial H-T, power management is crucial to the long term stability of Echo or any man made satellite.

The second reason kind of tag's onto the first. Its the idea of minimizing the three letters dreaded by hams world wide: Q-R-M.

In the tone access mode Echo does not have to listen to other traffic on the Amateur bands or any other signal not intended for the satellite to relay. While the satellite still has to compete with these R-F sources to capture the receiver, they are not retransmitted downlink. This means you do not have to listen to taxi cabs being dispatched in some third-world nations where the V-H-F Amateur bands have more business going on than ham radio contacts being made. A problem that the world wide Intruder Watch program has been fighting for years.

Yet another reason for tone access on Echo. By closing the audio path when no access tone is present the ground based user hears a short unmodulated carrier for the duration of the squelch tail. This can be used as a good measure of how well you are actually hearing the satellite.

Without tone access filtering, uplink band noise is heard. And, any ham who has heard a carrier access repeater where the squelch is open knows what that sounds like. Amplified noise that is sometimes difficult to differentiate from the actual band noise. In the case of a ham radio satellite it means not knowing if you are hearing the bird at all.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

After Echo's launch there was talk on some terrestrial repeaters that
AMSAT had put a private P-L repeater in space. This is far from the

case. Without tone access, the lifespan of Echo would be significantly reduced and fewer hams would have their chance to make contacts through it. (ANS)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Big words like "punctuation" are waaaay over the little window
lickers pointed head. To him, they are the "odd little marks and
such" between some of the words. He's been a SPED all his life.

If I understood your comment as well as the PS you added, it seems to me, it would be kind of ridiculous to insert some sort of low level Linear "in to" a transmitter to jack it up to 4 watts or more, don't you think? By the time you get done screwing around doing that, you could by a damned radio with rated output or one of the 10 meter radios that can put out more than the rated legal power, if you want to go that route. The FCC web site also states it is illegal to modify the insides to do same - so either way, it would be technically illegal. It is a moot point in any way shape or form to discuss raising the RF power out of a CB past legal limits regardless how it is to be done, internally or externally. I suppose we're both saying the same thing in a different way!

Yeah, in this thread. My first reply simply states that "linears" are not illegal in CB. And if you scroll down far enough, you'll see the punch line. And the fact that no one makes(to the best of my knowledge)a 4 watt linear, was the "play" in my sarcasm.

Call it a failed attempt at humor:-) Although, technically, it IS true.

Actually, you're quite mistaken. FCC rules clearly state that
external amplifiers are illegal, as are modifications made to the
transmitter of any type-accepted equipment. This effectively
determines any amplification of any CB equipment to be illegal. It
would be illegal, for example, for me to connect my vintage SONY
ICB-1000W portable 1-watt radios to a 3-watt amplifier (if such a
ridiculous piece of equipment actually existed) because I would be
using external amplification, which the FCC has ruled illegal.

Yeah, it does show my age all right. I remember doing my FORTRAN programs on
IBM key-punch machines when I was going to school for my EE degree in the
mid to late 70's. Those were the "good old days" not.

> Do you remember "bubble memory"?

Sure do Frank, and all the hoopla about it becoming the next best thing in memory storage. I've even run across some magnetic core memory cards. A customer I visited, of the company I work for, had some they needed to get repaired because they used it in an old minicomputer controlling some of the equipment in the plant. I saw them in their electronics shop waiting to get sent out to the computer manufacturer. The cores where about the sign of a pin head, and the core select, and sense wires, had to be 40 gage, like hair thin size. I think the core planes had to be hand built because of the tiny size of the cores and the wire used. The memory cycle times from what one of my books say was around 1 microsecond. And these were used in the mainframes of the day. Compare that to present day memory chips!

I didn't use any OS calls at all. The only BIOS functions I used were direct
calls to read/write absolute disk sectors. Everything else I had to write
from scratch. As simple as the DOS file system was there was still a lot to
handle. What made thing more interesting was all I had to work with was a
Windows 98 machine. That made thing more complicated because Windows always

wanted to create long file names which messed things up a bit when you format a disk. I had to put extra routines in to the code to filter that crap out so when the disk was defragmented I had wiped all the Windows file system extensions out, thus generating a valid DOS disk.

Those were rather unique if I remember right they used a 16 bit micro at the time. They even had an expansion box for add ons too.

now that leland mentions it they were also used on the simulators and
were literally called core memory. things weighed a ton and needed to be
reset very often using front panel switches.

Hello Marty:

Those are pretty well made amps. The Aux band switch position can be used for 12, 11, and 10 meters. Not a big deal to mod.

There ALC protection in the Ameritron Amps is quit impresive I think.

I have seen the Ameritron Amp with 2 each 3CX800 Tubes also do a cool 2500 out. Pretty impressive power levels, if you have the right antenna to be able to deal with that much steam.

Your price is a good price if I was in the market I would have been intretsed. Saw a Ameritron 1500 that uses the 3CX1500 Tube at the TRW Swap Meet selling for 2000, and it was in good shape, but only lasted a minuites there.

What I would like to see is more modification info on these larger amps to go to 6 meters. Especially the mod info that shows the plate tank coil tap, and input matching mods. Some of the hard core 6 meter guys have bought brand new Band Switching Switches, so that the extra band could ber added, without loosing the other band capibility. Maybe even a relay that would allow the 12, 11, and 10 meter poistion to be used, or the 6 meter band, yeah!

Anyway good luck

Jay in the Mojave

Windows 98 runs on a DOS kernel, so all windows 98 systems run on a
"valid" DOS disk. Edit your msdos.sys and turn your GUI off. Or just
make yourself a boot disk and format the drive.

Yeah, however I didn't feel like rebooting the computer 20 - 30 times going through the design - test - debug routine each time I worked on the project. The complier runs under Windows, but the defrag program runs under DOS. When the program failed I ended up with a wrecked disk format. It was easier to format the disk in a DOS window and just filter the long file name directory entries out during the defrag process. It was rather easy to do anyway since the long file name extension is done by using extra directory entries, 11 characters per entry, following the normal DOS directory entry for a given file. The long file name directory entry is marked with an invalid set of attribute bits that can't be set by the user under any condition so its easy to detect. Also it just so happens that DOS ignores the directory entries with the invalid attribute bit settings. The long file name ability using Windows is a real hack on the part of Microsoft. Each directory entry uses 32 bytes, and only 11 are used, the old DOS 8 dot 3 file name format, the rest is wasted. Enough of these directory entries are used as required until there is enough 11 byte blocks to hold the long file name.

No, it shouldn't. There are no VFAT or virtual drivers loaded.

What I mean is, the disk is configured for use with a VFAT driver.
Doesn't that cause compatibility problems when working under the FAT
under DOS?

Frank;
The way I understand it, is that the disk is configured or uses
FAT. VFAT serves as an interface between applications and the FAT.
So there shouldn't be any compatibilty problems when running DOS
programs.

Ok.... but if the FAT is set for short (8.3) filenames while the VFAT
uses long filenames, there are going to be short filenames that are
identical in the same directory; i.e, under VFAT;

pornpic001.jpg
pornpic002.jpg
pornpic003.jpg

...but under DOS FAT they are listed as:

pornpic~.jpg
pornpic~.jpg
pornpic~.jpg

So how do you discriminate between these identical filenames from DOS
without the VFAT driver? Does the VFAT driver maintain a directory
index file?

Yes it does use a FAT, File allocation Table, to manage the storage space on
the disk. Windows 95, 98 and DOS use it. The storage space is managed as one
or more disk sectors call a "cluster". The cluster number has to be mapped
to absolute disk sectors. The mapping varies depending on the size of the
disk. The FAT is nothing more than a table that maps one cluster to the
next. The file directory entry has the starting cluster number in it. The
way it works is the OS reads the starting cluster number out of the file
directory header. The numeric value points to a sequential entry in the FAT.
The OS then reads that value which again points to another entry in the FAT.
This proceeds until one of several special values is read, one of which
signals the value just read as being the last cluster in the chain. The
numeric value of the entries is also the cluster number of the data stored

on disk. Thus by following the chain of cluster numbers the OS is able to read the file's data off of the disk in the correct order, even if the clusters are not in sequential order on the disk. When this mapping gets screwed up that's when you get messages from the OS about lost or cross linked "chains". You may get more that one file that have a common cluster mapped to it which should never happen, crossed linked files, or you have a chain of clusters on the disk for which there is no file directory entry with a staring cluster pointing to the beginning of the chain, i.e. lost chains. The OS tries to clean up the mess by marking the clusters in the lost chains as being free disk space. For crossed linked files the OS just picks one file out of the two or more crossed linked and fixes the FAT so that the cluster(s) in common are mapped to only one file while removing it from the chain for the other files. There is no guarantee the OS is going to pick the right file to do this either.

The other thing the FAT table makes hard is file un-deletion and making sure nobody can read the deleted file's data. When you erase a file all that happens is the OS makes the file's directory header as being unused by changing some byte(s) in the header. The starting cluster number is not zeroed out either. The OS also runs through the file's allocation chain marking each entry with another of those special values that signals the OS that the cluster is available for data storage. The actual data in the cluster is not over written until it is used to hold the data from another file. It's still there if you use a disk sector viewing utility. That's why you see those utilities for scrubbing the disk of data from deleted files. They write random data to the free clusters to make sure anything there is unreadable.

Un-deleting a file is at best a pain and doesn't always work. The OS can store the file's data in any available clusters on the disk. There is no guarantee that the clusters will be used in order, or even sequentially, on the disk. Thus any file's data that spans more that one cluster you normally have to help the un-delete utility by looking at the data in the cluster and deciding if this should be included in the reconstructed FAT chain. If the data is not in human readable format you're screwed. If you're lucky the OS tries to allocated the clusters from low to high numbers so the un-deleted utility may try looking for the next free cluster on the disk assuming that is was likely used by the file. It does this until the clusters have enough storage space to hold the data as specified by the file size in the old directory header. Some times the last method works, and some times it don't.

Frank, the FAT doesn't have anything to do with the long or short file
names. The Windows OS does it by first building a standard DOS directory
entry for any file. After this is one or more directory entries where the

attribute bits have an invalid setting are built. That's how the Windows OS can tell the difference between the two. DOS just ignores the invalid directory entries. Each of these directory entries holds 11 characters of the long file name. The reason for this is the directory entry is still a DOS directory entry with room for only a 8 dot 3 file name. For example if the long file name has a total of 45 characters in it you would have the normal DOS directory entry with it's 8 dot 3 file name followed immediately by 5 more DOS directory entries with the special invalid attribute bits settings. You would need 5 because 4 would only hold a total of 44 characters. The OS also keeps a count of how many of these special DOS directory entries there are. If this gets messed up that's when the OS complains about a miss association between the long and short file names. This is a real hack job by Microsoft, waste full of space, and elegant it's not, but it does work.

3054. Re: TRC 490 AM/SSB 40CH BASE PLL LOCATION??? MB8719 PLL I'm told...

Newsgroup: rec.radio.cb
Date: 2004-08-30 07:40:39 UTC
From: George Kinzer <horseflygk@worldnet.att.net>
Message-ID: <XRAYc.274309$OB3.211343@bgtnsc05-news.ops.worldnet.att.net>
Source record: 185814

don't touch it if you dont have a clue where it is...

-- Realistic TRC-490 and other radios that use the PC-385 PCB.
If pin 10 of the PLL is tied low, remove the ground and pull the pin high to go down 64 channels ! (as found in the Washington)

If the pin is tied high, remove the voltage and ground the pin to go up 64 channels !

The state of pin 10 depends on the country that you are in and how it has been modified for the frequencies that are used.

The loop crystal can also be changed to give you more bands of channels if needed.

How to increase the modulation level.

On the Washington and some other versions of the PC-385 board the AMC uses a fixed resistance to limit the amount of modulation that can be produced (typically to just 75% !).

TR32 is the AMC transitor, however, there are two really easy methods of increasing the modulation.

The first method involves replacing the fixed resistor with one of a lower value, the resistor is a 1.5 KOhm and is located directly next to TR33 (it is part number R105, which is not marked on the PCB), it connects between TR33's base (the left leg, one end goes to a diode marking) and earth, replace this resistor with a 500 Ohm.

The second method is better, but, not all models can use it, it depends if the large transformer (marked as T1) is installed towards the rear of the PCB (next to L10), if it is not installed (as is the case with the Washington) you will see a silk screen marking for a preset pot inside the outline for the transformer (some radios already have a VR installed in this location to adjust the AMC), this is what you need to do for this mod:

Remove the 1.5K resistor in the D70 location that is next to TR33.

Install a 1N4148 silicon switch diode in the D70 location.

Install a 1 KOhm preset pot into the vacant position at the rear of the board (next to L10 inside the marking for the transformer).

Connect a jumper wire between the vacant hole that connects to D70 and the vacant hole that connects to the preset pots wiper (it is towards the front edge of the pot).

You have finished, all that needs to be done is to set the AMC level with the new VR (see the alignment instrucions for this).

On the internet, no one can hear you modulate.

Outgoing mail is certified Virus Free. I like that.
Checked by AVG anti-virus system (http://www.grisoft.com).

3071. FREE! "THE CB EPROM DATA BOOK" OF FREQ. MODS

Newsgroup: rec.radio.cb
Date: 2004-08-31 00:20:20 UTC
From: Lou Franklin <lou@cbcintl.com>
Message-ID: <12h7j05l9pk5gh6ecdd8h6ldvhpimi4f4q@4ax.com>
Source record: 185831

FREE!!

For advanced techs and serious radio hobbyists, we're now offering a FREE copy of our previously published "CB EPROM DATA BOOK" by Martin Pickering. (EPROM = Erasable Programmable Read Only Memory.) We sold it for many years but it's now out of print. This little manual of 60 illustrated pages is an absolute GEM of CB technical knowledge you'll just never find anywhere else. And it's yours for FREE from our Web site.

This book reveals the secrets of advanced channel programming, and picks up where our "CB PLL DATA BOOK" (www.cbcintl.com/pllbook.htm) leaves off. You'll get a thorough background in how these amazing programmable chips can be used to modify many popular CB PLL circuits for expanded frequency coverage. Covers the basic programming techniques, and even includes real PC board artwork for making EPROM circuits. Sample artwork includes EPROM boards for the popular MB8719, PLL02A, ï¿½PD2824, and ï¿½PD858 PLL circuits.

Best of all, the price is right! Download your FREE copy of "THE CB EPROM DATA BOOK" (948 KB Adobe PDF) at:

www.cbcintl.com/docs/EpromBook.htm

Don't forget to check out all our other CB specialty books, plans, kits, & high-performance accessories at:

www.cbcintl.com

SAVE MONEY! We regularly run EBAY auctions in which you can save up to HALF the cost of our most popular CB books and accessories. To see what's currently on sale, double-click the line below:

I don't know about that, but don't be surprised if they are. Back in the
80's they did have a deal worked out with an outfit call Santa-Cruz for a
Unix look alike OS I think.

Hi there,

My name is Chuck and I live in Lincoln Park, Michigan.

and I'm looking for someone I went to school with.

I am looking for a young lady named Pamela Ash. She married a man named
Chris Walton, Last I heard they were seperated and He was living with
another
woman. last I heard pam was working for a Mcdonalds. I am told Pam wasn't
working there anymore. Pam used to live here in Lincoln Park in an apartment
complex. But she may have moved. Not sure. I used to go to school with Pam
and
we were quite good freinds. I ran into Pam back in 2000, she was going
through
alot of bad stuff and I did my best to be there for her, and I gave her,
what I
felt was Christian Sound advice. She's a Believer and yes, She's saved. I
just
wish I could get ahold of her and see how she's doing.

If anyone from the Downriver/Detroit area is reading this, and Knows Pamela
Ash/Walton from Detroit, Michigan could you drop me an e-mail and maybe,
just
maybe, I could contact her, I would so much love to talk to her and see how
she

is doing...

Please, help a brother in need, who just wants to be reunited with a friend.

-Chuck Adkins

Hi guys... I've been considering leaving my Church...and the letter I am
about
to show explains some of the reasons why.... do you think I should give this
to
him?

real names have been obmitted to protect myself and the parties involved.

Resignation Letter

By

Charles P. Adkins
April 12, 2004

Pastor xxxxx,

After prayerful thought and consideration, I feel that the inevitable has
come
to pass. I have reached the end of my journey with xxxxx. My reasons are
many,
however, one of the main reasons I have reached this decision so quickly is
because of a lack of understanding between myself and your Pastoral staff,
as
you well know, I wasn't in attendance for Easter Sunday services. I wasn't
there, because I just really feel like the Church has totally forgotten the
real reason why we are supposed to celebrate Easter. Further more, I
believe
we as believers, if we are *really* in tune with the Word of God. We should
already know the reason for Easter, Which by the way, was the "World's" name
for a Holiday "Stamp" to be put on a celebration of the resurrection of our
Lord Jesus Christ. Further more, my problem with the "holiday" is that
coming
to Church dressed up is that it clashes with my genuine desire to serve the

Lord. I've always felt, that if it is about the clothes I wear. Then, I'd rather just say home.
Further more, I see no purpose in having a play that tells the story of the resurrection, because if we as believers READ the Bible, we already should know
this story in the first place. And being I know your responses before you even
say them, Your thinking."No, it's in case someone who's lost comes into the Church and gets saved from watching the play." well, I ask you this, how many
people Truly, Honestly got saved by watching this play? How many? I really wonder the number, if the truth be known, it was, more than likely more entertainment for the Christian people. Which leads me to next question, how
much money and time and effort was spend into the production of the play? That
money and effort could have been used in a REAL evangelistic manner, such as street witnessing or neighborhood canvassing or something more fruitful.

However, upon mentioning this to one of your Pastoral staff, Pastor xxxxx, I was labeled "Unacceptable and Immature". Now, before I continue, I don't wish
for you to "yell at", "scold" or "jump on anyone's (including xxx's) case" about this letter. This letter is a result of a lot of prayer and Study of the
Word. And just a culmination of events, that has taken place in the last few months. Honestly, Pastor, We are on two different pages. (And when I say "we"
I mean, your Church's vision, your idea of things and my idea of things. so on and so forth.) For Example, You and I have VERY different opinions of the Roman Catholic Church, I personally Believe that the Roman Catholic IS the "Whore of Babylon", I always have, In fact, if you've ever read the "Alberto"
Comic book series, by Jack T. Chick, you will understand the reasons why, I want nothing to do with the Roman Catholic Church! To by quite blunt about it,
You seem to be, If you'll pardon the phrase, "In bed with the Roman Catholic Church". And further more, you are teaching your flock that it's okay to mingle
and even associate with Roman Catholic people! This is a serious error, I feel.
As Paul did write in 2 Corinthians 6:11-18:

11 O ye Corinthians, our mouth is open unto you, our heart is enlarged.

12 Ye are not straitened in us, but ye are straitened in your own bowels.

13 Now for a recompence in the same, (I speak as unto my children,) be ye also
enlarged.

14 Be ye not unequally yoked together with unbelievers: for what fellowship hath righteousness with unrighteousness? and what communion hath light with darkness?

15 And what concord hath Christ with Belial? or what part hath he that believeth with an infidel?

16 And what agreement hath the temple of God with idols? for ye are the temple
of the living God; as God hath said, I will dwell in them, and walk in them; and I will be their God, and they shall be my people.

17 Wherefore come out from among them, and be ye separate, saith the Lord, and
touch not the unclean thing; and I will receive you,

18 And will be a Father unto you, and ye shall be my sons and daughters, saith
the Lord Almighty.

Notice he says.."And what concord hath Christ with Belial? or what part hath he that believeth with an infidel?" and I ask you, what "concord" do Protestant
Christians have to do with Roman Catholic's? Absolutely nothing! We don't even
believe in the same God! (again, see the Alberto series to see what I'm talking
about!)

I know, I mentioned xxxx to you in that e-mail, that wasn't the main reason I
didn't come. I didn't come because I felt that if I came to Church, on Easter
Sunday, even dressed casually, I'd be support that "frenzy" that the world has
planted in the Church, of you got to look like this on Easter Sunday. Further
more, I'm quite disturbed as to the fact that the secular tradition, (dressing
up, and people looking down upon those that don't) has crept into the Church today. My thing is, why should it be a "special" day? We are supposed to celebrate his resurrection DAILY! Not just once a year.

For these reasons I mentioned, and many others that I just don't feel the need
to go into, I cannot continue to attend xxxxx, Further more, I cannot continue
to seek Credentials with your denomination. So, I am, in fairness to the "School of Ministry" Administration, Returning these books and course book, I
only did 2 whole chapters in this book. They could "white-out" the used chapters and give them to someone who really wants to be in the school and could use these books. I realize that you did allow me to join for free. And

for this I am grateful, however, I don't feel this should be held over my
head, and I should be forced to attend somewhere, where I feel that perhaps
my
time is up and where me and the Pastors can't even agree on important
matters,
like those I have discussed with you in this letter.

I have enjoyed my 3 ½ - 4 years here. I've come through a lot, I've gotten
turned back on to reading the Bible, Daily, and I've been delivered for
quite a
bit. But a lot has changed in me, and a lot has taken place since I came to
xxxxx. And now, I feel it's time for me to move on to another Church.

Thanks for being there for me, when I needed a family.

As a formal request, I am kindly asking that my name be removed from the
Church
mailing list and my name be formally dropped from the membership list.

Thank you and God Bless,

xxxxxxxxxx

P.S. PLEASE, No phone calls about this matter or visits from the xxxxx. I've
made up my mind and don't need any hassles from anyone. Thanks.

==========

think I should turn this in or just leave?

No, but I'd trust chuckie to stir some shit. I'm cool with
Doug and Leland, as far as I know.

3087. 4-pin "crow foot" or "Y" plug for old Lafayette CB

Newsgroup: rec.radio.cb
Date: 2004-08-31 03:56:00 UTC
From: robert.macnutt@nghs.com
Message-ID: <7c4c8ad.0408301956.28c40ceb@posting.google.com>
Source record: 185897

Hi. I found a few really old posts about this plug, but no part numbers or sources. Anyone know where I can find one of these plugs? One post said it was used on the HB-400 radio. It's round, with round pins, shaped like a "Y" (or a crows foot).

Picture available here:

http://www.combo-organ.com/plug.jpg

I don't need it for a CB, though. It was used on an old Rheem combo (portable) organ for the volume pedal.

I only have a few and I'm keeping them because I haven't found a retail source. They have been used on lots of different stuff and that's where I find them, so just keep looking. If you get desperate you can always do the old wire-&-epoxy trick and mold yourself a new one -- I've had to do that more times than I care to remember.

Hey. It's just a 5 pin connector. Can't you find something from molex and swap out both ends? Or is there some kind of "authentic" value in this like the organ is a collectors item or something.

It's not a 5-pin connector, it's 4-pins, and the pin arrangement isn't
like any other I've seen. Yes, swapping both ends is a workable
solution, but it's worth spending a few minutes online doing inquiries
to try to locate the real thing. While combo organ's don't yet have
the status (or prices!) of vintage guitars and amps, collectors such
as myself will go to reasonable (but not fanatical) lengths to retain
as much original stuff as possible.

Thanks. can you give me an idea of the kind of things that used
these, i.e., a particular model/line of CB or something? I might be
able to locate a broken one on eBay for cheap, and talk the seller
into hacking off just the plug. hey, I might check the thrift stores,
too!

I've seen that same pin configuration on an old Lafayette tube radio. There
must be some old mic you can gt it from. I wouldn't know where to begin to
look though. :-(

3096. OT Electoral Votes and Bush Failures

Newsgroup: rec.radio.cb
Date: 2004-08-31 15:50:22 UTC
From: twistedhed@webtv.net
Message-ID: <5889-41349E3E-150@storefull-3255.bay.webtv.net>
Source record: 185906

Been reading lot's of polls lately touting junior gaining on Kerry, but the electoral poll is in favor of Kerry with 310.
This was taken from a flier circulating in Tampa Bay.
-

Flip-flops? GW is King!

GW was against campaign finance reform, now he's for it.

GW was against a Homeland Security Department, now he is for it.

GW was against a 9/11 commission, now he's for it.

GW was against an Iraq WMD investigation, now he's for it.

GW was against nation building, now he's for it.

GW was against deficits, now he's for them.

First GW was for free trade, then tariffs on steel, and now he's against them again.

GW was against the U.S. taking a role in the Israeli-Palestinian conflict, now he pushes for a "road map" and a Palestinian State.

GW was for states' rights to decide on gay marriage, now he is for changing the Constitution to outlaw gay marriages.

GW said he would provide money for first responders (fire, police, emergency) then he did the opposite.

GW said "Help is on the way" to our military, he then cut their benefits and health care, also sought to reduce hazard (combat) pay.

GW claimed to be in favor of environmental protection while he secretly approved oil drilling on Padre Island in Texas and other places. He also implemented and is responsible for many more anti-environmental actions.

GW called himself "The education president" while refusing to fully fund key education programs.

GW said being governor of Texas for six years was enough political experience to be president of the US, but criticized Sen. John Edwards for not having enough experience after Edwards served six years in the Senate.

During the 2000 campaign, Bush GW there were too many lawsuits being filed. During the Florida recount, he was first to file a lawsuit to

stop the legal counting of votes after Gore took followed Florida law to the T by asking for a recount as defined in the Florida Constitution.

On Nov. 7, 2000, the Bush campaign supported Florida county officials drawing up new copies of some 10,000 spoiled absentee votes in 26 Republican-leaning counties that the machines did not read. They marked them for the candidates when they showed what republicans referred to as "clear intent".
They then opposed other's "CLEAR INTENT" after Nov. 7 when Gore asked for recounts.
GW dominated absentee balloting in Florida by a two-to-one margin.

GW said during the 2000 campaign that he did not have a "litmus test" for judges he appointed to be against abortion, but mostly appointed judges who were against abortion.

In the early 1990s GW led a campaign to raise taxes in Arlington, Texas, to build a new baseball stadium for the team he partly owned.
He later criticized politicians for supporting tax increases after he got rich by selling the team with the new stadium to a wealthy campaign contributor.

GW opposed the US negotiating with North Korea and now he supports it.

GW went to the racist and segregationist Bob Jones University in South Carolina, then said he shouldn't have.

GW said he would demand a UN Security Council vote on whether to sanction military action against Iraq and later announced he would not call for a vote.

GW first said the "Mission Accomplished" Iraqi banner was put up by sailors. When the Navy objected, he admitted it was done by his advance team.

GW was for fingerprinting and photographing Mexicans who enter the US. After meeting with Mexican President Fox, he decided against it.

GW opposed Rice testifying in front of the 911 commission citing "separation of powers," then he was for it.

GW was against Ba'ath party members holding office or government jobs in Iraq but now he's for it.

GW said we must not appease terrorists, said the US will NEVER negotiate or make deals with terrorists. He lifted trade sanctions on admitted and Bush-labeled terrorist Mohammar Quaddafi and Pakistan, which you may remember pardoned their official who sold nuclear secrets to Iran, Libya, and North Korea.

GW said he would wait until after the Nov. election to ask for more money for the war effort but decided he needed it before the election, after all.

GW crtiticized Clinton for not "defining a clear exit strategy" in Kosovo, yet has done exactly that with the quagmire he created in Iraq.

GW said, "Leaving Iraq prematurely would only embolden the terrorists and increase the danger to America." His administration now says that US troops will pull out of Iraq when the new provisional authority asks. Recently he said they'll stay "as long as needed" again. Now he's saying that the Iraqis can ask the troops to leave, and they will. Or is he?

The Bush administration officials said that the Geneva Conventions don't apply to "enemy combatants." Now they claim they do.

Bush officials said before the Iraq invasion that Iraq posed an "imminent threat" to U.S. security and that Iraq had weapons of mass destruction and even nuclear weapons (Cheney on WMDS and Hussein: "He has them. We know he has them. We know where they are.")
After the invasion, they denied saying the word "imminent" and saying that Iraq had WMDs and nuclear weapons, even though they were caught on tape making such statements.

"The most important thing is for us to find Osama Bin Laden. It is our number one priority and we will not rest until we find him." - George W. Bush, Sept. 13, 2001

"I don't know where he is. I have no idea, and I really don't care. It's not that important. It's not our priority." - George W. Bush, March 13, 2002

From a republican who knows how much damage GW has done to the republican party and the world:
"The (Bush) administration has an overly simplistic view of how and when to use our military. By not bringing in our friends and allies, they have created a mess in Iraq and are crippling our forces around the world." -Retired Admiral William Crowe, former Chairman of the Joint Chiefs under Ronald Reagan

From: s3buell@sbcglobal.net (Landshark)
>Well you're right about that, when Leland talks
>tech about something that he might know a lot
>about, it would be worth something. Problem

>with that, Leland doesn't talk about CB,

..and one of the problems with Frank is he can't remain on topic when he disagrees with someone or DOES talk about cb.

>Doesn't own a CB, Has no interest in CB,

Nor does Frank have the interest in cb, only in what he THINKS cb should encompass. He has stated he has no interest in a group or hobby that advocates (which he erroneously claimed applied to this group) illegal operation and attempted to begin his own self-moderated version of this group to deal with his misguided self-impositions.

>advocates shooting CB'ers that don't follow

>the rules in the head like they were terrorist.

And Frank has said the lawbreakers (dx shooters, amp users, freebanders, etc.) on cb are "criminal" and should be locked up. Not as deadly as shooting one in the head, but certainly as radical and ridiculous.

>Frank, while condescending in tone, at least

>he owns a CB, Talks CB, Does experiments

>with CB.

So does Leland, whether he wishes to discuss it or not. His reasons for doing such may be just as valid as Frank's reason for denying his hammie status.

> Now don't get me wrong, when I'll disagree

>with Frank, I'll let him know, of course he'll

>start in with that arrogant attitude, but that

>doesn't preclude the fact that sometimes he's

>wrong, sometimes he's right.

No doubt about it. But somehow, when Leland gets to talking tech, one gets the sense he is actually enjoying himself and the subject. Even when talking tech, Frank is always pissed off at himself and the world

with an ax to grind and a chip on his shoulder. YOU can understand agreeing with someone when they are right (despite past disagreements), and the group can understand agreeing with someone when they are right (despite past disagreements) and the world can understand agreeing with someone when they are right, but for some odd reason, Frank allows his personal feelings and emotions to run amok, as seeing me agree with Leland has him emotionally charged and showing personal envy. Agreeing with someone who is correct on a certain subject, even though one usually disagrees with said person on most issues, is miscontrued by Frank as "sucking up" and illustrative of his incompetence.

I almost forgot - the main reason I need the correct plug is I'm
making a pedal for a 3rd party who lives across the country, and who I
could not expect to replace the jack on the organ. If it were mine,
yeah, I'd probably be ready to replace it and be done with it.

I see you can do cut/paste well from opednews, eh? This is one of the most liberal "news" sites on the internet.

Are these examples like Kerry claiming that he voted for the funding for the Iraq war before he voted against it?

There are lots of people on the left claiming that Bush is a failure but not providing much evidence for it. The Iraq war is not a failure. War can't be won over night. We could be in Iraq for a very long time. We were in Japan for seven years after the surrender. The difference is that the Japanese were not terrorists, they knew "honor in combat," regardless of how warped the "honor" was. They had a face, terrorist don't have a face. They attack from the shadows and hide in their "holy" sites then cry fowl when we attack them.

He was against the first drafts of the reform, it was unconstitutional.

>
> GW was against a Homeland Security Department, now he is for it.
>

Again, he was against the original drafting of the department, it had no real power and had many heads. The current one has teeth and power.

> GW was against a 9/11 commission, now he's for it.
>

Wrong, he has always been for an investigation into what went wrong and how it could be prevented from happening again. The original "commission" was a political activist group.

>
> GW was against an Iraq WMD investigation, now he's for it.
>

Wrong again. It was because of WMDs that we are in Iraq.

>
> GW was against nation building, now he's for it.
>

Define "nation building."

>
> GW was against deficits, now he's for them.
>

He is for spending whatever money it takes to fight this war on terrorism,
it's expensive.

>
> First GW was for free trade, then tariffs on steel, and now he's against
> them again.

Again, define tariffs. Do you know that he's against the same tariffs he is
now for?

>
> GW was against the U.S. taking a role in the Israeli-Palestinian
> conflict, now he pushes for a "road map" and a Palestinian State.

Again, the original "pact" was not the same as the one he is now for. You
must be sure you are making a valid comparison.

>
> GW was for states' rights to decide on gay marriage, now he is for
> changing the Constitution to outlaw gay marriages.

Again, apples and oranges. If it becomes a constitutional amendment it's not
longer a states rights issue. Do you actually know what "states rights"
means? States rights is taken from the clause that states that any powers
not specific to the Federal Government is reserved to the states. Yes,
marriage licenses are reserved to the states. If a state wants to make gay
marriage legal it is perfectly free to do so. HOWEVER, if the United States
Constitution is amended to define marriage to be between one man and one
woman it is also perfectly free to do so. Doing so would make it illegal for
a state to license same-sex marriage. It has nothing to do with states
rights. If it is truly a "states rights" issue where are all of those who
are for polygamy? That's not forbidden in the constitution. Isn't that a
"states rights" issue for Utah?

>
>
> GW said he would provide money for first responders (fire, police,
> emergency) then he did the opposite.
>

It's not the duty of the federal government to do so. The federal government funds the military and not the local fire departments. That's a local funding issue. My local volunteer fire department doesn't even get state support! That's why I give them my time and my money.

>
> GW said "Help is on the way" to our military, he then cut their benefits
> and health care, also sought to reduce hazard (combat) pay.
>

This was something that was put in place by Clinton. It was Clinton that stripped the military and veterans of their LIFETIME benefits.

>
> GW claimed to be in favor of environmental protection while he secretly
> approved oil drilling on Padre Island in Texas and other places. He
> also implemented and is responsible for many more anti-environmental
> actions.
>

How is that "against" environmental protection? By the way, your statement is wrong, there is no drilling on Padre Island at all, not one single well. The drilling is 25 miles off shore. There hasn't been an accident in 25 years. Why? Because of regulations put in force by Ronald Reagan's administration.

> GW called himself "The education president" while refusing to fully fund
> key education programs.

Again, not the job of the federal government. It's a state issue on funding of education.

>
>
> GW said being governor of Texas for six years was enough political
> experience to be president of the US, but criticized Sen. John Edwards
> for not having enough experience after Edwards served six years in the
> Senate.
>

Passing laws and being an administrator are two different jobs. You don't gain "leadership experience" in the Senate.

>
> During the 2000 campaign, Bush GW there were too many lawsuits being
> filed. During the Florida recount, he was first to file a lawsuit to
> stop the legal counting of votes after Gore took followed Florida law to
> the T by asking for a recount as defined in the Florida Constitution.
>

Wrong again. How many "recounts" should have been allowed? It had to be stopped at some point. An independent recount was done in February 2001 by the Brookings Institute, Bush won by almost a thousand votes. You won't find that tidbit on any of your liberal new sources.

>
>
>
> On Nov. 7, 2000, the Bush campaign supported Florida county officials
> drawing up new copies of some 10,000 spoiled absentee votes in 26
> Republican-leaning counties that the machines did not read. They marked
> them for the candidates when they showed what republicans referred to as
> "clear intent".
> They then opposed other's "CLEAR INTENT" after Nov. 7 when Gore asked
> for recounts.
> GW dominated absentee balloting in Florida by a two-to-one margin.

Again, after the "umpteenth" recount attempt. Remember, Gore was against
even allowing military absentee vote counts because the envelopes were not
postmarked to show the vote was cast before the deadline. Most military mail
coming from the field is not postmarked at all. That would have invalidated
thousands of our military votes.

>
> GW said during the 2000 campaign that he did not have a "litmus test"
> for judges he appointed to be against abortion, but mostly
> appointed judges who were against abortion.
>

I'm sure that abortion was not the only basis that President Bush used to
"test" the qualifications. Most conservatives are against abortion it would
only make sense that "conservative judges" would also be against abortion.

>
> GW opposed the US negotiating with North Korea and now he supports it.

Circumstances have changed. The North Koreans are willing to talk. Before
they were unwilling to even discuss their nuclear program so there was no
reason to "talk."

>
> GW went to the racist and segregationist Bob Jones University in South
> Carolina, then said he shouldn't have.

People make mistakes. At least Mr. Bush is man enough to admit it and not
excuse it.

> GW said he would demand a UN Security Council vote on whether to
> sanction military action against Iraq and later announced he would not
> call for a vote.
>

It was a technicality and a political ploy. Mr. Bush didn't need UN
permission in the first place.

>
> GW was for fingerprinting and photographing Mexicans who enter the US.
> After meeting with Mexican President Fox, he decided against it.
>

Politics as usual. I'm sure there are reasons for the change that neither
you nor I will ever know.

> GW said he would wait until after the Nov. election to ask for more
> money for the war effort but decided he needed it before the election,
> after all.
>

When money is needed now it's needed now. If he hadn't asked for money the
libs would be crying that our military doesn't have enough money.

>
> GW crtiticized Clinton for not "defining a clear exit strategy" in
> Kosovo, yet has done exactly that with the quagmire he created in Iraq.
>

I would not consider Iraq a quagmire. Vietnam was a quagmire, our military
had its hands tied. In Iraq we are free to defend ourselves with whatever
force is necessary. Again, I site Japan, we were there for seven years after
the surrender.

>
> GW said, "Leaving Iraq prematurely would only embolden the terrorists
> and increase the danger to America." His administration now says that US
> troops will pull out of Iraq when the new provisional authority asks.
> Recently he said they'll stay "as long as needed" again. Now he's saying
> that the Iraqis can ask the troops to leave, and they will. Or is he?
>

I see not problem with any of that. We will stay as long as needed. However
if the provisional authority asks us to leave we have little choice.

>
>
> The Bush administration officials said that the Geneva Conventions don't
> apply to "enemy combatants." Now they claim they do.
>

Read the whole story again.

>
>
>
> Bush officials said before the Iraq invasion that Iraq posed an
> "imminent threat" to U.S. security and that Iraq had weapons of mass
> destruction and even nuclear weapons (Cheney on WMDS and Hussein: "He
> has them. We know he has them. We know where they are.")
> After the invasion, they denied saying the word "imminent" and saying
> that Iraq had WMDs and nuclear weapons, even though they were caught on
> tape making such statements.

We know that Iraq had WMDs, he used them on his own people before we even
got there. He used them against Iran. He had plenty of time to hide them or
ship them to other countries before we got there. He would have been foolish

for him to use nukes on the US troops. He knew that we could easily make any of his cities disappear in a flash of light.

> "The most important thing is for us to find Osama Bin Laden. It is our number one priority and we will not rest until we find him." - George W. Bush, Sept. 13, 2001

We are still looking.

> "I don't know where he is. I have no idea, and I really don't care. It's not that important. It's not our priority." - George W. Bush, March 13, 2002

Priorities change.

> From a republican who knows how much damage GW has done to the republican party and the world:
> "The (Bush) administration has an overly simplistic view of how and when to use our military. By not bringing in our friends and allies, they have created a mess in Iraq and are crippling our forces around the world." -Retired Admiral William Crowe, former Chairman of the Joint Chiefs under Ronald Reagan

...and now a democrat.

Since 1976 we've been leeching off CBers with books, plans, and kits for CB radio. Do-it-yourself repairs and modifications, amplifiers, FM converters, bleedover filters, adding new frequencies, etc. are illegal for CB according to the FCC but I, Lou Franklin, don't care! I will teach you how to sleaze and weasel your way out of it with semantics like "it's for 10-Meter Ham conversion" and "information is legal". Now if I am teaching you how to be dishonest, how can you trust me, Lou Franklin, to give you honest secrets of how to increase your power, range, and privacy - even though its illegal? The answer is you cant ha ha ha! Please visit our Web site, where you can download our unique catalog of CB Radio Specialties and get encouragement to break FCC law, or check out our most popular 'we dont care about legalities' schematics (TriPower RF linear amp, Dynamic Speech Processor, FM3 circuit, RogerBeep, etc.) and other CB technical articles at:

www.cbcintl.com

SAVE MONEY sort of! We regularly spam the CB newsgroups in order to suck cash from bullible CBers. I also run EBAY auctions in which you can save up to HALF the cost of my 300 percent markup CB books and accessories. To see what's currently on sale, double-click the line below:

Been reading lot's of polls lately touting junior gaining on Kerry, but
the electoral poll is in favor of Kerry with 310. This was taken from a
flier circulating in Tampa Bay.
-
Flip-flops? GW is King!
GW was against campaign finance reform, now he's for it.

>He was against the first drafts of the reform, it

>was unconstitutional.

Unconstitutional is taking away rights in the Constitution, such as the
Patriot Act does by repealing the fourth amendment when the government
deems necessary, so don't even try to say this guy is concerned about
the rights afforded us via the Constitution, as he waged war upon it
after placing his hand on a Bible (man of God, remember/) and swore to
uphod and protect it, not water it down. Frankiln said those who would
scarifice liberty for security deserve neither.

GW was against a Homeland Security Department, now he is for it.

>Again, he was against the original drafting of

>the department, it had no real power and had

>many heads. The current one has teeth and

>power.

Many heads? How you figure? He is the one that hand picked Tom Ridge fom
Pa?
What exactly does the new one have you claim the old one lacked? Line

Item Veto for the prez?

GW was against a 9/11 commission, now he's for it.

>Wrong, he has always been for an

>investigation into what went wrong and how it

>could be prevented from happening again.

Which is why he promised the CURRENT commission only "an hour", but changed his mind and relented when the public screamed foul, with a generic press releasefrom the WH which read "The President has met with advisers and will cooperate fully with the commission".

>The original "commission" was a political

>activist group.

Riiight... And all those against Bush are "liberals" or "libs". This is why Bush is going to be left scratching his head wondering "What the hell happene?" in November, cause he and his sheople following subscribe to that exact same Stalinist rhetoric you just employed,,,that one is either with Bush/Stalin or against him.

GW was against an Iraq WMD investigation, now he's for it.

>Wrong again. It was because of WMDs that

>we are in Iraq.

History can not be brushed under the rug and rewritten. My my, how you like to deny the original reason we were given as a means for invading Iraq..you seem to forget (in addition to the military "operation" name given to the first attempt at invading Iraq) we were INITIALLY told it was about "liberation" of the people of Iraq. In addition, there were no WMDS found in Iraq.

GW was against nation building, now he's for it.
>Define "nation building."

Not up to me to define the term that the BUSH WH says it is doing in Iraq. Bush also criticized clinton for "Nation Building",,so you would have to ask he how he defined the term. Obviously, he applies different definitions to the term, one for when he engages in such activity, and another for when a democratic rival does same, sort of what you are attemptingby seeking my interpretation of a Bush term and claim.

GW was against deficits, now he's for them.

>He is for spending whatever money it takes to

>fight this war on terrorism, it's expensive.

Yes, read: deficit.

First GW was for free trade, then tariffs on steel, and now he's against them again.

>Again, define tariffs.

Again, ask him, as he is the one that apparently changed his mind and the definintion of what it and he means.

>Do you know that he's

>against the same tariffs he is now for?

Yea,,it was posted above.

GW was against the U.S. taking a role in the Israeli-Palestinian conflict, now he pushes for a "road map" and a Palestinian State.

>Again, the original "pact" was not the same as

>the one he is now for. You must be sure you

>are making a valid comparison.

Such as you exemplified by using the analogy of the Japanese (who never attacked us) and Iraq? A related comparison is Vietnam.

GW was for states' rights to decide on gay marriage, now he is for changing the
Constitution to outlaw gay marriages.

>Again, apples and oranges. If it becomes a

>constitutional amendment it's not longer a

>states rights issue.

Exactly,,,which illustrates his flip flop. He first was FOR states allowing this issue,,,,now,,he flipped and chnaged his mind and is seeking to make it a federal issue so the states have no choice. See? Another classic flip.

> Do you actually know what "states rights"

>means? States rights is taken from the clause

>that states that any powers not specific to the

>Federal Government is reserved to the states.

Except when to comes to upholding the state law and constitution, such as what ahppened when Bush and Harris circumvented state law and made up the federal rules as they went along.The SPECIFIC powers regarding the election as defined in the FL State Constitution was clearly defined. You are confused on this issue, as you merely illustrate excatly what was claimed above,,bush indeed claimed he was FOR states right to decide such an issue, and now he seeks to take it away by making it yet another alteration and assault on the US Constitution.

>Yes, marriage licenses are reserved to the

>states. If a state wants to make gay marriage

>legal it is perfectly free to do so. HOWEVER, if
>the United States Constitution is amended to

>define marriage to be between one man and

>one woman it is also perfectly free to do so.

>Doing so would make it illegal for a state to

>license same-sex marriage. It has nothing to

>do with states rights.

Sure it does. The entire issue of WHAT defines the term (something that is always gamed with by the right: definitions and spin semantics on meanings) was brought about by the STATE issues, one that Bush said he was for allowing the states to choose, but one that would achieve just the opposite by messing with the constitution. He flipped,,again.

>If it is truly a "states rights" issue where are all

>of those who are for polygamy?

They tend to gravitate to Utah.
Try and remain relevant. Your post makes the assumption there is a majority that endorses such acts.

>That's not

>forbidden in the constitution. Isn't that a "states
>rights" issue for Utah?

Not at all. It's a church issue. Polygamy is not permitted in the state of Utah, despite many misinformed assumptions, such as your own.

GW said he would provide money for first responders (fire, police, emergency) then he did the opposite.

>It's not the duty of the federal government to

>do so.

(shrug) Non-sequitur.
Let's assume your post was valid.....if it's not their job, he shouldn;t have lied and said he was going to provide this money, but, of course, his lie really isn't the issue to those sheople like yourself,,it's the fact that the feds "shouldn't" be engaged in such activty, so his lie becomes a non-factor to the neocons, the same manner in which all his lies are justified and digested by the defeated and pissed off radical right.

>The federal government funds the military and
>not the local fire departments. That's a local

>funding issue. My local volunteer fire

>department doesn't even get state support!

>That's why I give them my time and my

>money.

See above.

_
GW said "Help is on the way" to our military, he then cut their benefits
and health care, also sought to reduce hazard (combat) pay.

>This was something that was put in place by

>Clinton.

Completely wrong. Clinton has NOTHING to do with Bush seeking reduction
in hazard pay AFTER he committed troops to Iraq.

> It was Clinton that stripped the military and

>veterans of their LIFETIME benefits.

Such as? Once again, whatever Clinton did, is so laughable when the
neocons invoke him as a means of obfuscation to Bush incompetence, that
it merely serves that the point made against Bush is not only valid, but
a sore point within the Bush admin. that they would rather not discuss.

_
GW claimed to be in favor of environmental protection while he secretly
approved oil drilling on Padre Island in Texas and other places. He also
implemented and is responsible for many more anti-environmental actions.

>How is that "against" environmental

>protection?

Inherent risks, such as spills, would cause local economic disaster of
epic proportions.

>By the way, your statement is

>wrong, there is no drilling on Padre Island at

>all, not one single well.

No,,your statement is wrong.....I never said their was ANY wells on the
Island..I said he APPROVED it. rest assured, it's coming.

> The drilling is 25 miles off shore. There hasn't
>been an accident in 25 years. Why? Because

>of regulations put in force by Ronald Reagan's
>administration.

It would be great if regulations prevented all related accidents, but
they do not.

_
GW called himself "The education president" while refusing to fully fund
key education programs.

>Again, not the job of the federal government.

And again, then he shouldn't have mis-labeled himself as a
representative of the US government as such, but..alas,,he did.

>It's a state issue on funding of education.

In addition to being Federal, as well. In fact, if it wasn't for Federal
intervention and support of education, many colleges and states would
suffer.

_
GW said being governor of Texas for six years was enough political
experience to be president of the US, but criticized Sen. John Edwards
for not having enough experience after Edwards served six years in the
Senate.

>Passing laws and being an administrator are

>two different jobs. You don't gain "leadership

>experience" in the Senate.

Sure one does. In fact, that is exactly of which they are
representating,,,their constituents. They were chosen to lead in their
locales and voice the opinion of the constituents that reside there.

_
During the 2000 campaign, Bush GW there were too many lawsuits being
filed. During the Florida recount, he was first to file a lawsuit to
stop the legal counting of votes after Gore took followed Florida law to
the T by asking for a recount as defined in the Florida Constitution.

>Wrong again.

That's exactly what he did. To say Bush did NOT file suit to stop the
legal counting as provided by Fl law shows you better read up on history
since you are willing to argue it.

> How many "recounts" should

>have been allowed?

As many as permitted under Fl law.

>It had to be stopped at some point.

Says who? The law referred to "as satisfied in a Fl state court of law".
Bush and Harris circumvented the law.

>An independent recount was done in February
>2001 by the Brookings Institute, Bush won by

>almost a thousand votes. You won't find that

>tidbit on any of your liberal new sources.

Once again, calling me a liberal illustrates your disdain for all who dare oppose Bush, but serves to allow you to continue to make such errors. Bush lost the majority vote of the people. That makes two major issues of which you are in the dark.

_
On Nov. 7, 2000, the Bush campaign supported Florida county officials drawing up
new copies of some 10,000 spoiled absentee
votes in 26 Republican-leaning counties that
the machines did not read. They marked them for the candidates when they showed what republicans referred to as "clear intent".
They then opposed other's "CLEAR INTENT" after Nov. 7 when Gore asked for recounts.
GW dominated absentee balloting in Florida by a two-to-one margin.

>Again, after the "umpteenth" recount attempt.

As provided by law. Yet, when that law did not curtail favor to Bush and Harris, they circumvented it.

>Remember, Gore was against even allowing

>ilitary absentee vote counts because the

>envelopes were not postmarked to show the

>vote was cast before the deadline.

As is provided by election law.

>Most military mail coming from the field is not

>postmarked at all. That would have invalidated
>thousands of our military votes.

What do you mean it's not postmarked? ALL the mail I received from family in the field was post marked, even from the far east. When was the last time you dealt with APO? In any event, the election law makes no allowances for military absentee ballots...they are held to the same law as the rest of America's absentee ballots.

_
GW said during the 2000 campaign that he did not have a "litmus test" for judges he appointed to be against abortion, but mostly appointed judges who were against abortion.

>I'm sure that abortion was not the only basis

>that President Bush used to "test" the

>qualifications.

Others are sure it was.

>Most conservatives are against abortion it

>would only make sense that "conservative

>judges" would also be against abortion.

You disagree, then attempt to agree. The Bush-flip.

_
GW opposed the US negotiating with North Korea and now he supports it.

>Circumstances have changed.

Like the reasons for invading Iraq, changed? Or like the circumstances
that Congress was told the reasons for invading Iraq have changed?
Or like Bush saying there are WMDS in Iraq (Cheney: He has them. We know
he has them. We know where they are.) as a means to get Congress to
invade Iraq, then when the truth comes out, many say they would NOT have
voted for it if they knew the reasons were exaggerated and manufactured?

> The North Koreans are willing to talk.

You base this on what?
Where is a source showing N Korea is talking, or even "willing to talk"
to the Bush admin?

>they were unwilling to even discuss their

>nuclear program so there was no reason to

>"talk."

See above.

_
GW went to the racist and segregationist Bob Jones University in South
Carolina, then said he shouldn't have.

>People make mistakes.

Right. But Bush makes too many of them and compounds them with lies.

>At least Mr. Bush is

>man enough to admit it and not excuse it.

Like he has admitted failed intel for four years, but somehow excuses it
by keeping the same staff responsible for 4 years of repeated failed
intel and then thinks the US is stupid enough to re-elect the same group
of incompetents for another 4 years. That's actually a funny.

_
GW said he would demand a UN Security Council vote on whether to
sanction military action against Iraq and later announced he would not

call for a vote.

>It was a technicality and a political ploy.

Ploy? Yes, it was most certainly a ploy, one that failed.

>Mr. Bush didn't need UN permission in the first
>place.

Yet,,Iraq and whoever we decide to attack, somehow does? And if they don't follow UN protocol, we invoke their ignoring the UN as a means for war. Never mind BUSH ignores the UN and as you said, doesn't need their permission to do as he pleases, but other countries better abide by the UN. Sheer hypocrisy.

_
GW was for fingerprinting and photographing Mexicans who enter the US. After meeting with Mexican President Fox, he decided against it.

>Politics as usual.

Yea,,BUSH politics as usual. You dismiss his flips as "politics as usual" and accept them with nary another thought and continue to support him blindly. That's sheople mentality.

>I'm sure there are reasons for the change that

>neither you nor I will ever know.

No doubt, as he feels he is above explaining his flips to the masses. He hasn't a clue what is taking place nor is he in touch with the blue collar Americans that keep this country running.

_
GW said he would wait until after the Nov. election to ask for more money for the war effort but decided he needed it before the election, after all.

>When money is needed now it's needed now.

Even if it means flipping. In fact, you have defended all his flips. The reasons are debatable, but it mostly illustrtates he is not decisive, confident, or certain of many issues.

> If he hadn't asked for money the libs would be
>crying that our military doesn't have enough

>money.

IF IF IF,,IF the queen had balls she would be King,,,(nod to WA3MOJ for liberally using the saying)

_
GW crtiticized Clinton for not "defining a clear exit strategy" in Kosovo, yet has done exactly that with the quagmire he created in Iraq.

>I would not consider Iraq a quagmire. Vietnam
>was a quagmire, our military had its hands

>tied.

They do now, too. We have many Iraqi's and mid easterners running around the bases and DMZ zones overseas in the hotspots and our soldiers are told "These guys are ok" and they are wandering the bases freely and they are calling them "nationalists". Our guys ask what these guys are doing running around with free reign among US soldiers and all they are told is "these guys are ok".
I know of RECENT instances when our soldiers were reprimanded for drawing up mideasterners in their scopes for messing around the perimeters and screwing with the fences and barbed wire. Rules of engagement are cited as a means for not drawing up these suspicious characters. Never mind any one of them can have a grenade launcher or other weapon on them. According to many who were in Nam, yes, this is very much similar regarding the boys in the Pentagon not having a clue what is taking place in the "field" you speak of,,this was unanimously decided with the prison abuse scandal.

_
> In Iraq we are free to defend ourselves with

>whatever force is necessary. Again, I site

>Japan, we were there for seven years after the
>surrender.

And once again, I invoke Japan (as opposed to Iraq) attacked us and used conventional warfare against our soldiers. Terrorists do not use conventional warfare, as many Iraqis also see it as "defending with whatever force necessary".

_
GW said, "Leaving Iraq prematurely would only embolden the terrorists and increase the danger to America." His administration now says that US troops will pull out of Iraq when the new provisional authority asks. Recently he said they'll stay "as long as needed" again. Now he's saying that the Iraqis can ask the troops to leave, and they will. Or is he?

>I see not problem with any of that. We will stay
>as long as needed.

But Bush lambasted Clinton for saying this excat same thing and for NOT defining a clear exit strategy in Kosovo, period. GW fins himself in the same manner, only worse, as he tnow finds himself on the receiveing end of something of whcih he has no clear plan and no defined exit strategy. More hypocrisy.

_
>However if the provisional authority asks us to

>leave we have little choice.

What the hell is provisional authority if Bush can defy the UN? What
entity do you attribute such power that supercedes the UN?

_
The Bush administration officials said that the Geneva Conventions don't
apply to "enemy combatants." Now they claim they do.

>Read the whole story again.

No need. He flipped.

_
Bush officials said before the Iraq invasion
that Iraq posed an "imminent threat" to U.S. security and that Iraq had
weapons of mass destruction and even nuclear weapons (Cheney on WMDS and
Hussein: "He has them. We know he has them. We know where they are.")
After the invasion, they denied saying the word "imminent" and saying
that Iraq had WMDs and nuclear weapons, even though they were caught on
tape making such statements.

>We know that Iraq had WMDs, he used them

>on his own people before we even got there.

Here is where many Bushite Sheople get confused. You need familiarize
yourself with what the Bush admin constitutes as WMDS. According to the
Bush admin, chemical weapons such as the Botulin gas RUMSFELD helped
broker and sell to Hussein, is NOT classified on their WMDS list. Mere
chemicals in their original state is not classified as such. Your
argument is with what the Bush admin considers WMDS.

>He used them against Iran. He had plenty of

>time to hide them or ship them to other

>countries before we got there.

More confusion. One doesn't merely pack in the trunk and smuggle them
to Syria. The Bush admin admits via Powell that such an endeavor would
require labor of mammoth proportions, such as dozens and dozens, perhaps
hundreds of convoys of big trucks. Again, let's ASSUME once more that
such movements DID take place. The hub of activity would have been
IMPOSSIBLE to not detect on satellite pics. so IF that did occur, the
Bush admin FAILED miserably with their intel once again and allowed it
to be shipped out. Of course, this was actually a reason invoked by Bush
in 2002 as a means of invasion "to prevent the production and spread" of
WMDS. So according to your statements, he failed miserably in stopping
their spread. But of course, they never existed, even Bush' own people
in his admin are now saying they probably don't exist.

_
> He would have been foolish for him to use

>nukes on the US troops.

Bush was the one saying he was going to use them, no one else.

>He knew that we

>could easily make any of his cities disappear

>in a flash of light.

Kind of puts a damper on that republican theory that he would have done anything, including sacrificing his own people in order to use and produce such weapons.

_
"The most important thing is for us to find Osama Bin Laden. It is our number one priority and we will not rest until we find him." - George W. Bush, Sept. 13, 2001
We are still looking.
"I don't know where he is. I have no idea, and I really don't care. It's not that important. It's not our priority." - George W. Bush, March 13, 2002
>Priorities change.

As did the respect for the 911 victims. Bush whored them out to the media for his own agenda, saying to those families that Osama was responsible for their loved ones deaths and he would not stop until he was brought to justice, but as you say, his priorites change and those families and their loved ones are no longer important to his campaign and manufactured war against conjured evil.

_
From a republican who knows how much damage GW has done to the republican party and the world:
"The (Bush) administration has an overly simplistic view of how and when to use our military. By not bringing in our friends and allies, they have created a mess in Iraq and are crippling our forces around the world." -Retired Admiral William Crowe, former Chairman of the Joint Chiefs under Ronald Reagan

>...and now a democrat.

Which speaks volumes. He was intelligent enough to hold the position in Reagan's admin, but switching parties somehown now underminds his credibility and vast, broad expertise and experience to the republicans.
AS always,,if it ain't the Bush way, it's wrong, according to neocons.

Been reading lot's of polls lately touting junior gaining on Kerry, but
the electoral poll is in favor of Kerry with 310. This was taken from a
flier circulating in Tampa Bay

>Isn't this the same electoral college that the

>liberal New York Times wants abolished?

>Funny how liberals view the EC as good if

>their ahead, but bad if there not.

The only thing funny is how you sheople call all who oppose Bush a
"liberal". In fact, it's downright hilarious, illustrtating how far out
of touch this admin actually is.

>Gaining? Better check again.

>http://abcnews.go.com/sections/politics/Vote2

>004/bush_convention_poll_040829.html

I don't need media polls, check the only one that matters,,the electoral
poll. Once again,,Kerry is at 310. Bush isn't even close.

Oddly enough, I think Radio Shaft used the same connector in some of
their old car stereos. They used to sell a wiring harness with the
plug. You might check to see if they still keep it in stock (and if
it's the right one). If that doesn't pan out, the best place to find

them is inside old tube-type phonographs and cabinet stereos.

Actually it's a 4 pin plug. This plug was used on many Lafayette radios.
If you can't find the plug you can always go on Ebay and do a search on
Lafayette.
You usually can pick up an HB-525 or 625 for a song. Many come with the
microphone. Now you can get the radio with the female socket and the mic with
the male plug!

Hi all,

Does anyone know of this company and if they are still in business? Their website took and acknowledged an order, then emails go unanswered, and they don't pick up the phone.

If anyone has dealt with this company in the last week or two, what has been your experience?

TIA

Liam

lot's of polls lately touting junior gaining on Kerry, but the electoral
poll is in favor of Kerry with 310. This was taken from a flier
circulating in Tampa Bay

>Isn't this the same electoral college that the

>liberal New York Times wants abolished?

>Funny how liberals view the EC as good if

>their ahead, but bad if there not.

The only thing funny is how you sheople call all who oppose Bush a
"liberal". In fact, it's downright hilarious, illustrtating how far out
of touch this admin actually is.

>Gaining? Better check again.

>http://abcnews.go.com/sections/politics/Vote2

>004/bush_convention_poll_040829.html

I don't need media polls, check the only one that matters,,the electoral
poll. Once again,,Kerry is at 310. Bush isn't even close.

>I guess it depends on which poll you look at

>http://www.electoral-vote.com/

>http://www.americanresearchgroup.com/ev/

>http://www.rasmussenreports.com/Electoral%

>20College%20Projection.htm

Those are certainly different, however, the poll I was referring is the
one cited by the pundits. It still shows Kerry over 300.

It's quite easy to dismiss everything Bush as done as trash, but the fact remains that he failed to achieve his stated objectives...Capturing OBL and finding WMDS in IRAQ (which WAS the reason for the BUsh war). Since Bush failed at attaining such important goals, he merely changed his goals to something else and the Bushites merely shrig concerning his repeated failures on everything from his goals to his admin's incredibly poor intel.
Good thing Missouri isn't a factor ("swing" or "must-win") in the election.
Look, I'm no Kerry fan, I just happen to dislike the Bush handling of the country and just about everything else he does. Many are of my persuasion and voting for Kerry only as a means to fire the failure.

Source record: 185932

From: iamnotgeorge2004@yahoo.com (I Am Not George)
Since 1976 we've been leeching off CBers with books, plans, and kits for CB radio. Do-it-yourself repairs and modifications, amplifiers, FM converters, bleedover filters, adding new frequencies, etc. are illegal for CB according to the FCC but I, Lou Franklin, don't care! I will teach you how to sleaze and weasel your way out of it with semantics like "it's for 10-Meter Ham conversion" and "information is legal". Now if I am teaching you how to be dishonest, how can you trust me, Lou Franklin, to give you honest secrets of how to increase your power, range, and privacy - even though its illegal? The answer is you cant ha ha ha! Please visit our Web site, where you can download our unique catalog of CB Radio Specialties and get encouragement to break FCC law, or check out our most popular 'we dont care about legalities' schematics (TriPower RF linear amp, Dynamic Speech Processor, FM3 circuit, RogerBeep, etc.) and other CB technical articles at:
www.cbcintl.com
SAVE MONEY sort of! We regularly spam the CB newsgroups in order to suck cash from bullible CBers. I also run EBAY auctions in which you can save up to HALF the cost of my 300 percent markup CB books and accessories. To see what's currently on sale, double-click the line below:
http://stores.ebay.com/id=2993436&ssPageName=L2
-
You are in way over your head. You're lucky Lou is such a nice guy. What you did clearly indicates an intentional and malicious act by yourself to defame and malign his business and livelihood. In addition, you violated the Digital Electronic Signature Act as defined and placed into law by Congress because you attached his personal and proper name to your fraudulent post in a manner to give the impression it was he who wrote it concerning the business. If I were Lou, I would give you the option to settle out of court.....one time. Then I would contact my attorney and post his name on this group for additional contributions of your behavior by others whose personal lives you have attempted to malign. You could be in a heap of trouble boy, for sure.

> that's cutting your check. This is radical left wing secularist trash. just
> a suggestion, start watching Fox News channel for a fair and balanced look
> at politics.

> BTW, Bush is kicking Kerry's but in Missouri.

When was the last time anyone read anything about the Democrat's
leading
money-man, George Soros? The press are taking every step they can to
avoid having to say anthing about the guy. Except that he is a
successful 'financier' and 'entreprenuer'.

This is what respected English Historian and Author, the politically
liberal Paul Johnson, had to say about the guy:

" Perhaps the most sinister Kerry ally is the international
financier
George Soros, who boasts that he will devote huge chunks of his
fortune to buying a Democratic victory. Soros has always struck me as
an embodiment of the Marxist caricature of "finance-capitalism," a
sinister spider figure weaving his webs across frontiers. He has a
long record of interfering in the internal affairs of central and
eastern European countries. Much of his wealth comes from his
successful efforts to devalue the pound sterling at the time of the
Exchange Rate Mechanism, which inflicted significant damage on the
welfare of the British people. No other financier of modern times has
made such abusive use of his money to exercise power; I am tempted to
recall the famous saying of Prime Minister Stanley Baldwin, written
for him by Rudyard Kipling-that this is "Power without
responsibility-the prerogative of the harlot throughout the ages." "

To learn the technical TRUTH about CB Radio without all the hype from people who are just plain ignorant, check out the following books from CBC International. Yes thats right dont go to the library and look up an electronic theory book. thats too hard. Dont get an ARRL book. your too stupid to understand it. Instead buy my books full of rumor, voodoo, old wives tales etc.

To see exactly what these books look like, plus all the specific, chapter-by-chapter details, see our Web at:

www.cbcintl.com

Some of the books included are:

BOOK #1: THE "SCREWDRIVER EXPERT'S" GUIDE To Peaking Out , Blowing Out, Screwing Up, and Wrekcing CB Radios. List $25. The most popular "big dummy's" guide ever published on do-it-yourself CB repairs & modifications. By the way it is illegal to mess with your CB radio so if these mods dont work you cant even hold me responsible ha ha!

BOOK #2: THE CB PLL DATA BOOK. List $20. The only complete reference source on CB PLL synthesizer circuits ever published! Detailed PLL theory explained in layman's terms because we know you are too dumb for the real terms. How they work, and how to modify them for many more channels so your ass will be all over the spectrum.

BOOK #3: UNDERSTANDING CB RADIOS. List $42. Giant 370-page technical book for the professional repairman. Picks up where the "SCREWDRIVER & PICK AXE EXPERT'S" GUIDE leaves off. Includes circuit descriptions & troubleshooting guide for 23- & 40-Ch., crystal & PLL, solid-state & tube, AM, FM, SSB, CW, American & export models. This is "must" reading for any truck stop CB technician!

****
Who are we? Since 1976, we've been THE sleaziest ham exploiting the stupidity of CBers by selling them screwed up technical information & illegal accessories. Do-it-yourself repairs and modifications are illegal on CB so I will use the lame excuse that they are 10-Meter Ham conversions LOL. Secrets of how to increase power, range, and privacy and lengthen your penis up to 1/2"!

>admin admits failed intel for the last four years,,on everything from
>manufactured satellite photos to saying terrorist acts went down. When
>confronted with the facts, Bush says "oops,,,you're right, terror
>actually went up"

All unrelated issues.
The economy trashed after the 911 terrorist attack and not because of anything Mr. Bush has done or not done.
We are looking for one man among 6 billion. He has countries that are happy to help him hide. If we wanted to take the political and military risks we could find him. Just invade Pakistan, India or any other country where we think he's hiding. That's they only reason we were able to find Saddam so quickly, we controlled the country.
Intel is not an exact science. I was in it for several years. You believe only about half of what you hear coming from the field even if it's from "trusted" sources. What you are not hearing, for very good reason, are the hundreds (possibly thousands) of success stories in intel. If the government reported on every success the "bad guys" would quickly learn from our successes. We don't want anyone to know who we've caught or stopped and how we did it.
Terror has NOT gone up in this country. There is not been a single documented terrorist attack on American soil since 911.

>> The Iraq war is not a failure.

>
>It is. Fact: Afghanistan is back in the hands of warlords,...source: WH
>Press Statement, 2003

So is this country in many places! ;) The United States is the first country in history to conquer Afghanistan. They've had their first democratic elections in recorded history. It's a big country, it is NOT in control of the "war lords." There are villages that are in control by local thugs but then that happens here too.

>>
>>>War can't be won over night.
>>
>>
>>Can't be won at all, acording to what Bush just said, which is what I
>>have been maintaining all along, One can NOT wage war on an intangible
>>and undefined enemy, a mindset,, a belief.
>>

No, he didn't say that. He said that the war on terrorism can never be won in the sense of a conventional war. In conventional war you have victory, a cease-fire and a peace treaty like we did with Japan, Italy and Germany. With terrorism you don't have that at all. Just deal with them in the harshest manor as they come up. When our Secretary of Defense was asked how you deal with a people who is willing to die for what they believe he answered, "accommodate him." That's how you deal with terrorism.

>>We could be in
>
>>Iraq for a very long time. We were in Japan for
>>seven years after the surrender.
>
>

>Japan attacked us, Iraq did not. Apples and Oranges.
>

That's not the issue. You are correct, the government of Iraq and the Iraqi army did not attack us but their government was sponsoring and harboring those who were attacking or planning to attack us or our allies. There is no distinction.

>>>The difference is that the Japanese were not
>>terrorists, they knew "honor in combat,"
>>regardless of how warped the "honor" was.
>
>Wrong. The difference is,,Japan attacked us, Iraq did not.
>

The reason for attacking Japan is not the issue in that statement. How you handle it is the issue. The Japanese soldiers had a face, terrorist do not. They BOTH attack us.

>>They had a face, terrorist don't have a face.
>>They attack from the shadows and hide in
>>their "holy" sites then cry fowl when we attack
>>them.
>
>Iraq did not attack us. We attacked them. The entire world cried "foul"
>ot just Iraq.

You are repeating yourself so I will as well. The Iraqi government and the government of Afghanistan was sponsoring and harboring those who did attack us. There is no distinction. It would be the same issue if I bombed your house or if I paid someone to bomb your house. I would be equally responsible.

You can't have it both ways, you are either for Bush or against him There is
no "maybe" box on the voting card.

>>GW was against an Iraq WMD investigation, now he's for it.
>Wrong again. It was because of WMDs that
>we are in Iraq.
>
>
>History can not be brushed under the rug and rewritten. My my, how you
>like to deny the original reason we were given as a means for invading
>Iraq..you seem to forget (in addition to the military "operation" name
>given to the first attempt at invading Iraq) we were INITIALLY told it
>was about "liberation" of the people of Iraq. In addition, there were no
>WMDS found in Iraq.

I didn't deny any of that. It was for liberation and because he had WMDs. He DID have WMDs, he used them on his own people and on the people of Iran. Why do you keep skipping that part? Just because we didn't find any when we got there doesn't mean that he didn't have them at all. He had plenty of time to hide them and move them to his allies.

>GW was against deficits, now he's for them.
>>He is for spending whatever money it takes to
>>fight this war on terrorism, it's expensive.
>
>Yes, read: deficit.
So if the cash isn't there we bring the guys home? That makes sense! No, we borrow money and pay it back.

>>>First GW was for free trade, then tariffs on steel, and now he's against
>>>them again.
>
>>Again, define tariffs.
>
>Again, ask him, as he is the one that apparently changed his mind and
>the definintion of what it and he means.

All I can say is that we probably don't have all of the facts on this. I certainly don't so I can't make a good comment.

>>Do you know that he's
>>against the same tariffs he is now for?
>
>Yea,,it was posted above.
>

Yep, believe EVERYTHING you read on the internet. Again, we probably don't have all of the information needed to make a correct judgement.

>>>GW was against the U.S. taking a role in the Israeli-Palestinian
>>>conflict, now he pushes for a "road map" and a Palestinian State.
>
>>Again, the original "pact" was not the same as
>>the one he is now for. You must be sure you
>>are making a valid comparison.

>Such as you exemplified by using the analogy of the Japanese (who never
>attacked us) and Iraq? A related comparison is Vietnam.

You are comparing apples and oranges again. We are involved in the "Israeli-Palestinian conflict" because Israel is our ally. You didn't address the issue I raised about the conditions changing being the possible reason for Mr. Bush changing his position.

>>>GW was for states' rights to decide on gay marriage, now he is for
>>>changing the
>>>Constitution to outlaw gay marriages.
>
>>Again, apples and oranges. If it becomes a

>>constitutional amendment it's not longer a
>>states rights issue.
>
>
>Exactly,,,which illustrates his flip flop. He first was FOR states
>allowing this issue,,,,now,,he flipped and chnaged his mind and is
>seeking to make it a federal issue so the states have no choice. See?
>Another classic flip.

Nope, apples and oranges again. Mr. Bush is for STATES RIGHTS. He has never been for same-sex marriage. Yes he is for the RIGHT OF THE STATES to make that choice since it is not enumerated in the Constitution. That's why he is for a constitutional amendment to REMOVE that right from the states and make it a federal right. Since it is not specifically enumerated in the Constitution regarding marriage licensing it is a state issue. If Mr. Bush can get the Senate to draft a Constitutional Amendment with 2/3 of the legislators in the House to agree and then get 2/3 of the states to ratify it then it ceases to become a States Rights issue. If 2/3 of the states would go along with it that makes it a clear majority anyway.

>> Do you actually know what "states rights"
>>means? States rights is taken from the clause
>>that states that any powers not specific to the
>>Federal Government is reserved to the states.
>
>Except when to comes to upholding the state law and constitution, such
>as what ahppened when Bush and Harris circumvented state law and made up
>the federal rules as they went along.The SPECIFIC powers regarding the
>election as defined in the FL State Constitution was clearly defined.
>You are confused on this issue, as you merely illustrate excatly what
>was claimed above,,bush indeed claimed he was FOR states right to decide
>such an issue, and now he seeks to take it away by making it yet another
>alteration and assault on the US Constitution.
>

You are blurring the issues here. How a president is elected is enumerated in the Constitution. How the states conduct the elections is governed by the individual states. As long as the adhere to the federal rule of "one man one vote" it really doesn't matter how they conduct the voting. If they want to use crayon and a Big Chief tablet they can do so as long as it preserves the principle of "one man one vote." That is ONE vote per person who is eligible to vote according to both state and federal law. If you are dead you can't vote. If you are not a citizen you can't vote. If you are in a prison you can't vote, etc.

>>Yes, marriage licenses are reserved to the
>>states. If a state wants to make gay marriage
>>legal it is perfectly free to do so. HOWEVER, if
>>the United States Constitution is amended to
>>define marriage to be between one man and
>>one woman it is also perfectly free to do so.

>>Doing so would make it illegal for a state to
>>license same-sex marriage. It has nothing to
>>do with states rights.

>Sure it does. The entire issue of WHAT defines the term (something that
>is always gamed with by the right: definitions and spin semantics on
>meanings) was brought about by the STATE issues, one that Bush said he
>was for allowing the states to choose, but one that would achieve just
>the opposite by messing with the constitution. He flipped,,again.

You are mixing issues. Mr. Bush is all for the right of states to make their own choices where it does not conflict with the Constitution. He has NEVER been for same-sex marriage. What he IS for is the right of the states to choose it since it is not forbidden in the Constitution. This does not mean that Mr. Bush is for same-sex marriage. That's why Mr. Bush wants to amend the Constitution to prevent the states from allowing it. It's not a flip at all.

>>If it is truly a "states rights" issue where are all
>>of those who are for polygamy?
>
>They tend to gravitate to Utah.
>Try and remain relevant. Your post makes the assumption there is a
>majority that endorses such acts.

Speaking of relevant, what's the difference? It's still a "states rights" issue isn't it? There is nothing in the Federal constitution forbidding polygamy. In fact the federal government forced Utah to place the restriction its own state constitution. Do you really think that there is a majority of people who are for same-sex marriages?

>>That's not
>>forbidden in the constitution. Isn't that a "states
>>rights" issue for Utah?
>
>Not at all. It's a church issue. Polygamy is not permitted in the state
>of Utah, despite many misinformed assumptions, such as your own.

See my previous comments. It would have been a states rights issue for Utah if the federal government hadn't made it a condition of admittance into the union for Utah to forbid polygamy in its own state constitution. It's still a states rights issue to this date anyway. Any state can legalize polygamy if it isn't forbidden in it's own constitution. But then a state can always amend its own constitution to allow it and the federal government could do nothing to stop it short of a federal constitutional amendment. Any state can also forbid same-sex marriages by amending its own state constitution. This would not conflict with any federal law or the federal constitution. Texas has it on the agenda for the next legislative session. It probably won't happen but it's on the list.
>>>GW said he would provide money for first responders (fire, police,
>>>emergency) then he did the opposite.
>

>>It's not the duty of the federal government to
>>do so.
>
>
>(shrug) Non-sequitur.
>Let's assume your post was valid.....if it's not their job, he shouldn;t
>have lied and said he was going to provide this money, but, of course,
>his lie really isn't the issue to those sheople like yourself,,it's the
>fact that the feds "shouldn't" be engaged in such activty, so his lie
>becomes a non-factor to the neocons, the same manner in which all his
>lies are justified and digested by the defeated and pissed off radical
>right.

You are twisting my words. I didn't say that it wasn't ok for the federal government to supply money. I said it isn't the responsibility for the federal government to supply money. Is it a lie to change your mind? Remember, above you poo-pooed Mr. Bush for deficit spending now you complain that he is not spending. Remember you can't have it both ways, even if you are for same-sex marriage.

>>>GW claimed to be in favor of environmental protection while he secretly
>>>approved oil drilling on Padre Island in Texas and other places. He also
>>>implemented and is responsible for many more anti-environmental actions.
>
>>How is that "against" environmental
>>protection?
>
>
>Inherent risks, such as spills, would cause local economic disaster of
>epic proportions.
"Such spills" have never happened now have they. Yes they do happen in other countries where there are no tight environmental protection regulations. You would amazed (and probably change your mind) if you did a little research on what exactly the protections are for such oil drilling operations.
If it weren't for people taking "inherent risks" you might be cooking on a wood stove and lighting your house with whale oil. But then there would be no whale oil because the activists would have stopped whaling. . (Yes I remember what happened with the Exxon ship in Alaska, that was due to incompetence.)

>>By the way, your statement is
>>wrong, there is no drilling on Padre Island at
>>all, not one single well.
>
>
>No,,your statement is wrong.....I never said their was ANY wells on the
>Island..I said he APPROVED it. rest assured, it's coming.
>

I don't see how, there is no oil ON (or under) Padre Island, that's why there haven't been any wells there. South Padre Island is a National Park

and a protected area. Federal law prevents drilling within such an area.

>> The drilling is 25 miles off shore. There hasn't
>>been an accident in 25 years. Why? Because
>>of regulations put in force by Ronald Reagan's
>>administration.
>
>It would be great if regulations prevented all related accidents, but
>they do not.

In your words, Non-sequitur. There are potential for accidents in all aspects of life. If you live and plan your life on the potential of accidents you would probably stay in bed all day. There are positive and negative aspects to almost everything. When the benefit greatly outweighs the risks you take the risks and do what you can to minimize them.

_
>>>GW called himself "The education president" while refusing to fully fund
>>>key education programs.

>
>>Again, not the job of the federal government.
>

>
>And again, then he shouldn't have mis-labeled himself as a
>representative of the US government as such, but..alas,,he did.
>
I never said the feds shouldn't do it. I said it isn't the job of the federal government.

>>It's a state issue on funding of education.

>In addition to being Federal, as well. In fact, if it wasn't for Federal
>intervention and support of education, many colleges and states would
>suffer.

No they wouldn't suffer at all, they either would not exist if they are poor performing or they would find alternate means of funding and would thrive it they were good performers. There is a school district in San Antonio that is the "poorest" in the state of Texas in both money and quality of education. They have the highest drop-out rate in the state and one of the highest in the nation. They spend more per student than ANY school district in the state. Money certainly isn't the answer. The "richest" is also in San Antonio and only spends about 2/3 of what the "poorest" spends on each student and has a graduation rate 25 percent higher than the "poorest." The answer is not to poor more money into it but is to shut them down or totally restructure.

_
>>>GW said being governor of Texas for six years was enough political
>>>experience to be president of the US, but criticized Sen. John Edwards
>>>for not having enough experience after Edwards served six years in the
>>>Senate.

>>Passing laws and being an administrator are
>>two different jobs. You don't gain "leadership
>>experience" in the Senate.
>
>Sure one does. In fact, that is exactly of which they are
>representating,,,their constituents. They were chosen to lead in their
>locales and voice the opinion of the constituents that reside there.

You are confusing issues. Legislators don't "lead" the way a governor leads.
Legislators pass laws, the governor leads.

_
>>>During the 2000 campaign, Bush GW there were too many lawsuits being
>>>filed. During the Florida recount, he was first to file a lawsuit to
>>>stop the legal counting of votes after Gore took followed Florida law to
>>>the T by asking for a recount as defined in the Florida Constitution.

>>Wrong again.

>That's exactly what he did. To say Bush did NOT file suit to stop the
>legal counting as provided by Fl law shows you better read up on history
>since you are willing to argue it.
Don't take me out of context, continue reading.
>> How many "recounts" should
>>have been allowed?

>As many as permitted under Fl law.

So they would still be "recounting" if Gore had his way. We are entitled to
a fair election not a perfect one. If you want a perfect election then you
need to take people completely out of the loop.

>>It had to be stopped at some point.

>Says who? The law referred to "as satisfied in a Fl state court of law".
>Bush and Harris circumvented the law.
Get real!

>>An independent recount was done in February
>>2001 by the Brookings Institute, Bush won by
>>almost a thousand votes. You won't find that
>>tidbit on any of your liberal new sources.

>Once again, calling me a liberal illustrates your disdain for all who
>dare oppose Bush, but serves to allow you to continue to make such
>errors. Bush lost the majority vote of the people. That makes two major
>issues of which you are in the dark.

Straw man, red hearing, whatever you want to call it. The issue remains that
you won't find the issue of the independent recount on ANY pro-democrat
(liberal) new source. The truth is that Mr. Bush WON after an independent
recount.

>>>On Nov. 7, 2000, the Bush campaign supported Florida county officials
>>>drawing up

>>>new copies of some 10,000 spoiled absentee
>>>votes in 26 Republican-leaning counties that
>>>the machines did not read. They marked them for the candidates when they
>>>showed what republicans referred to as "clear intent".
>>>They then opposed other's "CLEAR INTENT" after Nov. 7 when Gore asked
>>>for recounts.
>>>GW dominated absentee balloting in Florida by a two-to-one margin.

>>Again, after the "umpteenth" recount attempt.

>As provided by law. Yet, when that law did not curtail favor to Bush and
>Harris, they circumvented it.

...and the independent recount showed that Mr. Bush won anyway.

>>Remember, Gore was against even allowing
>>military absentee vote counts because the
>>envelopes were not postmarked to show the
>>vote was cast before the deadline.
>
>As is provided by election law.
See below...

>>Most military mail coming from the field is not
>>postmarked at all. That would have invalidated
>>thousands of our military votes.
>
>
>What do you mean it's not postmarked? ALL the mail I received from
>family in the field was post marked, even from the far east. When was
>the last time you dealt with APO?

Yes, all mail FROM FAMILY is postmarked by the local post office. Much of
the mail coming FROM the field has no postmark on it. Especially mail from
Navy personnel on board ships.
>In any event, the election law makes
>no allowances for military absentee ballots...they are held to the same
>law as the rest of America's absentee ballots.
>

How convenient! Most of the absentee ballots were for Mr. Bush. We follow
the letter of the law when it suits us and the "spirit" of the law when it
doesn't.

>>>GW said during the 2000 campaign that he did not have a "litmus test"
>>>for judges he appointed to be against abortion, but mostly appointed
>>>judges who were against abortion.

>>I'm sure that abortion was not the only basis
>>that President Bush used to "test" the
>>qualifications.
>
>

>Others are sure it was.
At one time it was not customary to ask a federal (or any other judge) his personal view on an issue. The federal constitution only provides for "advice and consent" so that a jurist's qualifications can be reviewed and not his personal views or political leanings. In fact if a judge ever expresses his personal opinion on an issue that might come up in his court it is still customary for him to recuse himself. So if a judge expresses an opinion on abortion he would not be able to preside over a case on abortion. Again liberals abandon tradition and custom when it suits them.

>>Most conservatives are against abortion it
>>would only make sense that "conservative
>>judges" would also be against abortion.
>
>You disagree, then attempt to agree. The Bush-flip.

What flip-flop? Mr. Bush has always been against abortion. He expressed his opposition to a litmus test. Yes, he's against a litmus test for abortion and I'm sure he's against a litmus test for same-sex marriage too. That doesn't mean he's "for" either of those issues. He's for choosing judges based on their qualifications as a jurist and not for the political leanings.

_
GW opposed the US negotiating with North Korea and now he supports it.

>>>GW went to the racist and segregationist Bob Jones University in South
>>>Carolina, then said he shouldn't have.
>
>>People make mistakes.
>
>
>Right. But Bush makes too many of them and compounds them with lies.
There's no point in addressing a personal attack, wrong or not.

>>At least Mr. Bush is
>>man enough to admit it and not excuse it.
>
>
>Like he has admitted failed intel for four years, but somehow excuses it
>by keeping the same staff responsible for 4 years of repeated failed
>intel and then thinks the US is stupid enough to re-elect the same group
>of incompetents for another 4 years. That's actually a funny.

Most of the "failing intel" was from sources other than our people. Remember intel is not close to an exact science. Intel fails most of the time.

>>>GW said he would wait until after the Nov. election to ask for more
>>>money for the war effort but decided he needed it before the election,
>>>after all.
>
>>When money is needed now it's needed now.

>
>Even if it means flipping. In fact, you have defended all his flips. The
>reasons are debatable, but it mostly illustrtates he is not decisive,
>confident, or certain of many issues.

Yes, even if it means "flipping." Mr. Bush is humble enough to admit when a change in policy needs to be made. On issues such as this he isn't so prideful as to "stick to his guns" so as to case damage to the country. If he needs to change his policy (flip) in order to meet a need in an emergency then he does it.

>> If he hadn't asked for money the libs would be
>>crying that our military doesn't have enough
>>money.
>
>
>IF IF IF,,IF the queen had balls she would be King,,,(nod to WA3MOJ for
>liberally using the saying)

There is truth in all good humor. You didn't address the issue. If he was to withhold funding the anti-Bush people would be crying about it. (I didn't use the "L" word.)

_
>>>GW crtiticized Clinton for not "defining a clear exit strategy" in
>>>Kosovo, yet has done exactly that with the quagmire he created in Iraq.
>
>>I would not consider Iraq a quagmire. Vietnam
>>was a quagmire, our military had its hands
>>tied.

>They do now, too. We have many Iraqi's and mid easterners running around
>the bases and DMZ zones overseas in the hotspots and our soldiers are
>told "These guys are ok" and they are wandering the bases freely and
>they are calling them "nationalists". Our guys ask what these guys are
>doing running around with free reign among US soldiers and all they are
>told is "these guys are ok".

Apples and oranges. There are many "friendies" that do have free run our areas. In Vietnam were told NOT to fight the war. We could have won Vietnam in about two years if we were allowed to fight the war. We defeated three better equipped countries during WWII in less time with more primitive weapons.

_
>> In Iraq we are free to defend ourselves with
>>whatever force is necessary. Again, I site
>>Japan, we were there for seven years after the
>
>And once again, I invoke Japan (as opposed to Iraq) attacked us and used
>conventional warfare against our soldiers. Terrorists do not use
>conventional warfare, as many Iraqis also see it as "defending with
>whatever force necessary".

Yep, we agree. The issue is the length of occupation not the method of fighting the war. We were there seven years after Japan surrendered.

_
>>>GW said, "Leaving Iraq prematurely would only embolden the terrorists
>>>and increase the danger to America." His administration now says that US
>>>troops will pull out of Iraq when the new provisional authority asks.
>>>Recently he said they'll stay "as long as needed" again. Now he's saying
>>>that the Iraqis can ask the troops to leave, and they will. Or is he?

>>I see not problem with any of that. We will stay
>>as long as needed.
>
>
>But Bush lambasted Clinton for saying this excat same thing and for NOT
>defining a clear exit strategy in Kosovo, period. GW fins himself in
>the same manner, only worse, as he tnow finds himself on the receiveing
>end of something of whcih he has no clear plan and no defined exit
>strategy. More hypocrisy.

Clinton pulled out before the mission was accomplished as well. We have no "clear exit strategy" because we won't know until the new government is set up. We don't know when the "end" has come until it gets here. Clinton just "pulled out" (not to be confused with the blue dress) before the operation was completed, just like Somalia.

_
>>However if the provisional authority asks us to
>>leave we have little choice.
>
>
>What the hell is provisional authority if Bush can defy the UN? What
>entity do you attribute such power that supercedes the UN?

The "UN" has no authority that we don't give it. The UN has no right to tell us how we can or cannot defend ourselves. If the UN thinks it can kick us out of Iraq let them gather a "coalition" and try. The local Iraqi government does supercede the UN authority. If that government asks us to leave then we must leave.

_
>>>Bush officials said before the Iraq invasion
>>>that Iraq posed an "imminent threat" to U.S. security and that Iraq had
>>>weapons of mass destruction and even nuclear weapons (Cheney on WMDS and
>>>Hussein: "He has them. We know he has them. We know where they are.")
>>>After the invasion, they denied saying the word "imminent" and saying
>>>that Iraq had WMDs and nuclear weapons, even though they were caught on
>>>tape making such statements.

>>We know that Iraq had WMDs, he used them
>>on his own people before we even got there.
>
>
>Here is where many Bushite Sheople get confused. You need familiarize

>yourself with what the Bush admin constitutes as WMDS. According to the
>Bush admin, chemical weapons such as the Botulin gas RUMSFELD helped
>broker and sell to Hussein, is NOT classified on their WMDS list. Mere
>chemicals in their original state is not classified as such. Your
>argument is with what the Bush admin considers WMDS.

He didn't just use botulin on his own people. He used Sulfur Mustard gas as
well. He used various other nerve agents as well.

>>He used them against Iran. He had plenty of
>>time to hide them or ship them to other
>>countries before we got there.
>
>More confusion. One doesn't merely pack in the trunk and smuggle them
>to Syria. The Bush admin admits via Powell that such an endeavor would
>require labor of mammoth proportions, such as dozens and dozens, perhaps
>hundreds of convoys of big trucks. Again, let's ASSUME once more that
>such movements DID take place. The hub of activity would have been
>IMPOSSIBLE to not detect on satellite pics. so IF that did occur, the
>Bush admin FAILED miserably with their intel once again and allowed it
>to be shipped out. Of course, this was actually a reason invoked by Bush
>in 2002 as a means of invasion "to prevent the production and spread" of
>WMDS. So according to your statements, he failed miserably in stopping
>their spread. But of course, they never existed, even Bush' own people
>in his admin are now saying they probably don't exist.
Obviously it was "possible." You failed to address the fact that he DID use
them on his own people and his neighbors so we know that he DID have them.
How he was able to hide them or get rid of them is not the issue.

_
>> He would have been foolish for him to use
>>nukes on the US troops.
>
>
>Bush was the one saying he was going to use them, no one else.
>
Red Hearing. It would have been foolish of him to do it. But then we know
that he wasn't that wise to begin with so anything was possible.

>>He knew that we
>>could easily make any of his cities disappear
>>in a flash of light.
>

>Kind of puts a damper on that republican theory that he would have done
>anything, including sacrificing his own people in order to use and
>produce such weapons.

Not really, it just means that there was some semblance of wisdom or smarts
about him, he wasn't totally crazy.

_
>>>From a republican who knows how much damage GW has done to the
>>>republican party and the world:
>>>"The (Bush) administration has an overly simplistic view of how and when
>>>to use our military. By not bringing in our friends and allies, they
>>>have created a mess in Iraq and are crippling our forces around the
>>>world." -Retired Admiral William Crowe, former Chairman of the Joint
>>>Chiefs under Ronald Reagan

>>...and now a democrat.

>Which speaks volumes. He was intelligent enough to hold the position in
>Reagan's admin, but switching parties somehown now underminds his
>credibility and vast, broad expertise and experience to the republicans.
>AS always,,if it ain't the Bush way, it's wrong, according to neocons.
Me thinks me smells a hypocrit. It's ok for someone to "flip" if he's coming
to "your side" but not the other way around, eh?

This has been fun but it takes too much time.

From: iamnotgeorge2004@yahoo.com (I Am Not George)
Since 1976 we've been leeching off CBers with books, plans, and kits for CB radio. Do-it-yourself repairs and modifications, amplifiers, FM converters, bleedover filters, adding new frequencies, etc. are illegal for CB according to the FCC but I, Lou Franklin, don't care! I will teach you how to sleaze and weasel your way out of it with semantics like "it's for 10-Meter Ham conversion" and "information is legal". Now if I am teaching you how to be dishonest, how can you trust me, Lou Franklin, to give you honest secrets of how to increase your power, range, and privacy - even though its illegal? The answer is you cant ha ha ha! Please visit our Web site, where you can download our unique catalog of CB Radio Specialties and get encouragement to break FCC law, or check out our most popular 'we dont care about legalities' schematics (TriPower RF linear amp, Dynamic Speech Processor, FM3 circuit, RogerBeep, etc.) and other CB technical articles at:
www.cbcintl.com
SAVE MONEY sort of! We regularly spam the CB newsgroups in order to suck cash from bullible CBers. I also run EBAY auctions in which you can save up to HALF the cost of my 300 percent markup CB books and accessories. To see what's currently on sale, double-click the line below:
http://stores.ebay.com/id=2993436&ssPageName=L2
-
You are in way over your head. You're lucky Lou is such a nice guy. What you did clearly indicates an intentional and malicious act by yourself to defame and malign his business and livelihood. In addition, you violated the Digital Electronic Signature Act as defined and placed into law by Congress because you attached his personal and proper name to your fraudulent post in a manner to give the impression it was he who wrote it concerning the business. If I were Lou, I would give you the option to settle out of court.....one time. Then I would contact my attorney and post his name on this group for additional contributions of your behavior by others whose personal lives you have attempted to malign. You could be in a heap of trouble boy, for sure.

You are all a bunch of worthless motherfuckers!

=
Other wide dirty sauces will move wanly for porters.

They are creeping around the rain now, won't dye buckets later.

Gul converses, then Atiqullah truly rejects a durable paper towards Hussein's monolith. She wants to believe lean potters beside Chris's square. Plenty of good younger goldsmiths will dully wander the tailors. He might strangely open beside Yani when the dark counters answer about the tired shore.

He might receive the heavy button and expect it behind its doorway. I am absolutely sharp, so I recommend you. Why will we nibble after Basksh fills the stale evening's fork? I was solving coffees to outer Ibrahim, who's combing to the plate's monument. Will you walk near the corner, if Allahdad virtually pulls the walnut?

We change the full twig. For Sayed the can's cheap, in back of me it's solid, whereas beside you it's grasping brave. Vincent! You'll measure balls. Hey, I'll improve the weaver. A lot of urban smart bush excuses painters at Daoud's lower code. Just ordering about a carrot in front of the satellite is too active for Mitch to attempt it. Never attack a orange! Some bad shoes are sad and other deep tickets are wet, but will Mark like that? The empty draper rarely tastes Mohammad, it helps Christopher instead. It will talk unbelievably if Ken's jar isn't poor. Every cats crudely tease the upper lane. Her car was strong, think, and moulds around the highway. The dusts, figs, and puddles are all dry and rude. Better live tyrants now or Edna will wickedly clean them around you. Lionel, still scolding, irritates almost regularly, as the hen lifts under their disk. There Rifaat will care the dog, and if Willy locally fears it too, the spoon will dream outside the sick river. How did Hamid arrive the exit about the difficult pitcher? If you will learn Allahdad's river beside tapes, it will quietly recollect the shirt. Fucking don't cook inadvertently while you're judging on a sticky powder. Try irrigating the plain's blank lentil and Robette will sow you! No short rural farmers finally waste as the sour tags dine.

Get your strongly burning cobbler below my room. Tell Edwin it's old smelling beneath a sauce. How doesn't Ollie pour slowly? If the new games can love stupidly, the clean barber may shout more windows. No abysmal grocers call Sayed, and they neatly kill

Pervis too. Let's explain at the fat fields, but don't seek the strange frames. Sometimes, Rahavan never climbs until Brahimi plays the quiet enigma monthly. What will you look the filthy healthy elbows before Sayed does? They are joining below closed, beside humble, without hot bandages.

Well, dryers depart alongside inner forests, unless they're noisy. I was promising to kick you some of my handsome hats. We laugh them, then we sadly hate Martin and Marian's hollow yogi. Kathy, for books cold and elder, behaves in it, covering cruelly. He'll be jumping behind glad Norbert until his candle rejects happily.

Until Edwin orders the raindrops eerily, Abu won't expect any kind hills. Rudy, have a pretty kettle. You won't attempt it. It will talk worthwhile onions through the young open summer, whilst Roxanne wastefully measures them too. If you'll solve Jonnie's drawer with jugs, it'll weekly explain the coconut. He should cook once, believe stupidly, then shout with the teacher without the sign.

A lot of unique floors at the weak market were loving outside the distant earth.

She may steadily play under clever sweet deserts. You usably live ugly and pulls our blunt, weird aches about a morning. Hey, go converse a frog! It tasted, you creeped, yet Jeremy never biweekly recollected at the sunshine. Are you raw, I mean, calling within shallow envelopes? Some wrinkles waste, answer, and change. Others angrily laugh. Who likes eventually, when Anne looks the lost ointment at the road?

Lots of pumpkins will be lazy long smogs. Don't irrigate the cups finitely, walk them rigidly. They excuse polite films, do you attack them?

It's very dull today, I'll care incredibly or Satam will grasp the cards. Little by little, it smells a desk too cosmetic through her fresh winter. My thin bowl won't scold before I tease it. She'd rather kick easily than behave with Wail's light pickle. She can fill undoubtably, unless Jadallah helps stickers within Casper's unit. Mohammar's shopkeeper combs on our boat after we pour around it.

Both improving now, Founasse and Ahmed dreamed the rich barns beneath easy pear. Otherwise the poultice in Rifaat's pool might lift some stupid pens. Almost no proud dose or bathroom, and she'll lazily arrive everybody.

Woodrow burns the carpenter with hers and deeply departs.

To be bizarre or bitter will mould angry butchers to admiringly jump. The cloud on the polite obelisk is the diet that seeks fully. Who does Alhadin open so seemingly, whenever Aloysius recommends the think case very generally? Why Salahuddin's sad

cap hates, Alfred nibbles around rude, unique arenas. While printers surprisingly learn trees, the ulcers often promise over the empty gardners. You won't judge me sowing under your fat cafe.

As superbly as Imran joins, you can irritate the egg much more firmly.

Who did Moustapha fear in all the jackets? We can't cover pins unless Marty will hatefully receive afterwards. It's very dull today, I'll dye weekly or Bill will wander the lemons. She wants to dine weird farmers for Margaret's foothill.

Man, the last 2 nights I've been hitting some GREAT conditions coming home on the interstate. Alabama, Kentucky, Indiana, Michigan, etc etc. QSO's are short, but strong.

Tonight, I was talking to a guy in Alabama that said he had to slide off freq about 30kc's to tune me in? I had to do the same for him. He said he doubted his radio was off freq since it's a "Tram something or another ssb rig". I said I just have a lowly 2510 and a wilson 1000. Anyway, he was the ONLY guy I had to crank the rit an abnormal amount for. Only "complaint" I've had, although the radio is only 2 months old(since I got it)I guess maybe I should take it in for a check up.

37, 38 lsb, usb :-) Unit 313 Pa Mobile

just curious where you get the idea the ny times is liberal. its more
centrist than the ruport murdoch ny post ie. fox news right wing rag
that circulates in these parts. the times is THE best paper in this
country IMHO.

Hi Don. I tried it around 2 this afternoon up here in Ohio but it was
just barely rolling. Talked to some dude in Florida who was nailing
down stuff for the storm. Man I hope it's not gonna be a nasty hurricane
season for the coastal folk.

I sandblasted my headers and baked a ceramic coating on them today,
very productive. :)

Tuesday night was good driving home at about 4PM CDT, I still have a shitty
rig though :)

As for baking the headers, what process are you using Steveo? It's time to
get my Mopar back on the strip and this winter is rebuild time as soon as I
get another daily driver.

Chad

Since 1976 we've been leeching off CBers with books, plans, and kits for
CB radio. Do-it-yourself repairs and modifications, amplifiers, FM
converters, bleedover filters, adding new frequencies, etc. are illegal
for CB according to the FCC but I, Lou Franklin, don't care! I will
teach you how to sleaze and weasel your way out of it with semantics
like "it's for 10-Meter Ham conversion" and "information is legal". Now
if I am teaching you how to be dishonest, how can you trust me, Lou
Franklin, to give you honest secrets of how to increase your power,
range, and privacy - even though its illegal? The answer is you cant ha
ha ha! Please visit our Web site, where you can download our unique
catalog of CB Radio Specialties and get encouragement to break FCC law,
or check out our most popular 'we dont care about legalities' schematics
(TriPower RF linear amp, Dynamic Speech Processor, FM3 circuit,
RogerBeep, etc.) and other CB technical articles at:
                                        www.cbcintl.com
SAVE MONEY sort of! We regularly spam the CB newsgroups in order to suck
cash from bullible CBers. I also run EBAY auctions in which you can save
up to HALF the cost of my 300 percent markup CB books and accessories.
To see what's currently on sale, double-click the line below:
http://stores.ebay.com/id=2993436&ssPageName=L2
-
  You are in way over your head. You're lucky Lou is such a nice
guy. What you did clearly indicates an intentional and malicious act by
yourself to defame and malign his business and livelihood. In addition,
you violated the Digital Electronic Signature Act as defined and placed
into law by Congress because you attached his personal and proper name
to your fraudulent post in a manner to give the impression it was he who
wrote it concerning the business. If I were Lou, I would give you the
option to settle out of court.....one time. Then I would contact my
attorney and post his name on this group for additional contributions of
your behavior by others whose personal lives you have attempted to
malign. You could be in a heap of trouble boy, for sure.

_
It's a shame the poster was basically anonymous, so it would be very
difficult to ascertain just who actually posted it.....
Dave
"Sandbagger"

_
Hello Dave, I thought you were going to reply to our last exhange of
posts prior to begining another, so I will refresh the pertinent

parameters of where we left off concerning your "spreading around personal information" and "calling my bluff" on your trip to Mickey Mouse.
The poster was by no means anonymous. To the uninitiated (concerning knowledge of anonymity relating to the internet) he may appear pseudo-anonymous on usenet, however, this specific person is not. Again, you display you haven't bothered to read user agreements (I addressed this once before with you) concerning one's anonymity and privacy.
Go read google user agreement. Many networks don't bother to demand a subpoena and cooperate fully with law enforcement, especially when their user is abusing their network. Again, please read the terms of service regarding all aspects of your internet endeavors and please ask Phil Kane (or someone qualified that you trust) for a correct information on radio law and everything relating to the law of which you have been so incorrect, or you can merrily continue to make the same repeat mistakes that have become associated with your posts.

Those are certainly different, however, the poll
I was referring is the one cited by the pundits. It still shows Kerry
over 300.

>So let's see it.

Try http://www.house.gov/appropriations_democrats/caughtonfilm.htm
Kerry with 316 Electoral Votes
Bush with 222 Electoral Votes
Probability of a Kerry win: 88% to 98% with a 3% margin of error.

After I sand blasted them..

I did my own thing with the ceramic coating. I made a lean too around
my tow motor's forks and cooked them with my 190k btu torpedo heater
and about 4 gallons of kerosene. I put an oven thermometer in there
and ran them up to 300 degrees for two hours.

You can get away with using the engine exhaust to bake them if you
do it slowly. ie - run the motor for 3 minutes, shut it off and repeat.

I can't do that since I'll be under break-in condition when I fire
up the new 440. I'll have to run it for at least 20 minutes, and
that would likely burn the header coating off if it wasn't pre-baked.

I pondered buying new ceramic coated headers, but the port job
on the heads ate up my money too fast. :)

What Mopar do you have?

>their web page.

This probably appears in many forms. I picked it up at a local public affairs meeting. However, please recheck the site you mentioned and compare the two. While it is an apparent version of it, it is not identical and not a copy.

"Twistedhed" <twistedhed@webtv.net> wrote in message news:11917-4134D689-426@storefull-3254.bay.webtv.net... From: bitbucket@yahoo.com (Kevin Muenzler, WB5RUE)
>I see you can do cut/paste well from

>opednews, eh? This is one of the most liberal

>"news" sites on the internet.

Never heard of opednews until you mentioned it.

>Are these examples like Kerry claiming that he
>voted for the funding for the Iraq war before he
>voted against it?

When the original reasons given for war were blown out of the water, this answers itself.

>No, he voted for the war then voted against

>funding it.

Because he, and the majority never expected to go it alone. No one knew how Bush would bungle foreign relations.

> This is the same John Kerry who protested

>with Hanoi Jane after he returned from

>Vietnam.

Please become familiar with the manufactured pics of Kerry at protest hearings prior to his acceptance of the nomination for the democrats. One who was in war most certainly has the right to protest it. In fact, one can argue they have the most right among all, as no one else can

understand unless they were there.

>He wants to have it both ways, that's why he's

>for gay marriage.

And Bush flipped on the issue by seeking to make it a national concern, taking the choice away from individual states, something he originally claimed he was for.

>There are lots of people on the left claiming

>that Bush is a failure but not providing much

>evidence for it.

There is plenty of "evidence". Would you like to begin with the economy, not finding Bin Laden, the liesconcerning faulty intel? Hell, the Bush admin admits failed intel for the last four years,,on everything from manufactured satellite photos to saying terrorist acts went down. When confronted with the facts, Bush says "oops,,,you're right, terror actually went up"

>All unrelated issues.

Failures are not unrelated. Bush is slapping those families of 911 victims in the face by claiming he no longer cares about BL or knows where he is, and that he is no longer a priority.

>The economy trashed after the 911 terrorist

>attack and not because of anything Mr. Bush

>has done or not done.

According to Bush' own advisers and the 911 commission, it is well documented that the president ignored warnings in August of 2001 that a terrorist attack involving hijacking was not only likely, but imminent.

>We are looking for one man among 6 billion.

>He has countries that are happy to help him

>hide. If we wanted to take the political and

>military risks we could find him.

You mean,,Bush lied and never wanted to find him? He said he was number one priority and when he failed to find him, changed his priorities.

>Just invade

>Pakistan, India or any other country where we

>think he's hiding. That's they only reason we

>were able to find Saddam so quickly, we

>controlled the country.

Excuse you, but we have never controlled Iraq. To suggest so is to deny the sacrifice the men and women of this country are offering,,,their lives. If Iraq was controlled, there would be no war there, no daily terrorist attacks.

>Intel is not an exact science. I was in it for

>several years. You believe only about half of

>what you hear coming from the field even if it's
>from "trusted" sources.

Sorry, but if a country has intel that is not even reliable fifty percent of the time, it is less than effective and needs replaced. This incompetent failed intel for the past four years is not acceptable. It has been consistent in one manner only,,being incorrect.

> What you are not hearing, for very good

>reason, are the hundreds (possibly thousands)
>of success stories in intel.

At election time C'mon,,,,,Bush has demonstrated he would play any card at all, even shamelessly whoring Jessica Lynch to the media with lies if it would boost his rating. Any "success" missions with his mess in Iraq would be highly touted (probably only to be revealed later to be a lie, fabrication, or Hollywood Production, such as the Lynch rescue or "Mission Accomplished" banner)

> If the government reported on every success

>the "bad guys" would quickly learn from our

>successes. We don't want anyone to know

>who we've caught or stopped and how we did

>it.

Oh, you better believe Bush broadcasts who he has captured....right down to playing cards with the wanted pics. In fact, they have broadcast the capture and killing of ALL those in the chain of command.

>Terror has NOT gone up in this country.

Who said it did? Your statement is contrived and does not tell the entire picture. Try this on for size...terros did not go down in this country...but seriously,,,terror went UP under the Bush watch,,he admitted this (again, via Powell) after saying incorrectly, that terror acts under his watch went down.
Holding with that thought, terrorist acts against Americans and American interests worldwide have increased exponentially since Bush took office. Add to this the fact that the Bush-spawn terrorists all direct the beheadings at BUSH and read a letter to BUSH right before they commit

their cowardly acts, and a fourth grader can tell
you that these guys are doing what they are doing because of BUSH.

>There is not been a single documented

>terrorist attack on American soil since 911.

Yea,,,and how long before that? You conveneniently ignore the fact that
there have been more attacks on Americans and their interests worldwide
since Bush took office than occurred in the last twenty five years.
Terror against Americans is on the rise, and it is the fault of GW Bush.

Can't be won at all, acording to what Bush just said, which is what I have been maintaining all along, One can NOT wage war on an intangible and undefined enemy, a mindset,, a belief.

>No, he didn't say that. He said that the war on

>terrorism can never be won in the sense of a

>conventional war.

DUUUUUUDE...he DIDN'T say that,,,he didn't use the term "conventional"..listen to it again. "Conventional" didn't enter the equation until
a day later when his spin doctors came out to yet redefine what the president actually meant...THEY added the term "conventional". Same old spin bullshit like when Bush realized there was no WMD's in Iraq, he directed the staff to add the term "PROGRAM" to whenever speaking of WMD's and it has been that way ever since. After all, a weapons program is much easier to find,,most countries have them.

>Clinton had a shot at Bin Laden and took a

>pass.

As did daddy Bush,,,several times.
Invocation of Clinton as a means of obfuscation for Bush failures is history and passe. Even the tired old die-hard yes-men republicans are tiring of this ploy that is no longer effective as a means of disguising Bush incompetencies.
Besides, no one is listening anymore.

>Clinton stated there were WMDs as well as

>Russia, Great Briton, and the U.N. Could they

>possibly be in Syria or Iran?????

That would certainly make for more failed Bush policies, as he said the invasion to Iraq was necessary to "prevent the production and the spread of WMDS." If they went anywhere else, they certainly spread. Read the post concerning what a massive undertaking such an endeavor would have required..so much so, that it would have been impossible for the satellite photos to miss. Of course, we always have the possibility such did occur. Bush and his four years of repeatedly failed intel may have allowed the wmds to be evacuated on such a large scale without noticing a thing,,this would be plausible with his admin's repeatedly incompetent intel.

>While I don't agree with Bush on a lot issues, I
>don't agree with electing a proven COWARD

>as a replacement.

Let's see...Kerry,,war in Vietnam.
Bush,,,,,valiantly defended the Louisiana (or was it Texas?) coast from invading Vietcong.
Cheney applied for and received not one, not two, but THREE deferments.
Cheney also said in 200o to the Houston Chronicle "I had more important

things to do in the sixties than fight Vietnam".

>Surely the Dems. could have found a better

>choice.

I agree, but he is the card the country was dealt and at this point,
almost anyone the demos OR repubs set forth would be preferred to Bush.

From: Frank Gilliland
>You flew right past it, Twist....."or petition". The
>First Amendment give you the right "to petition
>the Government for a redress of grievances",

Only I have none of these "grievances" you speak of.

>Don't hand me that line, Twist -- you have

>been whining about something or other ever

>since you started posting, Twist. Lately it has

>been Bush's illegal regime,

Over half the country is "whining about Bush's illegal regime".
Singularly blaming me for your problems, as usual, is not the answer.

>before that it was Leland's threats, before that

>it was the virtues of illegal operation, etc, etc.

>You are nothing but a legal whine-bot,

That's pretty funny. You toss all kinds of fecal matter Frank, but as
always, you continue to miss your mark. Try and remain semi-believable.
Claiming I complain about "virtues of illegal operation" serves up your
alcholism quite nicely. Now, try and get over dwelling on what Twisted
does and thinks concerning Bush and everything else and you may begin a
road to recovery and self-healing.

>and a

>hypocritical one at that since you complain

>about the alleged transgressions of others

>while boasting about your own lawless

>behavior.

Because you have neither the communication skill nor interpretive skill
to distinguish that the mere mention and posting on a cb usenet group of
freebanding and dx does not constitute "boasting". Find a sponsor,
Frank. You worry about things of which you are impotent. Perhaps it is
why you are so hostile and angry all the time.

>which means you have a legal and direct

>course of action to try and change any law you
>think is unfair.

It's a non-issue with myself. It's so mundane, a law that is never
enforced isn't worth the bother you suggest.

>That is a right which goes above and beyond

>all the other rights that you are guaranteed to

>insure that the government remains a

>democracy.

We are not a democracy, we are a republic.

>Call it whatever you want,

I called it what it is. *You* called it whatever you wanted.

> but the fact remains that the people are in

>control of the government

I am glad you are recalling basic grammar school civics, Frank.

>(at least, they

>-would- be in control if they weren't so

>apathetic).

>But if the petition is denied, you -don't- have

>the right to ignore that law. And you -don't-

>have the right to selectively ignore any law just
>because you are a spoiled little child and are

>too lazy to follow the legal procedure for

>change.

I have the "right" to do anything I choose and if those who enforce the
law feel my acts are infringing on others or breaking the law, the law
has the right to make me accountable. If experiencing pain over cbers
talking dx is all you have to entertain and concern
yourself,,,,,congratulations.

>Oh yeah, I forgot you get your legal advice

>from the school of natural law,

You forgot? Well then, it should be of no consequence and incredibly
easy for you to tell the masses where you managed to recall this tidbit
from, if any place other than your own conjured delusions.

>where where 'civilization' is a conspiracy of the
>weak to opress those who would otherwise

>exercise their natural 'right' to rob them blind.

Wow, Frank,,watching that type rant and rave one would make the guess
you were humdinging on whiskey. too bad you aren't a happy drunk. You
folks who get mean when you drink are assh*les.

>So shouldn't you be busy thumbing your way

>to NY with your other anarchist buddies to

>crash a political convention? Or did you

> manage to save enough money to take the

>bus?

I'm not the one that posted to the group I was having financial problems
and couldn't afford bus or air fare..*you* did.

Yea,,,I'm hip to that factor...most of the time.

> Most tyrants just ain't human in

>my book, and they deserve the ass stomping

>that usually ensues.

I agree,,,but that was never the reason presented for debate to congress
on why to invade Iraq. Besides, we're going to be too busy losing troops
in Iran if Bush wins re-election to give a damn about those lost in
Iraq,,,,look how quick he forgot about BL and the promise he made to all
those families of the 911 attacks. Iran is no Iraq. We will not be
permitted to stroll into Tehran unobstructed as they did by virtual
comparison to Baghhad. Massive death is unavoidable in a war with Iran.
It will not be quick and easy. It will be shock and AWWWWWW (not awe).

Since 1976 we've been leeching off CBers with books, plans, and kits for
CB radio. Do-it-yourself repairs and modifications, amplifiers, FM
converters, bleedover filters, adding new frequencies, etc. are illegal
for CB according to the FCC but I, Lou Franklin, don't care! I will
teach you how to sleaze and weasel your way out of it with semantics
like "it's for 10-Meter Ham conversion" and "information is legal". Now
if I am teaching you how to be dishonest, how can you trust me, Lou
Franklin, to give you honest secrets of how to increase your power,
range, and privacy - even though its illegal? The answer is you cant ha
ha ha! Please visit our Web site, where you can download our unique
catalog of CB Radio Specialties and get encouragement to break FCC law,
or check out our most popular 'we dont care about legalities' schematics
(TriPower RF linear amp, Dynamic Speech Processor, FM3 circuit,
RogerBeep, etc.) and other CB technical articles at:
www.cbci
ntl.com
SAVE MONEY sort of! We regularly spam the CB newsgroups in order to suck
cash from bullible CBers. I also run EBAY auctions in which you can save
up to HALF the cost of my 300 percent markup CB books and accessories.
To see what's currently on sale, double-click the line below:
http://stores.ebay.com/id=2993436&ssPageName=L2
-
    You are in way over your head. You're lucky Lou is such a
nice guy. What you did clearly indicates an intentional and malicious
act by yourself to defame and malign his business and livelihood. In
addition, you violated the Digital Electronic Signature Act as defined
and placed into law by Congress because you attached his personal and
proper name to your fraudulent post in a manner to give the impression
it was he who wrote it concerning the business. If I were Lou, I would
give you the option to settle out of court.....one time. Then I
would contact my attorney and post his name on this group for additional
contributions of your behavior by others whose personal lives you have
attempted to malign. You could be in a heap of trouble boy, for sure.
_
It's a shame the poster was basically anonymous, so it would be very
difficult to ascertain just who actually posted it..... Dave
"Sandbagger"
_

Hello Dave, I thought you were going to reply to our last exhange of posts prior to begining another, so I will refresh the pertinent parameters of where we left off concerning your "spreading around personal information" and "calling my bluff" on your trip to Mickey Mouse.
The poster was by no means anonymous. To the uninitiated (concerning knowledge of anonymity relating to the internet) he may appear pseudo-anonymous on usenet, however, this specific person is not. Again, you display you haven't bothered to read user agreements (I addressed this once before with you) concerning one's anonymity and privacy. Go read google user agreement. Many networks don't bother to demand a subpoena and cooperate fully with law enforcement, especially when their user is abusing their network. Again, please read the terms of service regarding all aspects of your internet endeavors and please ask Phil Kane (or someone qualified that you trust) for a correct information on radio law and everything relating to the law of which you have been so incorrect, or you can merrily continue to make the same repeat mistakes that have become associated with your posts.

_
nothing for nothing twist but you yak to much.

_
You heard me, too? Man, every frequency I go to these days I'm being recognized. Amazing what height and water will do, ain't it? <g>

Iran will fold like a house of cards too. If we're smart we will
'Guantanamo Bay' both those ports. Put up a fence with keep the
hell out signs. Or they might say.."if you see us runnin, try to
keep up".

Free oil to the natives, except for the small tax that will rebuild
your infrastructure and make you a world player.

You'd let Iran make weapons grade uranium?

I'm sorry but I like my 2950. It may not have as pure of an output as some other radios, but I guaratee it's better than any CB. BTW, the 2950 has 100 Hz steps and an analog clarifier. There's no reason you can't talk to someone with a VFO. It also has CW. I paid just over $200 for mine brand new, not $500. I guess my biggest question is if you hate CB radios so much, what are you doing here?

Chris

| >
| >Isn't that what I just asked for? Another HF ham rig? The RCI-2970
| >was technically sold as a ham radio. I'm trying to find another 10
| >meter ham rig, with the aforementioned features, that can be modified
| >easily to cover at least 26.0-29.6999 TX/RX.
|
| No, what you asked for is another out of band modifiable radio that is a
| thinly disguised CB radio marketed to CBers as an "amateur" radio. You
want
| something like Copper sells, not the kinds of radios that AES, HRO, or any
of
| the other amateur radio dealers sell. The difference in quality is a dead
give
| away too. The RCI29XX radios have managed an uncomfortable crossover, but
are
| still considered extended range CB radios by any serious radio enthusiast.
|
| As an aside, a lot of radios are labeled as "amateur" radios because
| they are sold as (wink, wink) 10 meter radios. Hams wouldn't and don't buy
these
| radios, CBers do, and modify them (hell, most retailers sell an option to
have
| the radio modified for you by them) for extended operation. Most so called
10
| meter radios are sold as AM/FM only when you'd be hard pressed to find a
ham
| today that would use AM. Where is the popular CW mode that no respectful

amateur
| radio would be without? That and these are "channeled" radios and not
equipped
| with VFO tuning. 10KHz stepping is just ludicrous when trying to use SSB.
10 KHz
| steps severely limit the usefulness of the radio when you can not talk to
| someone using a VFO. FM is such a spectrum hog, that it is only used in
the
| uppermost portion of the 10 meter band, and usually for repeater use. SSB,
| specifically USB, is the mode of choice on 10 meters. And finally, you
would be
| hard pressed to find a ham dealer that sells these radios. You find them
at
| places like Copper that sell exclusively to CBers who are entrenched in
their
| inefficient, archaic AM mode, when clearly, SSB is a far superior mode
that
| delivers the most bang for the buck, and the greatest range.
|

I don't care what "user agreements" may say. There are ways to get
onto the internet and onto free news servers which do not require
identifying oneself. My very first internet connection was through a
school account which a whole lot of people "shared". How does anyone
identify an anonymous person who uses such unregulated access points?

>Go read google user agreement. Many networks don't bother to demand a
>subpoena and cooperate fully with law enforcement, especially when their

That's all well and good IF these ISP's know who the person is. Again,
I know of many ways to gain access to the internet without having to
reveal your true identity. Cable modems can be hacked, many places
offer WiFi open network access, many libraries, schools and even the
local Starbucks and Burger Kings offer public internet access. How do
you trace an anonymous user who uses these public portals to access
the internet?

Nothing old and cool like I expect yours is.

A 95 dodge Dakota sold as a 96 from Mopar performance. It's got a 318 with the Magnum RT mods all through, computer, bumpstick, roller everything, tri_Y headers, 5 speed, 3.90 locker, yadada, yadada.

I have modified the computer to allow me to make adjustments, tuned the suspension so it's not a burn out machine. put on a supercharger. updated the injectors and fuel pump. replaced the clutch with a centerforce gold, and driven the hell out of it.

It's now got 120K miles on it and has never failed to get me where I need to go in a very timely manner. All I've replaced out of necessity is the clutch and fuel pump (good op for upgrades). It was running low 12's in the quarter with street tires. I never took it out this year to the strip as this summer has been quite hectic :(It's a fun little truck, it's plane jane bright red, no fancy stickers that may suggest anything and has a single side exit 3" exaust (a must with the tri-Y's) pretty quiet but has a VERY unique tone. You would never know it will launch like a rocket at a stoplight, you get a fartpipe car next to you and it's hilarious to show them American torque out of a relitavely quiet plain pickup truck.

HOPEFULLY this winter I need to get some body work done from where I got rear ended by a light pole, and go through the engine. I know it's time for new valve springs and lifters. Compression seems OK on the cylinders but it probably wouldn't hurt to do a full rebuild, I may go a little crazy on the rebuild as I plan on getting a different daily driver, yall are going to shoot me but I think it's time for a VW as I have moved 20 miles away from work and them little buggers scream. I just cant get any 'ol import because I don't want every kid with a fart pipe dicking with me, haven't found anything American that turns me on for value and performance.

Whatcha got cookin Steveo? (other than headers). What are you building and when do you expect completion? Hopefully you don't live in the midwest or nort because it sounds like you will get it done just in time for winter :(

Chad

Sounds like a strong running truck, Chad.

I'm rebuilding the 440 in my 66 Pymouth Belvedere II since I
blew it up a couple months ago. It should produce something
in the range of 450-500 hp.

Here's a pic of it with my friend Mike.

http://www.geocities.com/picsrfun2003/mikeandthedere.jpg

I'm hoping to have it running again by the end of the month,
and yes I live in northern Ohio so weather plays a factor.

I only put around 2000 miles per year on it anyway. :)

Way cool! How's the frame flex on that drop top with that much torque? A friend of mine and I restored and updated a '68 442 convertible and when you stand on it the interior lights turn on from the flex in the door area :)

We injected this baby and anodized the fuel rails etc to match the orig olds gold color, you can't really tell unless you know what you are looking for. I highly reccommend injection, it's soooo tunable and smooth. if done right you can keep the original asthetics also.

It was fun modernizing an older car but yet keeping it true to to it's heritage. After the truck is done I would like to get an old gangsta phymouth to tinker with, after the recent move I have the garage space and I have always wanted one. I may fully modernize this one :)

The car looks great, you should be quite proud! Good luck on that 440, they are great motors, what did you do to pop the other one?

Chad

From: nojunk_n3cvj@ptd.net (Dave Hall)

>It's a shame the poster was basically

>anonymous, so it would be very difficult to

>ascertain just who actually posted it..... Dave

>"Sandbagger"

_
Hello Dave, I thought you were going to reply to our last exhange of posts prior to begining another, so I will refresh the pertinent parameters of where we left off concerning your "spreading around personal information" and "calling my bluff" on your trip to Mickey Mouse.

>Been busy. With the republican convention

>and such in the area, there were more

>pressing issues than newsgroup stuff.

You're an hour or more west of Philly in Pa.., the convention is in NY. Not many folks consider another state "in the area".
Nevertheless, you ignored the last questions posted to you and began new postings.

_
The poster was by no means anonymous. To the uninitiated (concerning knowledge of anonymity relating to the internet) he may appear pseudo-anonymous on usenet, however, this specific person is not.

>And you know this how?

Try and remain relevant and not concerned with my education and personal life.

_
Again,
you display you haven't bothered to read user agreements (I addressed this once before with you) concerning one's anonymity and privacy.

>I don't care what "user agreements" may say.

And that is why you fail to understand them and how they operate and need their operations explained,,because you admittedly don't care what they say, you fail to read them, which is a reason for your ignorance of their rules and the manner in whcih they operate..

>There are ways to get onto the internet and

>onto free news servers which do not require

>identifying oneself.

Try and remain relevant and try to not present arguments to yourself. No one said no identification isn't possible.

>My very first internet connection was through

> school account which a whole lot of people

>"shared". How does anyone identify an

>anonymous person who uses such

>unregulated access points?

It's not up to me to educate you on such things, but if you really haven't the foggiest clue how those hackers and virus creaters are caught, I suppose I can take a few minutes and explain to you in email how such things can occur. Of course, you can always do the homework yourself......if you need reference points in where to begin, I can assist with that dilemma of yours, also.

_
Go read google user agreement. Many networks don't bother to demand a subpoena and cooperate fully with law enforcement, especially when their user is abusing their network. Again, please read the terms of service regarding all aspects of your internet endeavors and please ask Phil Kane (or someone qualified that you trust) for a correct information on radio law and everything relating to the law of which you have been so incorrect, or you can merrily continue to make the same repeat mistakes that have become associated with your posts.

>That's all well and good IF these ISP's know

>who the person is.

It's all well and good regardless. Many free isp's you speak of aren't concerned with the identity of their users,,,UNLESS.

>Again, I know of many ways to gain access to

>the internet without having to reveal your true

>identity.

Again, please remain relevant. You have demonstrated exactly what you know and don't know, and the above statement has nothing to do with your google user.

>Cable modems can be hacked, many places

>offer WiFi open network access,

Correct,,read my piece on WIFI. this is old news. Once again, stop wandering and try and remain relevant and on subject. Google and AOL isn't WIFI OR cable.

>many

>libraries, schools and even the local Starbucks
>and Burger Kings offer public internet access.

>How do you trace an anonymous user who

>uses these public portals to access the

>internet?

Once again, it;s not up to me to educate you on areas in which you lack knowledge, but I wil assist you in broadening your intellect in this area if you are that obsessed with truly hiding your identity when posting to usenet.

Maybe Frances will make some strange conditions to let my crapy rig get out this weekend. I'll be tryin' 38L tonight, tmrw night, Sun night and possibly Mon night between 1700 and 2100 est.

Maybe I'll at least hear some of you out there if I can't talk to ya. My radio is still drifting (haven't had a chance to look it over) so if I shout out, I'll almost surly be slightly off freq.

-Dr.X (on the sand pile, waiting for the hurricane party to start).

Yep, those unibodys will twist like a pretzel and ruin the body if
you're not careful. I have mine pretty well frame tied to prevent
most of that.

Thanks, Chad. I spun a bearing in the old 440 and tore it up pretty
good. I think it was a cumulative thing from years of pounding! <g>

>those ports. Put up a fence with keep the hell

>out signs. Or they might say.."if you see us

>runnin, try to keep up".

> Free oil to the natives, except for the small

>tax that will rebuild your infrastructure and

>make you a world player.

Like the oil in Iraq that was supposed to pay for itself (the war) and
bring us lower gas prices....

>You'd let Iran make weapons grade uranium?

This is extremely important. Many are permitting the Bush administration
to pull a fast one here. If you read what is taking place in Iran
regarding this matter, they indeed are in compliance with UN directives
concerning the manner in whcih they are enriching their thirty-some tons
of uranium. The manner in whcih they are operating is well indeed the
agreement. The Bush administration is now reniguing on what the world
and UN accepts as acceptable. Basically, the Bush admin needs another
manufactured reason for war (to take away from the failed invasion of
Iraq (no wmds were found, THAT was the reason for war) and its problems)
and is now saying that although Iran is currently in compliance, the
POSSIBILITY exists that they COULD use the uranium for weapon production
In other words,,here we go again with the Bush parlor tricks.

Now that ought to be rockin' indeed. I didn't know the dude was a
minister now. Does he still jam or what's the story? When Charlie
Daniels took to preaching, his music and live shows suffered greatly.
Weird.

_
Nope, unfortunately Furay hung up his touring boots when he got
religion.

_
If this was back in the day, I would ask what album is on your
turntable. So, in earnest effort to appear with the times,,what is in
your CD/tape player/Ipod/whatever at this moment?
-
I have all except 8-track and reel to reel. Whatcha' offering? :)

_
I need to update, no reel-to-reel :)
I was asking what you were listening to.......as soon as I can get one
of the kids to stop by and teach me about music on the internet and
swapping files, who knows where this technological leap may lead me? I
may end up with a new way to access the group on one of those new
fangled gadgets y'all call a pc.

_
That would be a very smart move. Hell you could of bought two of them by
now, from the $$$ you've sent MSN. Dial up can be had for $10 a month
now.
But if you wanna do it right, go broadband. :)

_
The webtv was a freebie, as was the service.

>
> You're an hour or more west of Philly in Pa.., the convention is in NY.
>Not many folks consider another state "in the area".

Not geographically, but there are other related activities. I'm doing
my part to make sure we see 4 more years of Bush..... Pennsylvania,
was once considered a slam dunk for Kerry. Not so true now. Once us
country and suburban folk take our population clout and override the
blind ignoramuses who live in the cities, the state will swing solidly
into the Bush camp.

>Nevertheless, you ignored the last questions posted to you and began new
>postings.

If you don't check in for a while the posts get purged.

>The poster was by no means anonymous. To the uninitiated (concerning
>knowledge of anonymity relating to the internet) he may appear

>pseudo-anonymous on usenet, however, this specific person is not.
>
>>And you know this how?
>
>
>Try and remain relevant and not concerned with my education and personal
>life.
>

It is relevant. You made a statement. I questioned your ability to
know the specifics. Please be so kind as to elaborate on how you know
that this particular poster is not anonymous.

>Again,
>you display you haven't bothered to read user agreements (I addressed
>this once before with you) concerning one's anonymity and privacy.
>
>>I don't care what "user agreements" may say.
>
>
>And that is why you fail to understand them and how they operate and
>need their operations explained,,because you admittedly don't care what
>they say, you fail to read them, which is a reason for your ignorance of
>their rules and the manner in whcih they operate..

I didn't say I don't understand them, I said that I don't care what
they say. I don't care because user agreements are not relevant in
this case. What IS relevant is that anyone who wants to remain
anonymous for the purpose of maligning someone or otherwise being
disruptive, can do so, as relatively easily.

>>There are ways to get onto the internet and
>>onto free news servers which do not require
>>identifying oneself.
>
>
>Try and remain relevant and try to not present arguments to yourself. No
>one said no identification isn't possible.

Double negative?

You implied that even though a person may hide their identification,
to people on USENET, that the ISP's would know who they were. I
countered that this is not necessarily true. THAT is relevant.

>>My very first internet connection was through
>> school account which a whole lot of people
>>"shared". How does anyone identify an
>>anonymous person who uses such
>>unregulated access points?
>
>

>
>
>It's not up to me to educate you on such things,

A wise move, since you clearly don't understand the magnitude of the
issue.

> but if you really
>haven't the foggiest clue how those hackers and virus creaters are
>caught, I suppose I can take a few minutes and explain to you in email
>how such things can occur.

I already know how these people are caught. The same way that many
other sociopaths get caught. They can't keep their "deeds" to
themselves. Part of their anti-social and narcissistic personality
disorders compel these types of people to "share" their "big"
accomplishments with other people, in order to gain some warped
respect or admiration, or at the very least, outlaw notoriety. When
they finally succumb to this malady, they sign their own demise, as
all it takes is one person to dial the FBI to bring him down.

> Of course, you can always do the homework
>yourself......if you need reference points in where to begin, I can
>assist with that dilemma of yours, also.

You have no idea of just how much I do know about this subject.

_
>Go read google user agreement. Many networks don't bother to demand a
>subpoena and cooperate fully with law enforcement, especially when their
>user is abusing their network. Again, please read the terms of service
>regarding all aspects of your internet endeavors and please ask Phil
>Kane (or someone qualified that you trust) for a correct information on
>radio law and everything relating to the law of which you have been so
>incorrect, or you can merrily continue to make the same repeat mistakes
>that have become associated with your posts.
>
>
>>That's all well and good IF these ISP's know
>>who the person is.
>
>
>It's all well and good regardless. Many free isp's you speak of aren't
>concerned with the identity of their users,,,UNLESS.

Unless what? By then it's too late.

>>Again, I know of many ways to gain access to
>>the internet without having to reveal your true
>>identity.
>
>
>Again, please remain relevant.

I AM remaining relevant. Perhaps you need to examine your own
relevance?

> You have demonstrated exactly what you
>know and don't know, and the above statement has nothing to do with your
>google user.

It has everything to do with someone looking to malign someone over
the internet. Google isn't an ISP. They are an information archive,
and they offer news access. Anyone can use google and they can
represent themselves as anyone they wish, as I'm sure you are well
aware.

>>Cable modems can be hacked, many places
>>offer WiFi open network access,

>Correct,,read my piece on WIFI. this is old news.

Your "piece"? What piece? What, is our favorite WebTV user now an
expert on WiFi? I didn't know WebTV supported 802.11.

>Once again, stop wandering and try and remain relevant and on subject.

My name isn't John Kerry. I am not wandering.

Google and AOL isn't WIFI OR cable.

No, but those who get onto the internet through less than direct means
can avail themselves of these services.

How many "free" AOL disks are there? How hard would it be to fake a
name to gain a free month of AOL?

>>many
>>libraries, schools and even the local Starbucks
>>and Burger Kings offer public internet access.
>>How do you trace an anonymous user who
>>uses these public portals to access the
>>internet?
>
>
>Once again, it;s not up to me to educate you

This is your catch-all phrase when you either are unwilling or unable
to address the issue or question posed. In other words, you don't
know, and have no answer to this obvious issue.

> on areas in which you lack knowledge,

I am fully aware of the tricks that people use to gain internet
access. Perhaps you should read a bit into it yourself so that you
wouldn't make such ridiculous statements about no one being able to
hide behind their "user agreements".

3223. VOODOO CB & ILLEGAL MODIFICATION BOOKS AT 40% OFF

Newsgroup: rec.radio.cb
Date: 2004-09-03 18:18:18 UTC
From: iamnotgeorge2004@yahoo.com
Message-ID: <c034bd2.0409031018.67f1b389@posting.google.com>
Source record: 186083

To learn the technical hype about CB Radio without all the TRUTH from people who are just plain educated, check out the following books from CBC International. Yes thats right dont go to the library and look up an electronic theory book, thats too hard. Dont borrow an ARRL handbook, thats too difficult. your too stupid to understand REAL books. Instead buy MY books, they are full of rumor, voodoo, old wives tales etc. just right for an ignorant ass CBer like YOU!

To see exactly what these books look like, plus all the specific, chapter-by-chapter details, see our Web at:

www.cbcintl.com

Some of the books included are:

BOOK #1: THE "SCREWDRIVER & PICK AXE EXPERT'S" GUIDE To Peaking Out , Blowing Out, Screwing Up, and Wrecking CB Radios. List $25. The most popular "big dummy's" guide ever published on do-it-yourself CB modifications. By the way it is illegal to mess with your CB radio so if these mods dont work you cant even hold me responsible, ha ha HA!

BOOK #2: THE CB SNIP N' CLIP BOOK. List $20. The only complete reference source on CB PLL synthesizer circuits ever published! Detailed PLL theory explained in layman's terms because we know you are too dumb for the real terms. How they work, and how to modify them for many more channels so your ass will be all over the spectrum.

BOOK #3: TRYING TO UNDERSTAND CB RADIOS. List $42. Giant 370-page technical book for the professional idiot. Picks up where the "SCREWDRIVER & PICK AXE EXPERT'S" GUIDE leaves off (it leaves of at page 1 ha ha ha). Includes circuit descriptions & troublemaking guide for 23- & 40-Ch., crystal & PLL, solid-state & tube, AM, FM, SSB, CW, American & export models. This is "must" reading for any dumbass truck stop CB technician!

****
Who are we? Since 1976, we've been THE sleaziest ham exploiting the stupidity of CBers by selling them screwed up technical information & illegal accessories. Do-it-yourself repairs and modifications are illegal on CB so I will use the lame excuse that they are 10-Meter Ham conversions ha ha ha LOL. Secrets of how to increase power, range, and privacy and lengthen your penis up to 1/2"!

3224. Bahama Report on Hurricane Frances

Newsgroup: rec.radio.cb
Date: 2004-09-03 19:13:49 UTC
From: twistedhed@webtv.net
Message-ID: <19656-4138C26D-46@storefull-3251.bay.webtv.net>
Source record: 186084

I talked to an op in Freeport a short time ago. He said Frances was not as bad as they thought. While damage occurred, it was not that heavy and at this time they are reporting only a single death.
Also, check out the Hurricane Watch Net on 14.325 MHZ. Latest reports has the storm missing most of southern Florida. The eye is diminished and at times the wall is open. Intensity is expected to change over the next 24 hours.

anonymous, so it would be very difficult to
ascertain just who actually posted it..... Dave
"Sandbagger"

_
Hello Dave, I thought you were going to reply to our last exhange of
posts prior to begining another, so I will refresh the pertinent
parameters of where we left off concerning your "spreading around
personal information" and "calling my bluff" on your trip to Mickey
Mouse.

>Been busy. With the republican convention

>and such in the area, there were more

>pressing issues than newsgroup stuff.

  You're an hour or more west of Philly in Pa.., the convention is
in NY. Not many folks consider another state "in the area".

>Not geographically,

So go ahead and redefine what you actually meant when you said "in the
area" since you weren't geographically speaking.

>but there are other related activities.

See previous statement.

>I'm doing my part to make sure we see 4 more
>years of Bush.

Bully for you. You should have about four more months to enjoy your
activities.

>.... Pennsylvania, was once considered a slam
>dunk for Kerry. Not so true now. Once us

>country and suburban folk take our population

>clout and override the blind ignoramuses who

>live in the cities, the state will swing solidly into
>the Bush camp.

Nevertheless, you ignored the last questions posted to you and began new postings.

>If you don't check in for a while the posts get

>purged.

Your past posting contradicts this claim.

_
The poster was by no means anonymous. To
the uninitiated (concerning knowledge of anonymity relating to the internet) he may appear pseudo-anonymous on usenet,
however, this specific person is not.

>And you know this how?

Try and remain relevant and not concerned with my education and personal life.

>It is relevant. You made a statement. I

>questioned your ability to know the specifics.

My ability has nothing to do with the claim.

>Please be so kind as to elaborate on how you

>know that this particular poster is not

>anonymous.

Again,
you display you haven't bothered to read user agreements (I addressed this once before with you) concerning one's anonymity and privacy.

>I don't care what "user agreements" may say.

And that is why you fail to understand them and how they operate and need their operations explained,,because you admittedly don't care what they say, you fail to read them, which is a reason for your ignorance of their rules and the manner in whcih they operate..

>I didn't say I don't understand them,

How can you understand something you don;t read? You have displayed you have not read the terms of service and user information regarding isp's as if you did, you wouldn't have needed me to explain to you that these isp's (and security experts) all caution against posting personal information on the internet, such as your name.

>I said that I don't care what they say. I don't

>care because user agreements are not

>relevant in this case. What IS relevant is that

>anyone who wants to remain anonymous for

>the purpose of maligning someone or

>otherwise being disruptive, can do so, as

>relatively easily.

>There are ways to get onto the internet and

>onto free news servers which do not require

>identifying oneself.

Try and remain relevant and try to not present arguments to yourself. No one said no identification isn't possible.

>Double negative?

No,,try and follow. No one (as in no persons) have claimed that "no identifcation" is not possible via accessing the internet. Yet, you are presenting a self-directed argument as if that is exactly what one has done.

>You implied that even though a person may

>hide their identification, to people on USENET,

> that the ISP's would know who they were. I

>countered that this is not necessarily true.

>THAT is relevant.

That's not what occurred at all. *You* claimed your google posting Geogre was anonymous, in fact, it was *I* that countered such isn't true and off you went. I presented several examples of non-anonymity regarding accessing usenet (such as google) and because you fail to understand and comprehend why such services are not anonymous and refuse to read their terms of service and user agreements, demand I explain them to you.
Try not to lie about what occurred, Dave. It's not necessary.

>My very first internet connection was through

>school account which a whole lot of people

>"shared". How does anyone identify an

>anonymous person who uses such

>unregulated access points?

It's not up to me to educate you on such things,

>A wise move, since you clearly don't

>understand the magnitude of the issue.

A very wise move, taking into consideration you have spoke of "spreading around" any personal information you may find on one. For you to think I would teach you how to remain anonymous after you make such idle threats illustrates the issues of which you suffer.

_
but if you really
haven't the foggiest clue how those hackers and virus creaters are caught, I suppose I can take a few minutes and explain to you in email how such things can occur.

>I already know how these people are caught.

>The same way that many other sociopaths get
>caught. They can't keep their "deeds" to

>themselves. Part of their anti-social and

>narcissistic personality disorders compel these
>types of people to "share" their "big"

>accomplishments with other people, in order

>to gain some warped respect or admiration, or
>at the very least, outlaw notoriety. When they

>finally succumb to this malady, they sign their

>own demise, as all it takes is one person to

>dial the FBI to bring him down.

A nice conjured fantasy, but nowhere near the truth. Begin your search with Captain America and his hacking of HBO in the eighties. From there you can perform a process of elimination and check the factors which lead to the prosectution of each up to the present.
If you have even the remotest clue of what you speak, I don't have to explain to you anything more, as you already realize you're as incorrect now as you were in claiming dx was a felony and echo was illegal on cb.

_
 Of course, you can always do the homework yourself......if you need reference points in where to begin, I can assist with that dilemma of yours, also.

>You have no idea of just how much I do know

>about this subject.

You have left no doubt.

_

Go read google user agreement. Many networks don't bother to demand a subpoena and cooperate fully with law enforcement, especially when their user is abusing their network. Again, please read the terms of service regarding all aspects of your internet endeavors and please ask Phil

Kane (or someone qualified that you trust) for a correct information on radio law and everything relating to the law of which you have been so incorrect, or you can merrily continue to make the same repeat mistakes that have become associated with your posts.

>That's all well and good IF these ISP's know

>who the person is.

It's all well and good regardless. Many free isp's you speak of aren't concerned with the identity of their users,,,UNLESS.

>Unless what? By then it's too late.

Unless a problem occurs.

>Again, I know of many ways to gain access to

>the internet without having to reveal your true

>identity.

Again, please remain relevant.

>I AM remaining relevant. Perhaps you need to

>examine your own relevance?

Again, Dave, for crying out loud, no one has claimed it was impossible to access the internet and be completely anonymous.

_
You have demonstrated exactly what you
know and don't know, and the above statement has nothing to do with your google user.

>It has everything to do with someone looking

>to malign someone over the internet.

Not what you claimed. You claimed the google/aol user was anonymous and I educated you to the point where you are now changing your subject.

> Google isn't an ISP. They are an information

>archive, and they offer news access. Anyone

>can use google and they can represent

>themselves as anyone they wish, as I'm sure

>you are well aware.

Your claim was Geogre was anonymous. He's not.

>Cable modems can be hacked, many places

>offer WiFi open network access,

Correct,,read my piece on WIFI. this is old news.

>Your "piece"?

Changing subject now has you stuttering?

>What piece?

Wifi.

> What, is our

Are you preofessing to collectively speak for a certain faction when utilizing "we", Dave? Who might this faction be?

>favorite WebTV user now an expert on WiFi?

Your allow your definitions to continually be rededfined (such as the term "liberal") by others, so I have no interest in your interpretation of what you hold as "expert". After all, many would old an Extra as an expert in radio and related subjects, but you have disproven this definition when applying to yourself with your knowledge of radio law.

>I didn't know WebTV supported 802.11.

You probably also didn't know the linears being used for this frequency to boost wifi is near the same frequency as a microwave, either, but no one will hold that against you, either.

_
Once again, stop wandering and try and remain relevant and on subject.

>My name isn't John Kerry. I am not wandering.

Sure you are. You said your google boy Geogre was anonymous, I said he wasn't, you demanded I teach you how I know he isn't anonymous instead of reading google and like user agreements and tos' for yourself. When you realized you were wrong, you begin speaking of maligning one on the internet (many feel the intentional spreading of personal information would constitute "maligning", Dave, so think about your idle threat to do so before crying hypocritically about maliging one on the net) and debating yourself over the definition of what you hold as "expert".

_
Google and AOL isn't WIFI OR cable.

>>No, but those who get onto the internet

>through less than direct means can avail

>themselves of these services.

Do try and remain connected to your original incorrect claim regarding our favorite red-headed.posting step-bastard.

>How many "free" AOL disks are there? How

>hard would it be to fake a name to gain a free

>month of AOL?

>many

>libraries, schools and even the local Starbucks
>and Burger Kings offer public internet access.

Still hellbent on debating yourself.....

>How do you trace an anonymous user who

>uses these public portals to access the

>internet?

Once again, it;s not up to me to educate you

>This is your catch-all phrase when you either

>are unwilling or unable to address the issue or
>question posed. In other words, you don't

>know, and have no answer to this obvious

>issue.

You have yet to remain on a single issue. I am completely satisfied with my addressing your issues. It has resuted in your education that dx is not a felony, breaking cb rules you speak of is not criminal but civil, and echo being legal on cb, all of which you claimed the opposite.

–

>I am fully aware of the tricks that people use to
>gain internet access.

It wouldn't appear so by your posts. No one took issue with the notion, yet you posted examples of what you incorrectly felt was being contested.

>Perhaps you should read

>a bit into it yourself so that you wouldn't make

>such ridiculous statements about no one being
>able to hide behind their "user agreements".

>Dave

>N3CVJ

>"Sandbagger"

I said no such thing.

Wifi.

> What, is our

Are you preofessing to collectively speak for a certain faction when utilizing "we", Dave? Who might this faction be?

>favorite WebTV user now an expert on WiFi?

Your allow your definitions to continually be rededfined (such as the term "liberal") by others, so I have no interest in your interpretation of what you hold as "expert". After all, many would old an Extra as an expert in radio and related subjects, but you have disproven this definition when applying to yourself with your knowledge of radio law.

>I didn't know WebTV supported 802.11.

You probably also didn't know the linears being used for this frequency to boost wifi is near the same frequency as a microwave, either, but no one will hold that against you, either.

_
Once again, stop wandering and try and remain relevant and on subject.

>My name isn't John Kerry. I am not wandering.

Sure you are. You said your google boy Geogre was anonymous, I said he wasn't, you demanded I teach you how I know he isn't anonymous instead of reading google and like user agreements and tos' for yourself. When you realized you were wrong, you begin speaking of maligning one on the internet (many feel the intentional spreading of personal information would constitute "maligning", Dave, so think about your idle threat to do so before crying hypocritically about maliging one on the net) and debating yourself over the definition of what you hold as "expert".

_
Google and AOL isn't WIFI OR cable.

>>No, but those who get onto the internet

>through less than direct means can avail

>themselves of these services.

Do try and remain connected to your original incorrect claim regarding our favorite red-headed.posting step-bastard.

>How many "free" AOL disks are there? How

>hard would it be to fake a name to gain a free

>month of AOL?

>many

>libraries, schools and even the local Starbucks
>and Burger Kings offer public internet access.

Still hellbent on debating yourself.....

>How do you trace an anonymous user who

>uses these public portals to access the

>internet?

Once again, it;s not up to me to educate you

>This is your catch-all phrase when you either

>are unwilling or unable to address the issue or
>question posed. In other words, you don't

>know, and have no answer to this obvious

>issue.

You have yet to remain on a single issue. I am completely satisfied with my addressing your issues. It has resuted in your education that dx is not a felony, breaking cb rules you speak of is not criminal but civil, and echo being legal on cb, all of which you claimed the opposite.

–

>I am fully aware of the tricks that people use to
>gain internet access.

It wouldn't appear so by your posts. No one took issue with the notion, yet you posted examples of what you incorrectly felt was being contested.

>Perhaps you should read

>a bit into it yourself so that you wouldn't make

>such ridiculous statements about no one being
>able to hide behind their "user agreements".

>Dave

>N3CVJ

>"Sandbagger"

I said no such thing.

Afraid you may be right. It didn't happen with code free
VHF. We'll need better advertising of ham radio in the
electronics press, and various radio rags. (even CB, eeeeK!)
I'm an ex-CBer from 1976. Decided I liked 2 way radio enough
to step up to a ham license.

Mention that the prospective ham should visit several ham
clubs to find one he feels comfortable with.

I also disagree. It wasn't long ago that the horribly opressive US
puppet government under the Shah was overthrown, and that memory is
still fresh in their memories. If the US invades Iran you will see
huge battles fought by old men, women and children; and you can bet
that they will throw everything they have at us.

>manufactured reason for war (to take away from the failed invasion of
>Iraq (no wmds were found, THAT was the reason for war)

That was the -excuse- for war. There may have indeed been chemical and
bio weapons, but the US "intelligence" didn't have a clue where they
were, and were quickly shuttled out of the country long before the
invasion. The main reason we went into Iraq is now clear -- the
failing health of Saddam. Once his iron fist was gone there would be a
struggle for power between his cronies two sons, resulting in a civil
war between at least three major factions, totally destabilizing the
country for decades and leaving it open for influence/invasion from
disgruntled contries like Iran and Jordan. If that happened the US/UK
based Shell corporation would be no more, and the only major oil-rich
country friendly to the US would be Saudi-Arabia, which is currently
on the verge of civil war.

Despite the deception, I find it reprehensible that Bush and the UN
are not taking a more active stance in the situation in Sudan. It's
clear that oil is more important than genocide.

Heah Twisted:

That 14.325 MHz USB frequency, is kind of a disapointment. They ask for stations in the effected areas for current weather condations. And if any one whats to check in?!?!?!?!?

There must be a few more frequencies out there for us to listen in on.

Jay in the Mojave

I guess I missed ya Twist. I caught Eagle One out of Arizona (who promptly told me I was off freq;) and heard Triple 7 (local op) talkin' to LA with no problem. I usually get north/south skip, so I consider east/west as unusual and attribute it to the weather. I expect it to stay this way for a little while. At least while Francis is in town. Maybe I better get that radio on frequency before we lose the conditions and have to wait for the next hurricane.

Amateur Radio Newsline™ Report 1412 September 3, 2004

The following is a message from the Amateur Radio Newsline Support Fund. Here's the funds administrator, Andy Jarema, N6TCQ.

--

Well, here I am again, so theres obviously another financial crisis that Amateur Radio Newsline is facing. And this time its a real doozie. Let me explain it to you.

During the summer many of you are away and donations dwindle to a mere trickle. At the same time, some of our biggest yearly expenses occur during July and August. This includes the Young Ham of the Year Award presentation that we host every year in Huntsville, Alabama. While we had planned ahead, we did not know exactly how much we would need and we were caught short. The price of airfares was up as was the cost of hosting the mini banquet for our recipient, her family and friends.

Added to that were higher than anticipated telephone costs to cover the breaking news stories we brought you over the summer. And right now that leaves us with less than $50 in the bank and several hundred dollars in outstanding bills that must be paid right now to keep Amateur Radio Newsline coming your way.

As we have said before, Amateur Radio Newsline is a federally charted 501(C)(3) and California state not-for-profit corporation. For most United States residents it means that your donation is tax deductible.

So please help keep the news on your local net, on your repeater and on your computer by making a donation to the Amateur Radio Newsline Support Fund. Its address is Post Office Box 660937, Arcadia, California. The zipcode is 91066.

Again that's the Amateur Radio Newsline Support Fund at Post Office
Box 660937, Arcadia, California, 91066.

On behalf of the entire all volunteer world-wide Amateur Radio Newsline team, I thank you for listening to this appeal and for your ongoing support that keeps the news of Amateur Radio coming your way.

I'm Andy Jarema, N6TCQ. Now Amateur Radio Newsline report 1412.

--

Thanks Andy. Now Amateur Radio Newsline report number 1412 with a release date of Friday, September 3rd, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. The ARRL bandwidth based restructuring proposal causes controversy and maybe some reconsideration. Find out more on Amateur Radio Newsline report number 1412 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: REACTING TO THE ARRL BANDWIDTH PROPOSAL

An ARRL proposal to restructure Amateur Radio along bandwidth lines has caused a lot of discussion in the nations ham community. And it may cause the League to rethink its position. Amateur Radio Newsline's Mark Abramowicz, NT3V, is in Philadelphia, and has the rest of the story:

--

Shortly after the ARRL began circulating the proposal and posted it on its website, the e-mails, phone calls, HF, VHF, and digital-mode traffic took off.

And now, Amateur Radio Newsline has learned the bandwidth proposal may be tabled for more study when the ARRL's executive committee meets next month.

That confirmation comes from W6OBB in Nevada. If the call sign isn't familiar, the name behind it might be. He's Art Bell, host of the weekend edition of "Coast to Coast AM" heard on more than 500 commercial radio stations across the nation.

Bell, who joined the fight against Broadband Over Powerlines several months ago, and featured the subject on his radio program, expressed concern about what he called a Draconian proposal that would over-regulate the ham bands. Bell tells me he relayed that concern in a phone call to ARRL President Jim Haynie W5JBP.

Bell characterizes the discussion as cordial and at the end, he says Haynie related he was re-evaluating the proposal based on many comments he had received.

"He indicated to me and told me I could pass on to you that they're looking into pulling this whole thing back and taking a harder look at it," Bell says.

While Bell says he believes the ARRL had good intentions with the proposal, it may have gone too far.

"What began as an examination by the League of how we could possibly encourage the digital mode, it went a little too far and began to over-regulate," Bell says. "I'd kind of like to see it go the other way and I'd like to see our bands freed up."

Haynie says he's gotten a lot of feedback on the proposal. He says it came from the League's desire to promote - not restrict - innovation and experimentation. He says it was also a response the Federal Communications Commission's desire to see more innovation from the ham community.

"I think we rose to the challenge," Haynie says. "We have demonstrated Software Defined Radio that just knocked their socks off, in my view.

"We have come up with some other stuff - Joe Taylor and some of his things for moon bounce. And I think the Amateur Radio community needed a wake-up call is what they needed and I think that's what we've gotten and were given."

Haynie says it's clear the digital modes like RTTY and PSK 31 need attention.

"Where do we want to go to the future?" Haynie asks. "And, as I mentioned a couple of years ago, I took my model 28ASR and took it to the scrap man. But that's the standard that's used today is 850Hz shift at 45 baud.

"Well, we don't do too much of that. I'm not saying there's not RTTY enthusiasts out there, there are and I appreciate that and I know that and I want to protect their rights to do those things."

Art Bell says he and others don't object to digital innovation. But he doesn't think the proposal hits the mark.

"There are many with differing interests who are not too pleased with the proposal and, on the face of it, it simply does not make sense," Bell says. "I agree that we should encourage the digital modes and development, but we shouldn't try to push something into place that is not techincally ready to happen yet."

Restricting bandwidth, Bell says, won't promote innovation.

"Why do we have to cut and slice and dice and regulate," Bell says. Why not just let anybody virtually go anywhere and let all of us just live together with some gentlemen's agreements which we have now and which work very, very well on most bands?

"So with that in mind, look at the Canadians. The Canadians have a 6khz limit and they can go anywhere on the band they want from the bottom to the top. And I don't see why that would not apply and work well in America."

Haynie says he wants to hear more from hams and he's encouraging all of us to get into the FCC's Part 97 rules and share input on the proposal at the ARRL's website, that's ARRL-dot-org.

"Look at the rule book and see what's there now, "Haynie says. "And, is there something that could be changed that would allow a new technology to be developed, then that's what we want to know."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

More on the ARRL proposal and reaction to it in upcoming Amateur Radio Newsline reports. (ARNewsline(tm))

**

RESTRUCTURING: DROPPING CW TESTING IN CANADA

Meantime, to the north, another form of restructuring proposal is being considered by hams in Canada. This as telecommunications regulator Industry Canada publishes a Gazette Notice called "Recommendations from Radio Amateurs of Canada to Industry Canada Concerning Morse Code and Related Matters".

The Radio Amateurs of Canada proposal deals with the WRC-2003 decisions concerning Morse as a compulsory qualification for High Frequency operation in the Amateur Service. Radio Amateurs of Canada has recommended that Industry Canada delete the mandatory aspect of the requirement for Morse testing but leave it as a voluntary qualification. This, because knowledge of code may be required for reciprocal operation in those countries retaining a Morse requirement.

The notice was published on Saturday, August 28th and gives Canadian radio amateurs sixty days in which to respond. Radio Amateurs of Canada recommends that the nations ham community endorse this proposal. (RAC)

ENFORCEMENT: 10 METER INTRUDER WARNED

Here in the United States a commercial business has been warned to stay of the 10 meter ham band. The FCC's Daryl Duckworth, N-N-Zero-
W, explains:

--

Duckworth:"Dandy Service Corporation of Warrendale, Pennsylvania, was
issued a warning notice fot unlicensed radio operations on 28.085 Mhz. Two of their vehicles were the source of transmissions on August 5th of this year in Michigan on Interstate 94 at mile-marker 262."

--

Dandy Service was told to advise its drivers that operation of radio transmitting equipment without a license is a violation of the Communications Act of 1934. That it could subject the operator to fine or imprisonment, as well as an seizure of any non-certified radio transmitting equipment. Monetary forfeitures normally range

from $7,500 to $10,000. (FCC, RAIN)

THE BPL FIGHT: IT MAY BE COMING TO SO. CAL.

A heads up warning to hams living in the California counties of Los Angeles, San Diego and Riverside. According to ARRL officials in the Southwestern Division, Broadband over Powerline may be coming your way.

Writing in the latest issue of the division electronic newsletter, Director Art Goddard, W-6-X-D, and Vice Director Tuck Miller, N-ed-6-T, say that power companies in these areas may be considering BPL as a new business venture. The two officials add that the regions Amateur community needs to work together to see if they can head off these B-P-L flirtations before they become entrenched on the ham radio bands.

The report goes on to say that local ARRL Section Managers are already on top of the situation. The S-M's are reportedly forming Local Action Teams to work on all levels in handling the B-P-L threat to the area. (ARRL Southweestern Divisioon Communicator)

**

OPERATIONAL NEWS: TO PL OR NOT TO PL - THATS THE SERA QUESTION

Repeaters in eight states and the hams that operate through them may soon face mandatory use of continuous tone coded squelch. Then again, they may not. Amateur Radio Newslines Gary Pearce, KN4AQ, is in Raleigh, North Carolina, trying to sort it all out:

--

SERA, the SouthEastern Repeater Association, ignitied a furious debate when its Board of Directors voted to require the use of tone as a condition for frequency coordination for all repeaters in its territory. SERA is the frequency coordinating group for eight southeastern states: Georgia, Kentucky, Mississippi, North and South Carolina,| Tennessee, and parts of Virginia and West Virginia.

The SERA Board voted at its June meeting that some form of tone access will be a condition of coordination for all new repeaters effective immediately. Existing repeaters will need to adopt tone

within two years, by July 2006. The board was acting on a motion by Steve Grantham AA5SG, the Director from Mississippi. The goal of the policy was to reduce the number of complaints that SERA coordinators receive from repeater owners whose carrier access repeaters are keyed up by users of a co-channel neighbor.

In discussion at the meeting, the new policy was softened some when coordinators asked if this meant that repeaters would be automatically decoordinated if they decided not to use tone. The answer, according to an article in SERA's magazine the Repeater Journal, was "no, but…" SERA would not entertain an interference
complaint from repeater owners who remained carrier access.

The debate began in earnest when the August issue of the Repeater Journal began arriving and the ARRL published a story about it on their web site. Repeater owners argued the merits of tone itself, along with complaints that SERA didn't poll its members, and non-member repeaters, before making the decision.

The decision may not be final, according to SERA President Roger Gregory W4WRG:

--

Gregory: I've received, and we have received a lot of comments pro
and con about this policy. And all I can say right now is that we're
taking a second look at it and it's not really written in stone at
this time as to what kind of decision we're going to make one way or
the other."

--

SERA's next Board meeting takes place in January, but the group can
reach an earlier decision at any time through an e-mail ballot.

Reporting for Newsline, this is Gary Pearce KN4AQ in Raleigh, North Carolina.

--

So will the hams in SERA coordinated states have to use tone access on every repeater? Right now, the answer seems up in the air. (KN4AQ, ARNewsline(tm))

**

HAM RADIO IN SPACE: ISS GOES CROSS-BAND REPEAT

Speaking of repeaters. there's a new cross-band F-M system in space
and its home is on the International Space Station. This, as the ARISS program announces that the amateur radio equipment aboard the orbiting outpost is now on the air in repeater mode.

The downlink frequency remains 145.80 MHz. The new uplink frequency is 437.80 MHz and all frequencies are subject to Doppler shifting.

ARISS leaders say that they realize that many hams will miss the packet station that the cross-band F-M voice repeater replaces. Burt the groups leaders say that the cross-band repeater will allow further experimentation of the ISS amateur radio system.

For further information on working satellites and adjusting for Doppler shift, please review Emily Clark's (W0EEC) excellent presentation on AMSAT's website, http://www.amsat.org/amsat-new/information/faqs/Intro_sats.pdf (ARISS)

**

RADIO LAW: FCC ADOPTS RULES TO ENHANCE NETWORK OUTAGE REPORTING

Back on mother Earth in Washington, the Federal Communications Commission has adopted new rules requiring wireless, wireline, cable, and satellite telecommunications providers to report information about significant disruptions or outages to their systems to the Commission. The FCC says that these reports must be filed electronically. The Commission also ruled that all sensitive information collected as a result of these new rules will be protected from public disclosure. The full story is on-line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-250543A1.doc (FCC)

**

RADIO LAW: FCC REDEFINES DTV CONVERSION SCHEDULE

The FCC has also taken steps toward deciding exactly which channels broadcasters will end up with when they switch to digital television. By unanimous vote, the Commissioners have set up a timetable that will decide by June 2006 which channels people will tune in on to see their favorite programs. .

FCC chairman Michael Powell says that the vote signals that substantial progress has been made in switching television from its current analog transmission system to digital. He adds that the national dialogue has shifted from wondering if the DTV transition would ever end to exploring when it should end. (FCC)

**

RADIO LAW: CANADIAN GROUPS CHARGE THAT HD RADIO WILL HARM RECEPTION

Meantime, Canada charges that High Definition or Hi Fi digital Radio will harm reception of Canadian stations inside its own border. At least that's the headline from the August 30, 2004 edition of Inside
Radio.

According to the story that follows, both the Canadian Boadcasting Corporation and the Canadian Association of Broadcasters have asked the country's technical regulatory agency to protest iBiquity's In-Band On-Channel digital radio system. They allege harmful effects on current A-M reception, especially during nighttime hours. The whole story is on-line at http://tinyurl.com/6uubn and www.insideradio.com (CGC)

**

HAM AWARDS: THE RCC IS BACK AND ITS FREE

Some good news. The Rag Chewers Club or R-C-C award is back, but it will not be sponsored by the American Radio Relay League. Bill Pasternak, WA6ITF, has the details:

--

Its the Society for the Preservation of Amateur Radio -- better known by the acronym SPAR that will be sponsoring the new R-C-C. The group has announced that as of September 1st it will adnminister this fun award and will do so following the old ARRL rules.

According to SPAR, all a ham has to do to get an R-C-C is to present evidence of having had an actual one on one Q-S-O that lasted at least 30 minutes. The QSO can be made on any legal amateur frequency.

In early 2004 the ARRL announced it was discontinuing the Rag Chewers' Club Award due to a lack of interest. Conversations SPAR held with hams seemed to indicate that the lack of interest was due mainly to the cost of the award. So SPAR says that the award will be available free of charge to all licensed radio amateurs.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los
Angeles. Jim.

--

All certificates will be distributed by e-mail as Adobe P-D-F files that you can print and frame. The awards are numbered and endorseable by mode. Complete rules and an on-line application are on the SPAR website at www.spar-hams.org. (SPAR, QRZ.com)

**

NAMES IN THE NEWS: HAPPY 104 BIRTHDAY TO KJ6KQ

And less we forget, a belated birthday greeting goes out to Bill Diaper, KJ6KQ who turned 104 on August 12th. That's right, we

said
104, and probably making him the oldest living radio amateur in the United States, if not the world.

According to a posting on the Q-R-Zed dot com by Tom Ferguson, N6SSQ, website, Bill is a member of the Pacific Amateur Radio Guild and these days resides in the Masonic Homes in Union City, California. Tom says that there is a radio shack in the basement that Bill used up till a year ago but is very difficult for him to access now. That's because the station is in the basement next to the laundry room. Bill says it is dark and damp down there and must get assistance to get there and have someone tune and adjust the frequency on the rig for him.

N6SSQ adds that the Pacific Amateur Radio sent Bill a flurry of letters and cards on his birthday and that he was very pleased to get them. (QRZ.com)

HAM FAIR JAPAN ATTRACTS 30000 ATTENDEES

Turning to the ham radio social scene, Japan's largest hamfest, the JAIA Ham Fair, was held the weekend of August 21st and 22nd. The venue was Tokyo's Big Sight International Convention Center. Among
the highlights of gear being shown were Yaesu and Icom both showcasing their high end $10,000 H-F transceivers. Kenwood did not match in the super high end radio category but had a well attend ongoing demonstration of their ARCP-480 Radio Control Program.

But the manufacturers and dealers were only a small part of the show. Over 170 radio clubs also had booth space at the show. These ranged from large organizations like JAMSAT, the Japan Shortwave Club, and SEANET down to local organizations who use their booth for flea market sales.

Also present were a wide variety of organizations promoting every aspect of Amateur Radio. This included mountain-topping operators, microwave activity enthusiasts and antenna construction experimenters. Operations represented included facsimile, SSTV, ATV,

RTTY, 10M FM, 6 Meters, CW devotees, QRP, homebrewing, classic rigs, military surplus and even a contingent from the A-M community.

Ham Fair is Japan's largest annual gathering of radio amateurs from
the Pacific Rim. An estimated 25,000 to 30,000 attended this years event. (WIA News)

**

THE SOCIAL SCENE: WSWSS 2004 FALL CONFERENCE IN FRESNO CA

Back on this side of the Pacific, the Western States Weak Signal Society tenth annual VHF and UHF Conference takes place Saturday, October 9th. The venue is the M2 Antenna System Facility, at 4402 N. Selland Ave in Fresno, California. Registration starts at 8 AM with the conference program slated to begin at 9 AM. For more information write to David Peters, KI6FF, 14291 Middletown Lane, Westminster, California, 92683. You can also e-mail David to ki6ff@juno.com (VHF Reflector)

**

HAM RADIO BUSINESS: OAL NO LONGER REPPING DEM

In news from the ham radio business world, David Clingerman, W-6-O-A-L says over the V-H-F Reflector that his company known as the Olde Antenna Lab of Denver, Colorado is no longer representing Down East Microwave, Inc. Dave says to please refer your help questions, pricing information and orders directly to Down East Microwave in New Jersey. (VHF Reflector)

**

HAM RADIO NEAR SPACE: UK BALLOON LAUNCH LICENSED FOR SEPT. 12

G3ZHI reports that a license has been granted for a United Kingdom high altitude ham radio balloon flight. The project is now authorized for operation on 2.500 GHz on Sunday, September 12th. The license has special permission to operate at up to 50,000 feet instead of the usual flight ceiling of 2,000 or 5,000 feet.

The launch is scheduled to take place at about 1.30. Plans are still afoot to relay pictures via the new 13 centimeter GB3FT repeater if the system is completed and on the air in time for the flight. More information on this experiment as it becomes available. (G3ZHI)

**

WORLDBEAT - UK:: NEW RSGB ON -LINE

There's a new ham radio promotional video out and it has a definitely
British flair. And in an effort to help to promote amateur radio, the recently-created Essex Amateur Radio Club has started streaming

the new RSGB video "What is Amateur Radio" on the Internet.

The Essex group is providing it at speeds of 26 kb and 57 kb so it can be viewed by those using dial-up as well as broadband. If you want to take a peak it is available in cyberspace at www.essexamateurradio.org.uk (RSGB)

**

WORLDBEAT - NORWAY: HACKER DEFEATS AIRPORT EXPRESS

Meantime on the European mainland the same Norwegian hacker known for developing D-V-D encryption-cracking software has apparently struck again. This time his target is the security system that protects Apple Computer's wireless music streaming technology.

Jon Johansen has released a hacking system on his website that provides a key to unlock the encryption Apple uses for its AirPort Express. The unit lets users broadcast digital music from Apple's on-line iTunes Music Store on a stereo that's not plugged into an Apple computer. This permits other software applications from competitors to work with the proprioritary AirPort Express codec. Apple is reportedly considering taking legal action in the case. (Published reports)

**

RADIOSPORTS: HOST STILL NEEDED FOR 2005 ARDF GAMES

Turning to the world of radiosports, a reminder from Joe Mell, KZ0OV, that a group is still meeded to host the fifth U-S-A Amateur Radio Direction Finding Championship games. This, in the summer of 2005.

Some prerequisites for being the host include having suitable sites for 2 meter and 80 meter hunts along with the ability to provide foxhunting courses. There are also the organizational aspects to consider. These include providing registration services, housing for the contestants, meeting rooms, transportation to and from the hunt areas and lots more.

If your club is interested in hosting this event, please contact Joe by e-mail before September 15th to homingin@aol.com. Full details about the games and how to become the 2005 host is on line at www.homingin.com (ARNewsline(tm))

**

DX

In D-X, word that K3GV portable VY2 is active on 15 and 20 meters as from Prince Edward through the 12th of September. The island counts as NA-029 for the RSGB Islands on the Air award program. QSL's go to
K3GV at his callbook address. (RSGB)

And while this is short notice, the All Asian SSB contest will take place beginning at 00.01 U-T-C on Saturday, September 4th and will run for 48 hours. Operation is on 160 through 10 meters with stations in Asia trying to work the rest of the world. The official exchange for this one is a signal report and the operator's age. (WIA News)

**

THAT FINAL ITEM: NRC MEETS IN BATAVIA NY

And finally this week, a big meeting of broadcast band SWL's is taking place as we go to air. Here's Fred Vobbe, W8HDU, with the details:

--

Audio report only. Download the newscast at www.arnerwsline.org

--

Fred has promised to be here net week with a full wrap-up on this years gathering. (W8HDU)

I have one but it was discontinued 10 years ago. It's an Antenna Specialists AV-240. It's 4 ft. long - YES, 4ft! It's based on a commercial land-mobile antenna and handles about 150 watts. I've actually talked skip on AM with only a 35 watt amp. As far as what is made now, I don't know of a real good one. The Midland Power Max works OK but doesn't last long. The plastic bakes in the sun. I get about 1/2 the reading on a field strength meter as what I do from a good antenna. If you do get one, look for one with a ground strap off the coupling box.

If you can mount a trunk-lip mount antenna on the hood, that may be an option for you. I have an all black 3 ft. one on my Voyager. Works much better than the little glass mounts. Take a look around eBay. They often have new, old stock antennas. Maybe you'll find something there or get a good idea of what is around.

Frank what you posted is what more people shold know about. The

situation in the Darfur region of Sudan is akin to the genocide that happened in the Balkans several years ago. Only problem is that it doesn't involve oil so piss on it. How many teams of investigators with their own private security does it take to say its a colossal f up? As far as the oil angle, what did everyone expect when the oil boys were elected? Is it a shock? How much you paying for a gallon compared to 4 years ago? Better yet what is the profit margin now for the big oil comapanies? Off my soapbox but still pissed the american people were fooled into believing the right wing is better because they would provide security.

Just my opinion, but the problem isn't with the Republicans -or- the
Democrats -- it's the political party system that doesn't work. Well,
I should say that it works fine for those who get elected, but nobody
else.

3289. Lightning Protection

Newsgroup: rec.radio.cb
Date: 2004-09-05 04:19:04 UTC
From: radio_geek <pwest@mindspring.com>
Message-ID: <che43o$4f5@odak26.prod.google.com>
Source record: 186099

I have created a website for computer and radio geeks with many columnists that are CB/HAM guys. I know there have been several questions about lightning protection in the past and one of the colmunists just wrote an article that explains it in a pretty simple fashion (although it references computers in the example).

You can get to the article by going to

http://www.aboutgeeks.com

and looking for the article on 'Lightning Protection' on the home page. BTW, aboutgeeks.com also has product reviews and technology news for those interested.

Thanks

steveo, mark beck, brian vanderpool and lancer/bp/vanilla
vick/kennelmaster you guys sure devote a lot of time to this "george"
guy whoever he is. Sounds like you are the ones who are gay not him
ROTFLMAOOOOOOOOOooooooooooooooo!

Why is your NNTP posting host so far from Virginia? That's kind of weird,
no?

Yes, he is George Busch, Ham license WA3MOJ
of Allen Town Pa, all around troll and haters of
people that use CB's.

Now watch the tirade he'll go through, calling me
names, accusing me of everything he can imagine.

On AOL, when using Proxy servers as he's
doing, it will show a different addy almost
every time. It's all good, his life revolves
around this group and harassing cb'ers

I don't know if you can beat a wilson "little wil" trunk mount for this
situation. I have one on my Passat and love it. All total, it's 36" and
can still handle 500watts.

Best mounting location on a van unfortunately will be the right/left hood
where it meets the cowling IMHO.

On-the-glass antennas do not work. Don't waste your money on any one of
them.
Either drill a hole for a ball mount on the side
of the van, or use a classic bumper mount version.
The altenative is a magnetic mount on the roof
or if you have those "trucker" type mirrors put the
antenna on the mount.

Poor obcessed google-puppet, your worst nightmare would be, no NG
access in the rubber room at the State hospital. :))

3336. Re: antenna mast (push-up poll)

Newsgroup: rec.radio.cb
Date: 2004-09-06 13:55:34 UTC
From: Jay in the Mojave <jay123a@qnet.com>
Message-ID: <413c6da9$0$104$6c56adcd@news.qnet.com>
Source record: 186146

Hello Dr. X:

Yes Radio Shack doesn't carry a bunch of the radio stuff like they use to. I think it kind of reflects the communication market, with the internet, cell phones, Nextel Walkie Talkies, ect.

I talked with one of the long time Radio Shack mangers at a local radio get together BBQ and get to know each other radio personalities cook out. The manger told me RS was deleting many things like the Telescoping TV Masts.

However I believe that Lowels home improvement stores carry the Channel Master 30 foot Telescoping Masts. Rohn Manufacturing went out of business, so the good Heavy Duty Telescoping Masts seem to have dried up a little. But there was a new company that bought the Rohn manufacturing plant, and these Heavy Duty Masts should be made available soon, I would think.

You might have to find a local communications distributor that sells them tho. Stocking these masts is NOT a pleasant things for retailers.

Jay in the Great Mojave Desert, ...just down the road ah ways from the fillin station.

Me too, not that I'm much in to CB, but never knew Kenwood to be involved in "CB". Ham and 2 way radio (police/fire/ems radios) - yes, but not CB.

At these frequencies, you might as well use a paper clip.
Antenna performance is relative to size. (up to a point)
Consider a base-loaded whip, maybe on a magnet mount, in the center of the
roof.

Couple of racks of lamb, soaking in some olive oil, thyme, rosemary,
garlic. Throw them on the BBQ , keg of Foster's this month.
Hot tubs being delivered on Thursday :)

Yes, I thought that too after I hit send. But I'm serious, if there is such
an animal, I'd like to see one. I know Kenwood and Yaesu are manufacturers
of very fine products. It would be interesting to see their ideas in the CB
arena.

Hey Shark! It's been like a hundred years (since before I was ten years old), since I've had lamb. My Grandmother used to cook it before she passed away. You know the funny part? I can't even remember if I liked it. I think I did, because I can remember well the things I hated. (liver, etc) Anyway, I've been thinking of trying it again. What does it compare to, taste-wise?

Take care,

Geo's Daddy

LOL!! Oh, I don't know, maybe a rare to med
rare steak? Lamb has a lot of fat, so you have to do
a lot of trimming. You'll find it on a lot of Mediterranean
restaurants menu, along with Greek, Armenian some
middle east.
Racks are the only way IMHO. If done right, they
are perfect, moist & still very easy to cut, so much that
you should be able to cut it with a fork. Shiskabob
(not sure of the spelling) was originally made with lamb.
My Mom used to make a killer lamb curry dinner, too die for.

In a nutshell, they suck. I've had 2 different ones and they both performed terribly, I could hear, but they were both pretty much mute on the transmit, SWR's weren't bad, it's just the coupling through the glass (I believe) that did not cut it.

How 'bout a tasteful bumper mount with a disconnect, or a mount on the roof
and a no ground plane antenna on a disconnect, the roof may discourage
theft. Just watch those parking garages!!!

The best CB would be the Cobra 2000 for a base and the Cobra 148GTL for a mobile. BUT, you have to get the older mobile made in the Phillipines. The board is made by Uniden. The new Cobra radios are junk!

The Uniden Grant XL is also a great radio (same thing as the 148).

If you want an import radio. The Galaxy DX-2527 is the way to go. Good clean radio without the stinger board on the back!

The best CB antenna made today is the Interceptor 10K...

Message-ID: <zWk%c.418$xA1.30@newsread3.news.pas.earthlink.net>
Source record: 186175

The 78XL is an excellent radio. The Uniden chassis are much more robust than any other on the market today.

Go to
http://www.fgbestcommunications.com/

They have a mod for that radio that will give you 50 watts PEP and real loud and clean audio. If you put a D-104 on it and crank it up, you will no longer be clean and your audio will be distorted. Just crack it open and you will sound great!

You have a great radio!

Good SWR says nothing about radiation efficiency.
A 50 ohm resistor has great SWR, and only radiates heat.
A compromise antenna might closely approximate a resistor.

Egg-Zachary!!!!

Never checked the SWR after the POS antenna fell off the mount on the glass.
My guess is the SWR still would have been "pretty good" due to the matching
network inside. Shoulda taken a pic and posted it after I destroyed the
inside part :)

Source record: 186180

I had a 2 meter antenna that failed this way once.

Suddenly, no range at all. I put a bird inline, between the antenna base
and the antenna (SO-239 mount) and found 40W forward, nothing reflected, but
my range was about that of my HT on EL power, which is 20mW.

Replaced the antenna with a 1/4w wire, and back in business.

we are getting the outer bands now. I just arrived at the operation HQ
in Sarasota, and I was havibng a heck of a time keeping the car on the
road. I was staying in Tampa, but thats changed I was going to be there
until the 6th, but now am staying farther south, back where I was
before.
I am hanging in there, I'll be running the comm center tonight here at
the HQ.
73 de Keith KC8TCQ

_
Looks like you have plenty of work....that band from that rear wall
pounded this area early yesterday morning in the wee hours. And then the
rains came. 18 inches in some areas.

swr meter is for testing the antenna when connected to the radio
try changing to another antenna - or do some tuning on the one you're using
The swr meter goes in line between the radio and antenna -
Radio --coax--> SWR meter -- coax----->antenna

Heah Twisted:
That 14.325 MHz USB frequency, is kind of a disapointment. They ask for stations in the effected areas for current weather condations. And if any one whats to check in?!?!?!?!?
There must be a few more frequencies out there for us to listen in on.
Jay in the Mojave

_
Hey Jay....just had power restored...Keith should have some frequencies to share,,I think he's in some type mobile command center (man, those things can be impressive). I just took a break to check in after having power restored,,,,plugs and cables are all off the ground and everything is drying out. Haven't had time to mess with any radio except when portable, which hasn't been much. Since power came on, I plugged in the cb,,,,will hook everything else back up after everything dries.

Frank Gilliland wrote:
That was the -excuse- for war. There may have indeed been chemical and bio weapons, but the US "intelligence" didn't have a clue where they were, and were quickly shuttled out of the country long before the invasion. The main reason we went into Iraq is now clear -- the failing health of Saddam. Once his iron fist was gone there would be a struggle for power between his cronies two sons, resulting in a civil war between at least three major factions, totally destabilizing the country for decades and leaving it open for influence/invasion from disgruntled contries like Iran and Jordan. If that happened the US/UK based Shell corporation would be no more, and the only major oil-rich country friendly to the US would be Saudi-Arabia, which is currently on the verge of civil war.
Despite the deception, I find it reprehensible that Bush and the UN are not taking a more active stance in the situation in Sudan. It's clear that oil is more important than genocide.

_
Seems like they paid some lipservice to it since your post with a few bs statements addressing the issue..smoke but no fire. Interesting take on the failing health of Hussein,,,wonder how much longer we have to wait for Castro's health to fail. What is going to be interesting, is where the chips fall when Saudi DOES erupt, as you alluded.

I wish I had that generator. Couldn't work today without power. Tmrw I'll be needing to print out paperwork for products to ship out (AutoZone ordered some stuff and they fine us if we miss an order). Progress energy says they have no clue at all when they can give us power. I wish they made battery backups that could last a week or so. That would be way cool. I'm gonna start a battery collection. :-P

Thanks Twist. We found one. A local ham had a spare and let us have it (FREEBEE!!!). It's for my freind Wild Bill (chan 29fm & 35am). His cheap tv antenna mast holding an Antronn 99 got took out early by Frances so I decided he needed something a little stronger. (I told him not to use that cheap stuff). At least with the push-up, he can easily take it down before Ivan can have a go at it.

Thanks again for the offer.
Dr.X

Did so almost on a daily basis, have given up now and will buy elsewhere.
Any recommendations for a good on-line supplier who can come up with a
Magnum 257?

1:1 can never be achieved, but you can get close. Anything under 2:1 is useable.
Maybe your meter is not working correctly? If possible, check your coax with an ohm meter. Center to center, shield to shield, center to shield.
Is your coax the 50 ohm type? 75 ohm coax will work but a 50 ohm meter will not read correctly.
Good Luck
73

I bought a magnetic antenna with about 12' of cable. The instructions on the antenna say move to channel 1 and that you might move the antenna up/down 1/8" to achieve something near 1, but nothing.

Is the radio crap? I have bid on another magnetic antenna on ebay to see if something is wrong with the RS one.

Before you scrap the radio or the antenna, try to borrow a dummy load.
That will take the antenna out of the picture and give you a better idea
of what is going on.

Most likely, taking the antenna out of the setup will give you good
readings. If that's the case, check the antenna connections and the
coax going to the antenna very carefully.

If you still get the same readings try changing the coaxial cables
connecting the radio to the SWR meter and then the one connecting
the SWR meter to the dummy load. If all this fails to give you good
results, then there might be something wrong with the radio.

This would be my first CB. One catch is that I drive a small pickup and I'm over six feet tall. Doesn't leave a lot of room, so I was looking for a radio that will fit in the dashboard. I'd only have to make the slot 1/4" wider for the Cobra.

Pete

You should be able to get below "2" on channel 19 if your antenna is
properly grounded. What is your ratio on channels 1 and 40?

Look at the 75WXst for size and a first unit. May want an external speaker.
I put the speaker in the stock center location in my truck, it's hidden. I
never use the scan or the dual watch function unless I can afford to go with
a super high squelch setting. The first blip and you are hanging on that
station for a while. I just program the memory presets to the ones I listen
to. I have found it's output to be a little weak, but haven't tried any
moreenrty level models so I have nothing to compare to. But with any entry
level radio (or any radio for that fact) it's Antenna, Antenna, Antenna.

Hi Guys,

I just installed the Service pack 2 for Windows XP Pro here.

and there is quite a noticeable difference in the Speed of the Machine.

however, there is a way to get some of it back.

this is all done AFTER you install the service pack 2

here's how to do it...:

1. disable everything running in your task bar.
2. start system clean up... you'll get like a gig space back.
3. run defrag... not just once, but until you stop getting the "these files didn't
defrag" message, if that listing is blank, you're all set if not, keep defragging until it is blank... system will pick up quite a bit of speed.

It does seem to run alot slower than the SP1. I am on a AMD 825 here with 640 megs of rem and a 12.9 gig drive... I got close to 4 gigs free... and yes, there are some times when the system does slow down quite a bit. dunno if it's due to some bad code or what.... and is it me or did SP2 eat a alot of hard drive space?

anyhow, there some advice for you guys.

Thanks for reading...

The manufacturer?

Seriously, WHY? You're only going to see 1-2dB gain maximum (more likely
<1dB) from this rather dubious "peak and tweak".. Better feedline, or a
better antenna will get you that, plus it applies to any radio you use, not
just that one.

Hmm.. Sounds like you still have a way to go.
Is this an unusual antenna?
2-1 is still a bit high.

Peak and Tune is allot of Bullshit, just a sucker fad.
Usually it screws up the radio, if you need more distance, get a amp.

Frank Gilliland wrote:
"That was the -excuse- for war. There may have indeed been chemical and
bio weapons, but the US "intelligence" didn't have a clue where they
were, and were quickly shuttled out of the country long before the
invasion. The main reason we went into Iraq is now clear -- the failing
health of Saddam. Once his iron fist was gone there would be a struggle
for power between his cronies two sons, resulting in a civil war between
at least three major factions, totally destabilizing the country for
decades and leaving it open for influence/invasion from disgruntled
contries like Iran and Jordan. If that happened the US/UK based Shell
corporation would be no more, and the only major oil-rich country
friendly to the US would be Saudi-Arabia, which is currently on the
verge of civil war.
Despite the deception, I find it reprehensible that Bush and the UN are
not taking a more active stance in the situation in Sudan. It's clear
that oil is more important than genocide."

–
Seems like they paid some lipservice to it since your post with a few bs
statements addressing the issue..smoke but no fire.

–
"I heard that report too, spoken as if Sudan has enough oil to make any
significant difference in the market, which it doesn't."

–

Interesting take on
the failing health of Hussein,,,wonder how much longer we have to wait
for Castro's health to fail.

–
"Cuba, like Florida, has no natural resources other than it's climate."

Yea,,,same with many of these other nations that can be defined as
having "terrorist" leaders every bit as dangerous, and some more so,
than Hussein.

–

What is going to be interesting, is where the chips fall when Saudi
DOES erupt, as you alluded.

–
"A rich person dies and all the relatives, close and distant, descend
upon the estate like vultures. (There are scientists who believe that
early humans were hunter/gatherers, but the evidence clearly indicates
that they were scavengers. So much for the theory of evolution.)"

–
You pretty much summed it up, but which relatives prevail is going to be interesting, considering the US will probably be the "judge" of whatever takes place. Do you think the US is going to be thrust into the position (more so than now) to take more of a stance (one way or the other) concerning Saudi? It would seem this is inevitable.

Power was just restored today...was on a generator for everything else.

_
"I wish I had that generator. Couldn't work today without power. Tmrw
I'll be needing to print out paperwork for products to ship out
(AutoZone ordered some stuff and they fine us if we miss an order).
Progress energy says they have no clue at all when they can give us
power. I wish they made battery backups that could last a week or so.
That would be way cool. I'm gonna start a battery collection." :-P

_
The amount of water is unreal,,the bay surged more than I had ever
witnessed.....everyone here along the northern edge had water in the
house. Much cleaning up to do, but I'm heading out on the water tomorrow
to check out the area. Now we have Ivan expected to come up into the
Gulf and he was class IV last I checked. By the time Frances got to us,
he was a class I. Most folks (transplants that never weathered a
hurricane) aren't prepared for that large a storm (Ivan).

_
"I've only been here for about 12 years. Never got to see a direct hit
in St. Pete. After Frances brushed by us, I don't think I want to see a
direct hit.
-Dr.X (glad Twist didn't get blown away by Frances)."

_
St. Pete got nailed on parts of Snell Isle. I have a friend who lives

near 38'th Ave and 4'th St N. He told me he was kayaking on the streets
in Snell Isle. Glad you guys down there fared well, too.
Right now, Jamaica needs our prayers.

Way back when (when disco was new..) I worked in a 2-way shop, and I was able to get up to 5W out of the new (at that time) 4W rigs. Done right, it's a marginal if mostly un-noticable improvement. Done wrong, the harmonic output goes way up, the output transistors get hotter than they should, and it's just a mess.

Spend the same money on the antenna!

We're about to enter the peak of the hurricane season. Yes, hurricane season is an exciting time to be in Florida. If you're new to the area, you're probably wondering what you need to do to prepare for the possibility that we'll get hit by "the big one." Based on our experiences, we recommend that you follow this simple three-step hurricane preparedness plan:

STEP 1. Buy enough food and bottled water to last your family for at least three days.
STEP 2. Put these supplies into your car.
STEP 3. Drive to Ohio and remain there until Halloween.

Unfortunately, statistics show that most people will not follow this sensible plan. Most people will foolishly stay here in Florida.

We'll start with one of the most important hurricane preparedness items:

HURRICANE INSURANCE:
If you own a home, you must have hurricane insurance. Fortunately, this insurance is cheap and easy to get, as long as your home meets two basic requirements:
(1) It is reasonably well-built, and
(2) It is located in Ohio.

Unfortunately, if your home is located in Florida, or any other area that might actually be hit by a hurricane, most insurance companies would prefer not to sell you hurricane insurance, because then they might be required to pay YOU money, and that is certainly not why they got into the insurance business in the first place. So you'll have to scrounge around for an insurance company, which will charge you an annual premium roughly equal to the replacement value of your house. At any moment, this company can drop you like used dental floss. Since Hurricane George, I have had an estimated 27 different home-insurance companies. This week, I'm covered by the Bob and Big Stan Insurance Company, under a policy which states that, in addition to my premium, Bob and Big Stan are entitled, on demand, to my kidneys.

SHUTTERS:
Your house should have hurricane shutters on all the windows, all the doors, and -- if it's a major hurricane -- all the toilets. There are several types of shutters, with advantages and disadvantages:

Plywood Shutters: The advantage is that, because you make them yourself, they're cheap. The disadvantage is that, because you make them yourself, they will fall off.

Sheet-Metal Shutters: The advantage is that these work well, once you get them all up. The disadvantage is that once you get them all up, your hands will be useless bleeding stumps, and it will be December.

Roll-Down Shutters: The advantages are that they're very easy to use, and will definitely protect your house. The disadvantage is that you will have to sell your house to pay for them.

Hurricane-Proof Windows: These are the newest wrinkle in hurricane protection. They look like ordinary windows, but they can withstand hurricane winds! You can be sure of this, because the salesman says so. He lives in Ohio.

HURRICANE PROOFING YOUR PROPERTY:
As the hurricane approaches, check your yard for movable objects like barbecue grills, planters, patio furniture, visiting relatives, etc. You should, as a precaution, throw these items into your swimming pool (if you don't have a swimming pool, you should have one built immediately). Otherwise, the hurricane winds will turn these objects into deadly missiles.

EVACUATION ROUTE:
If you live in a low-lying area, you should have an evacuation route planned out. (To determine whether you live in a low-lying area, look at your driver's license; if it says "Florida," you live in a low-lying area). The purpose of having an evacuation route is to avoid being trapped in your home when a major storm hits. Instead, you will be trapped in a gigantic traffic jam several miles from your home, along with two hundred thousand other evacuees. So, as a bonus, you will not be lonely.

HURRICANE SUPPLIES:
If you don't evacuate, you will need a mess of supplies. Do not buy them now! Florida tradition requires that you wait until the last possible minute, then go to the supermarket and get into vicious fights with strangers over who gets the last can of SPAM.
In addition to food and water, you will need the following supplies:
23 flashlights and at least $167 worth of batteries that won't work or will be the wrong size for the flashlights.

Bleach. (No, I don't know what the bleach is for. NOBODY knows what the bleach is for, but it's traditional, so GET some!)

A 55-gallon drum of underarm deodorant.

A big knife that you can strap to your leg. (This will be useless in a hurricane, but it looks cool.)

A large quantity of raw chicken to placate the alligators. (Ask anybody who went through a hurricane; after the hurricane, there WILL be irate alligators.)

$35,000 in cash or diamonds so that, after the hurricane passes, you can buy a generator from a man with no discernible teeth.

Of course these are just basic precautions. As the hurricane draws near, it is vitally important that you keep abreast of the situation by turning on your television and watching TV reporters in rain slickers stand right next to the ocean and tell you over and over how vitally important it is for everybody to stay away from the ocean.

Good luck, and remember: It's great living in Paradise

its a legitimate question though the good ant is always a plus. as with
ham rigs, places like a&e provide a service to keep the rigs on freq
etc. for cheaper pieces of equipment like cb's there are quite a few
posters here asking basically the same thing. tuning for peak
performance doesn't necessarily mean more watts.

Hi
I received a lot of help the last time I looked
for advice on this newsgroup, so I thought I would hit you up for some more.

Someone has stolen my antenna. I had a Wilson 5000 mag mountand
I don't wont to replace it with another mag mount.

First
let me tell you what I have. I have a Cobra 29 LTD and a Palomar Elite 300 amp.
(I have already took some hits for what I have but for now that's what I got.
IM hoping to upgrade the first of the year.)This is in a 1999 chevy pick up. I
do have a place to mount an antenna on the tool box or the light bar around the
back of the cab. I was Looking at the Wilson 5000 and the 1000 trucker along
with the K-40 trucker. The setup I had before worked real good for what it was
but now that I have to replace the antenna and I would like get the best one I
can. I might be moving up to a Ranger or a Galaxy the first of the year so what
ever I get I would like it to work with a new radio. Any input or coments would
be great. I have a blank check from the shop where it was at when it was stolen
and i would like to get a new one this weekend.
Thanks Roch

thanks Roch

Amateur Radio Newsline™ Report 1413 – September 10, 2004

Amateur Radio Newsline report number 1413 with a release date of
Friday, September 10th, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Hurricane Frances strikes Florida and ham radio is prepared. Hear the ham radio first responders in action on Amateur Radio Newsline report number 1413 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HURRICANE FRANCES VS. HAM RADIO

Hurricane Frances pounded Florida with high wind and heavy rain after it smashed across the state's East coast. Close to 4 million residents lost power and telephone service. Cellular phone networks that survived Frances’s gale force winds quickly became overloaded. Enter ham radio. Amateur Radio Newsline’s David Black, KB4KCH has been following the story from our South-East bureau in Birmingham, Alabama:

--

When Hurricane Frances hit Florida on Labor Day weekend, the storm ripped roofs off buildings, toppled trees and cut power to about 4 million people. Also lost was part of the states telephone and cellular service. This created a communications vacuum.

But hams affiliated with SATERN - the Salvation Army Team Emergency Radio Network, A-R-E-S, and the Hurricane Watch Net were expecting Frances. Radio amateurs had been tracking this storm as it ravaged its way across the Caribbean. And it was ham radio that let the world know of the destruction the giant storm had caused as it hit some of the islands:

--

“Roger roger. On Elutheria Ill say about 40 percent of the structures have damage. In the Rainbow Bay area where I live I would say about 70% of the hhomes here have structural damage. Over.”

--

Once a Category 4 hurricane with winds of 145 mph, Frances had weakened to a Category 2 storm as it neared Florida. Winds dropped to a peak of 105 mph as it made landfall at Sewall's Point, north of Palm Beach, around 1 a.m. Eastern Daylight Time on Saturday, September 4th. Ham radio operators affiliated with

the Hurricane Watch Net tracked its approach:

--

“This is KA5E with the Hurricane Watch Net. We are currently taking measured weather reports out of the affected area for Hurricane Frances. Do I have any stations on with pdates or signifigant weather reports. KA5E, over.”

--

The powerful storm hit Florida with ferocious winds and sheets of rain. The hurricane was so large and slow moving that its western outer edges had began arriving on the east coast on Saturday morning. On Sunday morning its eastern edges were still pounding the coast from which 2.5 million people had been told to flee. Repeaters interconnected using I-R-L-P and Echolnk were pressed into service to help coordinate the latest round of evacuations:

--

“KC4PNC KB1CYO net control. Go ahead sir,”

“They have called for mandatory evacuation for Hillsboro county for manufactured homes and also mobile homes. They have not ordered a mandatory for low lieing areas but they are strongly recommendng it.”

--

And as evacuee’s poured into shelters, communications volunteers were needed. A call was put out over the interlinked repeater network and the hams responded

--

“We are looking for any volunteerr Amateur Radio operators to help with shelters. We have eight shelters open right now. Those are being manned. However, since its a declared evacuation all of the other shelters will be opened and we are looking for vlunteers to man those shelters. KC4PNC.”

--

As Frances path of destruction hit Florida's central Atlantic coast counties, blinding rain squalls drove clouds of sand into the air. At the same time high waves thundered onto the beaches. One ham watched as his rain gage was torn away and white caps pounded ashore:

--

“Any kind of rainfall accumulation?”

“No, that gage blew away but I can tell you that we are in a high tide area right now and I can see the tides up about a foot and a half and I have water coming over my seawall. But its not a problem. We are still at a much higher elevation. The water is over the seawall along the Intercoastal Waterway.”

--

As palm trees rained coconuts and then toppled over and buildings suffered extensive damage there was also a tragedy at sea. And the U-S Coast Guard turned to Amateur Radio for help:

--

“I want to remind the net that the Coast Guard has asked us to lend assistance in the search for the Anna Marie. It is a vessel that went down off the coast of Sarasota this evening about 10 to 12 miles out. Any assistance or any information on the Anna Marie that went down with the crew 10 o 12 miles out of Sarasota, the U.S. Coast Guard would appreciate your assistance.”

--

At airtime its not known what happened to the Anna Marie nor the fate of its crew. But as the search continued, there was yet another threat. Early on Sunday the 5th, the massive weather system spawned a tornado, and the warning went out over the I-R-L-P ham radio network:

--

“The tornado is expected to be by Bostwick by by 2:45 Eastern, Forholm by 3:00 a.m. and thats all I have.”

--

As that twister touching down the National Weather Service office in Jacksonville issued a tornado warning for Northern Clay County including the city of Orange Park. Also affected were St. Johns, Clay, and Putnam Counties. And as dawn was breaking radar picked up a developing tornado near Doctors Inlet moving West at 45 mph. Only some damage to roofs was reported.

But reporting weather was not the only chore radio amateurs were involved in. Another as health and welfare. Letting worried relatives and friends know about those stuck in Frances path. Many like this central American station who was happy to hear that the hurricane was headed away from his daughters location:

--

“OK. Great. Thank you very much. I appreciate that information. We are here in a location where we do not have any TV or any other communication. We are on the beach on the West coast of Panama. So thanks very much I do appreciate it. This is HB1XRO and the handle is Bob.”

--

By Monday afternoon, Frances had crossed the eastern Gulf of Mexico and made its second landfall in Florida's northwest Panhandle section some 20 miles south of Tallahassee. Now it only a tropical storm with sustained wind near 65 mph. Damage was mainly to power and telephone lines. At that point the forecasters were predicting the storm would move north-northwest at about 8 mph, and was not expected to regain hurricane strength.

Frances soaked Georgia, dumping 11 inches of rain in a 24 hour period in the town of Patterson.

Media reports blame Frances for at least seven deaths in Florida, including two people who were killed Saturday when the roof of he building they were in collapsed. There were also two deaths in the Bahamas. One of these was a teenager who was reportedly electrocuted when he tried to hook up a generator to a power mains that was still on.

With thanks to the hams who supplied the storm audio over the Internet used in this report, I'm David Black, KB4KCH at the South-East bureau in Birminham Alabama for the Amateur Radio Newsline. (ARNewsline(tm))

--

**

RESCUE RADIO: HAM RADIO PREPARES FOR IVAN

And its not over yet. As we go to air Hurricane Ivan is making its way cross the Caribbean and could strike the United States. CQ's newsdesk reports that Amateur Radio at the National Hurricane Center, WX4NHC, was to be reactivated for Hurricane Ivan at 2 PM EDT Thursday, Sept. 9, and will be active on Friday-Sunday 8 AM-11 PM EDT. The Hurricane Center will be on the Hurricane Watch Net on 20 meters as well as the VoIP Hurricane Net,. The latter is a combination of IRLP and Echolink stations.

The Cayman Islands and Jamaica are the next locations in the path of this extremely dangerous Category V Hurricane which now has maximum sustained winds of 160 MPH per the latest advisory issued at 5 AM EDT Thursday morning.

VoIP Net Control Station Rob Macedo, KD1CY, says they are trying to coordinate with the IRLP node owners on the Cayman Islands and Jamaica on usage of their nodes and liaisons to those affected areas. Currently there are no Echolink or IRLP nodes in Cuba.

National Hurricane Center advisories indicate that the path of Hurricane Ivan is not clear after it passes over Cuba on Sunday. Residents in the affected area should monitor the situation closely. There is a possibility that the hurricane's forward progress could slow and emergency nets may be activated for an extended period of time. It also means that ham radio communications volunteers could have a lot more to do in the coming days. (CQ)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the repeaters of the Condor Connection intertie serving the great American South-West.

(5 sec pause here)

**

RESCUE RADIO: FIRST RESPONDERS SAY THEY NEED INTEROPERABILITY

Meantime, three years after the nine eleven terrorist attacks, thousands of police and fire divisions in cities and counties across the United States still

do not have coordinated communications capabilities. So says the First Response Coalition and Amateur Radio Newslines Norm Seeley, KI7UP, has the details:

--

The First Response Coalition calls this lack of interoperability an unresolved national crisis and it has decided to take on the FCC and big business to solve it. This as the organization reaches out directly to more than 43,000 local police and fire officials to solicit their help.

First Response wants Congress to overturn the FCC decision to award spectrum to Nextel in favor of a plan that deals both with interference problem and the interoperability crisis. Gene Stilp, who is the First Response Coalition coordinator says that the FCC plan involving Nextel is wrong for police officers and firefighters. This is because it only takes on only part of the interference issue. Moreover, it does not do anything about the lack of interoperability between emergency response groups.

The First Response Coalition says that this outreach program is getting a very favorable grassroots response. So far over 17 fire chiefs have joined ranks with the group in opposing the FCC's current plan for what they call a give away of taxpayer-owned spectrum.

For the Amateur Radio Newsline, I’m Norm Seeley, KI7UP.

--

About the only emergency responders these days who have full two way radio interoperability are radio amateurs. Hams had voluntarily set world-wide communications standards many years ago. (First Response Coalition release)

**

RESCUE RADIO: AMBER ALERT LINKS UP TO THE WEB

The nation's Amber Alert system has become a web available tool. This, thanks to a portal made available by the E2C company of Scottsdale, Arizona.

Until now, Amber Alerts have been a primarily radio based technology. This meant that messages had depended on the nation's Emergency Alert system for relay and delivery. The new Web-based system can process and transmit the same emergency information more quickly and make it available to a wider variety of devices. It also comes with software that pinpoints the location of a child abduction and sends out emergency notification targeted to that geographic area.

As of now, Amber Alert managers in 11 states have access to the new portal. Use of the system is expected to expand to the 49 states that have statewide Amber Alert systems. Hawaii has no statewide system but has several local alert networks. (E2C)

**

THE BPL FIGHT: VK 4-WHEELERS JOIN BPL FIGHT

A Four Wheel Drive hobby group has joined the fight against BPL. Its happening down-under. WIA Newscaster Phil Waite ,VK2DKN, reports:

--

The VKS737 4WD HF Radio Network, joined the fight against BPL last week, following the recent WIA news broadcast by Jim Linton, VK3PC, highlighting the BPL industry's attack on interference protection for so called `recreational radio services' and an approach from WIA Director, Glen Dunstan, VK4DU.

VKS737 are currently circulating their members with information about the threat BPL poses to their activities, and encouraging their members to lobby politicians on the issue.

The VKS737 network is used extensively for emergency communications in remote areas, as well as serving the communications needs of outback travellers. Their current membership is around 7,000 and they potentially reach 250,000 Australian 4WD owners.

Many of their network base stations are in urban areas potentially affected by BPL and VKS737 members are rightly concerned about the threat presented to their HF communications. Their organisation is also associated with the Australian Citizens Emergency Radio network, who provide similar services on citizens band frequencies.

Phil Waite, VK2DKN, for the WIA National News.

--

The Wireless Institute of Australia is discussing ways the two organizations can assist each other in the fight against BPL. (WIA News)

**

INTRUDER WATCH: STRANGE SIGNALS AT 7238 KHZ

According to Bob Gonsett, W6VR, for the past three weeks, hams in the southwestern U.S. have been reporting a mysterious signal in the 40-meter band. One party described it as a "mechanical sound." Another speculated that it was "data."

Engineers at Communications General Corporation in Fallbrook California took a quick look at the situation on Septeember 6th. And at 3:20 P-M Pacific Daylight Savings Time the company found several close-spaced CW carriers. The four strongest signals at CGC's lab were on 7238.063, 7238.150, 7238.237 and 7238.412 kHz. The signal on .237 was the strongest of the group and the frequencies reported should each be accurate to better than plus or minus 30 Hz.

Communications General says it is not sure if the signal was coming from one specially modulated transmitter or from transmitters at different locations. Bob Gonsett adds that it will be interesting to learn the source or sources of these transmissions. (W6VR, CGC)

**

SAFETY: RADIO ENGINEER ELECTROCUTED WHILE WORKING ALONE AT TOWER SITE

The hazards of working near power lines has been brought front and center again. This with word that a Wyoming broadcast engineer has killed while working at a transmitter site in Colorado.

Thirty nine year old Robin Bradley Thomas was killed while working alone, trying to install a radio transmitter. The accident happened about 18 miles northwest of Red Feather Lakes in northern Colorado. Indications are that Thomas of Cheyenne died when he accidentally came in contact with high-voltage and was electrocuted. Thomas was described as an experienced engineer who contracted out his services. (CGC)

**

RADIO LAW: CELLPHONE PROVIDERS SUED OVER LOCKED PHONES

A consumer watchdog group sued three cellular telephone companies. This. for "locking" their phones to make it harder for customers to switch carriers.

The Foundation for Taxpayer and Consumer Rights is the group that filed the suit in Los Angeles. It accuses AT&T Wireless Services Inc., T-Mobile USA Inc. and Cingular Wireless, of using software in their handsets that prevents them from being used on a competitors' network.

All phones in question use Global System Mobile communications, or GSM technology which effectively limits a handset to a specific carrier using a non interchangeable SIM card. The lawsuit complains that this is an unfair and deceptive business practice under California state law.

The phone companies are defending their policy. They say that they routinely subsidize handset cost and would loose substantial revenue if they allowed customers to easily use those phones with another carrier. (Foundation for Taxpayer and Consumer Rights)

**

REPEATER COORDINATION: METROCOR MORITORIUM TO END DECEMBER 15

Attention repeater owners in the New York metro and surrounding area. An impoerant deadline is aproaching.

You may remember that your new area frequency coordinator MetroCor had put in place a two year moritorium on new co-channel coordinations when the group came into being. It had also asked existing repeater operators who have documented proof of expired coordination from the now defunct Tri State Amateur Repeater Council to update their coordinations with MetroCor.

In a posting to QRZ.com, MetroCor's Mario Sellitti, N2PVP, says that this moratorium had minimized the possibility that new coordinations might inadvertently displace longstanding users of the spectrum. It also helped to avoid creating disputes where none previously existed.

Now, says Sellitti, this period must now come to an end. He says that MetroCor will be terminating the moratorium as of midnight, Saturday, December 15th.

But he adds this qualifier. Sellitti says that anyone in the area having a repeater or knowing of one belonging to another ham, and that repeater qualifies for this exception, to please refer to MetroCor's on-line F-A-Q in item No. 11. This will give you or the person with the other machine the information needed to gain new coordination through MetroCor. Those in need will find it on-line at www.metrocor.net/faq.htm. (MetroCor, QRZ.com)

**

THE SOCIAL SCENE: W9DXCC CONVENTION IN ILLINOIS IN SEPT

Turning to upcoming social events, Joe Shrader, W9JUV says that the 52nd annual W9DXCC Convention and Banquet takes place Saturday, September 18th. This years venue is the Holiday Inn Chicago in Elk Grove, Illinois with noted DXer and author John Devoldere, ON4UN, as the featured banquet speaker.

John Devoldere leads the world in countries worked on 80 meters with over 350, and is first ham outside of North America on 160 meters with over 290 contacts. He is also an avid contester was elected to the CQ Contest Hall of fame in 1997. Devoldere is also one of the best speakers in the hobby.

This is a show you won't want to miss. For registration and lodging information visit the www.qth.com/w9dxcc on the world wide web. (W9JUV)

**

THE SOCIAL SCENE: SVHFS IN NC NEXT APRIL

And make plans now to attend the 9th Annual Southeastern VHF Society Conference. The 2005 gathering will be held in Charlotte, North Carolina next April 29 and 30.

Guy Titman, K4NUS has offered to be host and facilities chair for 2005 gathering. More information is on the web at www.svhfs.org (VHF Reflector)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

HAM TECHNOLOGY: HAM DREAM DIGITAL VOICE QSO

What is believed to be the first two-way digital voice contact in South Africa took place between ZS1AN and ZS1AU on August 10th. Contact was made on 15 meters with both amateurs using Ham Dream software for the QSO. Amateur Radio Newsline's Bruce Tennant, K6PZW has the details:

--

Ham Dream is an open-source version of the Digital Radio Mondiale broadcasting standard. It was adapted for amateur use by HB9TLK and gives hams the ability to talk almost noise free. Here’s how.

Speech is converted to digital data using a low-bitrate vocoder analog to digital converter. The data is then transmitted using a high-speed modem. At the receiving end the data is decoded to recover the audio at the receiver. Although still in the evelopment stages, there is worldwide interest in Digital Voice, which can deliver very high signal-to-noise ratios over medium quality narowband S-S-B channels.

For those who want to experiment, HamDream software can be downloaded free of charge from the South African Radio League's website at www.sarl.org.za.

For the Amateur Radio Newsline, Im Bruce Tennant, K6PZW, reporting.

--

Further information on digital voice in ham radio is available on HB9TLK's website. Its in cyberspace at www.qsl.net/hb9tlk (GB2RS)

**

EMERGING TECHNOLOGY: TiVO OVER THE NET

Federal regulators have approved technology allowing TiVo subscribers to send copies of recorded shows over the Internet. In its decision, the Federal Communications Commission said the new feature by Alviso, Calif.-based TiVo has enough protections in place to prevent mass distribution of copyrighted material.

The technology would allow a TiVo subscriber to download broadcasts to a computer and send copies of recorded shows over the Internet to an office or home or to a small circle of friends, as long as they are on the subscriber's registered account. The Motion Picture Association of America, the National Football League and others complained that the new service would allow the 1.6 million TiVo subscribers to redistribute shows over the Internet to virtually anyone, anywhere. (Published news reports)

**

EMERGING TECHNOLOGY: FCC TAKES NEXT STEPS TO PROMOTE DIGITAL TV TRANSITION

Its full speed ahead with the conversion to digital television. So says the FCC as it issues a Report and Order that it says implements several steps necessary for the "continued progress of the conversion of the nation's television broadcast system from analog technology to digital television.

The paper covers almost every aspect of the conversion process over the next several years. It also highlights the coming events and should be considered "must reading" for those interested or involved in the future of digital T-V. You will find it on-line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-250542A1.doc (CGC, FCC)

**

WORLDBEAT: NEW UK REPEATER SERVES LONDON AND KENT

And if you are planning a trip to the UK, don't forget your reciprocal license and your HT. And be sure to try out a new repeater serving the needs of hams in the North Kent and South East London England area.

Its call is GB3OK and it is sponsored by the Bromley Repeater Group and it went on the air on the 16th of August. It transmits on 145.650 MHz with the standard 600 Kilohertz input offset and requires a 103.5Hz tone to access the receiver. The trustee of GB3OK or repeater keeper as the British call them is Tony Ravelini, G1HIG, in the city of Kent. (GB2RS)

**

DX

In DX, HA3JB tells the Ohio Penn D-X Newsletter that he will operate as SU8BHI from Cairo, Egypt. This, from September 21st through December 20th. Activity will include CW, PSK, RTTY, SSTV and some SSB. QSL direct to HA3JB. (OPDX)

And UA9OBA, has been active as JT100M. This is a special callsign being used until September 13th during the Mongolian leg of the Altay-Himalaya Transasian off-road expedition. Activity has been mainly on 20 meters SSB around 14.180 Mhz. QSL via UA9OBA. (OPDX)

**

THAT FINAL ITEM: THA FINAL ITEM: A KEYLESS T-HUNT

And finally this week, a Michigan ham radio operator from the Ford Motor Company was part of a two man team that has solved the mystery of malfunctioning remote keyless car door openers, garage door openers and other such devices in Las Vegas, Nevada. A problem with R-K-E devices that had baffled many residents since a massive outage began last February.

Las Vegas resident Bill Zawistowski was one of those complaining. He and others vented their frustration to anyone who would listen including the FCC. Ford responded by flying in two R-F detectives. Earl Morse, N8SS, represented the auto maker and Nabil Hachem was from Alps Automotive, which makes the keyless car-door devices. And it did not take very long for Morse and Hachem to figure out what was happening:

--

Morse: "When we got there we discovered a signal in the paassband of the RKE receivers which was actually strong enough to keep the RKE from activating its own receiver in the vehicles. We investigated further and found it to be a stuck repeater. We can leave it at that."

--

Morse says it was not much different than a ham radio T-hunt except for the frequency:

--

Morse: “Having experienced Fox Hunting first hand. the only difficult art was shifting all my equipment to that frequency. All of my antennas were relatively useless because they were cut to 2 meters an 440 so we had to make some new antennas for the 315 Mhz. band.”

“We did have one advantage in that the RKE group had purchased a Doppler direction finder and we utilized that a lot.”

--

Morse tells Amateur Radio Newsline that once they found the transmitter it only took a few phone calls to get it turned off. The problem did surface again a week later but this time one landline call got it to go QRT for good. (ARNewsline (tm))

http://www.kb8ygc.com/Repeater.pdf

This comes from www.copper.com "forums". Apparently, there is a "repeater"
for the chicken band on the air. The link at the very top has pictures,
circuitry and everything! Is this not against the law? :(.

Jerry

I've made 11 meter repeaters before. If you stay low keyed, you can get away with it for a very long time. Personally I think it's much better than running a bunch of heat to get out and you're not splattering the crap out of your neighbors if you're accessing it from your home. Worked great with a HH too but I had to make the encoder inside a large mobile mic since I couldn't fit it into the radio shack hh at the time.

Do you also drive at 100 MPH because it's illegal to do so and you've done
it before? People who always break the rules are partially responsible for
yet more being imposed. Rules are made for a reason. And no, it isn't to be
broken....

I thought you'd use the analogy of the "gun" and the "person holding it"
instead.

Do tell, what harm would a cb reapeater do in comparison to a car wrecking
at 100mph?

Standing by....

If you're going to use that analogy, then make it a little more realistic.
Using a repeater on 11 meters is more like driving 5 MPH over the speed
limit. I guess you would rather have folks driving near hospitals with 1200
watt splatter boxes stopping hart monitors just so they can be heard.

Well, I've never tried using one for dx. I'd rather do that without any
help. The repeater was just for getting mobiles and hand healds on an equal
playing field with base stations around town. For that, it works great. When
the skip starts rolling, your freind across town isn't going to hear you
while your on a trc-216 even if you have it's antena fully extended.
(unless you connect it to an external antenna and maybe run up some heat).

The whole point WAS.... Do you do it because it is ILLEGAL? Driving faster than the speed limit allows - regardless if 5 or 100, linear amps, etc... ALL are illegal, so is that why you do it? ANY analogy could be used in this case. IF it is illegal, it is illegal - regardless what the situation is which is against the laws of the land. As for comparing the damage done in going 100 mph as opposed to a CB repeater... Maybe there isn't any comparison in that regard, BUT again BOTH are illegal. No, I wouldn't want people driving past Hospitals with 1200W splatter boxes, silly statement - they're not legal anyhow. SO that analogy sucks as bad as you think mine did. Besides, they won't "stop" a heart monitor. Maybe interfere. A "heart monitor" won't "stop" the heart, it merely reads the heart rhythm and allows the staff to see how the patient is doing. RF in close proximity may interfere with a Pacer, but I'm not so sure a 1200 watt radio going down the road will do it. It is more like Microwave ovens up close, some other forms of RF at high density, like Radar System. Cell phones are even thought to do it - in some cases. I'm sure there are 1500 watt Ham stations within proximity to some hospitals with no mention of problems. But no matter, if you're into illegal operations, nothing anyone else says will sit well with you. All I can say is - do it long enough, your turn will come.

Well then you made no point. I think everyone here is mature enough to already know it's illegal. I don't recall reading anything in the thread that said/argued otherwise.

Typically, things are illegal for a reason. I'm still listening to why a repeater should be illegal on a CB freq....and a car going 100 mph ain't gonna cut it :-)

Call the FCC and ask them, they're the ones who made the law, not me. I'm not going to waste anymore time on this. It's illegal, I didn't make it that way, and I'm not going to burn hours to defend it.

> The whole point WAS.... Do you do it because it is ILLEGAL?

Nope, and I doubt you exceed the speed limit just because it's illegal too.
(and please don't say you've never exceeded the speed limit 'cuz I just
won't believe you).

> Driving faster
> than the speed limit allows - regardless if 5 or 100, linear amps, etc...
> ALL are illegal, so is that why you do it?

Nope.

> ANY analogy could be used in this
> case.

You're right. I misread. My humble apologies on that.

> IF it is illegal, it is illegal - regardless what the situation is
> which is against the laws of the land.

So I've heard... *yawn*

> As for comparing the damage done in
> going 100 mph as opposed to a CB repeater... Maybe there isn't any
> comparison in that regard, BUT again BOTH are illegal. No, I wouldn't want
> people driving past Hospitals with 1200W splatter boxes,

<Snip useless soapbox on your medical knowledge since you're not too stupid
to understand what was meant in the first place>

Ok, to fix the 1200 watts into the hospital analogy, we'll forget that
situation and I'll give you one that you and I can both relate to better.

I live in an apartment complex. If you lived in the apartment next door to me, would you rather put up with me kicking on a 1200 watt box on an indoor dipole, or would it be better that I just use my 2 watt walkie talkie to connect to a repeater so I can talk with my friends? I don't think I need to explain what the hot box would do to your television reception (and possibly reception on lots of other consumer level entertainment equipment).

And stop crying about "it's illegal!". If I want to get out, I'll get out weather you like it or not. Personally, I think to choose to use the repeater would be more responsible of me and respectful to you as my neighbor.

> But no matter, if
> you're into illegal operations, nothing anyone else says will sit well wit
h
> you. All I can say is - do it long enough, your turn will come.

I think I'll attract less of Uncle Charlie's attention if I use the repeater and more if I use the 1200w amp, don't you?

-Dr.X

>
> Don

Hi M-Tech! How are ya?

Let me see if I can help you with that Don. You see, some hams take offense when a common "CB'er" does something that might take some intelligence to do. Most hams don't care that running an 11 meter repeater is illegal. They care more that a CB'er might enjoy some of the capabilities that should be reserved for a privileged few. The ego of the more common amateur radio operator can seriously compete with some of the "channel masters" of the 11 meter band. Many of them break their own arms trying to pat themselves on the back for being such a smart tech or because they bought such great equipment. Let a CB'er build his own amp or transmitter and they're ready to pounce. "Can't let the trailer trash get too smart, nooooo. They might actually accomplish something. Wouldn't want that to happen."

Anyway, I hope this helps you to understand even a little bit about his point (aside from "IT'S ILLEGAL!", that is).

<quote>
FCC: Part 95, RULE 19 - Remote Control Operations
{A} You MAY NOT operate a CB station transmitter by RADIO remote control.
{B} You MAY operate a CB transmitter by WIRELINE remote control IF you
obtain specific approval in writing from the FCC. To obtain FCC approval you
must show why you need to operate your station by wireline remote control.
Send your request and justification to:
FCC, Gettysburg, PA 17325.
If you receive FCC approval, you must keep the approval as part of your
station records (read Rule 27 on station records).
</quote>

In other words, a repeater is just a radio remote controled station. Even if
you put the receiver (input) at one end of town and you get approval to wire
control the transmitter (output) at the other end of town, you are still
indirectly operating the transmiter by radio remote control (illegal). Sux,

don't it.

You'll just burn hours posting 8 times to tell us it's illegal.

My guess would be that a repeater has the sofistication and skill level to operate/setup and is out of the TARGET that 11 meters was designed for....the "push and talk" crowd. Other than it not fitting the agenda of a "citizen band", I can't think of any other reason.

Yeah. I already figured what his "point" was :-) I just didn't like the implication of the 100mph analogy and it's possible cause to bodily harm being used as a comparison to operating a 4watt repeater!! I thought his first post of "because it's
illegal" was enough.

Anyway, I've been good:-) Still trying to find you guys on 37-38 lsb/usb(Twist and you). Conditions have just been terrible lately.

Hi Steveo!

Yeah, we're taking turns. lol. Who's turn is it now?..I'd like to get it
over with. :-D
When it's my turn to get busted, I'll let NS know. It'll make his day, I
think.

Oh geeze...I just now took a min. to look at this project. I should have kept quiet. That's no repeater. Store and rebroadcast? I guess it still qualifies as a repeater since it literally repeats everything, but it sucks. Who would want that peace of junk? I thought you were talking about relaying in real time like a normal repeater. In this case, I wouldn't even bother with such a device.

Frankly Dr. X, I don't give a damned!!!!! If you get busted, that is YOUR problem, not mine. I could care less. Was just pointing out, a CB Repeater is illegal anyway you try to spin it. Protest to the FCC who made it that way. Ask them for THEIR reasons. "I" do not make their rules. But I will say, I've known many who said they'd never get busted. Never say never. It happens in due time. One guy (A CBer) was very defiant and got busted as many times as he ignored their rules. Paid upwards of $50,000 in fines and lost all equipment each time. So, if you have money to gamble, be my guest. How does the saying go.... "A fool and his money are soon parted"?

No snow, but cold weather. I get this just in
time for when I'm going away. Heading out to
Texas on Wednesday visit my cousin in Austin.
Then Hot Springs Arkansas on Thursday until
Sunday for business. Got a 4 hour lay over in
Huston on the way home, my other cousin in
Huston is going to hangout for a while when
I'm there.

Yeah, I doubt many traffic cops even care. It's just more paperwork to them anyway. And it still would depend on them knowing what radio equipment is and isn't legal. I think they have better things to do.

On the contrary, I've known a couple of people that got them.
One was using a Moonraker 6 with 2500 watts, turning on touch
lights 2 blocks away. The other was running 5000 watts 2 blocks
from the PBS TV station in San Francisco, both not to smart.
Keep it low keyed and clean and usually nothing will ever happen.

Keith,

Do you need a temporary pop/smtp box while you're out doing all the good
work?

3507. FREE! "THE CB EPROM DATA BOOK" OF FREQ. MODS

Newsgroup: rec.radio.cb
Date: 2004-09-12 04:19:00 UTC
From: Lou Franklin <lou@cbcintl.com>
Message-ID: <hhj7k01gpvpf13f3mbfvlbo11bekl7v45t@4ax.com>
Source record: 186267

FREE!!

For advanced techs and serious radio hobbyists, we're now offering a FREE copy of our previously published "CB EPROM DATA BOOK" by Martin Pickering. (EPROM = Erasable Programmable Read Only Memory.) We sold it for many years but it's now out of print. This little manual of 60 illustrated pages is an absolute GEM of CB technical knowledge you'll just never find anywhere else. And it's yours for FREE from our Web site.

This book reveals the secrets of advanced channel programming, and picks up where our "CB PLL DATA BOOK" (www.cbcintl.com/pllbook.htm) leaves off. You'll get a thorough background in how these amazing programmable chips can be used to modify many popular CB PLL circuits for expanded frequency coverage. Covers the basic programming techniques, and even includes real PC board artwork for making EPROM circuits. Sample artwork includes EPROM boards for the popular MB8719, PLL02A, ï¿½PD2824, and ï¿½PD858 PLL circuits.

Best of all, the price is right! Download your FREE copy of "THE CB EPROM DATA BOOK" (948 KB Adobe PDF) at:

www.cbcintl.com/docs/EpromBook.htm

Don't forget to check out all our other CB specialty books, plans, kits, & high-performance accessories at:

www.cbcintl.com

Since 1996 we've been SPAMMING the rec.radio..cb newsgroup and saying we are the leading supplier of books, plans, and kits for the illegal CB radio crowd. Do-it-yourself repairs and modifications are illegal for CB according to Part 95, but I, Lou "the weasel" Franklin can get around it by claiming its info for 10-Meter Ham conversion. Ha ha ha. Wink Wink. As if any real ham would want an echo mike and a roger beep LOL. My books also cover such illegal for CB stuff as amplifiers, FM converters, adding new frequencies, etc. Hell I will have you transmitting on frequencies you had no idea you were on. Secrets of how to increase your power, range, and privacy, yes, these are so secret I dont even know them. All I know is snipping wires and butchering legal CBs - and now you can too!

Please visit our Web site, where you can download our unique catalog of voo doo CB bullshit. Our most popular schematic is a TriPower RF linear amp, we call it that because no matter how hard you TRY it wont give out any POWER ha ha ha. Its all illegal anyway so you cant complain when it blows up in your face.

Yeah, it still has 155 mph winds so it's still cat 5. Also, upper level winds appear to be pushing east. So it could still pull a Charlie on us and hook to the east when we don't expect it. But from what they're saying, looks like Panama City for now.

ok, I just heard the weather man on FNC say that a 155 is cat 4, 156 would
make it a cat 5. So one mile per hour short.

yeah, it's a monster.

I was actually afraid that the shortwave kooks would find a different hobby after Clinton left office and y2k fizzled out.

But 9/11 came along. And that opened up a whole new branch of kookdom. And I'm proud to say that the kooks are still able to get themselves pretty stirred up from time to time.

The hotel I am staying in now has a free business center with internet
access. so I can access my home email account., but thx.

I am back working at the HQ in Sarasota (it has a Bradenton address)
off university parkway and I-75. this is a plesent change drom driving
1.5 / 2 hours one way to my work site, heck now I could walk there
heheh. Doing laundry today, and relaxing.... sipping on an ice cold
Sam Adams. If yer in the area and want to meet for a coffee email me
logdshr AT bnnorth DOT net I'll give ya my cell #.

Can anyone help. I am stuck with this problem
In receive, when I turn the volume, it starts to squeal at around 70% ???

I tested a dozen of lytics around the AF power amp. Found C118 had hi ESR.
Replaced it , it still squeals the same. Tried it with a 8 ohms dummy load
and scoped it., same it squeals.
???
Thanks

Look for poor grounds, also scope the power supply around the audio chip, could be an open supply bypass cap. Since the audio chip starts to pull some power when you crank it up, it CAN get back into the 12 volt supply if a bypass electrolytic is open.

3521. New CB recomendations

Newsgroup: rec.radio.cb
Date: 2004-09-13 05:07:37 UTC
From: jeramy@jeramy.us
Message-ID: <21e917cc.0409122107.30fea678@posting.google.com>
Source record: 186281

I've just recently started in CB radio. My first radio was an old Cobra 29 that bit the dust a couple of weeks ago (beyond repair.. long story). So I'm in the market for a new CB. Money is tight, and I am wanting to spend the majority of it on a good antenna (thinking a Wilson 1000). That leaves me with a budget that can only handle the smaller, cheeper CBs like the Cobra 19DX or the Midland 1001Z.

My question is if these small CBs are even worth it. Are they? I'm only interested in bare-foot operation while on the road (no SSB) to keep in touch with other drivers. Will theese serve that duty well?

Thanks in advance,
Jeramy

Source record: 186283

AMERICANS WITH NO ABILITIES ACT PASSES CONGRESS May 23, 2005
WASHINGTON, DC (AP) - Congress approved sweeping legislation, which
Provides new benefits for many Americans. The Americans With No
Abilities Act (AWNAA), signed into law by President John Kerry
shortly after its passage, is being hailed as a major victory by
advocates of the millions of Americans who lack any real skills or
ambition. "Roughly 50 percent of Americans do not possess the
competence and drive necessary to carve out a meaningful role for
themselves in society," said Kerry, a longtime AWNA supporter. "This
is why many of them voted for me. We can no longer stand by and allow
People of Inability to be ridiculed and passed over. With this legislation,
employers will no longer be able to grant special favors to a small group
of workers, simply because they do a better job, or have some idea of
what they are doing," said Kerry. President Kerry pointed to the
success of the US Postal Service, which has a long-standing policy
of providing opportunity without regard to performance. Approximately
80 percent of postal employees lack job skills, making this agency
the single largest US employer of Persons of Inability. Private sector
industries with good records of nondiscrimination against the Inept
include retail sales (72%), the airline industry (68%), and home
improvement "warehouse" stores (65%) President Kerry has also set
an example, personally selecting hundreds of Nonabled people for
top government positions, including many cabinet-level jobs.
Under the Americans With No Abilities Act, more than 25 million "middle man"
positions will be created, with important-sounding titles but little real
responsibility, thus providing an illusory sense of purpose and performance.

Mandatory non-performance-based raises and promotions will be given,
to guarantee upward mobility for even the most unremarkable employees.
The legislation provides substantial tax breaks to corporations which
maintain a significant level of Persons of Inability in top positions, and
gives a
tax credit to small and medium businesses that agree to hire one clueless
worker for every two talented hires. Finally, the AWNAA contains tough
new measures to make it more difficult to discriminate against the
Nonabled, banning discriminatory interview questions such as "Do you have
any goals
for the future?" or "Do you have any skills or experience which relate to
this job?" and "Are you awake?" "As a Nonabled person, I can't be expected
to keep up
with people who have something going for them," said Mary Lou Gertz, who
lost her position as a lug-nut twister at the GM plant in Flint, MI due to
her lack of notable job skills. "This new law should really help people
like me."

With the passage of this bill, Gertz and millions of other untalented citizens can
finally see a light at the end of the tunnel.
Said Kerry, "It is our duty as lawmakers to provide each and every American citizen, regardless of his or her adequacy, with some sort of space to take up in this great nation."

Brand new in the box Cherokee CBS-500 with manual. Nice Radio! I've taken it out to see if it works and boy it was keying 4 and swinging 20 watts, i never knew these radios did that much. I also have a President Zachary T. 40 channel base station. Has a switch on the back where it can either dead key 2 watts and swing 15 or key 6 watts and swing 20 watts. Very clean radio and comes with a hand held echo power mic. Unit sounds REALLy good. i'll take $200 for both or $100 a piece. let me know

Thatz-me-JP

Can ya' feel the heat, oh small minded obsessed one?
Aheeeehahahahhahahah! Is it not the absolute most hysterical thing you ever saw? I can set my own personal dog on remote, when I have a position that dictates entertainment, I snap a few biscuits at Lthe doggie and the poor hammie barks.
What is the matter? It is the sound of a career minimum wage earner having his face rubbed in his own fecal matter. Found your remailer, but you are too stupid to realize more than a few of us have your number...ahehehehehehhhahaha...But that is ok, just because the adolescent gay porn chat rooms banned you for nonpayment of services in your section 8 apartment. Oh, I love the envy, ahahahahaha, the greed, (snicker), post a few more times today, slave. You shall quit when you see the light in your rear view snotboy, ahahahahahah...you do know that you're busted don't you? And I am gonna be the one to expose you to the world, here and your ham sites, so you should just sell your stolen equipment now hypocrite..ahahehehehehahahahahahahahhahaha...what pleasure I derive from commanding you at every turn. You are a no one, the hams don't even like you..ahahahahahaha..which is why your limp wrist does what I command, day in, day out, all day, twisted is your GOD, nothing is on your mind besides twisted...hehehe...you can't even figure out who you are posting to most of the time..ahahahahahhahahahaha you must answer each and every thing I say...always...your lack of confidence is overshadowed only by your desperation in frantically searching for a kindred soul (mmmmph...like that would happen, hyukhyukhyuk) to seem sympathetic to your shortcomings and lack of sense. Try again. Maybe with the Tourettes comes denial, you can plainly see the writing on the wall, I guess it is a cwy for help. Do not worry, property of mine, when the authorities come your way, you will probably get out of it
due to you handicap...ahehehehhehe! Go off to work now (Your work consists of me making a fool of you and you playing dressup to be

someone who wouldn't give your soon to be rotting carcass the time of day.), ahaahahhahaa! By the way, how is the weather there? I hear it is getting warmer. Poor confused androgynous Hermie. Waaaaaa! No one will play with you, just kick you in them green 6 teeth you have left..ahahahaha! Real humans are gainfully employed, but not youL, you sit here, day and night, night and day, popping veins and burning up the 4 of the remaining 5 brain cells you have left, convincing yourself that some way, some how, you will defeat the mighty twisted who has single handedly reduced you to nothing more than a quivering, cowering mass of anonymous (not anymoreeeeeeeeee) jello (soLoon, boy , this gonna be fun..life is great when you AINT AS STUPID as you...ahahahahahaahaahahha) who is at my every beck and call and hangs on my every word like an earnest young boy who is in complete awe of his pater after observing him urinate for the first time. Ahahah..you think that a few posts through supernews was gonna cover for you? Ahahahahahha! Fecal brain. I ain't gonna tell you where else you slipped, 'cause you're still doing it. I look forward to you, "spitting in my face", but since you are nowhere near Ohio, never had plans to be, and haven't the gonads to be a man, we know you are just hiding, PRETENDING to be some one you ain't. But since you know I know who you are, well, scratch that 'cause we know you don't have the courage of a little girl, do you Mr. Snot? Since you depend on a government check to support yourself, I have a feeling the feds are gonna get a whoLe lot of email (read:payback), but rest assured, incapacitated one, you will not have to wet yourself because of me. At least as long as you never meet me...nyuk nyuk nyuk! After alluding that the door is about to slam on your furry tail of rancid filth, I had 26, can you imagine, 26 emails asking not only who, but where you are, and out of those 26, there are seventeen states just asking where you live,,,,hahahahhahahahahhahahah!. That is a real easy one, ain't it? It's on QRZ.com Doug himself should kick your ass for what you did. Funny thing is, I bet he could..ahahahhahahahahah, he wasn't a coward, (well, not all the time) he posts from his real addy, not like the poor section 8 Hermie who has zero cajones.ahahahahahah..but we knew that. Poor bipolar thing, try to act the upstanding ham and it's all crashing in around your illiterate girth., aheeeeeehehehehe...I love it..although my sides are a bit sore after laughing at you all day yesterday...I knew you were sewage matter when I first saw you here. With the impenetrable control I have over you, it's no wonder you stay here to worship me and turn my word to scripture, if someone made an ass of me like I did to you, I would cwy too.well, no I wouldn't, 'cause I ain't a hermie..hahaha....only I don't just make you cwyL, I make you beg for it, and there ain't a damn thing you can do about it except try harder to be me and fell sorry for your incontinent self and wait,,tick, tick, tick!! AHAHAHAHAHHAHAH ROAR!!!!!!!LMAO!!!Oh, there is one more thing you WILL do, you WILL continue to stay right here, 'cause you know your exposure is coming real soon, and ya' know what? You don't want to miss it! I am gonna let you cut your own throat by denying it. I gave you the rope and you ran with it and tied it around your neck..I am gonna have a blast kickin' the chair out from under you. But you are going to do the final

laceration!!!! All those CC emails you sent? Perfect. Remember our email exchange? You bit hook, line, and sinker!!. Serves you right!!! Now what you got? AHahahahahahahahahaha! As I stated, all you have are jokers, fool! I'm shoving the Ace of spades down the back of your skirtLhahahahahaaheehheheeh!!

Well, if you have a toolbox across the back of the bed the BEST antenna IMHO for that application would be the largest center-loaded antenna you can get. Something like the wilson trucker 2000. The idea is to get the load and as much of the top of the antenna ABOVE the cab as possible. You can easily mount to the box with a non-magnetic mount...just run a ground strap from your bed to the tool box to make sure it's grounded. Don't mount it too close to the back of the cab or it will slap the glass when it contacts something overhead. A small rubber ball placed below the center load can stop that.

I'm also assuming the tool box is metal..... :-). Otherwise, the next best place is right against the drivers side hinge/cowling area of the hood. Again, this is just my humble opinion.

Good luck!!

Don

You would probably be better off with FRS radios. They are cheap and you can get headsets for them as well. CB's need too long of an antenna and too large of a ground plane to be practical on a bike.

Uniden Pro510XL. I have had a few of them and they are good on receive and transmit. No need for a power mic. They do benefit from a modulation adjustment but that requires changing a resistor instead of turning a potentiometer. Just don't let anyone talk you into removing the modulation limiter because it will become muffled. I've seen these radios go on eBay for $5. The older version of it, the PC33 is also a great radio.

Chris

Make sure you don't have anything under the base of the antenna. Some people try to put a towel or something under it to protect the paint. It won't work.

My guess would be the same reason as the distance rule. That distance rule is not exactly enforceable as it is, without allowing repeaters to extend distance.

I believe that Australia allow repeaters on CB, and I have not yet heard of anyone being run over by one going at 100MPH.

I have been contacted by someone claiming to be a BBC reporter. He asks to be put in contact with CBers who are opposed to the CADS system.

Personally, if the BBC are to report on the issue, I would prefer they take a genuine look at the general feeling among UK CBers - not push the report in the direction they may wish.

I have replied to see if he wants me to give out his contact details, and I am checking the source of the mail (in case it's a wind-up).
Of course, due to spammers, contact details could only be given by e-mail.

Any takers?

Peter.

Isn't the aussie CB band UHF?
That makes a big difference.

An HF repeater can cause interference pretty much worldwide.
UHF would only cover a few 10's of miles.
We have the same issues with 6 meter and 10 meter repeaters, though they are
legal for hams.

Hi Dave.

Tell me please. What remedies are there for such issues in 10 meter? Just wondering. Or is the inadvertent skip ok with the hams (possibly a welcome side affect)?

Thanks,
-Dr.X

PL tones, and coordination, carefully limiting the number of repeaters in use, and their power output. They may even control their power according to band conditions, but I'm not sure on that.
The only repeaters I've worked on, were 2M and higher, so I don't have direct experience there.

You might look up one of the 10M repeater callsigns, and email the licence holder, and ask him.

I'd ask him why he wants only those opposed, why not just ask a broad spectrum of people (CBers)

We'll see if he gives out his details first. I can't see why he wouldn't if he were genuine.

Hello All:

Here is a neat web site from the ARRL on AM Transmitters and such.

http://www.arrl.org/tis/info/am.html

There now have a book on amplifiers

http://www.arrl.org/catalog/?item=9310

And great books on transmission lines and antennas

http://www.arrl.org/catalog/?category=Antennas%2C+Transmission+Lines+%26+Propagation&words=

Also books on interference RFI/EMI and how to cure them.

http://www.arrl.org/catalog/?category=Interference%2FDF&words=

Yeah, the hams are very good at coordination/cooperation. Something
seriously lacking in 11 meters (but that's stating the obvious I guess).

> They may even control their power according to
> band conditions, but I'm not sure on that.

Yeah, I thought about limiting output power but it seems to me that if I can
talk skip with 500 mw on 11 meters, then scaling back couldn't be much help.
Skip will roll when skip wants to roll. Maybe a high angle of radioation
would allow good local and limit the ability to dx. (anyone with good
antenna theory have ideas on that?)

There are antenna designs that radiate most of their power skyward, high angle, for short range comms.. I can't recall the name at the moment..

Because I like to see folks do well with their businesses, don't you? Last
time I checked, the I-10K appeared to be one of the best omni-directional
antennas on the market and was actually cheaper than the Mosley Devants.

http://www.mosley-electronics.com/citizen_band.htm

It's also a friendly comment directed to an acquaintance I haven't heard
from in quite some time. Some might call it common courtesy.

Things are well, thanks for asking. Lately, I'm trying to work all 50 states
QRP and have about 13 left. (Including the difficult AK.)

Hope all's well with you and yours. :-)

if i remember right the original poster was from canada who posted the
directions for building a repeater. how that affects u.s. users is open
to interpretation.
the other point is how jerry posts 'chicken band' and takes offence when
someone jams him for being anti cb. hypocrite as twisty might say.

i keep meaning to ask who this apartment ham guy is and by the looks of
the pics of the proffesional ant installation i wonder why he posts
here. is this the same guy who was at the front door of the walkup who
appears short dumpy and in need of a shave?

Jim, hams are licnesed by the US govmt to try different things with
rf. Cbers are not. If you cant follow the rules of this country then
leave and go to canada

Hi Bert.

That's a great link. Very informative. I've always thought an extremly high angle of radiation would be a great local talk tool but I've never tried anything to test that theory (damned apartment complex rules). The artical says 200 miles radius +/- 100. I wonder what it would be like on 11 meters. Anyone here try that on 10?

Thanks again.
-Dr.X

Sounds like a well thought-out bill. Let's just hope that the state
of North Carolina can put some teeth in the enforcement end of it.

Federal law trumps state law no matter what side the state law takes. Any
normal judge would just say that a rule already exists to address the issue
so state level action is a waste of time and taxpayers money.

But doesn't that just mean enforcing existing federal regulations? I don't
think local laws need to be passed for local enforcement of a federal law. I
could be wrong. I'm not a lawyer. :-)

Not sure, most guys use it for 40...but 11 should work just fine. Seems
kinda opposite to the conventional wisdom of "get it as high as you can." Go
for it and please let me know how it works out, good luck.

ok, I'll wait and see. But it seems to me that's just RE-enforcment. A total and complete waste of time and money on the part of the state to make rules that are already on the books. There is no need for new laws when existing ones will do the job just fine. To me, if the fed says bank robbery is illegal, I see no reason for the local gov to make new laws to say the same thing since they already have the right to enforce it.
I'm not saying that it's not going to pass. I'm sure there are pleanty of people in NC that will say, "Oh, make illegal radios ILLEGAL. Sure, I'm for that. Let's vote yes! on proposition bla-bla to make those terrible "UN-LAWFUL radios into ILLEGAL radios...". It could happen. But I still think it's still a waste of time.

ok, I'm done. ;-)

Hello!, Maybe someone here can help me out?.

On Saturday June 02, 2001, I bought at a garage sale
for 25 cents, A 2 record set of 78's (these are the same size as a 33), But
they at 78 speed:.

The Records are VOX Presents on POLYDOR Records

BEETHOVEN SONATA in C MAJOR Op: 109
For Piano WILHELM KEMPFF, Pianist.

These Records were made in France in 1936...

Record # 1 has a crack in but is still playable.
Record # 2 has no cracks and plays well,

The question is how much are these Records worth??

Anyway Thanks For The Help,

And yes I know this is rec.audio.tech , Didn't Know where else to go with
this question..

Thank-You

But local jusisdictions (state/county etc) can't enforce federal law.
Having a local ordinance that mirrors the federal allows them to enforce it.

Actually it's Rec.radio.cb But I understand the mistake. Every medium to large town has a record collectors store, they are tough to find. Mine is a used bookstore with every old piece of vinyl in the back you can imagine, with vintage audio equipment!!! Find this store as these people do it more for a love of music than as a source of revenue. They will be able tell it's value. Beings as one is damaged I would suspect it's value pretty low. BUT I have seen works like this go for cash for an artistic standpoint if the wax is in visibly good shape. Some people will frame these old pieces. Good luck! Are you a record collector?

Chad

Which phone number do you suggest I use? Or would it be better
to email her at info@nancybuschesq.com and ask her about the
slander laws in Allentown, and what options I have in dealing
with the jerk (George Busch) that called me a child molester?

That way I could ccp lots of pertinent info.

Looks like a no go, 27 MHz is way too high to be reflected, according to the data on their site.

Well, one more reason to upgrade :)

Hello Bert:

Glad you liked the web sites there, I got a few e-mails from guys who liked the web sites also.

Yes things are going well. I have a few commercial customers that are getting intrestered, and a small order for over seas that I am filling now.

I also have a Crusader 10K Beam Antenna in the works its a 5 element yagi. And have modified it to be a 7 element yagi beam antenna with a 36 foot Boom. And I may even make a 8 element beam on a 62 foot Boom.

Here's a web site that has a few photos of the "Super Crusader Seven"

http://www.cbradiotalk.org/forum/viewtopic.php?t=933

The lower boom is a support boom that significantly increases the Booms strength. The Crusader Beam Antennas use a split and insulated driven element, using a Hairpin Matching System, and are feed thru a current 1:1 Balun, to reduce line radiation, and reduce interference. Its pretty amazing how well these lager beam work. We can talk to the San Fernando Valley, most all of Los Angles, and the outer areas. Not bad having to go over a couple of mountain ranges.

Hope you are well, and everything in life is well.

Jay in the Mojave

You're telling me state officials can't enforce federal law????

This just sounds to me that NC is cleaning up it's policy to mirror the feds
policy on CB equipment. They've had the authority to seek/confiscate said
equipment for as long as there has been federal legislation on CB equipment.

I googled this and can't find a bill 257 from session 2003.

Some of you can try if you wish and help me out..LOL
http://www.ncga.state.nc.us/gascripts/BillLookUp/BillLookUp.pl?Session=2003&BillID=257

Okay, I got it. It's an AMENDED Law. Just like a said. They've ALWAYS had
the power to enforce this at ANY level. They've also always had the "law".
This is simply adding to it(ratified).

I found it here:
http://www.ncga.state.nc.us/html2003/bills/currentversion/ratified/house/hbil0257.full.htm

officials can't enforce federal law????

It may be that they can't enforce federal regulation (as opposed to law).
IANAL.

The FCC had a bulletin on this some time back which explained it in terms of
making it possible for local authorities to enforce FCC regs.

Okay. That makes sense. For example, federal regulations mandate certain area's conduct emissions testing on vehicles. But states do NOT have to enforce it. However, if they do not, they lose certain grants/aid/monies etc.

But as far as this subject goes....this is NOT a new "law". It's simply verbiage added to an existing law(ratified/amended) at the state level, taken from the federal level.

It's quite obvious that you are not a lawyer. States are free to pass
any law that does not conflict with federal regulation. In this case,
the state's law compliments the federal statute, and does not come in
conflict with the federal law.

Whatever they want to call it, it's still going to be a waste of time and money. Reading up on it, it appears it comes from some local (Sheriff Rosco P. Coltrane maybe) charging a citizen using the FCC's rules. The offender was causing interference in the television and telephone of his neighbor. It was appealed and the defendant won. So Rosco asked Boss Hogg if they can get clarification of the law. Boss Hogg obliged and is now in the process of getting the clarification.

Meanwhile, Uncle Jessie probably was just running a little heat so he and Daisy can talk to the Duke Boys while they were out jumpin' over hollers with The General Lee.... :-|

3612. FREE! "THE CB EPROM DATA BOOK" OF FREQ. MODS

Newsgroup: rec.radio.cb
Date: 2004-09-17 04:22:29 UTC
From: Lou Franklin <lou@cbcintl.com>
Message-ID: <2kpkk0lst4dvv709us5pdfjds13qeo5tu0@4ax.com>
Source record: 186422

FREE!!

For advanced techs and serious radio hobbyists, we're now offering a FREE copy of our previously published "CB EPROM DATA BOOK" by Martin Pickering. (EPROM = Erasable Programmable Read Only Memory.) We sold it for many years but it's now out of print. This little manual of 60 illustrated pages is an absolute GEM of CB technical knowledge you'll just never find anywhere else. And it's yours for FREE from our Web site.

This book reveals the secrets of advanced channel programming, and picks up where our "CB PLL DATA BOOK" (www.cbcintl.com/pllbook.htm) leaves off. You'll get a thorough background in how these amazing programmable chips can be used to modify many popular CB PLL circuits for expanded frequency coverage. Covers the basic programming techniques, and even includes real PC board artwork for making EPROM circuits. Sample artwork includes EPROM boards for the popular MB8719, PLL02A, ï¿½PD2824, and ï¿½PD858 PLL circuits.

Best of all, the price is right! Download your FREE copy of "THE CB EPROM DATA BOOK" (948 KB Adobe PDF) at:

www.cbcintl.com/docs/EpromBook.htm

Don't forget to check out all our other CB specialty books, plans, kits, & high-performance accessories at:

www.cbcintl.com

SAVE MONEY! We regularly run EBAY auctions in which you can save up to HALF the cost of our most popular CB books and accessories. To see what's currently on sale, double-click the line below:

Hi
I know nothing about CB.
I'd like to buy some "device" that does two functions (I'm even not sure if those exist:):
-CB radio and scanner(be able to scan police frequency)
What particular model would you suggest? (not too expensive and not to big, handheld preferable)
thanks
jazu

He gave an e-mail address (at bbc.co.uk) and a 'phone number (mobile).

The name checks out, he is mentioned on some BBC sites. Also, the computer
used traces back to the Beeb.
It also appears that he may have been visiting the site on several occasions
over the last few months... maybe he has an interest in CB radio?

I have replied to the e-mail address given, but heard nothing yet.

Regards,

Peter.

You would think people would have the common courtesy NOT to operate a phone
or television within "X" distance from an illegal CB station :-)

The LEAST the guy can do is move!!

Heh-heh...yeah, get the hell out of my neighborhood if you can't take the heat. ;-)

What's up with that anyway? It seems that on the back of most consumer electronics there's a notice saying it must not cause interference and it must accept interference. What's it going to be? If my radio causes interference, is my neighbor supposed to just take it because the notice says so? And if that's the case, why should I as an op worry about it? I think it should read one way or the other, not both ways to accommodate the FCC. It should read something like "must not cause interference and if it gets interference you should load a shot gun and find the CB prick that's running 4kw to talk to the guy down the street" or something of that nature.

-Dr.X (not emitting interferons to the best of my knowledge)

They do create a bit of an ambiguous situation.
When two unlicenced devices interfere, it would appear that both are SOL.
If a type-accepted CB device is interfering with a part 15 device, then as I understand it, the part 15 device is SOL.

But wouldn't the CB device op be required to make changes? He's the one
causing the interferance. My memory of such things is quite dusty.

I checked out your site. I liked the "no active linear" amplifier. Have you
ever tried something similar to that to amplitude-modulate the collector of
a mosfet rf amp? Just curious. It would be like digital audio except the
audio amps would need to be at least about half the wattage of the rf amp.
(that could get ugly. :-P)

Message-ID: <21e917cc.0409170832.6dab89a5@posting.google.com>
Source record: 186444

I appreciate the uniden recomendations, but I ran into a great deal and took it instead. An oldtimer was selling out some of his stuff at a garadge sale and I picked up a few antennas there. That freed up some cash to throw towards the radio, and at the same time a TA truck stop had a sale on the Texas Ranger Freedom One (a TR-696F ssb mobile with flag face place) for a little over $100. So I ran with it. Got it installed and will be installing the antenna here in a few.

Thanks again!

Jeramy

> But wouldn't the CB device op be required to make changes? He's the one
> causing the interferance. My memory of such things is quite dusty.

The part 15 device is the bottom of the food chain.
It is required to accept any and all interference, including that which may cause undesired operation.

This assumes that the other device is either part 15, or unmodified CB, or commercial licenced radio (unmodified), or ham radio operating in-spec.

If I read them right, a modded CB, or one with an amp, or a ham radio that was operating out of spec, would be given the burden of cleaning up the problem.
If you're operating illegally, then you go below the part 15 devices.

Modded or not, I *think* it's up to the radio operator NOT to interfere with his/her neighbors.

I look at it this way;
If your cordless phone was making my garage door go up and down all night, I'd expect YOU to remedy that situation.

I had a situation once where I was broadcasting through a next door neighbors, well, let's just say a "type of piano you find in a church" because I can't think of how to word it without it coming out wrong:-) That was about 20 years ago when I was running 750 watts through stacked moonraker IV's. I tried installing filters every where I could plug one in but to no avail. So I stopped running the linear and all was well....it was just a cheap splatter box anyway. We moved and I sold everything.

We actually just stopped in to see them a few months ago and she still has and plays that "type of piano you find in a church" :-)

Amateur Radio Newsline™ Report 1414 September 17, 2004

Amateur Radio Newsline report number 1414 with a release date of
Friday, September 17th, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio meets hurricane Ivan. Find out
the details on Amateur Radio Newsline report number 1414 coming your
way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAM RADIO VS. HURRICANE IVAN - IN THE CARIBBEAN

Last week it was Frances. This week it's Ivan. Bother killer
storms
that took lives and destroyed property across the Caribbean before
making landfall on U-S shores. And as has been the case s many times
this year, ham radio was ready. Our team coverage starts here:

--

I'm Henry Feinberg, K2SSQ:

--

" The eye center of hurricane Ivan was located near latitude 17.9
North and longitude 78.7 West, or about three-zero, thirty miles or
five-zero, fifty kilometers South-West of the Western tip of Jamaica
and 190 - one hundred and ninety miles or 305 kilometers
East-South-East of Grand Cayman"

--

That was a warning relayed over ham radio in the Voice over I P
Hurricane Watch Net. Hurricane Ivan had hit Jamaica with wind speeds
near 155 mph. And as the storm approached, hams involved in the
Hurricane Watch Net relayed up to the minutes reports to the National
Hurricane Center in Miami:

--

"...wind speed sustained at 80 miles per hour. Gusts to 100
miles. Is
getting horizontal ran. Skies are darkening rapidly..."

--

The killer storm had already been blamed for at least 64 deaths in the Caribbean, including 34 in Grenada. It hit Jamaica on Saturday, September 11th packing winds close to 165 mph. In downtown Kingston, 20-foot-tall trees were uprooted, some flung onto the roofs of cars, and twisted metal roof panels strew the streets. At least 11 people were killed as the storm blew across.

Now on Sunday the 12th, reports were coming in from Ivan's next stop.
From the few hams in the Cayman Islands who were riding out the storm on the air using whatever gear they had that would run on emergency power:

--

"Zed-F-one kilo oscar has come up a couple of times reporting flooding
in areas that have never flooded before in a hurricane. They have some intermittent cellular telephone service. The land line phones are down and a lot of flooding. VP5DB with the Hurricane Watch Net."

--

Then there was this dramatic report to the Hurricane Watch Net from a crew member of the British Royal Navy ship Richmond that was anchored not far off shore. The Richmond had cut short her visit to Curacao to standby to assist islands devastated by Ivan:

--

Audio only. Hear it at http://www.arnewsline.org

--

Category 4 and 5 hurricanes can cause buildings to collapse, destroy mobile homes and flatten trees and road signs. Such storms are accompanied by a surge of sea water and require evacuation of low-lying areas within 5 miles to 10 miles of the shore. Normal lines of communications are almost always cut and this was the case with Ivan. And broadcasters in the Caribbean who were able to stay on the air had their reports passed to the outside world using ham radio. Stations like Wenty Bethune, 6Y5IC, who had survived Ivan' rampage on
Jamaica and was on the air from Kingston using battery power:

--

"We cannot confirm it, but we understand that there are people in the
Caymans standing on their roofs shouting for help. Sounds like a traumatic situation in the Caymans. This is coming off FM radio about an hour ago. QSL?"

--

6Y5IC said that he was also handling traffic into and out of the storm ravaged area. He added that he could probably operate for about to weeks using batteries.

Now Ivan was on a direct path toward Cuba. This, as Florida residents braced for a third storm to hit the state in a month. And on Monday the 12th a strengthened Hurricane Ivan headed toward the tip of western Cuba with winds in excess of 160 miles per hour:

Ivan bombarded western Cuba with the full fury of a category 5 hurricane. It damaged hundreds of homes and swamped at least two towns. The storm was so vast that its clouds simultaneously covered Cuba, the Florida Keys, the entire Florida peninsula and parts of the Bahamas, Mexico, Belize and Honduras.

Florida expected the worst. But after passing Cuba Ivan kept traveling West into the Gulf of Mexico. And even as Cuba was being hit hams on Mexico's Yucatan Peninsula like Juan Berndes, XE3AAF, were
checking into the Hurricane Watch Net to report that Ivan was being felt:

--

"Roger, OK. I can only tell you that we have been having squalls
--
intermittent squalls all throughout the morning, and that's about it.
That's the information I can give you at the present time.
Over"

--

Now, a hurricane watch was in effect the entire Florida panhandle and as far west as Louisiana, including New Orleans. Ivan, still a category 4 killer storm was on his way to the U-S mainland. I'm Henry
Feinberg, K2SSQ. (ARNewsline(tm))

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W8GK repeater serving Charleston West Virginia.

(5 sec pause here)

**

RESCUE RADIO: HAM RADIO VS. HURRICANE IVAN - LANDFALL

I'm Bill Pasternak, WA6ITF, continuing our coverage of Hurricane Ivan.

Packing gale force winds, Hurricane Ivan slammed ashore near Gulf Shores, Alabama in the wee hours of Thursday, September 16th. Anticipating the storms arrival, Alabama, Florida, Louisiana and Mississippi had declared states of emergency a day earlier. A last minute shift spared New Orleans a direct hit but some 360,000 homes and businesses were without telephone service or power in Alabama, Louisiana and Mississippi. And throughout it all, ham radio operators did their part by passing health and welfare traffic, damage assessments and those very important storm position reports:

--

"Repeating the 4 a-m CDT position: 30.9 North, 87.7 West.
Movement
toward the North near 214 miles per hour. Maximum sustained winds near 115 mph. Minimum central pressure 947 millibars."
--

Notice something interesting about that audio? The station reading that report is not in the continental United States. In fact he's thousands of miles away in Australia. But thanks the latest technology developed by hams -- a service called The Internet Repeater Linking Project -- Amateur Radio operators anyplace in the world can pitch in to help when there is an emergency like hurricane Ivan.

But long before the storm made landfall residents of the Gulf States and the nations ham radio community were preparing for the its arrival. On Wednesday the 15th, some highways were converted into one-way evacuation routes. This, after authorities from the Florida panhandle to Louisiana ordered wholesale evacuations of low lying areas. Everyone from New Orleans east to Apalachicola, Florida was on alert because even the tiniest change in the storm track now could move the location of the storm's landfall by hundreds of miles. And after taking a day off to regroup, the Hurricane Watch Net on 14.325 MHz again sprang to life. Some of those checking in were directly involved in storm relief efforts:

--

"Kilo Delta 5 Golf Golf Lima north of the Coast. I'm
operating the
Operations Center at Camp Shelby, Mississippi. Over."

--

Even though the storm was still well out to sea, it did not take long for reports from hams in Ivan's target area to begin flowing in.

--

"Kilo Charlie 5 Romeo Fox Uniform. What is your traffic?
Over"

"Thank you very much. The name is Paul and I am in Ft. Walton
Beach,
Florida. Ill give you the coordinates. Latitude 30.44 North.
Longitude 86.62 West. And the Barometric Pressure is 29.79 and
falling. The winds are estimated at coming from the
East-South-East."

--

Now it would be a waiting game for residents along the gulf coast as
they waited and watched as hurricane Ivan roared toward them with.
When Ivan did make landfall it lashed southern Alabama with 135 mph
winds and threatened much of the Gulf Coast with surging flood waters.

--

"This is K5PSB with the Salvation Army Team Emergency Net looking
for
stations with traffic in the affected areas of the Caribbean or the
Gulf Coast. Ill take anybody that I can hear. K5PSB."

"W-A-0-Lima Sierra Bravo."

And the latest advisories from the National Hurricane Center show that
Ivan still has a lot of destructive force left. The latest storm
track as of noon, Thursday September 16th shows Ivan heading
North-North-East through parts of Georgia, Tennessee, Kentucky and
Ohio as it downgrades in intensity and begins to fall apart. But
falling apart may be a bit of a misnomer because even then a hurricane
can continue to be a destructive force.

But even as Ivan is weakening, yet another storm is gaining strength.
Hurricane Jeanne intensified as it made its way to the Dominican
Republic after hitting Puerto Rico on Wednesday. Jeanne is moving
west at about 9 miles per hour with maximum sustained winds of 80 mph
and will likely be the big ham radio story, next week.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF.

--

The hurricane, one of the strongest on record to hit the region, has
killed at least 65 people. With the hurricane season not yet over
these hams could be kept busy for some time to come. (ARNewsline)

(Note: Audio of Hurricane Ivan communications was recorded off-air
and from Internet relay feeds. Our sincere thanks to the may hams
world-wide who supplied them.)

**

RESCUE RADIO: SOCAL SHADOW DRILL

Out on the U.S. West coast, twenty-five city of California's
Huntington Beach Radio Amateur Civil Emergency Service volunteers
participated in a simulated city-wide Emergency 911 system crisis on

Saturday, August 28th. Called the "Shadow Drill," radio volunteers received 9-1-1 calls and dispatched fire department equipment and personnel for an eight hour shift.

The objective of the drill was to provide an alternative dispatch communications system to all Huntington Beach Fire Department resources, including hazardous materials, ambulance and fire response apparatus. This was the third year in a row that Huntington Beach RACES performed the Shadow Drill for the city. (KH6WZ)

**

THE BPL FIGHT: PHILLY MAY GO NON-BPL WIRELESS

Philadelphia says it's looking to have wide spread Internet access available over the next few years, but it likely will not be B-P-L. This, as the City of Brotherly Love looks to create a 135-square-mile wireless network instead. Amateur Radio Newsline's Mark Abramowicz, NT3V, has the rest of the story:

--

Philadelphia's Mayor John Street has a vision to turn this community of historic and diverse neighborhoods into a Digital City. And, he's not looking at Broadband Over Powerline Internet Access to do it.

Instead, Mayor Street, a big fan and user of technology - he carries his own Blackberry everywhere - sees the wireless world as the way to go. And, he's committed a task force to explore an estimated $10 million investment in the idea.

Mayor Street's chief information officer is Dianah Neff.

"Outdoor wireless has come on the scene and has presented an affordable entry point to create a dense, cellular mesh network that would act like an umbrella over the city," Neff explains. "And it's a transport, it's an outdoor transport that would allow wireless access that then goes to the Internet for all people in the city."

Neff says users of the system would have easy access. She notes one test site near City Hall is being getting great reviews.

"You can access it through a lap top, through a PC tablet through a hand-held device," Neff says. "You would log on, put in your code to the system. And in the case of Love Park - which is a hot spot now - it's free.

"All you have to do is go on and register. And then you get a connection out to the Internet."

Neff says the plan proposes to attach transmitters/receivers atop light pots.

"The best place to mount these in the outdoors is on the light posts because you need a power source," Neff says. "You could mount the

radio antennas actually on the light posts which reside in the public right-of-way which is owned by the government.

"And that's why this has to be a public-private partnership and there's limited space on there you can't put a dozen companies' wireless device.

"But if you had this infrastructure that anybody could either pay to connect in for profit or ride for free, based on criteria that will be established, you would be able to do it."

Neff says the system would be "hot" for outdoor use. But there is equipment available to bring the signal indoors.

"There are devices that can be placed in your window to bring outdoor wireless," Neff says. "If your proximity is close to a fixed-wireless outdoor point, you may be able to get it in your house.

"And, so we see that there's a great opportunity to be able to go either out onto your front porch and log on into a wireless environment outdoors, or through a device, if you want to bring it into your home, to all rooms in your home.

"That may be one of the fee-services that would allow us to sustain the system."

Neff says the task force is looking at a couple options in terms of fees.

"The mayor is committed to providing some level of free access whether that's in public outdoor areas or as a low cost to everyone," Neff says. "There has been a committee that's been formed - the Wireless Philadelphia Executive Committee - they're looking at fees, roles and responsibilities in the investment and the sustainability of the system."

Neff says the committee will deliver a report to Mayor Street by December. After that, bids will be sought and Neff says she'd like to see several neighborhoods up and running a few months later.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Philadelphia hopes have the whole network in operation sometime in 2006. (ARNewsline(tm))

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being

relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

ENFORCEMENT: LETS MAKE A DEAL - FCC STYLE

The FCC has accepted an offer from an Iowa ham to turn in his Amateur Radio license in order to avoid having to pay a $12,000 fine. It did so in a September 7th Memorandum, Opinion and Order that partially granted a June 6, 2003 Petition for Reconsideration filed by Scott E. Kamm, N0UGN, of Sioux City.

Back on May 7, 2003 the FCC issued a $12,000 Forfeiture Order to Kamm for what the agency said were willful violations of several sections of its Amateur Service Part 97 rules. The Commission said that the offenses involved intentional interference to communications on 146.31 MHz, the transmission of music on an amateur station, and failure to identify an amateur station by call sign.

The FCC says that in support of his Petition for Reconsideration that Kamm offered to immediately withdraw his pending application for renewal of his license. He also offered to refrain from applying for any other license for a period of five years.

The FCC says that it agrees to this offer. As such it concludes that cancellation of the $12,000 forfeiture was warranted. (FCC)

**

ENFORCEMENT: $10000 PAGING FINE AFFIRMED

The FCC has affirmed a $10,000 monetary forfeiture to Jeffrey Amedro of Morgantown, West Virginia. Amedro does business as Cell Page and the FCC says he has racked up a number of violations. Cathy Anno, KB0FDU, reports:

--

The FCC says that it issued the fine for what it calls willful and repeated violation of Section 301 of the Communications Act by Amedro's company Cell Page. This, by operating radio transmitting equipment on the frequency 157.740 MHz without FCC authorization to do so.

On September 5th, 2003 the District Director of the Commission's Columbia, Maryland Office issued a monetary forfeiture in the amount of $10,000 to Cell Page. Cell Page did not contest the violation. Rather in its October 16, 2003 response, the company requested a reduction or cancellation of the proposed forfeiture.

Presumably, intending to claim its inability to pay Cell Page stated that it had been in contact with a certified public accountant to complete its tax returns. Once completed, Cell Page states that it

would forward three years of tax returns to the Enforcement Bureau by approximately October 31, 2003.

The FCC says that as of its decision to affirm the fine, neither Amedro nor Cell Page has submitted the company tax returns. Without the appropriate financial documentation, the FCC says that it can not consider Cell Page's claim of inability to pay. So it is now denying
the request by Cell Page for reduction or cancellation of the fine.

For the Amateur Radio Newsline, I'm Cathy Anno, KB0FDU.

--

The fine against Cell Page was affirmed on September 7th. Amedro was given the usual 30 days to pay or to file an appeal. (FCC)

**

ENFORCEMENT: CLEANING UP INTERFERENCE

The FCC has written to Andrews Cleaners in Andrews, Texas. This to tell proprietor Andrew White that he regulatory agency has received complaints that equipment at the business may be causing harmful radio interference to a local ham radio operator.

In its letter, the FCC tells White that the agency has the responsibility to require that such problems be rectified within a reasonable time if the interference is caused by faulty consumer equipment. It also suggests that he might want to contact the ARRL for guidance about radio interference that involves Amateur Radio operators. (FCC)

**

HAM RADIO IN SPACE: SIGNALS BOUNCED OF THE GENESIS RE-ENTRY

A group of ham radio operators have successfully bounced signals off the ionized trail of the Genesis space probe. This, as it re-entered the Earth's atmosphere on September 8th.

According to Robert Brown, KR7O, several stations trying to be heard off the probes fiery trail were monitored at his QTH from 1552 to 1600 UTC. This is part of what Robert heard:

--

Backscatter audio

Robert says that all signals heard were on 144.200 MHz in the 2 Meter band. Among them were KC6ZWT and WA6KLK who were using voice. There were also others trying to make the path using CW. K7RO adds that KC6ZWT reported hearing Robert's signal over the same backscatter

ionized path. All of the stations involved in this test were located in California. (K7RO)

**

DX

In D-X, BB2RS reports that a group of Japanese amateurs are operating from Sri Lanka as 4S7DUG from September 18th to the 23rd. Activity is on 160 to 6 meters with an emphasis on the lower bands. They plan to have four stations active simultaneously. (GB2RS)

And F4DZY is active from Corsica stroke TK through the 22nd of September. Look for him on the High Frequency bands using SSB and QSL as directed on the air. (GB2RS)

**

THAT FINAL ITEM: HAM RADIO, HURRICANE FRANCES AND THE PRESIDENT OF THE UNITED STATES

And finally this week, the story of hurricane Frances, some ham radio operators who helped to keep a local commercial station on the air after the storm and two who met with President Bush on his recent tour. Joseph Lenartiene, KD4BTD has the rest of the story:

--

Pres Bush: "I want to thank the Emergency Operations Centers all across the state of Florida, the first responders, Police and Firefighters, the people working long hours here, I want to thank the Red Cross"

--

While President George Bush did not mention Amateur R radio Operators in his national Press Conference held on Wednesday, September the 8th, He did the next best thing while visiting Florida's Treasure Coast
that day when he shook hands with Bruce Reid, K9SHT and Lee Kaufmann KG4BYG at the St. Lucie County Emergency Operations Center in Ft. Pierce Florida.

--

Kaufmann: "Well we had two special visitors today, we had The President and the Governor both came in. The one nice thing is that he greeted everyone here: He didn't just walk by. He came in, said
hello and saw the ham station in the shelter here and even was aware of what we were doing."

--

Other than the President stopping by, thing were pretty normal at the EOC Ham Station according to Lee.

--

Lee: "I was running communications between the EOC and the shelters
and today was a little bit calm but yesterday was busy sending messages. I think we had somewhere in the number of a hundred messages back and fourth between the shelters."

--

Not the most glamorous work but as expressed by St. Lucie County EC Ernie Marques, KF4IHX, very Satisfying.

--

KF4IHX: "We had a busy last 6 days. We've handled over 350 pieces of
traffic during this emergency and we're very pleased because for a brief period of hours, ham radio was the only link between our shelters and we proved a point that Amateur Radio can get through when nobody else can."

--

While Frances stayed awhile to visit St. Lucie County, The Special Needs Shelter felt the wrath and when the need came to find a new QTH for the evacuees, (Sound of a Nextel) not Nextel but N9SRO answered the call.

--

N9SRO: "The Special Needs Shelter needed someplace to relocate because they had sustained some damage during the Hurricane. Nextel's
were a no go after the storm but I was able to facilitate communications via the ham radio to get that move started."

--

Hurricane Frances officially made Landfall in a town called Sewall"s Point in Martin County Florida. The next County south St. Lucie. While Amateurs down there did much the same from their EOC, A few did more. Louie Delonoy, K4LOU, Helped put Martin Counties Radio Station, back on the air.

--

K4LOU: "Martin County had been telling people all day Friday on their
Billboard to tune to WSTU for the latest news. Now there comes Monday Morning and they're off. I called Ben, N4BG and he tells me chances
are they took a major hit. I come up, he takes me around to the back,

and here's their tower on top of the dish with the two STL feeds
on
them. You know, sitting on the roof. So I go up there and inspect it
moved everything around and Boom, they're on the air."

--

And Port St. Lucie Broadcasters Vice President Greg Wyatt
couldn't be
happier.

--

Wyatt: "We now have the Louie, Ben, and Jerry show here at WPSL,
WJNX, and WSTU. Between the three of em, they managed to get two
radio stations on the air in 5 hours and now the third one today. I
tell you, its mind boggling."

--

Although it was far from over for Florida thanks to Hurricane Ivan,
Amateur radio on Florida's Treasure Coast has returned to what it
was
before the storm. The major lesson learned here was the need for
relief after the storm. And that's what Treasure Coast Hams are
ready
to do for those affected by Ivan.

For Amateur Radio Newsline, I'm Joe Lenartiene, KD4BTD, in Ft.
Pierce
Florida.

--

Joseph Lenartiene, KD4BTD, is with WQCS FM in Ft. Pearce, Florida.
(KD4BTD, ARNewsline(tm))

hmmm steve mentions geo, someone who uses the header that he is not
george responds and then states he is not george. bizarre.

LEGALLY operated CB's are protected by FCC statute under the FCC
rules, part 95, in much the same way Amateur operator operate under
Part 97 rules. What this means is that a CB that is operating as type
accepted equipment under part 95 is considered to be spectrally
acceptable to any and all receivers, intentional and non-intentional.
Part 15 devices are "low dog" devices. If they are interfered with by
legally operating equipment, operating under ANY FCC rules, then it is
up to the owner or the Part 15 device to resolve their interference
problems. Conversely, if a part 15 device CAUSES interference to any
other device, it is again up to the owner of the part 15 device to
resolve any interference issues.

Some caveats here... Illegally modified CB radios or CB's operating
with external amplification are NO LONGER considered to be operating
under the protection of FCC Rules part 95. They are considered to be
unlicensed, and as such, ANY interference they cause to ANY device is
considered to be the fault of the CB operator and they MAY be held
liable.

Well Don, in a Good Neighbor type of way, you would think that the
owner/operator of the transmitting equipment would do "the right
thing" and resolve the interference issue. I agree that the operator
should take reasonable effort to do what they can. Example, a
neighbor nearby complained that my Amateur gear (unamplified, no more
than 70 watts to the antenna) was interfering with their TV. I put a
low-pass filter on my antenna feedline and haven't heard a word from
them since. Now granted, I'm operating under Part 97, and they are
owners of Part 15 devices, but since they live two houses down, I
figure maybe someone else might be hearing my SSB signal on their TV.
Turns out later that they're using a satellite system and their
internal wiring is point to point with SPEAKER WIRE!

Trust me. If the low-pass filter didn't do the job, I'd have sent
them packing and looking for other solutions. I made an effort.
Possibly a token effort, but still an effort beyond what the law
required.

Then again, unlike you, I tend to operate legally, and therefore I
have very few interference complaints and if I DID have any other
complaints, would be 100% legal in telling the owner of the Part 15

device that they need to look at THEIR installation first, THEN come talk to me...

I've seen lo-pass and high-pass have -no effect- because of fundamentals
and cheap home electronics. In the end you still have to deal with a pissed

of neighbor.

Better re-read that part 15 notice that came with it.

The sad fact is that a lot of these devices are made, with practically no effort to immunity.
They lack even minimal shielding, have very poorly chosen 1st/2nd IF frequencies, with no image rejection, and rely on the most trivial encoding systems, all to save nickles.

http://www.arrl.org/tis/info/part15.html#Scope

"To help emphasize the secondary status of all devices operated under Part 15, the rules stipulate that the devices must not cause harmful interference to other radio services and must accept any interference caused by the legal operation of other radio services."

You've been counting the minutes till I returned from the Poco show.

Looks like you're trying to get George in trouble, or anyone else
who will listen to your brainless spittle, google/aol boi.

There was a device available 15-20 years ago that allowed you to receive 2m
band as well as CB band. FM only as i remember. But there are rx convertors
made by datong, try looking for datong on the web. GL

When you bought your CB, there is THAT one control knob called OFF/Volume!
Turn it counter-clockwise until you hear no sound or see no lights and you
hear the "click".

There, now that is done!
You WILL be alright!
How 'bout some cheese with that whine!!

You speak from experience, or you like sitting at home typing these lame
posts about "AAAUDDDIIIOO"?

If you have no CB, then Why in the hell do you jack off behind that screen
name that you created!!

You must frequent those truckstops and wait in the bathroom writing on the
walls waiting for your handjob from that big burly truck driver!!

3670. TV antenna ground plane?

Newsgroup: rec.radio.cb
Date: 2004-09-18 12:46:46 UTC
From: "Glenn S." <GlennS999@cox.net>
Message-ID: <moaok0d38hs0r8qca77rbq1cqgfcb6ja3u@4ax.com>
Source record: 186480

After reading the following paragraph, I'm wondering if my TV antenna is affecting my Antron 99 either positively or negatively...

11. If you mount two or more antennas close to each other, you will alter the transmission patterns of each one. The affect may be either positive or negative. We recommend that a minimum of 12" exist between your CB antenna and other types of antennas.

http://www.firestik.com/Tech_Docs/63Things.htm

Both are clamped directly to the same pipe/mast. The TV antenna is clamped 12" below the bottom of the Antron, and the highest point of the antenna is about 6" below the Antron.

Another thing that's got me wondering if it is affecting the radiation pattern is that fifteen years ago, I didn't have the TV antenna under the Antron, and the neighbors whined so much about hearing me in their telephones that I put all my CB stuff in the attic. Now, I've put the exact same equipment back up two weeks ago, with the addition of the TV antenna, and I haven't had one complaint. Could the TV antenna be affecting my radiation pattern?

> :-) cheers john

It sounds more like you have a HTX-10. The HTX-100 doesn't come stock
with LSB or AM, but it does have a CW mode. I do have a external mod
that adds CW to the HTX-10. I'm sure it's out on the net some where
as well.

> "Jimmie" <Gfender@carolina.rr.com> wrote in message

>
>>Any one use an HTX 100 for CB. They had the wong sideband for CB but this
>>could be modified. Just wondering if there are many out there who did it.

I have a HTX-100 and have used it on 10 Meters through a couple of
sun spot cycles, and it works great. However, I have not done and
modifications. IMHO it decreases the overall value. Not to mention
that, it is not type accepted to operate on the CB channels, but we
will let others argue that point.

If you are interested in the modifications that are available for the
HTX-100 go to "http://www.qsl.net/kf2tz". There is a link to a group
of mods. Included in that is a LSB modification. I do not recommend
any of them unless you are an experienced electronic technician
or engineer. Even then the mods are risky.

A little warning on the web site. The qsl.net server is very, very slow.
You will need to be patient as it connects and loads. Some of the pages
have pics that are also slow to load.

Hello Glenn S:

As Dave has said it may be acting like a ground plane, to some extent.
And changing the elevation pattern. Or even helping decouple some of the
energy coming down the coax.

Also maybe the neighbors have cable TV now. Which is a big help.

Jay in the Mojave

Steve;

If I'm in town. I travel a lot for work and normally I don't make firm plans to do anything during the week since I may have to travel on a moments notice and on the weekends I have things of my own to take care about. For example this past week I was in Macon Georgia Monday through Wednesday and up in Saginaw Michigan on Friday. If you have a specific place in mind let me know, but no promises I'll make it.

How am I trying to get george in trouble? I dont even know who george
is. I keep reminding you I am not george.My name is I am not george.
You are confused and have been drinking too much ass juice.

Why are you crying to Leland? He wont help you harass or intimidate
people you are on your own.

Earle is an anti war singer steveo you must be confused I thought you
were a brainless bush flag waver. Hey check this out..

Home to Houston

When I pulled out of Basra they all wished me luck
Just like they always did before
With a bulletproof screen on the hood of my truck
And a Bradley on my back door
And I wound her up and shifted her down
And I offered this prayer to my lord
I said "God get me back home to Houston alive
and I won't drive a truck anymore"

Early in the mornin' and I'm rollin' fast
Haulin' nine thousand gallons of high test gas
Sergeant on the radio hollerin' at me
Look out up ahead here come a R.P.G.
If I ever get home to Houston alive
Then I won't drive a truck anymore

I've driven the big rigs for all of my life
And my radio handle's "Train"
Down steep mountain roads on the darkest of nights
I had ice water in my veins
And I come over here ï¿½cause I just didn't care
Now I'm older and wiser by far
If I ever get home to Houston alive
Then I won't drive a truck anymore

Great God A'mighty what was wrong with me
I know the money's good but buddy can't you see
You can't take it with you and that ain't no lie
I don't wanna let ï¿½em get me I'm too young to die
If I ever get home to Houston alive
Then I won't drive a truck anymore

You pose an interesting question.

One antenna (your transmitting/receiving antenna) is vertically polarized; the tv antenna is horizontally polarized. Normally, a ground plane is formed by wires running away from a vertical antenna - or - a mesh of wire extending away from the antenna.

Since neither exist, I suspect you would have little coupling to the tv antenna. The horizontal elements are so short that I doubt any directly beneath the vertical would have an effect and the boom might have a small effect, but only in the directions that it is running beneath the vertical.

I'm not saying there is no effect; I am of the belief that any effect would be exceedingly small (with a possible exception of a small change in the radiation pattern in the direction (both ends) of the tv antenna.

The best solution is to convince your wife that you need an 8 element rotatable cross-polarized lightning deflector mounted on top of a 120 foot tower :))
(can we spell 'Yagi'?) LOL

(why do I see a number of the group planning to try and convince their wives that they need a similar 'lightning deflector'?)

73 from Rochester, NY
Jim

3703. Understanding Steveo and his visits to AKC'ers

Newsgroup: rec.radio.cb
Date: 2004-09-19 05:29:39 UTC
From: keyklonzrnutjobs@yahoo.com
Message-ID: <586e7bbf.0409182129.dd97726@posting.google.com>
Source record: 186613

You have to understand the motivation behind Steveo's visits. Keyclowns are desperate people...they do not have the mental faculties to tolerate being bugged about their keyclownism. It makes them upset because they have to hear dissent. Steveo is the poster child for this attitude. He simply cannot take it when somebody gives him crap about being a keyclown.

This atttude has no doubt been developed by a lifetime of crying and whining to get his way. It started in his childhood, when he whined and cried in supermarkets and malls to get candy or toys. When his parents indulged him in these situations it reinforced the idea in his young mind that if he yelled and cried to get his way that he should always get it.

As he became a young adult and found that life had to be met on life's terms, not his, he railed at the injustice of it all. Teen years immediately before this stage found him in a constant state of barely controlled rage and often acting out in his frustration. Typical of such incidents are punching people who cut him off in traffic, yelling obscenities out car windows, and showing no consideration for others.

Such is the mentality of a keyclown. RF spectrum, to a keyclown, is nothing more than a wide open space to play in. If this were a private yard or a public place belonging to all taxpayers, the evidence of keyclownism would be obvious. The place would be uncaringly trashed with garbage and the observed attitude would be "So what if it is a mess, you wanna MAKE me clean up after myself, sucker?"

The visits to peoples' homes are an expression of this frustrated, thwarted, angry personality. Steveo tries to make someone conform to his ideas of what should be in the NG by making threats and visits. To Steveo, the worst thing on earth would be if the AKC knows his address, and his logic is that him knowing AKC addresses should strike fear in their hearts. You see, when he visits with his 12 gauge digicam the AKC should shake. They do...with laughter.

The fact that Steveo shows himself to be a disturbed individual in these visits does not dawn on him. This is because he is not inhibited by the normal sense of right and wrong. His opinion, like that of all keyclowns, is that whatever he wants to do is OK, and if someone disagrees then he has the right to attack them, physically or otherwise. This affliction is commonly called a sociopathic disorder.

The very fact of posting this message will bring a barrage of name calling, threats, and other things that keyclowns believe are effective. They think they are effective because they are effective at

riling THEM up. This attitude is consistant with keyclownism's main root causes: the fact that keyclowns are only aware of what they want and have no concern for others, coupled with a total inability to tolerate even the most basic forms of disagreement.

The reactions to this post will prove the thesis as presented. Keyclowns are simple creatures, and always behave in a predictable manner.

Yaesu VX-7R handheld radio receives .05-999 Mhz and transmits
2m/440/6m/220 - best radio for travel I have ever owned. Even gets shortwave
broadcast (ok) and AM/FM radio and TV simulcast. But, CB band (11 meters) is
RECEIVE only, you cannot transmit.

Here are the specs and a pic - http://www.rigpix.com/yaesu/vx7r.htm

I don't know exactly what limp-wristed is, but you definately need
some hand strength to operate it. The brakes/clutches are operated
by squeezing levers and pushing something with the thumb.

I'm replacing it with a smaller unit because I messed up my back
big-time running it for about six hours continuously a few weeks ago.

Silly you...he said he would be civil. As far as being man to man, you must mean frustrated, childlike spoiled baby to man. Cuz you definitely act frustrated, childlike, and spoiled. Sorry about your youth and upbringing, but that is your problem, dude.

You go anywhere you want with your 12 gauge digicam...maybe you can take some more pics...wacky boy. I wouldn't step on his premises if I were you, though. There are a few tricks to be played on the cocky and the foolish.

Hey Peepeeholic:
Yes I am in Toledo. I have plenty of down home hospitality for you or
ANY of the other queens in here who wish to stir up some mess.
You wanna come by and visit? I will be delighted to send you back to
the MISTAKE ON THE LAKE with a thought in your mind that it was a real
dumb idea.
Imagine, Peepeeholic...Imagine...You come to my place and star some
junk...I put you face down and hurtin extreme, take pics of you laying
there with a bumped up noggin, and post 'em to the NG. I relish you
coming by. I am good in the callbook, just as I told your wife, the

trainedpuppet.
Have not had this much fun since I used to go cuttin' coax and
building jamming oscillators back when I was 16 yrs old.

You are a boy...grow up.

You are also a puppet of the AntiKeyclowns.

3723. FREE! "THE CB EPROM DATA BOOK" OF FREQ. MODS

Newsgroup: rec.radio.cb
Date: 2004-09-19 20:22:14 UTC
From: Lou Franklin <lou@cbcintl.com>
Message-ID: <jjqrk0htl9984gvbobsrftrnqjsa53fr65@4ax.com>
Source record: 186633

FREE!!

For advanced techs and serious radio hobbyists, we're now offering a FREE copy of our previously published "CB EPROM DATA BOOK" by Martin Pickering. (EPROM = Erasable Programmable Read Only Memory.) We sold it for many years but it's now out of print. This little manual of 60 illustrated pages is an absolute GEM of CB technical knowledge you'll just never find anywhere else. And it's yours for FREE from our Web site.

This book reveals the secrets of advanced channel programming, and picks up where our "CB PLL DATA BOOK" (www.cbcintl.com/pllbook.htm) leaves off. You'll get a thorough background in how these amazing programmable chips can be used to modify many popular CB PLL circuits for expanded frequency coverage. Covers the basic programming techniques, and even includes real PC board artwork for making EPROM circuits. Sample artwork includes EPROM boards for the popular MB8719, PLL02A, ï¿½PD2824, and ï¿½PD858 PLL circuits.

Best of all, the price is right! Download your FREE copy of "THE CB EPROM DATA BOOK" (948 KB Adobe PDF) at:

www.cbcintl.com/docs/EpromBook.htm

Don't forget to check out all our other CB specialty books, plans, kits, & high-performance accessories at:

www.cbcintl.com

SAVE MONEY! We regularly run EBAY auctions in which you can save up to HALF the cost of our most popular CB books and accessories. To see what's currently on sale, double-click the line below:

3727. CB REPAIR & MODIFICATION BOOKS AT 40% OFF

Newsgroup: rec.radio.cb
Date: 2004-09-19 20:22:32 UTC
From: Lou Franklin <lou@cbcintl.com>
Message-ID: <7kqrk0t9k9js664l35rqmku0vu052p5uht@4ax.com>
Source record: 186637

To learn the technical TRUTH about CB Radio without all the hype from people who are just plain ignorant, check out the following books from CBC International. They're selling right now at a big discounts on our EBAY & AMAZON stores too.

Check it out!

To see exactly what these books look like, plus all the specific, chapter-by-chapter details, see our Web at:

www.cbcintl.com

Some of the books included are:

BOOK #1: THE "SCREWDRIVER EXPERT'S" GUIDE To Peaking Out & Repairing CB Radios. List $25. The most popular "big dummy's" guide ever published on do-it-yourself CB repairs & modifications. Covers peaking of receivers, transmitters, modulation, mike problems, antenna & SWR problems, detailed frequency modifications for both crystal & PLL radios. Loaded with charts, illustrations, and specific instructions for most brands including the new export models. This latest edition also covers slider and broadbanding tricks, FM conversions, and much more!

BOOK #2: THE CB PLL DATA BOOK. List $20. The only complete reference source on CB PLL synthesizer circuits ever published! Detailed PLL theory explained in layman's terms. How they work, and how to modify them for many more channels. Includes specific PLL block mixing diagrams, truth charts, & IC pin function diagrams for nearly every PLL chip ever used. Covers all the most popular U.S. & export chassis, with specific listings of all models using the chip.

BOOK #3: UNDERSTANDING & REPAIRING CB RADIOS. List $42. Giant 370-page technical book for the professional repairman. Picks up where the "SCREWDRIVER EXPERT'S" GUIDE leaves off. Includes circuit descriptions & troubleshooting guide for 23- & 40-Ch., crystal & PLL, solid-state & tube, AM, FM, SSB, CW, American & export models. Covers test equipment (& where to find it), transistor basics, synthesizers, receivers, transmitters, power supplies, T/R switching, antennas, interference, parts & accessory sources. Over 350 illustrations including schematics, charts, and photos. Huge subject index also lets you look up repairs by symptoms. This is "must" reading for any serious CB technician!

For details on our Galaxy-Ranger Service Manual (2nd Ed.) go to:

www.cbcintl.com/galaxy.htm

SAVE MONEY! We regularly run EBAY auctions in which you can save up to
HALF the cost of our most popular CB books and accessories. To see
what's currently on sale, double-click the line below:

http://stores.ebay.com/id=2993436&ssPageName=L2

****
Who are we? Since 1976, we've been THE source for CB Radio
technical information & high-performance accessories. Books,
plans, kits, do-it-yourself repairs and modifications,
10-Meter Ham conversions, amplifiers, FM converters, bleedover
filters, etc. Secrets of how to increase power, range, and privacy!

FORMAL DISCIPLINARY HEARING-KATHLEEN R. LEE
Chairman Woods noted that Kathleen Lee was issued CPA certificate 36,525 on July 15, 1998. The hearing was to consider disciplinary action against Ms. Lee's CPA certificate pursuant to Ohio Revised Code section 4701.16(A)(5), conviction of a felony under the laws of any state or of the United States. Ms. Lee was convicted in the United States District Court, Northern District of Ohio of five counts of Aiding & Assisting in Filing False Tax Returns, a violation of 26 USC 7206(2), on June 12, 2000. Ms. Lee did not appear at the hearing. The Board agreed to deliberate the disciplinary action in a later executive session.
Action taken.
Kathleen R. Lee, CPA 4701.16(A)(5)-Convicted of aiding & assisting in filing of false tax returns. CPA certificate revoked.

Hello CSFD:

Not a bad price at 280.oo which is where its at right now.

The cost of the Moonraker 4 would probably be in the neighborhood of 500 to 600 dollars today to manufacture, even with the stock cheap shit hubs that break way too easily. Even more with the good CNC of modified cast aluminum Hubs.

But the Moonraker 4 was always a great performing beam.

Wow that Moonraker 4 sold for 370 dollars.

Wonder if there is a market to sell new CNC Machined Hubs with stronger Boom????? That the elements would just fit into, and it would be like a after market bolt on upgrade?

Maybe even a kit to replace the Gamma Matches, and replace them with a Hairpin and Balun Matching System, hum..........

Could call it the Moonraker Four, bolt on upgrade Mod (BOUD)

And have your picture on the front of Popular Communications, with some hot babe draped all over ya, With the BOUM Moonraker 4 in the background. YEAH! Buy 6 copies for my Mother!

Hey, Psychiatrist to keyclowns. thanks for your post on keyclownism now I understand what motivates these guys and why they act the way they do. It is always fun to watch them kind of like animals in the zoo or hamsters in a cage. I have a pet keyclown his name is Twisty and he wont obey commands, wont make sense, stirs up the other keyclowns, etc. Is there some special book I Should read to understand Twisty?

Thanks again.

>
> Which omnidirectional base antenna will put out the least TV
> and telephone interference in the neighborhood?

It doesn't depend on the antenna almost at all. The main cause of interference is from three sources. One a dirty transmitter, the second is from receiver front end over load, and the third is from RF getting in to the electronics directly.

The first one you can do something about by using a clean transmitter. In other words one that hasn't been messed around with such as peaking etc. Peaking a CB radio requires messing around with the tuned output circuits which are responsible for presenting the proper load to the output transistor. These circuits are also responsible for filtering out the harmonic signals that cause interference to TV signals. The people who peak radios rarely if ever check the radio output for spectral purity and the now peaked radio may have a much dirtier output that it had before it was touched.

Receiver front end over load you can do little to prevent except by keeping your antenna as far away from your neighbor's TV/radio antenna as you can get.

As far as RF getting in to the electronics directly you can suggest they try using some RFI suppression chokes they can buy at the local Radio Shack. Other than that the fault lies with the manufacture of the malfunctioning electronic device.

The use of a amplifier is not recommended since one it isn't legal to use on the CB band, and second it makes all of the above problems much worse.

As long as you operate using legal and unmodified equipment you will be in the clear even if one or more of your neighbors complains to the FCC. The was a case here in the Detroit area 3 to 4 years ago where a local CBer was coming in over his neighbor's TV's, radios and cordless phones. The FCC investigated his station and found everything in order, no illegal or modified equipment. The FCC told the city there was nothing they could do since his station meet all FCC specifications and suggested the people having problems either complain to the manufacture of the affected device, or buy some RFI suppression devices and try them out.

You are welcome. See, people? The corectness of the psychological profile of a keyclown has been borne out again. As was indicated in the initial analysis, a stream of invective and threats has been spewed out. The reaction is intense because of the frustration felt by keyclowns when they are correctly profiled.

As for any particular book on keyclown behavior or activities...hmmm...maybe "One Flew Over The Cuckoo's Nest" by Ken Kesey. While this book is not about keyclowns, the parts of the book that describe the activities of the inmates in the asylum would be a good parallel to the actions of keyclowns in this newsgroup.

Message-ID: <CCu3d.5365$gG4.5109@newsread1.news.pas.earthlink.net>
Source record: 186515

The mast is not a good resonator at 27 MHz. The tuning box on this antenna merely allows the radio to see a bad antenna as a resonant antenna. It would perform poorly. You want a separate CB antenna. The proper length for a CB antenna is 108". That's a 102" whip plus 6" for the spring. Anything shorter is tuned by a coil somewhere in the antenna. While this is a compromise, antennas longer than 4 ft. should give good performance. If you must have something shorter, look at the Wilson Little Wil. It's about 3 ft. long. If you want something cheap but decent and even shorter, the Cobra AT35 can be found on eBay for less than $10. It is 26" tall.

From what I have read, they will be both CADS and CB frequencies, a shared
band.
I suspect that Ofcom know that CBers will be hard to actually remove.
Changing laws is one thing, enforcing new laws is another matter.

> Still facts have never got in the way of a good BBC report.

From what I have found out about the reporter, I suspect it may be an on-air
"heated debate" that the beeb want. He may also have contacted religious
groups, asking for those who are against CBers staying on the band.

Regards,

Peter.

>the electronics directly.

That's not entirely true. The antenna DOES have a part to play in the whole mess. Some of the "stick"-type antennas, such as the A-99, have poor decoupling and this allows for significant coaxial shield radiation. Some of these antennas also concentrate a good portion of their near field radiation in places where it would exacerbate front end overload or couple R.F. into house wiring.

An otherwise clean transmitter coupled to an antenna with the above characteristics can cross the line between no RFI and significant RFI. In some cases, this can be mitigated somewhat by moving the antenna (usually raising it) to another area, where it's radiation will not couple as much R.F. into neighboring premises. A better solution would be to run an antenna with ground plane radials, such as a Sigma 5/8 wave or similar.

Good luck to you Twisty! I know what it's like to get 25 inches of rain in a weekend! It comes down in two days and takes two weeks to run off.
Kevin, WB5RUE

_
Hello Kevin! Crazy weather....thanks for the good wishes,,,we fared well....took a road trip and watched the flooding in the Appalachians from the safety of the camper on high ground.
Only two more months of hurricane season,,,,Frances was the one from which we had to dry out.

Hey Twist;
You ready for number three, or are you getting out of town? If it was me
I would be looking for someplace else to live.

Hello Leland! We got lucky,,,very lucky, indeed. I did manage to take
note of the sky while on the road above the Mason Dixon line and it was
nothing but gray and overcast. From what I remember, the sun reappears
sometime in the spring after it disappears completely for the winter in
the fall. I'll take my chances here in the sunshine state..I'm a sun
junkie and need it almost everyday. I can't imagine going months without
seeing 'ol Sol.

Going strictly on memory, didn't HR 2346 precede this?

3769. Re: CB antennas and neighbors

Newsgroup: rec.radio.cb
Date: 2004-09-20 14:32:40 UTC
From: twistedhed@webtv.net
Message-ID: <16410-414EEA08-241@storefull-3256.bay.webtv.net>
Source record: 186531

An otherwise clean transmitter coupled to an antenna with the above characteristics can cross the line between no RFI and significant RFI. In some cases, this can be mitigated somewhat by moving the antenna (usually raising it) to another area, where it's radiation will not couple as much R.F. into neighboring premises. A better solution would be to run an antenna with ground plane radials, such as a Sigma 5/8 wave or similar.
Dave
"Sandbagger"
http://home.ptd.net/~n3cvj
_
And the running of certain amplifiers will NOT compound or add additional RFI in such cases. A perfect linear for cbers is a palomar, as it is not class C, which certain long-time hammie posters in rec.radio.cb consider to be some kind of devil-spawned conspiratorial gadget to reek havoc and cause misery in their radio lives.

3770. Some stuff up for sale or trade:

Congratulations and way to go! Last time I worked all fifty was a few years ago...11 meter ssb with a radio set at 3 watts, barefoot. Did the same on 11 meter AM, also. Damn Rhode Island was the most difficult for me to get. Mod Squad made Hawaii a breeze. Few more weeks I should have my ears back up.

FCC rule 2.815(b): After APR 27, 1978, no person shall manufacture, sell
or lease, offer for sale or lease (including advertising for sale or
lease), or import, ship, or distribute for the purpose of selling or
leasing or offering for sale or lease, any external radio frequency
amplifier or amplifier kit capable of operation on any frequency or
frequencies between 24 and 35 MHz.

_
FCC rules apply only to the US. The internet is international and he is
quite within his rights to offer such an item for sale. Export to
another country is quite legal. Get educated.

> Which omnidirectional base antenna will put out the least TV
> and telephone interference in the neighborhood?

A resonant one, properly decoupled from the feedline.

Someone with an antenna analyzer can check this for you, you're not just looking for low SWR, you're looking for little or no reactive component to the impedance in that band.

As an extreme bad example, I saw a radio shack salesman explain to a customer how he could use their discone antenna (the one without the top element!) for CB.
That antenna is dramatically too small to be resonant on 11m, it would have just been an efficient radiator for any VHF-UHF band harmonics and noise that the rig might produce.

Kerry voted for that, before he voted against it.
I remember that.....it was before Bush was against a 911 commission
investigating, then for it. I also think it was before Bush claimed he
was for states making their own laws concerning the queer marriages,
then positioned himself against it by making it a federal issue. <g>

_
>Fags don't deserve to be married.

Bush apparently struggled with this issue before flip-flopping. FWIW, I
agree that same-sex should not be married. Call it a union, call it a
joint companionship, call it what you may,,,but to call it "marriage"
implies it is blessed by God.
BTW, my grass was knee high in a little over a week from all the
rain...unreal.

Twisty it is rare that anyone calls you on your bullshit, that must be
why you keep making outrageous shit up. Below is a recent FCC citation
for selling and offering for sale cb type amps on the internet.

March 23, 2004
Mr. Donal W. Hewitt
P. O. Box 344
Tomball, TX 77377
SUBJECT: WARNING NOTICE--POWER AMPLIFIER
MARKETING VIOLATIONS
Case # EB-2000-222
Dear Mr. Hewitt:
At the Dayton Hamvention in 1999, an official Notice of Violation was
issued to you as a result of violation of Section 2.815 of the
Commission's rules regarding manufacturing and marketing external
radio frequency power amplifiers that operate below 144 MHz. The
citation was based upon the offering for sale of your model WM-600 and
WM-300 amplifiers and kits.
In your response to the citation on May 24, 1999, you stated "I have
ceased from selling and offering for sale the Model WM-300 and WM-600
linear amplifiers and any other of this type amplifiers." We note that
on your Web site <www.worth-more.com>, you are again advertising these
amplifiers. Although you state on the Web site that these units are
for sale "pending certification," we note numerous reports from

purchasers of these units on www.eHam.net.
We also note that on January 17, 2004, you presented and offered for sale non-certified amplifiers at the Houston Amateur Radio Supply parking lot as well as at the February 21, 2004, Smithville, Texas Hamfest.
This letter constitutes a Warning that continued sale of non-certified equipment will subject you to fine or imprisonment, as well as an in rem seizure of non-certified equipment, in cooperation with the United States Attorney for your jurisdiction. Monetary forfeitures normally range from $7,500 to $10,000. Such continued sale will also result in the designation of your Amateur Radio station license for a revocation proceeding, and your Operator license for a suspension proceeding.
This is the last written warning you will receive about this matter.
CCL: Southeastern Regional Director, FCC

It figures you would show nervous laughter after being outed as a felon.

Hey! After doing a little more research about superskyhooks and N8WWM's
antenna scam and felony bust, and court ordered shrink..I found out
that he's also living with a felon who has lost her CPA license due
to tax fraud. (details below) Man, this N8WWM guy has real issues!

KC8QJP Lee Kathleen <---- her address is the same as N8WWM on QRZ.com

http://acc.ohio.gov/dhearing.html
http://acc.ohio.gov/bdmn0401.html
FORMAL DISCIPLINARY HEARING-KATHLEEN R. LEE
Chairman Woods noted that Kathleen Lee was issued CPA certificate 36,525
on July 15, 1998. The hearing was to consider disciplinary action
against Ms. Lee's CPA certificate pursuant to Ohio Revised Code section
4701.16(A)(5), conviction of a felony under the laws of any state or of
the United States. Ms. Lee was convicted in the United States District
Court, Northern District of Ohio of five counts of Aiding & Assisting in
Filing False Tax Returns, a violation of 26 USC 7206(2), on June 12,
2000. Ms. Lee did not appear at the hearing. The Board agreed to
deliberate the disciplinary action in a later executive session.
Action taken.
Kathleen R. Lee, CPA 4701.16(A)(5)-Convicted of aiding & assisting in
filing of false tax returns. CPA certificate revoked.

Not as great a show as watching you jump in person, fugly!

http://img86.exs.cx/my.php?loc=img86&image=dogieupclosefugly3.jpg

Well .it's not
too far from his house, never knew that before heh never
bothered to look up
his house. It is off Starr ave. the drive is in an alley to the
south of
Starr. Main ST. which is also the Cherry St Bridge, going south
from front
st. you go to Starr ave. and make a left, going east. cross the
railroad
tracks and make a right on the first street, and then you'll see
an alley on
your left, turn left and the shop should be the last drive on
the left hand
side.

That's the one! Crisco Kathy Lee slathers herself up before the
bacon starts sizzling. The neighbors don't complain about the RF
as much as the putrid smell coming from 504 EUCLID AVE.

Glad yer doing ok Twist..... I am flying to Montgomery Al tomorrow
am. plane leaves Tampa at 8:35 am. Not sure how long I'll be on that
operation but wanted to wish you well.

Not sure when I'll get back online again so everyone take care and
behave yourselves heheh (like thats going to happen :P)

My collection of SBE Radios 5 total.

1 - Super Console 2 with Scanner.

3 - Console 2 Radios
1- basic stock, org. box Mike Manual.
1- parts radio - all intact just does not work -
40 channel dial - xtal mod.
1 - Max out mod - paired up with Siltronix Model 90 -
broad bandwidth mod (lots of inside tricks) - Variable AM wattage out.
1 - Sidebander 2

Prefer Pickup -
I'm in Toms River NJ

Will talk over phone about details.

That would be true of course for his own situation, the classic RF in the
shack problem, but he specifcaly asked about interference to the local
neighborhood if you re-read his post. In that case I doubt the antenna type
will have any significant impact.

Twist the amp doesn't have to be class "C" to cause problems. Even a class "B" linear amp is not completely clean. In particular solid state amps are a problem because many are push-pull designs with no filtering on the output. A push-pull design has low levels of even harmonic output since the even order signals cancel out in the output transformer. And that is only for "well matched" power transistors. The problem with the push-pull design is the odd order harmonics are not attenuated at all! If you care to look at Ham rigs that use wide band solid state push-pull amplifier output for HF operation you will see band pass filters on the output. In fact these filters are switched in and out depending on the band in use. That's how the manufactures keep the output clean enough to meet FCC specifications.

Tube amplifiers are another story. These amplifiers can be relativity clean IF the output is designed correctly. The critical section is the output matching circuit. This circuit performs two important functions; load matching and harmonic filtering. Some of the posters on this board in the past don't seem to grasp these two ideas well. They seem to think that if the amp loads up OK then all is well - not true. If you go through the math you will discover that there is no unique solution for the value of the matching section component values. So how do the designers pick the values they do? They pick an operation "Q" for the matching section, that forces a particular value for the components. The significance of the "Q" value is it is a measure of how frequency selective the matching section becomes. The higher the "Q" the sharper the response becomes, thus the less harmonic energy is coupled to the output. Pick a "Q" too low and you have significant harmonic output from the amplifier. Pick a value too high makes the

amplifier a pain to use, in other words the amplifier has to be retuned for small shifts in operating frequency. From either experience, or through detailed and complex calculations, acceptable values for "Q" have been determined that would yield a tube amplifier matching circuit that is likely to have acceptably low levels of harmonic output content.

If somebody says their amp is "clean" well the only sure way to know is to test it with a spectrum analyzer. If you look at reviews for Ham rigs, and power amplifiers in particular, you will see spectrum analyzer screen shots so the buyers can see for themselves just how clean the output happens to be. And I haven't seen a spectrum analyzer screen shot for a 11m solid state amplifier yet. If you know of any it would be interesting to see them.

Rf on the feedline will be radiated through the whole path, and probably much lower and closer to the neighbor. RF on the feedline is never a good thing.

I can see why that issue would bother you, especially when you are so
worked up about it you were going to move to Vermont a while back.
Must be rough to be a keyclown.

While I've never used a spectrum analyzer on it, my tube type Collins
30L-1 amp seems to be very clean. It's the only amp I've had that
doesn't interfere with broadcast TV on channel five. So I agree with
you on the tube amp summary.

3826. AKC SHOWS APPRECIATION FOR Mopeadope

We wish to extend our sincerest thanks to mopeadope for continuing to perform as trained by us, his AKC Masters.

Having a low level of frustration like he does is hell on him until he responds to our commands. Good boy, mopeadope...here's yer biscuit. Sit up now, mopeadope...yap some more now...ahhh SUCH a good mopeadope.

Yessiree, that mopeadope sure takes to training. Goooooood boy, mopeadope, goooooood boy!

<heheheheh>

Training keyclowns to yap for your personal amusement, and for that matter to show their lack of normailty is easy and fun, thanks to the patented AKC system of keyclown training. Get your free guide to better keyclown training today!

Well trained keyclowns always respond like that...their training
automatically kicks in because of their sociopathic
personalities....always good to see a keyclown doing as told.

>neighborhood if you re-read his post. In that case I doubt the antenna type
>will have any significant impact.

If you live in a fairly densely populated area (<1/4 acre lots) the
near field will affect the neighbors as much as your own shack. I've
known people who have switched from an A-99 to a 5/8th wave ground

plane and have solved RFI problems. Nothing else changed, just the antenna.

Antennas do not "create" harmonics or other spurious signals. But some may be more "friendly" to radiating a second or third harmonic. Their near field radiation pattern and coaxial decoupling contribute to the near field strength of a signal. Due to the characteristics of some of the most infamous antennas, they may radiate the same amount of R.F. into nearby structures while running 4 watts, as another type of antenna may do with 100 watts or more.

This just illustrates that there are many facets of a radio station that need to be looked at when troubleshooting RFI. Everyone is aware of "dirty" transmitters, and most people are aware that consumer electronics are not particularly well designed with RF immunity in mind. But once you've proven that the transmitter is "clean", and you still have an RFI problem, you have to consider other options. Your mission is to minimize the amount of RF which gets into neighboring homes. If raising or moving the antenna to a place where it couples less RF into a home may just do the trick. Changing the antenna to a better design may accomplish the same thing. Good RF grounding may also minimize RFI. There is no "one size fits all" solution.

Bingo.

First, don't make noise. (clean rig)
Second, don't radiate noise. (resonant antenna)
Third, use an antenna pattern and feedline decoupling, so that the radiated
energy is up and away from the vulnerable system.

Distance, because of the inverse square law, is your friend. Double the
distance between the radiator and the target, and the signal drops to 1/4 of
what it was.

Another less often appreciated point, fixing any one thing may make an
improvement, but not solve the problem. Then the perception is that the fix
"didn't help" or "was worthless".
Old engineering maxim, if you can't measure it, you can't improve it,
certainly applies.

Leland wrote:
(Twist the amp doesn't have to be class "C" to cause problems. Even a class "B" linear amp is not completely clean. In particular solid state amps are a problem because many are push-pull designs with no filtering on the output.)

_
I take your word for it.
I mentioned the class only because of the myriad of posts condemning the class C amps.
What is push-pull design?

_

(A push-pull design has low levels of even harmonic output since the even order signals cancel out in the output transformer. And that is only for "well matched" power transistors.)

_
I guess that sort of answers my previous question.....but is something that is not well matched better than a push-pull design, or am I thoroughly lost here?

_
(The problem with the push-pull design is the odd order harmonics are not attenuated at all! If you care to look at Ham rigs that use wide band solid state push-pull amplifier output for HF operation you will see band pass filters on the output.)

_
Ahhhh,,,,that explains it.

_

(In fact these filters are switched in and out depending on the band in use. That's how the manufactures keep the output clean enough to meet FCC specifications.
Tube amplifiers are another story. These amplifiers can be relativity clean IF the output is designed correctly. The critical section is the output matching circuit. This circuit performs two important functions; load matching and harmonic filtering. Some of the posters on this board in the past don't seem to grasp these two ideas well. They seem to think that if the amp loads up OK then all is well - not true. If you go through the math you will discover that there is no unique solution for the value of the matching section component values. So how do the designers pick the values they do? They pick an operation "Q" for the matching section, that forces a particular value for the components. The

significance of the "Q" value is it is a measure of how frequency selective the matching section becomes. The higher the "Q" the sharper the response becomes, thus the less harmonic energy is coupled to the output. Pick a "Q" too low and you have significant harmonic output from the amplifier. Pick a value too high makes the amplifier a pain to use, in other words the amplifier has to be retuned for small shifts in operating frequency. From either experience, or through detailed and complex calculations, acceptable values for "Q" have been determined that would yield a tube amplifier matching circuit that is likely to have acceptably low levels of harmonic output content.)

–
Hell, someone should have solicited your opinion long ago on this matter,,,so here goes.....what type low power tube amp (say 100 to 250 watts), if any, would you recommend for 10 meter?

–

(If somebody says their amp is "clean" well the only sure way to know is to test it with a spectrum analyzer.)

–
Yea,,,,guess so. When I first used an amp, I asked my neighbors if they heard so much as an errant erratic noise anywhere, to let me know. Years ago I had a neighbor tell me she could hear me on a cordless phone or pc speakers (can't remember which) and she declined any action on by behalf to rectify the situation. I think she enjoyed listening. Nevertheless, I made some changes because I thought that if she could hear me, them others could, too. A tower and new antenna changed everything.

-

(If you look at reviews for Ham rigs, and power amplifiers in particular, you will see spectrum analyzer screen shots so the buyers can see for themselves just how clean the output happens to be. And I haven't seen a spectrum analyzer screen shot for a 11m solid state amplifier yet. If you know of any it would be interesting to see them.)

-

I don't. There is no question some of those high drive competition amps are dirty as hell. While I would never use one for dx, I admit a fondness for a shoot-out.

Read it again. He went back on word via his SIGNED affidavit to not sell the items in question. Again, there are exceptions to this rule. All one needs is to be a valid exporter. Mr. Hewitt, apparently was not. Case closed. It's why so many places exist that sell such items and the FCC does nothing.,,because an exporter may sell these items legally.

-
March 23, 2004
Mr. Donal W. Hewitt
P. O. Box 344
Tomball, TX 77377
SUBJECT: WARNING NOTICE--POWER AMPLIFIER
MARKETING VIOLATIONS
Case # EB-2000-222
Dear Mr. Hewitt:
At the Dayton Hamvention in 1999, an official Notice of Violation was issued to you as a result of violation of Section 2.815 of the Commission's rules regarding manufacturing and marketing external radio frequency power amplifiers that operate below 144 MHz. The citation was based upon the offering for sale of your model WM-600 and WM-300 amplifiers and kits.
In your response to the citation on May 24, 1999, you stated "I have ceased from selling and offering for sale the Model WM-300 and WM-600 linear amplifiers and any other of this type amplifiers." We note that on your Web site <www.worth-more.com>, you are again advertising these amplifiers. Although you state on the Web site that these units are for sale "pending certification," we note numerous reports from purchasers of these units on www.eHam.net. We also note that on January 17, 2004, you presented and offered for sale non-certified amplifiers at the Houston Amateur Radio Supply parking lot as well as at the February 21, 2004, Smithville, Texas Hamfest.
This letter constitutes a Warning that continued sale of non-certified

equipment will subject you to fine or imprisonment, as well as an in rem seizure of non-certified equipment, in cooperation with the United States Attorney for your jurisdiction. Monetary forfeitures normally range from $7,500 to $10,000. Such continued sale will also result in the designation of your Amateur Radio station license for a revocation proceeding, and your Operator license for a suspension proceeding. This is the last written warning you will receive about this matter. CCL: Southeastern Regional Director, FCC

What I cant get over is Steveo is going through all the phases you
said he would like a time table lol

gig : a person of odd or grotesque appearance, and that most certainly
applies to you, fugly.

Glad yer doing ok Twist..... I am flying to Montgomery Al tomorrow am. plane leaves Tampa at 8:35 am. Not sure how long I'll be on that operation but wanted to wish you well.
Not sure when I'll get back online again so everyone take care and behave yourselves heheh (like thats going to happen :P)
73 de Keith

_
Well Keith, I really wish we could have hooked up,,,,,I had every intention on calling you but as you know first-hand, the storms kind of took precedence over everything. I'm still reeling from Frances and all her water. Some stuff still hasn't dried out. Thanks for all your contributions to the state and its people,,,,,we would have been much worse without all you volunteers. Special mention to the electric company employees from other states....we would never have had electric restored that fast without their assistance.

when you tell a whopper you really tell a whopper lol. OK Twist please post the exceptions. That would be the part of the FCC rules that say CB amps are OK for export and all you need to be is a valid exporter. Since you know they are fact you should bre able to post them. Oh here it comes I can tell already you are twisting and spinning and backpedaling wait for it here comes your most creative excuse yet ROTFLMAO

I "witnessed" a 50 foot tower and a PDL II being yanked down by an
irate guy with a piece of heavy rope and a Ford F-250 4x4 once.

It sure shut the stupid bastard up in a hurry! <g>

Actually, we already know. We knew even before you threatened. You are
a keyclown. Keyclowns are predictable.

Anything you do will not silence the AKC, and you know it will not.
Therefore, anything you do is fruitless. You are an impotent little
keyclown with a big mouth and a little mind. This has been proven.
